#Remote Role (USA)

#Contract to Hire

Job Description :-

Client is seeking a detail-oriented QA Specialist to lead quality assurance for critical digital experiences, including our Learning Management System (LMS), key system integrations, and the upcoming relaunch website. This role will ensure all member- and learner-facing systems meet high standards for functionality, accessibility, and user experience.

The ideal candidate brings hands-on experience designing and executing test plans across web platforms, has strong familiarity with accessibility standards (WCAG), and excels at collaborating with stakeholders to translate user requirements into rigorous QA protocols.

Key Responsibilities

Design and execute comprehensive test plans for digital products, including:

LMS and associated customizations

System integrations (e.g., Salesforce, ERP, HubSpot)

Relaunched .website and member portal

Conduct cross-browser, cross-device, and accessibility (WCAG 2.1+) testing.

Collaborate with product owners, engineers, and stakeholders to define acceptance criteria and testing scripts.

Interview internal users and stakeholders to gather user scenarios and real-world workflows for validation.

Track and report issues using ticketing/project management tools.

Validate bug fixes and enhancements in staging environments before production releases.

Recommend QA processes and build reusable testing templates where applicable.

#Qualifications

5+ years of experience in QA testing for web-based applications and digital platforms.

Strong expertise in manual testing, UX evaluation, and accessibility standards (e.g., WCAG, ARIA roles).

Experience working with LMS platforms (e.g., Thought Industries), CMS, and modern web tech stacks.

Familiarity with enterprise integrations (Salesforce, ERP, HubSpot, SSO).

Strong analytical, communication, and documentation skills.

Ability to manage testing in fast-paced, iterative environments.

Nice to Have

Experience testing multilingual or region-specific user experiences.

Background in EdTech, certification programs, or nonprofit membership organizations.

=====

Company Name: Itronix Solution

Job Position: Manual QA

Experience: 00-04 Years

Location: Remote

Availability: Immediate joiners

Skills: Manual testing, WCAG, VPAT, SECTION 508, ARIA, HTML

If you are interested, please share your profile to truptim@istronix.com with details on CTC, ECTC, and Notice Period

=====

We're Hiring: QA Engineers (Remote - LATAM Only)

Are you a QA professional with 5+ years of experience and looking for your next remote opportunity?

We're searching for skilled QA Engineers based in Latin America.

What You'll Be Doing:

Design and execute thorough manual test cases
Collaborate with cross-functional teams to ensure full test coverage
Support automation efforts and contribute to QA best practices
Track and document bugs while helping improve product quality

What We're Looking For:

5+ years of QA experience (strong manual testing + some automation)
Experience with tools like TestRail, Xray, or QMetry
Solid understanding of different testing methodologies (functional, regression, integration, etc.)
Familiarity with CI/CD pipelines
Bonus: API testing, JavaScript/TypeScript, healthcare systems, microservices

We're looking for proactive, detail-driven engineers who take pride in building high-quality software products.

Sound like you or someone you know? Let's connect. Send me an email with your resume to jessica.monge@hatchworks.com

=====

Urgent Hiring | QA Lead – Remote Opportunity

We're looking for an experienced QA Lead who is passionate about quality, performance, and leadership in a fast-paced product-based environment.

Position: QA Lead

Experience: 5 – 8 years (with at least 2 years in a lead capacity)

Key Responsibilities:

- Lead QA efforts across the product lifecycle — planning, strategy, and execution
- Design and implement manual testing strategies
- Conduct Performance Testing to ensure scalability and reliability
- Collaborate with cross-functional teams including development, product, and DevOps
- Own the quality metrics and contribute to process improvements
- Drive defect management, risk analysis, and test coverage reporting

Key Skills Required:

- Strong background in Manual Testing and test case design
- Hands-on experience with Performance Testing tools (e.g., JMeter, LoadRunner)
- Experience working with Product-Based Companies (preferred)
- Proven track record in leading QA teams and delivering high-quality products
- Excellent communication and analytical skills

Salary / Budget: ₹25 – ₹30 LPA (Based on experience & interview)

Work Mode: 100% Remote

Notice Period: Immediate to 30 days (Preferred)

Job Title: Salesforce QA Manual Lead

Location: Remote

Experience: 7+ Years (Must have Team Lead experience)

Job Description:

We are looking for an experienced Salesforce QA Manual Lead with strong expertise in Salesforce CRM testing, API testing, and the Lending domain. The ideal candidate should have hands-on experience in manual testing, test management tools, and leading QA teams while ensuring high-quality deliverables.

Key Responsibilities:

- Lead and mentor a team of QA engineers to ensure high-quality test execution.
- Perform manual testing for Salesforce CRM, ensuring functionality, integration, and data integrity.
- Conduct API testing using Postman, REST Assured, and Swagger.
- Validate backend data using SQL queries and monitor application performance via Grafana & Dynatrace.
- Prepare and present QA reports, defect analysis, and test metrics to stakeholders.
- Manage test cases and defects using Zephyr, Jira, or similar tools.
- Collaborate with cross-functional teams to ensure seamless testing and deployment.
- Drive test strategy, planning, and execution while ensuring adherence to best practices.
- Troubleshoot issues, perform root cause analysis, and suggest improvements.

Must-Have Skills:

- 7+ years of QA Manual Testing experience (Team Lead experience required)
- Strong expertise in Salesforce CRM & Lending Domain
- Hands-on with API Testing (Postman, REST Assured, Swagger)
- Proficient in SQL for backend validation
- Experience with Grafana & Dynatrace for monitoring
- Expertise in test management tools (Zephyr, Jira)
- Strong analytical, problem-solving, and communication skills
- Experience in preparing QA reports & metrics

Good-to-Have Skills:

- Knowledge of Automation frameworks (Selenium, Cypress, etc.)
- Familiarity with CI/CD pipelines
- Basic knowledge of JavaScript/TypeScript
- Experience in Performance Testing (JMeter)

Note: Interested candidate can share resume on Mail ID:

#hiring #SeniorQALead

Min Experience: 9+ Years

Location: Remote.

We are seeking an experienced Senior QA Lead with expertise in both Manual and Automation Testing for web and mobile applications. The ideal candidate will have a strong background in testing methodologies, hands-on experience with test automation tools, API testing, performance testing, and CI/CD integration. The individual will play a key role in ensuring the quality and stability of our web and mobile applications while actively contributing to the automation of test processes and workflows.

Key Responsibilities:

- Lead end-to-end quality assurance activities, ensuring the successful delivery of web and mobile applications with minimal defects.
- Design, develop, and execute automated test scripts using industry-standard tools and frameworks (e.g., Selenium, Appium, Cypress, TestNG, etc.).
- Perform manual testing of web and mobile applications, including functional, integration, regression, and system testing.
- Create and maintain comprehensive test plans, test cases, and test scripts.
- Develop, manage, and execute test scenarios across multiple devices and platforms (Android, iOS, web).
- Ensure testing covers the full spectrum: usability, performance, security, and compatibility.
- Collaborate with cross-functional teams including developers, product managers, and other QA engineers to ensure quality throughout the SDLC.
- Identify, report, and track defects, and perform root cause analysis to prevent future issues.
- Work with the development team to prioritize issues and ensure they are addressed before releases.
- Continuously improve testing processes, tools, and techniques to optimize efficiency

and effectiveness.

- Provide leadership, guidance, and mentorship to junior QA engineers and foster a culture of quality.

Key Skills:

- Manual Testing: Expertise in SDLC, STLC, functional, regression, UAT, cross-browser, and mobile testing.
- Test Automation (Web & Mobile): Proficient in Selenium, Appium, JavaScript, Python, Java, Playwright, and Cypress.
- API Testing: Skilled in testing RESTful APIs, GraphQL with Postman, RestAssured, and scripting in JavaScript/Python.
- Performance Testing: Experience with JMeter, Gatling, and k6 for load and performance testing.
- Test Management: Proficient in JIRA, TestRail, Zephyr for defect tracking and writing clear bug reports.
- CI/CD Integration: Experience with Jenkins, GitHub Actions, GitLab CI/CD, and Docker for test automation.
- Mobile-Specific Testing: Knowledge of real devices, simulators, XCUITest, Espresso, deep linking, and push notifications.

Security & Compliance: Understanding of OWASP Top 10, security principles, and compliance with HIPAA, GDPR, ISO 27001.

Apply now or refer someone great. Plz share your updated resume to hr.team@kpitechservices.com

We Are Hiring!

Job Title: Salesforce Automation Test Engineer

Employment Type: Full-Time

Work Mode: Remote

Experience Required: 5–7 Years

Apply at: hr@avtechnosys.com

Job Description:

We are seeking a skilled Salesforce Automation Test Engineer with strong expertise in automation frameworks and Salesforce CRM platforms including Sales, Service, Marketing, and CPQ Cloud. The ideal candidate should have a passion for quality, strong problem-solving skills, and proven experience in both UI and API test automation.

Key Responsibilities:

- Perform functional, regression, smoke, and performance testing.
- Design, build, and maintain automation frameworks (UI, headless, and API).
- Automate Salesforce applications including Sales, Service, Marketing, CPQ Cloud, Communities, and Force.com apps.
- Test Lightning Web Components (LWC) and related Salesforce features.
- Develop and execute automated tests using tools like Selenium, Provar (CPQ Testing), Appium, Rest Assured, and Playwright.
- Perform mobile automation testing (BrowserStack preferred).
- Integrate automation scripts with CI/CD pipelines (e.g., Jenkins, GitLab CI).
- Manage test cases, test data, bug tracking, and reporting using tools like JIRA, Zephyr, TFS, HP ALM.
- Collaborate with cross-functional teams in Agile/Scrum environments.
- Continuously improve QA processes and frameworks.

Required Skills & Experience:

- 5–7 years of experience in Salesforce automation testing.
- Minimum 4+ years focused on Salesforce CRM applications (Sales, Service, Marketing Cloud).
- Hands-on experience with Salesforce CPQ testing.
- Strong understanding of LWC (Lightning Web Components).
- Proficiency in UI & API automation using Selenium, Playwright, Java, JavaScript, Rest

Assured, TestNG, JUnit.

- Experience with mobile automation using Appium and BrowserStack.
- Familiarity with CI/CD tools such as Jenkins and GitLab CI.
- Experience in using test management tools like JIRA, Zephyr, HP ALM, and automation tools like Cucumber, Cypress, UFT, Coded UI, Telerik.
- Solid knowledge of JavaScript, HTML, CSS for automation scripting.
- Strong troubleshooting and debugging skills for automation failures.
- Excellent communication skills.

Preferred Qualifications:

- Salesforce certifications (QA/CPQ/Admin) are a plus.
- Experience with performance testing tools is desirable.

We're Hiring: QA Engineer – Functional & AI Testing

Remote | English-speaking global team | AI-focused projects

Love breaking things to make them better?

Join SynergieGlobal, where we test beyond the basics — into the future of AI.

Tech Stack Highlights:

AI Testing: Chatbot validation, LLM prompt testing

Functional Testing: Manual & exploratory testing for web-based systems

Tools You'll Use: Jira / Trello, DevTools, screen capture & annotation tools

Automation (bonus): Selenium / Playwright / similar

Environment: Work with U.S.-based developers on real-world AI use cases

What You'll Do:

Validate Voice AI & web features

Simulate user scenarios to catch hidden bugs

Report with precision — screenshots, recordings, and clear logs

Collaborate with global dev & AI teams to build better products

Why Join Us?

Profit sharing + 13th-month pay

Flexible 40-hour work week

Modern tools, zero micromanagement

Clear growth roadmap + continuous upskilling

Work that actually impacts users

Looking for someone with:

5+ yrs QA or functional testing experience
Strong English & critical thinking
Curiosity about AI (LLMs, prompt quality, etc.)
Ready to test the limits?
Send your CV to: backoffice@synergieglobel.com

We're hiring a Python RPA Developer – Healthcare Revenue Cycle Automation

Job Overview:

We are seeking a Python Automation Developer to build and maintain intelligent automation solutions focused on Revenue Cycle Management (RCM) in the #healthcareindustry. This role requires strong Python skills, particularly in #Selenium and #OpenCV and a deep understanding of healthcare billing workflows. Experience with #AI #ML, #OCR, and cloud platforms (especially Azure) is highly desirable.

Responsibilities:

- < Design, implement and maintain robust automation scripts for RCM processes using Python, Selenium, and OpenCV.
- Automate web-based tasks (e.g., web scraping, form submissions, browser interactions) using Selenium.
- < Utilize OpenCV for image recognition and data extraction in visual and document-based workflows.
- < Apply #AI and machine learning techniques (e.g., OCR, NLP, predictive analytics) to enhance automation and improve process outcomes.
- < Integrate automation solutions with billing software, #EHRsystems, and healthcare web portals.
- < Monitor, troubleshoot, and optimize automations for accuracy, efficiency, and reliability.
- < Work alongside #SMEs and operations teams to translate manual workflows into digital automation.
- Maintain secure credential handling, logging, and audit trails in line with #HITRUST/HIPAA compliance.
- < Leverage Azure services (e.g., Azure Functions, Azure Storage, Key Vault) to support

scalable automation.

Requirements:

- Must have Healthcare API Knowledge
- Strong proficiency in Python programming
- Experience with Selenium for browser-based automation.
- Understanding healthcare RCM workflows (e.g., billing, coding, claims, denial management).
- Knowledge of HIPAA and healthcare security best practices.
- Strong analytical, debugging, and documentation skills.
- RCM Automation: Proven experience in automating complex workflows within the healthcare revenue cycle, including eligibility, claims processing, payments, and denials management.
- Integration Skills: Experience integrating with third-party healthcare software (EHR/EMR systems, billing software, etc.).
- Python scripting solutions and monitor and support those solutions long-term. Use Python to build ETL data pipelines, clean data and enable large scale data processing.
