Good to Have:

-  Familiarity with JMeter, Jest, and CI/CD pipeline testing
-  Experience using Jira and Confluence
-  20 Full-Time Employee (FTE) position available

 If you're a test automation enthusiast who loves clean code and robust testing frameworks, we want to hear from you!

 DM me or email your resume to Diwanshi.Thakur@roaphexglobal.com

=====

I'm **#hiring** for **#SDET** (Software Development Engineering in Test).

Location :

Chennai, Tamil Nadu, India

About us

Money Forward aims to move peoples lives forward by offering various SaaS applications for Back-office

operations and eliminating non-essential work from complex daily tasks, and radically changing the quality of time spent on work.

In the HR domain, we are providing the following six products;

- Money Forward Cloud Payroll
- Money Forward Cloud HRIS (Human Resource Information System)
- Money Forward Cloud Attendance
- Money Forward Cloud Tax Adjustment
- Money Forward Cloud Social Insurance
- Money Forward Cloud My Number

We are looking for people who can contribute to improving the quality and productivity of our products as SDETs (Software Development Engineers in Test).

Overview

To solve the above issues, our SDET division has the following goals to improve quality and test lead time in all products in the HR solution department.

Introduce API automation testing and support product teams so that they can implement API automation testing in the development phase.

Implement test pyramid to reduce end-to-end test cases and increase API automation testing.

Implement quality gates to achieve quality assurance for every pull request.

Implement a quantitative quality dashboard to visualize product quality quantitatively and can make improvement actions.

(Challenge) Utilize AI to make API test cases automatically.

Responsibility:

Develop and maintain API automation testing framework and other tech areas (Environment, CI/CD pipeline).

PIC of some products to achieve good API automation testing coverage and implement test pyramids in your products. You will also collaborate with product teams to support their API automation testing implementation, with QA to implement the test pyramid.

Improve the development process and test process from a test engineering perspective.

Requirements

- Strong communication skills which can work with SDET and product members in Japan from the India branch.
- Leader experience (At least 3 years) who can lead and have a responsibility for API automation testing in your products.
- Experience of developing and maintaining automation testing frameworks and other tech areas (Environment, CI/CD pipeline).
- 5 years experience to work on automation testing (Especially API auto test).
- Experience to collaborate with stakeholders (QA, Product team, PdM, etc..) to make test cases and implement automation testing.
- English: Business-level English ability.

Nice to have

- Experience of improving the development process or test process.
- Experience of building/maintaining CI/CD environments.
- Experience of implementing a test pyramid.
- Typescript
- Playwright for API auto testing
- Cucumber
- CI/CD pipeline
- Japanese: Conversation level.

Interested candidates please share your CV on sharma.vibhore@moneyforward.co.jp .

Sony hiring for QA

Role Overview

The incumbent will create and lead the quality engineering and automation framework for the SonyLIV platform's Middleware/API gateway product for AGL project.

Position Title - Staff Engineer, QA Automation, Digital Business

Location - Mumbai / Bangalore (WFO)

Education - B.E./B.Tech in Computer science Experience - 8+ years

Other Job Requirements - Working knowledge on middleware or API gateway applications

Areas of Responsibilities:

Quality Engineering -

- Develop and execute comprehensive test strategies, plans, and cases for API Gateway products, covering all aspects of API testing.
- Experience in software quality assurance, with a strong focus on backend API testing of backend systems
- Automate API/UI/Unit tests and integrate them with CI/CD pipelines for seamless deployments.
- Experience of backend testing with deep knowledge of API and HTTP protocol
- Good understanding of message queues, lambda function, base and AWS services
- Good understanding of AWS log analysis
- Work experience in OTT application is desirable

Process Automation -

- Design and implement robust automation frameworks for both back-end systems using industry-standard open-source tools (e.g., RestAssured, Pytest, etc.)
- Solid work experience in testing and automating the OTT based backend applications.
- Design and implement quality process and quality metrics for the applications across platforms
- Good understanding of processes and methodologies with ability to adapt and improvise in various situations

Knowledge Management -

- Responsible for developing automation dashboards and reports to quality engineering
- Should be able to perform timely evaluation of new technologies and methodologies.

Critical Competencies for Success

Behavioral:

- Should be a good team player & able to work independently under pressure.
- Strategic thinker balanced with a grasp of details. Must possess the ability to switch between execution and strategy mode most effortlessly.
- Ability to see the big picture, visualise the future and develop relevant test /Automation strategies that add value to our business.
- Ability to prioritise and cope with competing demands. Must possess a sense of urgency and excellent execution and project management skills.
- Must be excited by and be able to navigate ambiguity.
- Passion for results and excellence.
- Must be able to get the job done by working collaboratively with others. Inquisitive and analytical mind; out-of-the-box thinking; brings a creative perspective to business problems by applying functional expertise, business understanding and common sense.

Technical:

- Proven experience in writing comprehensive test strategies, plans, and cases for complex data-driven applications.
- Strong programming skills in Python, Java, or any other programming language to lead the efforts on backend and frontend automation tasks.
- Design test plans to simulate high user concurrency and monitor key performance metrics.
- Automate API/UI/Unit tests and integrate them with CI/CD pipelines for seamless deployments.
- Solid work experience in testing and automating OTT-based backend applications.
- Through understanding of the Software Development Lifecycle (e.g. Requirements, Design, Development, Testing) and Exposure to Agile or iterative SDLCs.
- A better understanding of Linux, Android and Cloud platforms (AWS) and CDNs is preferred.
- Should have excellent programming/coding and logical skills.

Other Personal Characteristics

The successful candidate must be bright, quick, and a team player with the independence of thought and opinion to provide candour and honesty to support and influence key business decisions. Must have authenticity to establish quality relationships across the organisation through the highest levels of professionalism, ethics and mutual respect.

Personal traits which will make one an ideal candidate for the position are:

- Straightforward, professional and polished
- Excellent communicator
- High energy, with an ability to motivate
- A do-it-yourself orientation, consistent with the company's "roll-up-the-sleeves" culture
- A positive outlook with an ability to deal with ambiguity
- Is a balanced individual capable of developing creative solutions while anticipating and mitigating risks
- Has business acumen and is a strategic thinker
- Is an independent thinker and assertive. Can voice their opinion professionally against top management and other stakeholders.

🌟 *We're Hiring at Liveon Technolabs Pvt Ltd*

Job Title: Senior RF/WiFi Test Engineer
Company: Liveon Technolabs Pvt. Ltd.
Location: Bangalore
Job Type: Full-time
Experience: 4 - 5 years
Department: Wireless Systems / QA / RF Engineering

About Liveon Technolabs Pvt. Ltd.

Liveon Technolabs is a growing technology-driven company focused on delivering high-quality wireless, embedded, and connectivity solutions. We specialize in the development and testing of next-generation IoT, networking, and wireless communication systems. Join our team of passionate engineers and contribute to cutting-edge RF and wireless innovation.

Job Summary

We are looking for a highly skilled and experienced Senior RF Test Engineer to lead and execute testing and validation efforts for RF components and systems. The ideal candidate will have a deep understanding of wireless communication protocols, test methodologies,

and performance optimization for embedded wireless devices.

Key Responsibilities

Lead RF/WiFi testing efforts for embedded and wireless products.

Design and execute test cases for WiFi (802.11 a/b/g/n/ac/ax), Bluetooth, and other RF technologies.

Conduct OTA performance testing (TRP, TIS) in anechoic chambers.

Analyze KPIs like throughput, signal strength, EVM, PER, and sensitivity.

Work with test equipment such as LitePoint, Spirent, Rohde & Schwarz, Keysight, etc.

Use tools like Wireshark, QXDM, QCAT, and other debugging tools for issue analysis.

Validate antenna performance and support hardware teams in RF layout evaluations.

Collaborate with firmware and system engineering teams for root cause analysis and issue resolution.

Ensure compliance with regulatory and certification standards (FCC, CE, BIS).

Prepare comprehensive test documentation, reports, and presentations for internal and customer reviews.

Required Skills & Experience

Bachelor's or Master's degree in Electronics, Communications, or related discipline.

Minimum 4 - 5 years of hands-on RF and WiFi testing experience.

Strong knowledge of wireless protocols and standards, especially 802.11 (WiFi).

Experience with RF test automation and scripting (Python preferred).

Familiarity with antenna measurements, SAR, and EMC testing.

Excellent analytical, debugging, and documentation skills.

Ability to lead a small team and mentor junior engineers.

We're Hiring! | Senior QA Engineer @ VuNet Systems

At VuNet Systems, We're looking for a driven and hands-on Senior QA Engineer to strengthen our growing engineering team and help build high-quality, scalable systems for our observability platform.

What We're Looking For:

We're seeking someone with solid experience in:

- ✓ Building robust CI/CD pipelines using Jenkins, GitHub Actions, or GitLab CI
- ✓ Containerization & orchestration with Docker, Kubernetes
- ✓ IaC with Terraform or Ansible
- ✓ Monitoring & observability tools like Prometheus, Grafana, Elastic Stack, OpenTelemetry
- ✓ Cloud-native systems on AWS, Azure, or GCP
- ✓ Strong scripting skills (Python, Bash, Groovy)
- ✓ Testing high-throughput distributed systems & automating test frameworks (pytest, k6, etc.)

You'll:

- ◆ Own quality strategy across metrics, logs, tracing, and alerting pipelines
 - ◆ Build automated test suites for APIs, data pipelines, and dashboards
 - ◆ Integrate test automation into CI/CD and GitOps workflows
 - ◆ Mentor junior QA engineers and promote QA best practices
- 🎯 Experience: 6+ years in QA/Quality Engineering with deep understanding of distributed systems, observability, and performance testing.

📍 Location: HSR Layout, Bengaluru

🏢 Mode of Work: Full-time, In-Office

👤 Experience: 6 to 10 years

🚀 We're Hiring: Senior QA Automation Analyst

📍 Location: Bengaluru (Hybrid/On-site)

📝 Experience: 5+ years

📦 Focus Areas: Web & Mobile Automation | SFCC | GenAI in QA

Are you a QA professional passionate about test automation, performance testing, and working with AI-assisted QA tools?

We're looking for a Senior QA Automation Analyst with strong experience in Selenium WebDriver and Katalon Studio to help lead web automation initiatives—particularly in Salesforce Commerce Cloud (SFCC) environments.

This is your chance to drive high-quality digital experiences while working on cutting-edge tools and frameworks in a fast-paced, collaborative environment.

What You'll Work On:

Automating web applications using Katalon Studio and Selenium WebDriver

Testing and validating flows within SFCC Business Manager

Supporting performance testing efforts

Exploring and using GenAI/LLM tools for QA acceleration

✅ Bonus Skills:

Mobile automation (Native apps) using Appium, Katalon, Selenium
API automation via Katalon Studio
Familiarity with performance testing tools
Exposure to AI-assisted QA tools and modern QA best practices

Couple of more positions that we at Hertzwave are hiring for : Job Post 1

Shared by **Job Curator** - Join us on Telegram: <https://t.me/testingexperiencedopenings>

Test Lead (QA) – Cloud Sustainability Platform

Location: Bengaluru

Experience: 6–8 years

Summary

Hertzwave is seeking a hands-on Test Lead (QA) to own the end-to-end quality assurance of our multi-tenant carbon-intelligence SaaS platform. This role is pivotal in ensuring our cloud-native solution remains secure, performant, and audit-ready. You'll lead a small QA team, define testing strategies, and drive automation across our CI/CD pipeline. Success in this role means delivering clean, reliable releases that support our mission to accelerate net-zero transitions for enterprises.

Responsibilities

Lead and mentor a QA squad focused on testing a cloud-native sustainability platform.

Define and implement comprehensive test strategies for functional, API, performance, and regression testing.

Develop and maintain automation frameworks using tools like Selenium, PyTest, and JMeter.

Collaborate with product and engineering teams to ensure test coverage across microservices and data pipelines.

Monitor and improve test efficiency and effectiveness within CI/CD workflows.

Ensure platform compliance with security, performance, and audit standards.

Advocate for quality best practices and continuous improvement across the organization.

Qualifications

6–8 years of experience in software QA, with at least 2 years in a leadership role.

Strong expertise in SaaS testing, automation tools (Selenium, PyTest, JMeter), and CI/CD pipelines.

Solid understanding of API testing and performance benchmarking.

Experience with AWS-native architectures and microservices.

Excellent communication and collaboration skills.

Exposure to ESG or sustainability domains is a plus.

Bachelor's degree in Computer Science, Engineering, or a related field.

- Python
- PySpark
- Pytest (for automation testing)

Key Responsibilities:

- Own end-to-end testing for Azure-based data products including ADF, DLS, and Databricks.
- Create, execute, and maintain automated test suites using Pytest for data engineering workloads.
- Design and manage test plans, test cases, estimations, and timelines.
- Perform manual and automated testing with a strong focus on data accuracy and performance.
- Collaborate with data engineers, solution architects, and data scientists to ensure quality assurance.
- Work under the guidance of a tech lead and independently drive test deliverables.
- Identify testing risks early and proactively raise them with stakeholders.
- Comply with standard testing tools, Shell testing frameworks, and delivery processes.
- Provide continuous feedback and improvements in testing approaches.
- Participate in project work split between ODE team and Bolt project (approx. 50/50).

Nice to Have:

- Exposure to Data Science products and workflows
- Knowledge of Shell GCC, MDH, and GCC landscape (can be trained if not available)
- Understanding of test delivery assurance and Shell's internal tools/frameworks

Job Title: SAP Test Automation Engineer

Location: Hyderabad / Bengaluru

Job Type: Contractual

Experience Required: 5–9 Years

Job Summary:

We are seeking a skilled SAP Test Automation Engineer with hands-on experience in Worksoft Certify, SAP ECC/S4 HANA, and HPALM/Octane. The ideal candidate will be responsible for designing, developing, and executing automated test scripts for SAP applications, ensuring high-quality deliverables across SAP modules.

Key Responsibilities:

Design and implement automated test scripts using Worksoft Certify for SAP applications. Perform functional and regression testing across SAP ECC and S/4 HANA modules (SD, MM, FICO, etc.).

Integrate automation frameworks with HPALM/Octane for test management and defect

tracking.

Collaborate with SAP functional and technical teams to understand business processes and testing requirements.

Maintain and enhance existing automation scripts and frameworks.

Participate in test planning, execution, and reporting activities.

Ensure alignment with QA best practices and compliance standards.

Required Skills:

Worksoft Certify: Minimum 5 years of hands-on experience in automation scripting and execution.

SAP ECC / S4 HANA: Strong understanding of SAP modules and business processes.

HPALM / Octane: Experience in test management, defect tracking, and reporting.

Experience with Execution Manager (EM) or Certify Test Manager (CTM) is a plus.

Good understanding of SDLC, Agile methodologies, and test automation strategies.

Strong analytical and problem-solving skills.

Excellent communication and collaboration abilities.

Do share your resume on Sinha.soumya@net2source.co.in

American Express is hiring for Senior Quality Engineer II-25011635 for Bengaluru location

Key Responsibilities:

Understand the Loyalty and Benefits domain and how it powers the AMEX experience for customers

Learn and support our legacy applications and modern platforms to develop a deep understanding of all functional workflows.

Work closely with product owners and/or other technology counterparts globally as needed to further our initiatives targeting business growth, cost savings, platform maintenance and platform modernization.

Participate in agile development processes including sprint planning, stand-ups, demos and retrospectives

Ability to come up with multiple test automation framework solutions, present pros and cons and influence stakeholders towards a technical solution

Be actively involved in test automation framework development/enhancements, low level design, coding, code reviews and unit and E2E testing in. Assist with production deployment and ensure smooth CI/CD pipeline process.

Ability to Identify test data needs for various initiatives and bring innovation to reduce the data setup effort

Deploy multiple needed components in test environment and perform test execution (automated and manual)

Co-ordinate delivery of the project across global teams. Manage risk through all stages of project life cycle.

Be a role model for engineering excellence within the team driving adoption of CICD and DevOps practices.

Take ownership and lead initiatives. This could also involve leading a small team of quality engineers.

Minimum Qualifications:

Bachelor's degree in computer science, computer science engineering, or related experience required with at least 8 years of experience in software quality assurance

Delivered complex projects where complexity is a function of domain knowledge required, technical implementation and stakeholders.

Ability to independently work with product and business to gather requirements, write test cases and come up with test data needs.

Experience in converting BDD scenarios to detailed manual test cases with required validation steps

Experience in developing test automation framework using Go, Godog, cucumber or other BDD frameworks. Exposure to container-based technologies (docker, Kubernetes), GIT, Jenkins, TDD/BDD, mocking frameworks, CI/CD gates on security, code coverage and code quality.

Experience with distributed systems, micro services architecture (REST) and messaging services such as Kafka.

Experience working with relational/NoSQL databases

Ability to work in a team environment as well as independently

Commitment to write clean maintainable code with good documentation practices

Exposure to Chaos engineering, nonfunctional requirements testing

 We're Hiring for couple of Senior SDET roles at HireRight (Playwright, RestAssured, Java) – Bengaluru, India (Hybrid) 

I'm looking for an experienced QA professional who can build, lead, and deliver with ownership and technical depth.

We have one open position for a Senior Software Development Engineer in Test (SDET) with 5–8 years of experience. This is a hybrid role, so candidates must be based in Bengaluru.

 What I'm Looking For (Must-Haves):

-  1+ years of hands-on Playwright automation experience — including building frameworks in Playwright. Non-negotiable.
-  API Testing with both Postman as well as RestAssured.
-  Strong programming skills — Proficient in Java
-  You've led a QA team (at least 2 members) and helped them grow technically
-  Solid debugging and problem-solving abilities — you can go beyond symptoms to fix root causes
-  You take initiative and thrive in a fast-moving, collaborative environment
-  Strong communication skills — both written and verbal

 We're Hiring! | Business Analyst – Motor Insurance Domain(India Based)

(5–10 Years) - Chennai

Work Mode- On-site (Work from Office)

"Candidates open to relocation from other locations are also welcome to apply. Please share your updated resume at keerthana@inypeople.com."

Are you passionate about simplifying insurance processes through technology and insights? Join our team as a Business Analyst focused on Motor Insurance and be part of driving digital transformation in the insurance industry.

 Position: Business Analyst – Motor Insurance(India Based)

 Location: [Chennai / On-Site]

 Experience: 5 to 10 Years

 Domain: General Insurance / Motor Insurance

 Key Responsibilities:

✨ Work closely with underwriters, claims, policy, and operations teams to gather and document business requirements.

✨ Analyze end-to-end motor insurance processes: policy issuance, endorsements, claims, renewals, NCB handling, etc.

✨ Create and manage BRDs, FRDs, use cases, and user stories.

✨ Collaborate with cross-functional teams (IT, QA, Product) for implementation and UAT.

✨ Support configuration and testing of insurance platforms / PAS (Policy Admin Systems).

✨ Conduct GAP analysis and impact assessment for new product launches or process changes.

 Technical & Functional Skills:

✨ Strong understanding of motor insurance domain workflows

✨ Hands-on experience with BRD/FRD documentation

✨ Knowledge of tools like JIRA, Confluence, MS Visio, and Postman

✨ Familiarity with SQL for basic data extraction & reporting

✨ Experience working in Agile / Scrum environments

Bonus: Exposure to insurance platforms (e.g., Guidewire, Duck Creek, TCS BaNCS)

 Who Should Apply:

✓ Business Analysts with 4–9 years of experience, preferably in the Insurance or BFSI domain

✓ Professionals with prior experience in motor insurance, especially policy lifecycle, claims, and endorsements

✓ Excellent communication and stakeholder management skills

=====

 Quality Analyst (Mid-Level) – Hybrid

 Location: Chennai, Tamil Nadu, India

 Experience: 1.5 to 5 Years

We're on the lookout for a detail-oriented and driven Quality Analyst to be part of our growing QA team.

If you're passionate about ensuring product excellence and enjoy working in a collaborative and high-performance environment, we want to hear from you!

🎯 Key Responsibilities:

- ✓ Develop, review, and execute detailed test plans and test cases
- ✓ Perform manual testing of web and mobile applications
- ✓ Identify, document, and track software defects
- ✓ Collaborate with developers, product managers, and other stakeholders
- ✓ Contribute to continuous improvement of QA processes

🔧 Skills & Qualifications:

- ✓ 1.5 to 5 years of manual testing experience
- ✓ Strong understanding of software development lifecycle (SDLC) and testing methodologies
- ✓ Proficiency in test case creation, execution, and bug tracking tools
- ✓ Excellent communication and presentation skills
- ✓ Ability to work independently and as part of a team

🚀 We're Hiring! | Performance Tester | 8–13 Years | Banking Domain | Chennai

Are you a Performance Testing specialist ready to take on large-scale, critical projects in the banking domain?

We're looking for an experienced Performance Tester with strong JMeter skills to join our dynamic QA team in Chennai.

📍 Location: Chennai, India

****👤 Employment Type:** Full-time

****🕒 Notice Period:**

Immediate joiners to 30 days preferred.

****🔍 Role Overview:**

As a key member of our Performance Testing Team, you will:

- Gather performance testing requirements and translate them into test plans and cases.
- Develop and maintain automated scripts in JMeter, with custom JavaScript code for enhanced scenarios.
- Conduct system performance testing to ensure reliability, capacity, and scalability.
- Analyze test results, pinpoint root causes, and coordinate with development and DBA teams for issue resolution.
- Develop performance test scenarios and environments, and generate clear test summary reports for management.
- Recommend new tools, techniques, and improvements to enhance performance test effectiveness.
- Support continuous integration initiatives with performance testing best practices.

****✅ What You'll Bring:**

- ✓ Bachelor's degree in Computer Science, Engineering, or equivalent.
- ✓ 8–13 years of hands-on QA/testing experience with 5+ years in performance testing (minimum 2 years with JMeter — mandatory).
- ✓ Good programming experience (at least 3 years) in any programming language.
- ✓ Solid experience in banking or financial services projects (must have).
- ✓ Proven expertise in coordinating across teams — DBA, DevOps, System Admins — to drive performance test success.
- ✓ Excellent communication and collaboration skills (written & verbal).
- ✓ Working knowledge of Agile/Waterfall SDLC, MS Office tools, and Continuous Integration workflows.

If you're passionate about performance engineering and ready to make an impact in the banking domain, we want to hear from you!

✉️ Apply now with your updated resume and notice period details.
