Job Title: Java Selenium Tester (Automation + Manual)

📍 Location: Hyderabad (Onsite/Hybrid as applicable)

👤 Experience: 5-10 Years

💼 Employment Type: Full-time / Contract (specify as per requirement)

📅 Notice Period: Immediate to 15 days (preferred)

Job Overview:

We are looking for a skilled and detail-oriented QA Engineer with hands-on experience in both Automation and Manual Testing using Java + Selenium, preferably in SaaS-based applications within the Storage domain. The ideal candidate will have strong debugging skills, domain understanding, and the ability to work in an agile team to ensure product quality and reliability.

Key Responsibilities:

Design, develop, and maintain robust automation test scripts using Java and Selenium WebDriver

Perform manual testing for functional, regression, and system integration testing

Validate complex SaaS-based applications and ensure seamless user experience

Shared by **Job Curator** - Join us on Telegram: <https://t.me/testingexperiencedopenings>

Work closely with development and product teams to understand requirements and design comprehensive test strategies

Identify, document, and track bugs using tools like JIRA, TestRail, or similar

Validate storage systems, including performance, backup, and scalability scenarios

Participate in sprint planning, estimation, and daily stand-ups as part of the Agile/Scrum process

Contribute to continuous improvement of QA processes and frameworks

Required Skills:

- ✓ 6+ years of experience in QA Testing (Automation + Manual)
- ✓ Proficiency in Java + Selenium for test automation
- ✓ Experience working in or testing SaaS-based platforms (Mandatory)
- ✓ Good knowledge of the Storage domain (SAN, NAS, Backup, Replication, etc.)
- ✓ Strong understanding of STLC, test case design, and bug lifecycle
- ✓ Hands-on experience with TestNG, Maven, and automation frameworks
- ✓ Experience with CI/CD tools like Jenkins, Git
- ✓ Strong analytical and troubleshooting skills
- ✓ Excellent communication and collaboration abilities

Nice to Have:

- ★ Exposure to cloud platforms like AWS, Azure
- ★ Knowledge of API testing using tools like Postman or RestAssured
- ★ Experience in performance or load testing (JMeter, LoadRunner)

Why Join Us?

Work on cutting-edge SaaS and storage technologies

Opportunity to be part of a fast-paced, growth-oriented environment

Collaborative and inclusive team culture

Competitive compensation and flexible work culture

✉ Interested candidates can send their resumes to: pallavi@technology-next.com

We're Hiring | Quality Engineer – IT QA (Automation/Specialized)

📍 Locations: Gurugram, Noida, Pune, Bengaluru, Hyderabad (Initial Remote)

🌐 Off-shore Opportunity

Are you passionate about building trustworthy AI systems? We're looking for a Quality Engineer with a deep focus on AI-driven applications and Retrieval-Augmented Generation (RAG) models. If you're excited by automation, NLP, and AI reliability, this could be your next great role.

What You'll Do:

- Design & implement quality strategies for RAG-based AI systems
- Build and automate test cases to ensure accuracy, reliability & performance
- Dive deep into root-cause analysis of model or system defects
- Partner across teams to improve user experience & AI trustworthiness
- Apply AI-specific QA methodologies including model evaluation metrics

What You Bring:

- 3+ years of QA/QE experience (AI-focused preferred)

Shared by **Job Curator** - Join us on Telegram: <https://t.me/testingexperiencedopenings>

- Hands-on with tools like Selenium, Cypress, JUnit, Postman
- Knowledge of AI/ML testing, NLP systems, embedding-based retrieval, vector DBs (Pinecone, Weaviate, etc.)
- Familiarity with metrics like BLEU, ROUGE, F1-score, Precision, Recall
- Experience with performance/load testing tools like JMeter or Gatling
- Strong analytical + communication skills – you're a collaborative problem solver

💬 If you're driven to improve AI quality and build intelligent systems that people can trust — we want to hear from you!

✉️ Apply now or DM me to know more. "adam.carter@pwsrecruit.com"

=====

🎯 Now Hiring: Senior QA Automation Engineer | 8+ Years Exp. | Hybrid – Hyderabad | Contract 🚀

Senior QA Automation Engineer who's passionate about quality, driven by automation, and experienced in delivering high-performing software in fast-paced Agile environments.

📍 Location: Hyderabad, India (Hybrid)

📄 Type: Contract

✉ Apply: Send your resume to swetha@krishpar.com

🔧 What You'll Do:

Build scalable automation frameworks in Java/JavaScript

Automate across web, mobile & API layers using Selenium, Appium, TestNG, JUnit, Postman, RestAssured

Integrate automation into CI/CD with Jenkins, GitHub Actions, etc.

Validate backend systems using SQL and RDBMS

Define robust test strategies, mentor junior QA engineers, and drive end-to-end quality ownership

💡 What We're Looking For:

8+ years of QA Automation experience

Deep understanding of QA processes in Agile/Scrum

Hands-on coding + testing expertise across multiple layers of a modern tech stack

Leadership and mentoring skills to uplift the quality culture

🚀 Ready to lead the charge in quality engineering?

=====

🇮🇳 We're Hiring at Publicis Sapient!

Senior Quality Engineer (4–8 Years Experience)

Location: Gurugram/Noida/Bangalore/Hyderabad/Pune/Mumbai

Experience Required: 4–8 years

Are you passionate about automation, quality, and innovation? We are looking for a Senior Quality Engineer who thrives in fast-paced, agile environments and is ready to build scalable, efficient test automation solutions.

Must-Have Skills:

- Strong programming skills in Java
- Hands-on with Selenium, Rest Assured, API Testing
- Deep knowledge of BDD frameworks like Cucumber
- Experience in building robust automation frameworks (Page Object Model, CI/CD integrations)
- Solid grasp of OOPs concepts, SQL, and microservices testing

This is more than a QA role – it's an opportunity to own the automation vision, collaborate with high-performing teams, and deliver quality at scale.

If this sounds like you or someone you know, let's connect! Apply today!

Job Title: SAP Test Automation Engineer

Location: Hyderabad / Bengaluru

Job Type: Contractual

Experience Required: 5–9 Years

Job Summary:

We are seeking a skilled SAP Test Automation Engineer with hands-on experience in Worksoft Certify, SAP ECC/S4 HANA, and HPALM/Octane. The ideal candidate will be responsible for designing, developing, and executing automated test scripts for SAP applications, ensuring high-quality deliverables across SAP modules.

Key Responsibilities:

Design and implement automated test scripts using Worksoft Certify for SAP applications. Perform functional and regression testing across SAP ECC and S/4 HANA modules (SD, MM, FICO, etc.).

Integrate automation frameworks with HPALM/Octane for test management and defect tracking.

Collaborate with SAP functional and technical teams to understand business processes and testing requirements.

Maintain and enhance existing automation scripts and frameworks.

Participate in test planning, execution, and reporting activities.

Ensure alignment with QA best practices and compliance standards.

Required Skills:

Worksoft Certify: Minimum 5 years of hands-on experience in automation scripting and execution.

SAP ECC / S4 HANA: Strong understanding of SAP modules and business processes.

HPALM / Octane: Experience in test management, defect tracking, and reporting.

Experience with Execution Manager (EM) or Certify Test Manager (CTM) is a plus.

Good understanding of SDLC, Agile methodologies, and test automation strategies.

Strong analytical and problem-solving skills.

Excellent communication and collaboration abilities.

🚀 Now Hiring: Performance Test Engineer |

Are you a QA professional passionate about Performance Testing & Engineering?

We are looking for skilled individuals who can own the performance lifecycle—from planning to analysis—with minimal supervision.

Shared by **Job Curator** - Join us on Telegram: <https://t.me/testingexperiencedopenings>
This document is for Subscribed Members only. **If you notice this is shared publicly by anyone pls report to us on info@jobcurator.in or whatsapp +91 9014875399**

- ◆ Role: #Performance Test Engineer
- ◆ Experience: 5+ Years
- ◆ Location: Bangalore, Hyderabad, or Gurugram (India)
- ◆ Mode: Full-time | Mid-Level

Key Skills & Requirements:

- ✓ Strong experience with JMeter, Python, AWS
- ✓ Hands-on in test strategy, script development, execution & result analysis
- ✓ Exposure to tools like AppDynamics, CloudWatch, Splunk
- ✓ Nice to have: Git, DB & Network Analysis, Thread/Heap dump analysis
- ✓ Strong communication, coordination, and problem-solving skills

As a Performance Engineer, you'll work on improving application speed, stability, and scalability—playing a critical role in ensuring a seamless user experience. If you can lead end-to-end performance testing and demonstrate best practices, we'd love to connect!

✉ Share your CV at praveen_j@elgebra.com or DM me directly.

Referrals are most welcome! 🙌
