Hiring Alert !!

🔴 Looking for a Smart QA Intern with Strong JavaScript Skills 🔴

We're building a reliable and scalable product — and quality is at the core of it.

That's why we're hiring a QA Intern who's not just into testing, but is excited to automate real-world application using JavaScript and Playwright.

What We Expect:

- ✓ Strong understanding of JavaScript (functions, promises, DOM, etc.)
- ✓ Hands-on with Playwright or similar automation tools
- ✓ Clear understanding of Manual Testing principles (test cases, bug reporting, etc.)

🎯 Requirements:

- You've written JS scripts — not just copied them
- You understand selectors (CSS/XPath), waits, async code
- You can debug your own tests and know why something failed
- Familiarity with Git, VS Code, and browser DevTools is a plus

📍 Location: Bengaluru

🕒 Internship Duration: 6 months

🚀 PPO Opportunity: Yes, based on performance

Apply- <https://lnkd.in/gzKctban>

hr@janitri.in / abhaypratap.singh@janitri.in

=====

🔊 We're Hiring: Data Test Engineer – Primus Global

📍 Location: [Bengaluru] | 💼 Full-Time | 🕒 [Onsite]

Primus Global is looking for a skilled Data Test Engineer to join our growing team! In this role, you will design, develop, and maintain automated test solutions using ETL tools, ensuring data accuracy and robust quality across various systems. You'll work closely with stakeholders and data teams to deliver impactful, end-to-end QA solutions.

💡 What You'll Do

Understand business functionalities and technical/database landscapes of applications in scope.

Collaborate with Database Engineers and Data Analysts to define and gather testing requirements.

Build and maintain test automation frameworks covering ETL processes, database systems, and data validation.

Implement scalable and reusable Quality Engineering strategies, best practices, and guidelines.

Identify, replicate, and report defects; verify and validate fixes.

Ensure data accuracy, completeness, and consistency using ETL tools and SQL queries.

Bring a proactive, collaborative mindset with strong verbal and written communication skills.

✅ What We're Looking For

Hands-on experience in ETL testing, automation, and data validation.

Strong proficiency in SQL and familiarity with ETL tools.

Ability to work in a collaborative, fast-paced environment.

Excellent problem-solving and analytical skills.

🚀 Why Join Primus Global?

Be part of a dynamic and innovative team delivering real-world impact.

Opportunities to work on high-visibility projects with leading global clients.

Shared by **Job Curator** - Join us on Telegram: <https://t.me/testingexperiencedopenings>

Supportive work culture focused on growth and performance.

🔗 Ready to take the next step in your QA career? Apply now and join the team at Primus Global. Please drop your resume at svinod@primusglobal.com

Functional Testing Engineer (AI-Aware)

Experience:- 3+ years

Location:- Bengaluru,India

Role Overview

We are seeking a proactive Functional Testing Engineer with 3+ years of experience to join our Quality Assurance team in Bengaluru. You will be responsible for ensuring the functionality, quality, and reliability of our software products, including innovative features powered by Artificial Intelligence (AI). This role involves deep collaboration with cross-functional teams, focusing on manual functional testing with added exposure to AI-integrated features.

Key Responsibilities

Review product requirements with Product Owners and Business Analysts to ensure clarity and testability.

Design and execute detailed manual and exploratory test cases across web, mobile, and desktop applications.

Conduct functional, regression, integration, and UAT testing across platforms and devices.

Prioritize and optimize test cases based on risk and impact.

Test AI/LLM-driven features, validating behavior, outputs, and user interactions.

Perform internationalization (i18n) testing to ensure multi-language and locale compatibility.

Log, track, and manage defects using tools like Jira or Azure DevOps; collaborate for swift resolution.

Participate in crowd testing and analyze results to improve coverage.

Leverage user feedback and support data to provide quality insights.

Required Skills & Qualifications

Bachelor's in Computer Science or related field.

3+ years in functional testing with a strong grasp of SDLC/STLC.

Experience with test management tools (e.g., TestRail, Jira).

Familiarity with Agile/Scrum practices.

Interest in AI/ML and their impact on product testing.

Strong communication and collaboration skills.

Preferred (Nice to Have)

SQL knowledge for data validation.

Exposure to API testing (e.g., Postman).

Basic understanding of automation tools like Selenium or Playwright.

Experience with i18n and UX-focused testing.

Must-Haves:

Functional Testing 4/5

AI Awareness 3/5

SQL 3/5

SDET (Mobile UI, API, Web UI Test Automation)

Bangalore

About the Role

We are seeking a highly skilled Software Development Engineer in Test (SDET) with a strong foundation in mobile, API, and web test automation. You will play a pivotal role in ensuring the quality and reliability of our client's products by designing, developing, and executing comprehensive test automation frameworks.

Responsibilities:

Develop and maintain robust test automation frameworks for mobile, API, and web applications.

Design, implement, and execute automated test cases to cover various test scenarios.

Collaborate with development and QA teams to identify test automation opportunities and improve test coverage.

Analyze test results, identify defects, and work closely with development teams to resolve issues.

Stay up-to-date with the latest testing tools, technologies, and industry best practices.

Participate in code reviews and provide feedback on code quality and testability.

Contribute to the overall test strategy and automation roadmap.

Required Skills:

Strong programming skills in at least one language (Java, Python, JavaScript, etc.).

Experience with mobile test automation frameworks (Appium, Espresso, XCTest).

Proficiency in API testing tools and frameworks (Postman, Rest Assured, JMeter).

Expertise in web test automation frameworks (Selenium, Cypress, Playwright).
Solid understanding of software development lifecycle and testing methodologies.
Experience with CI/CD pipelines and test automation integration.
Excellent problem-solving and analytical skills.
Strong attention to detail and quality focus.

Preferred Skills:

Experience with performance testing and load testing.
Knowledge of cloud-based testing platforms.
Experience with test data management.
Understanding of security testing concepts.

dyuti@acyutaenterprise.com

Job Title: Quality Assurance (QA) Engineer

Location: Bengaluru

Experience: 3–6 years

CTC: Upto 8,00,000 LPA

About Paywize

Paywize is building India's first Fintech OS, powering payouts, collections, connected banking, and bill pay infrastructure for modern businesses. Our systems handle hundreds of thousands of transactions daily across multiple rails (UPI, IMPS, NEFT, Cards, Wallets, VPA, BBPS, etc.). We are looking for a QA Engineer to ensure our systems are reliable, secure, and scalable.

Key Responsibilities

Design, write, and execute manual and automated test cases for RESTful APIs, frontend dashboards (React.js), and backend services (Node.js).

Validate transactional workflows (e.g., Payouts, Collections, Wallet updates, Reconciliation).

Develop automation test scripts using tools like Postman, Cypress, Selenium, Playwright, or REST Assured.

Perform load testing and stress testing of high-TPS systems using JMeter or k6.

Conduct regression, integration, and smoke testing for every release cycle.

Work closely with developers to debug production issues and reproduce edge cases.

Maintain test coverage and ensure compliance with PCI-DSS and ISO 27001 testing protocols.

Build and manage CI/CD testing pipelines (e.g., GitHub Actions, GitLab CI).

Own data integrity validation across distributed microservices and databases (PostgreSQL, Redis, RabbitMQ).

Contribute to test strategy for multi-wallet architecture, rate limiting, and webhook delivery verification.

Required Skills

3+ years of QA experience in fintech, banking, or transactional platforms.

Strong knowledge of API testing, SQL, and working with JSON, JWT, encryption (AES256).

Experience with load testing, security test scenarios, and sandbox/test environment management.

Hands-on with tools like Postman, Swagger, JMeter, k6, Cypress, Selenium, Git.

Familiarity with transaction reconciliation, ledger validations, and audit logs.

Understanding of queue-based architectures (RabbitMQ/SQS/Kafka) is a plus.

Shared by **Job Curator** - Join us on Telegram: <https://t.me/testingexperiencedopenings>
This document is for Subscribed Members only. **If you notice this is shared publicly by anyone pls report to us** on info@jobcurator.in or whatsapp +91 9014875399

Basic knowledge of Kong Gateway, Keycloak, and PCI/ISO audit practices preferred.

Nice to Have

Exposure to Node.js, Laravel, or React environments.

Familiarity with bank-grade environments, fraud detection workflows, and KYC/AML validation systems.

Experience testing real-time monitoring dashboards, wallet freeze flows, or SwitchQ (smart routing) modules.

Why Join Us?

Be part of a mission-critical fintech platform serving some of India's top merchants and platforms.

Contribute to nation-scale systems with daily TPS in the thousands.

Work with a tech-forward team building fully secure, modular financial infra.

Competitive compensation, flexible work culture, and fast career growth.

We're Hiring: Senior Software Development Engineer in Test (SDET)

Location: Bangalore

Experience: 4+ Years

Are you passionate about shaping the future of grocery retail through technology? Join a fast-scaling ecommerce platform that is transforming how millions of Indians shop for groceries every month. With operations across 30+ cities and millions of monthly orders, we're reimagining supply chains and customer experience — and we're just getting started. We are looking for a Senior SDET who thrives in a high-performance environment and has a strong foundation in building scalable, automated test frameworks for modern web and mobile applications.

What You'll Do:

Design and develop robust automation frameworks for web, mobile, and backend services. Collaborate with development and product teams to create scalable and maintainable test plans and cases. Own end-to-end test strategy, execution, and reporting for large-scale ecommerce modules. Build reusable libraries and maintain object repositories within the automation framework. Perform functional, regression, and performance testing to ensure product quality. Contribute to CI/CD pipeline improvements with automated test coverage.

What We're Looking For:

B.Tech in Computer Science or related field.
Hands-on experience with automation tools like Selenium, Appium, or Rest Assured.
Strong programming skills in Java, with exposure to Python or JavaScript being a plus.
Proficiency in databases like SQL/MySQL.
Experience in performance testing using JMeter is a bonus.
Strong foundation in test design, test case creation, and defect management.
Self-motivated team player who thrives in a fast-paced, startup-like environment.
Excellent communication and analytical skills.

https://www.linkedin.com/posts/khushi-gunwant-humanresources_hiring-sdet-automationtesting-activity-7353291717460054016-MoZm?utm_source=share&utm_medium=member_desktop&rcm=ACoAAckCjQwBqKVTuDI60WDo276YwlzAY1hHiI8

SLK is looking for Test Architects (Immediate Joiners ONLY)

Job Title: Architect – Testing

Location: Devanahalli, Bangalore

Work Mode: Hybrid / On-site

Experience: 10+ years of experience in QA and DevOps roles, with a strong focus on automation testing and CI/CD pipeline creation.

Job Summary: We are seeking a seasoned QA Architect to join our dynamic team. The ideal candidate will have extensive experience in automation testing and test automation frameworks, creating and managing Continuous Testing (CT) pipelines, and a deep understanding of DevOps practices. This role requires a strategic thinker who can design, implement, and maintain robust testing frameworks and CI/CD pipelines to ensure the highest quality of our software products.

Key Responsibilities:

Design and Develop Automation Frameworks: Create and maintain scalable automation testing frameworks using tools like Selenium, UFT, Katalon, Tosca or similar No Code Low code tool.

Continuous Testing Pipeline: Design, implement, and manage Continuous Testing (CT) pipelines to integrate with CI/CD processes.

Collaboration: Work closely with development, QA, and operations teams to ensure seamless integration of testing processes.

Test Strategy: Develop and implement comprehensive test strategies, including functional, performance, and security testing.

Technical Leadership: Provide technical guidance and mentorship to QA and DevOps teams.

Monitoring and Reporting: Set up monitoring and reporting mechanisms to track the effectiveness of testing processes and identify areas for improvement.

Tool Selection: Evaluate and select appropriate testing tools and technologies to meet project requirements.

Defect Management: Identify, track, and manage defects throughout the software development lifecycle.

Documentation: Maintain detailed documentation of testing processes, frameworks, and results.

Technical Skills: Proficiency in programming languages such as Java, Python, or similar.

Hands-on experience with automation tools like tools like Selenium, UFT, Katalon, Tosca or similar no code low code tool.

DevOps Expertise: In-depth knowledge of DevOps practices, such as Jenkins, GitLab CI, or similar and including CI/CD, containerization (Docker, Kubernetes), and cloud platforms (AWS, Azure, GCP)

Problem-Solving: Strong analytical and problem-solving skills to quickly identify and resolve issues.

Communication: Excellent communication and collaboration skills to work effectively with cross-functional teams.

Education: Bachelor's or Master's degree in Computer Science, Engineering, or a related field.

Preferred Qualifications:

Certifications: Relevant certifications in QA, DevOps, or cloud technologies.

Leadership: Proven experience in leading and mentoring technical teams.

Agile Methodologies: Familiarity with Agile and Scrum methodologies.

Please share your CV's to : akshaya.b@slksoftware.com

🚀 We're Hiring: ServiceNow QA/Tester

📍 Location: Offshore (Preferred: Bangalore or Hyderabad)

🧠 Experience: 5–8 Years

💼 Type: Full-Time | FTE with one of our End Customers

🕒 Notice Period: Immediate to 15 Days

Are you a seasoned QA professional with a passion for ensuring high-quality ServiceNow implementations? We're looking for a ServiceNow QA/Tester to join our growing team. You'll be responsible for leading testing efforts across ServiceNow CSM modules, ensuring robust, compliant, and high-performing solutions.

🔧 Key Responsibilities:

Lead and execute QA testing for ServiceNow CSM projects using Agile methodology.

Create and maintain test plans, test cases, and test scripts across CSM, Portals, and the ServiceNow platform.

Coordinate with business analysts and developers to ensure comprehensive test coverage.

Execute manual and automated tests, including ATF; document and track defects to resolution.

Mentor junior testers and enforce QA best practices.

Participate in requirement/design reviews and sprint ceremonies.

Report test status, quality metrics, and assessments to stakeholders.

Continuously enhance QA processes and stay updated on platform features and trends.

✓ Required Qualifications:

Bachelor's in Computer Science, IT, or related field.

5–8 years in QA, with 3+ years in ServiceNow testing.

Strong understanding of ServiceNow architecture and workflows.

Hands-on experience with Selenium, ATF, and defect tracking tools (JIRA, ServiceNow).

Experience in Agile/Scrum environments.
Strong analytical and communication skills.

Preferred Certifications: ServiceNow Certified System Administrator, Certified Implementation Specialist.

🌟 Desired Skills:

Expertise in ATF, API testing, integration validation
Familiarity with ITIL processes and ServiceNow's CSM modules.
Strong documentation, leadership, and mentoring skills.
Passion for quality, automation, and continuous improvement.

📌 Why Join Us?

Work as an FTE with one of our prestigious end customers
Be part of mission-critical ServiceNow implementations
Collaborative, growth-driven work culture
Access to the latest in ServiceNow technologies and tools

🗂️ Immediate joiners highly preferred (Notice Period: 0–15 Days)

Interested or know someone who fits? Send your resume to
hanifarsangeetha@sightspectrum.com

We are looking for a Test Engineer with 3–6 years of experience to support testing activities for Wealth Management platforms. The ideal candidate should have a strong foundation in QA practices and a keen eye for detail in financial systems.

Immediate joiners are preferred.

Location:

Offshore: TVM/Bangalore

Onsite : Middle East Country

Key Responsibilities:

- Analyze business and functional requirements in the wealth management domain.
- Design and execute test cases for functional, regression, integration, and end-to-end testing.
- Conduct manual testing across CRM systems, investment modules, and reporting tools.
- Validate financial data, portfolio structures, fee calculations, and compliance logic.
- Log and manage defects using tools like JIRA or Azure DevOps.
- Collaborate with development and product teams to resolve issues efficiently.
- Perform API, UI, and data validation testing.
- Support SIT, UAT, and release validation cycles.
- Contribute to QA process improvements and automation readiness.
- Ensure adherence to industry testing standards and documentation practices.

Domain Knowledge (Preferred):

- Client Onboarding KYC
- Portfolio Investment Management
- Financial Planning Risk Compliance
- CRM Client Portals
- Reporting, Billing Fee Management
- Security, Access Control Audit

Candidates having above skill set, please share resumes to shilpa.thomas@testhouse.net
