We're hiring a Salesforce QA Engineer with 3+ years of hands-on experience in Salesforce testing, including Salesforce CPQ. The ideal

candidate will be skilled in manual and automation testing, familiar with Salesforce configurations, and experienced in Agile environments.

#Role: Salesforce QA Engineer

#Location: Bangalore / Pune

Key Responsibilities:

Design & execute manual and automated test cases for Salesforce apps (CPQ, Sales/Service Cloud, Lightning).

Test and validate workflows, Apex code, Lightning components, and integrations.

Conduct functional, regression, integration & UAT testing.

Work closely with developers, BAs & stakeholders to troubleshoot and resolve issues.

Enhance automation frameworks using tools like Selenium, Provar.

Use JIRA/Azure DevOps for defect tracking and participate in Agile ceremonies.

Requirements:

2 – 3 years in QA, with 3+ years in Salesforce testing.

Strong skills in Selenium, Provar, Postman, API testing, Git, Jenkins.

Deep understanding of Salesforce platform: CPQ, Lightning, custom objects, Apex.

Excellent communication and documentation skills.

Preferred Skills:

Salesforce CPQ, Apex, Selenium, Java, Python, Automation Testing

Our mail id - [hr@infobyd.in](mailto:hr@infobyd.in)

=====

Role: Salesforce QA Engineer

Location: Onsite (Bangalore / Pune)

Job Description:

We are seeking an experienced Salesforce QA Engineer with 5 to 7 years of hands-on experience in testing Salesforce-based applications, including Salesforce CPQ. The ideal candidate should have a strong

understanding of Salesforce platform features, excellent testing skills, and familiarity with automation tools. This role will be responsible for ensuring the quality and performance of Salesforce applications across multiple business functions.

Responsibilities:

- Design and execute manual and automated test cases for Salesforce applications, including Salesforce CPQ.
- Review business requirements, functional specifications, and technical documents to understand the system.
- Perform functional, regression, integration, and UAT testing.
- Collaborate with developers, business analysts, and other stakeholders to resolve issues.
- Validate Salesforce configurations, workflows, Apex classes/triggers, Lightning components, CPQ rules, and third-party integrations.
- Maintain and enhance test automation frameworks using tools like Selenium, Provar, or TestNG.
- Report, track, and validate defects using tools like JIRA or Azure DevOps.
- Participate in Agile/Scrum ceremonies and contribute to sprint planning and estimation.

Requirements:

- B.Tech in Computer Science, Information Technology, or a related field.
- 5 to 7 years of experience in Quality Assurance/Software Testing, with at least 3+ years in Salesforce testing.
- Solid understanding of Salesforce CRM, including Sales Cloud, Service Cloud, CPQ, Lightning Experience, and custom objects.
- Strong experience with test case design, test execution, and defect management.
- Proficiency in using tools like Selenium, Provar, UFT, or similar automation tools.
- Experience with API testing using tools like Postman or SOAP UI.

Interested may send their resumes at [nehaholkar442@gmail.com](mailto:nehaholkar442@gmail.com)
