job title-Automation Tester (Integrated Eligibility Systems)

sohini@cloudingest.com // w2 role

| Remote Work

Must have: Selenium, CICD, Jenkins, Bamboo

The Automation Tester will collaborate with cross-functional teams to develop and execute automated testing strategies, ensuring thorough testing of Eligibility and Interfaces modules. The Automation Tester will be responsible for automating end-to-end testing processes and identifying opportunities to enhance the quality and efficiency of the system.

Essential Job Functions

Develop and execute automated tests for Integrated Eligibility systems, including programs, data conversion processes, and modules related to Eligibility and Interfaces.

Automate and maintain test scripts to ensure complete testing across the Eligibility and Interfaces modules.

Record problems and issues per the project's problem and issue management plans.

Define and implement automation strategies, goals, and deliverables to ensure robust test coverage for the entire system lifecycle.

Identify, track, and manage defects through automated test execution, ensuring that issues are resolved on time.

Work with stakeholders and cross-functional teams to review automated test results and validate system functionality.

Inform the test lead of any issues that may affect the schedule, budget, or quality of the product or the testing process.

Maintain and update test plans, test cases, and test scripts, ensuring that all automation testing efforts are well-documented.

Other duties assigned.

Required Skills and Abilities

10+ years of experience in automation testing, including the development and execution of automated test scripts for integrated systems.

3+ years of experience with Integrated Eligibility systems, with experience in automating tests for Eligibility and Interfaces modules.

Experience in defining and automating test cases for system processes, including case/claim lifecycles and converted data.

Ability to identify test automation opportunities and provide solutions to improve testing speed, efficiency, and coverage.

Experience with defect tracking tools and continuous integration tools.
Strong analytical and troubleshooting skills with the ability to analyze and resolve test automation challenges.
Excellent communication skills to collaborate effectively with developers, business analysts, and other stakeholders.

Education

Bachelor's or master's degree in a relevant field, such as Information Technology, Computer Science, or Business Administration.

Required Experience and Qualifications for this Role

Minimum of 10 years of overall testing experience.

At least 3+ years of automation testing experience within Integrated Eligibility projects.

In-depth knowledge of Integrated Eligibility systems and modules, including end-to-end test automation for Eligibility and Interfaces.

Web Content Accessibility Guidelines (WCAG)

Proven experience with test automation frameworks and scripting languages

Job Requisition: Senior Test Automation Engineer

Location: Remote Virginia

Experience: 13+years

Resumes: jobs@apexsynctech.com

Job Summary

We are seeking a highly skilled and experienced Senior Test Automation Engineer to join our QA team. The ideal candidate will have a strong background in test automation using Selenium and a deep understanding of testing Python-based applications hosted on AWS. This role involves designing, developing, and maintaining automated test scripts to ensure the quality and reliability of our software products.

=====

We're Hiring: QA Tester (1–4 Years Experience)

Location: USA (Remote/Onsite – as per client requirement)

Visa: USC / GC / OPT / H4-EAD

We are looking for a skilled and motivated QA Tester to join our growing team. This is a great opportunity for candidates with 1–4 years of experience in software quality assurance who are passionate about delivering high-quality applications.

Key Responsibilities:

Design, develop, and execute test cases (manual or automated)

Identify, document, and track software defects

Work closely with developers and business teams to ensure quality deliverables

Participate in Agile ceremonies and contribute to testing strategy

Preferred Skills:

Experience with tools like Selenium, Postman, JIRA

Good understanding of SDLC, STLC, Agile/Scrum methodologies

Basic scripting or programming knowledge is a plus

Strong communication and analytical skills

=====

We're Hiring: Automation QA Engineer (Web & Mobile)

Experience: 3–6 Years

Education: B.E./B.Tech., MCA

Are you passionate about ensuring software quality through automation and manual testing? Do you thrive in a fast-paced environment and enjoy working on cutting-edge technologies in the OTT space? We're looking for a skilled Automation QA Engineer to join our growing team!

Role Overview:

As an Automation QA Engineer, you'll be responsible for designing, implementing, and maintaining test automation frameworks and contributing to overall product quality on Web and Mobile Web platforms. Experience in the OTT industry is a bonus!

Key Responsibilities:

1. Automation:

Design, implement, and maintain automation frameworks (Java/Python, BDD – Cucumber)

Use Selenium/Appium for browser and mobile testing

Leverage cloud/remote devices for automation

Integrate CICD pipelines (Git/Jenkins) for remote execution

Build automation dashboards and performance KPI frameworks

Use shell scripting and version control for robust code management

2. Manual Testing:

Conduct functional, regression, exploratory, ad-hoc, security, integration, and system testing

Perform Audio/Player playback testing and use tools like Charles/proxy to monitor APIs

Analyze crash/network logs and understand analytics tools

Work with APIs and CMS platforms

Tools & Technologies:

Selenium, Appium, Cucumber, Eclipse IDE

Charles, Jenkins, Jira, Confluence

Java, Python, Shell scripting

Exposure to Web Services, API Gateways, Cloud platforms (AWS/GCP/Azure), and CDNs

What We're Looking For:

3–6 years of experience in automation and manual testing

Solid understanding of SDLC/STLC and Agile processes

Proficiency in coding and logical problem-solving

Experience in building frameworks from scratch

A proactive, detail-oriented, quality-first mindset
