Job Opportunity: QA Engineer at Crosslynx US LLC

Location: Sector-67, Noida

Department: Software

Experience: 7–12 Years

Apply at: [prabha.pandey@crosslynxus.com](mailto:prabha.pandey@crosslynxus.com)

#### Position Summary:

Crosslynx US LLC is seeking a QA Engineer with strong technical expertise and leadership skills to oversee quality assurance efforts across enterprise software projects. The ideal candidate will excel in test automation, possess analytical acumen, and collaborate effectively with diverse teams to ensure the delivery of top-notch solutions.

#### Key Responsibilities:

- Lead test automation strategy and technical direction.
- Develop and maintain scalable automation frameworks utilizing Selenium, Cypress, Playwright, and Appium.
- Choose automation test cases based on ROI, risk assessment, and stability.
- Integrate automated tests into CI/CD pipelines such as Jenkins and GitLab CI.
- Implement best practices like Page Object Model (POM) and modular design.
- Efficiently manage test data and environments.
- Conduct API testing using tools like Postman, RestAssured, and SoapUI.
- Employ test management tools like JIRA, TestRail, and Zephyr for traceability and reporting.
- Perform performance testing with JMeter and LoadRunner.
- Operate in containerized environments using Docker/Test Containers.
- Utilize cloud-based platforms like BrowserStack and Sauce Labs for cross-browser testing.
- Identify automation opportunities in collaboration with development and business teams.
- Mentor and provide guidance to QA team members.
- Ensure quality in test plans, cases, and defect reporting.
- Continuously enhance QA processes and monitor automation ROI.
- Research and implement new testing tools and methodologies.
- Communicate progress, risks, and metrics to stakeholders.

#### Required Qualifications:

- 7+ years of software QA experience, with 5+ years in automation and 3+ years in a senior/architect role.
- Proficiency in Selenium WebDriver (Java), CI tools (Jenkins), test management tools (JIRA)

Job Title: Automation Test Engineer – Java, Selenium, API

Experience: 3 to 6 Years

Location: Noida

Job Type: FTE

Shared by **Job Curator** - Join us on Telegram: <https://t.me/testingexperiencedopenings>

work mode: On Site (5 Days Working)

#### Job Summary:

We are looking for a skilled and detail-oriented Automation Test Engineer to join our Quality Engineering team. The ideal candidate will have solid experience in test automation using Java and Selenium, strong API testing knowledge, and the ability to build or maintain robust test automation frameworks. You will work closely with developers, testers, and product teams to ensure high-quality software delivery through automation.

#### Key Responsibilities:

Design, develop, and maintain automation frameworks for web and API testing using Java and Selenium.

Create and execute automated test scripts for functional, regression, and integration testing.

Perform API testing using tools like Postman, Rest Assured, or similar.

Integrate automated tests into CI/CD pipelines for continuous validation.

Collaborate with developers, business analysts, and QA team members to understand requirements and translate them into test automation scenarios.

Identify test coverage gaps and enhance test suites accordingly.

Analyze test results, debug issues, and work with the team to resolve defects.

Maintain comprehensive test documentation and reports.

Participate in code reviews and contribute to QA best practices and standards.

#### Required Skills:

3 to 6 years of hands-on experience in test automation.

Strong programming skills in Java 11+ and knowledge of OOPs principles.

Expertise in Selenium WebDriver and related automation tools.

Solid experience in building or enhancing test automation frameworks (e.g., TestNG/JUnit, Cucumber and BDD-based frameworks).

Proficient in API testing using tools such as Rest Assured or Postman

Familiar with version control tools like Git.

Experience with CI/CD tools such as Jenkins, GitLab CI, or similar.

Understanding of software testing life cycle (STLC) and QA methodologies.

Experience with bug tracking tools like JIRA/Rally

#### Nice to Have:

Experience with cloud testing platforms like Sauce Labs, BrowserStack, or LambdaTest.

Familiarity with performance testing tools (e.g., JMeter, Gatling).

Exposure to Agile/Scrum methodologies.

Knowledge of database testing and SQL.

#### Soft Skills:

Excellent analytical and problem-solving skills.

Strong communication and interpersonal abilities.

Ability to work independently and in a team environment.

Attention to detail and a quality-first mindset.

Proactive attitude and willingness to learn and adapt.

Shared by **Job Curator** - Join us on Telegram: <https://t.me/testingexperiencedopenings>
