Automation QA Engineer (2–4 Years Experience)

Location: Baner, Pune (Hybrid)

Experience: 2–4 Years

Notice Period: Immediate or 15 days

About the Role:-

We are looking for a passionate and detail-oriented Automation QA Engineer to join our dynamic team in Pune. In this role, you will work closely with developers, product managers, and other QA team members to ensure the delivery of high-quality, reliable software. If you enjoy writing automated test scripts, improving QA processes, and working in a collaborative environment, this role is for you!

What You'll Do

Collaborate with cross-functional teams to understand product requirements and define test strategies

Design, develop, and execute automated test scripts for functional and regression testing

Maintain and enhance our automation frameworks using Selenium, TestNG, or equivalent tools

Perform manual testing when needed for edge cases or exploratory testing

Log, track, and manage bugs using tools like JIRA

Participate in design and code reviews to contribute from a quality perspective

Assist with User Acceptance Testing (UAT) and troubleshoot production issues

Contribute to CI/CD processes and integrate automated tests into build pipelines

What We're Looking For

2–4 years of hands-on experience in software testing with a strong focus on automation

Proficiency in automation tools like Selenium WebDriver, TestNG, or similar frameworks

Scripting experience in Java, Python, or any object-oriented programming language

Shared by **Job Curator** - Join us on Telegram: <https://t.me/testingexperiencedopenings>

Solid understanding of QA methodologies, SDLC, and STLC
Experience with test management and bug tracking tools (TestRail, JIRA, etc.)
Familiarity with Git and CI/CD pipelines
Strong analytical and communication skills

Nice to Have

API testing experience (Postman, RestAssured)
Exposure to performance testing tools (e.g., JMeter)
Familiarity with cloud platforms (AWS, Azure, etc.)

Interested candidates can share their CVs at:

career@varseno.com

=====

We Are Hiring: Selenium + Python Engineer

- *Location: Pune
- *Experience: 6+ Years
- *Employment Type: Full-Time
- *Work Mode: Onsite

We are looking for a highly skilled Selenium + Python Engineer to join our team. The ideal candidate will have strong experience in designing and maintaining test automation frameworks, deep knowledge of Selenium WebDriver and Python, and a passion for quality assurance and continuous improvement.

*Key Responsibilities:

- * Develop and maintain robust, scalable test automation frameworks using Selenium WebDriver and Python
- * Write and execute automated test scripts for web applications (functional, regression, integration, smoke testing)
- * Collaborate closely with development, QA, and DevOps teams to integrate testing into CI/CD pipelines
- * Analyze and debug test results, identify root causes, and ensure timely resolutions
- * Continuously enhance automation tools, processes, and practices

*Required Skills:

- * Strong experience with Selenium WebDriver and Python
- * Proficiency in automation frameworks (PyTest, unittest, Robot Framework)
- * Hands-on experience with CI/CD tools (Jenkins, GitLab CI, Azure DevOps)
- * Good understanding of SDLC, Agile methodologies, and QA best practices
- * Experience with version control tools (Git, Bitbucket)
- * API testing experience (Postman, Requests, RestAssured) is a plus

*Preferred Qualifications:

- * Relevant certifications (ISTQB, Selenium, Python, etc.)
- * Exposure to cloud platforms (AWS, Azure, GCP)
- * Familiarity with containerization tools (Docker, Kubernetes)
- * Performance and/or security testing experience

If you're passionate about building high-quality software through robust automation, we'd love to hear from you.
