🚀 We're Hiring: Junior Business Analyst – Credit Risk | 4–6 Yrs | Immediate Joiners
📍 Locations: Bangalore | Hyderabad | Pune | Gurgaon

Are you passionate about credit risk and ready to make a meaningful impact in a fast-paced, highly collaborative environment? Join us as a Junior Business Analyst (Credit Risk) and play a vital role in shaping strategic financial initiatives that influence critical business decisions.

💠 About Us

We're a leading global financial services organization with a strong commitment to innovation, regulatory excellence, and talent development. Our culture values integrity, ownership, and continuous learning, offering you a dynamic platform to grow alongside top industry professionals.

🎯 What You'll Do

As a Junior Business Analyst in the Credit Risk domain, you'll:

- Drive business analysis across PD, LGD, EAD, and RWA calculations
- Collaborate closely with business leads and cross-functional teams
- Lead change initiatives and ensure CRDVI compliance across the board
- Support implementation, testing, reporting, and regulatory documentation
- Act as the key liaison for internal stakeholders and regulatory bodies

📁 What We're Looking For

- ✅ 4–6 years of experience in Business Analysis, preferably in Wholesale Banking
- ✅ Strong understanding of credit risk concepts (PD, LGD, EAD, RWA)
- ✅ Exposure to CRDVI implementation and regulatory compliance
- ✅ Experience in data analysis, change management & process re-engineering
- ✅ Excellent communication, stakeholder management, and analytical skills
- ✅ Preferred certifications: CBAP, Change Management, Lean Six Sigma

✨ Why Join Us?

- Be part of a transformation journey in a highly regulated and critical business function
- Work with experienced professionals across domains
- Continuous learning opportunities & career progression
- Inclusive work culture that promotes balance and innovation

👉 Ready to Elevate Your Career?

We are looking for a skilled and detail-oriented Loan IQ QA Engineer/Lead to join our growing Quality Assurance team!

If you have hands-on experience with Loan IQ, a strong grasp of corporate lending workflows, and a passion for ensuring product quality, we'd love to hear from you.

📍 Location: Bengaluru, Pune, Hyderabad, Chennai, Gurugram

👤 Experience: 5 to 8 Years

🕒 Employment Type: Full-time

Key Highlights:

- ◆ Solid experience in Loan IQ testing
- ◆ Deep understanding of commercial lending and loan lifecycle
- ◆ Strong skills in test planning, execution, and defect tracking
- ◆ Collaborate with cross-functional teams (BA, Dev, Product)
- ◆ Experience with SQL, JIRA, and test automation is a plus

This is a great opportunity to work on critical QA initiatives in the corporate lending domain, ensuring the robustness and accuracy of the Loan IQ application.

 We're Hiring: Product Manager – Fintech (Bank/NBFC Collaboration)

 Location: Chennai |  Experience: 3–6 Years (flexible for the right candidate)

 Industry: Fintech / Financial Services |  Employment Type: Full-Time

We are looking for a sharp and proactive Product Manager to lead and deliver solutions at the intersection of technology and finance. If you've worked closely with Banks, NBFCs, or regulated fintech environments, this could be your next big career move!

 Role Overview

This role will be the crucial link between partner banks/NBFCs and internal teams—responsible for defining product flows, managing delivery in agile sprints, and ensuring products align with compliance and business needs.

 Key Responsibilities:

Collaborate with partner Banks and NBFCs to understand business and regulatory

requirements.

Translate partner inputs into PRDs, user stories, and product flows.

Manage the product roadmap, lead agile sprints, and work with cross-functional teams (engineering, QA, design).

Monitor KPIs, feedback, and improve product performance.

Ensure compliance and security requirements are integrated into product development.

Be the single point of contact for priorities, deliverables, and stakeholder expectations.

✅ Ideal Candidate Has:

3–6 years of Product Management experience in lending, payments, or banking tech.

Strong exposure to Bank/NBFC partnerships and familiarity with LMS/LOS platforms.

Experience working in agile/scrum environments with tools like Jira or Trello.

A track record of handling API integrations, regulatory workflows, and stakeholder communication.

Technical understanding to work effectively with development teams.

🏠 Preferred Background:

Candidates with experience in Banks, NBFCs, or leading fintechs building lending/payment platforms.

✉ Interested or know someone suitable?

Send your resume to [balakumar@softonehr.com]/Whatsapp- 7823907362] or DM for a quick discussion. Let's build the future of financial technology together!

We are hiring for Guidewire Testing for our MNC based client

Location: Hyderabad and Chennai

Experience: 4 to 6 Years

Notice Period : Immediate to 90 Days

Full-Time

Job Summary:

The Automation Guidewire Tester is responsible for designing, developing, and executing automated tests to ensure the quality and functionality of Guidewire applications. This role involves collaborating closely with developers, business analysts, and other QA team members to create and maintain automated test scripts that validate Guidewire software modules and integrations. The tester will also work on improving test coverage, reducing manual testing efforts, and ensuring that the Guidewire applications meet business requirements.

Key Responsibilities:

1. Automation Test Development:

- o Design, develop, and maintain automated test scripts for Guidewire applications (PolicyCenter, BillingCenter, ClaimCenter) using appropriate automation tools.

- o Build and enhance the existing test automation framework to improve efficiency and reusability.

- o Write clear and concise test cases that cover all aspects of functionality, integration, and performance.

2. Test Planning and Execution:

- o Develop and execute test plans, test cases, and test scripts for functional, regression, and performance testing.

- o Identify, document, and track bugs using defect management tools, ensuring they are addressed and resolved by the development team.

- o Perform test data preparation and work closely with the development team to ensure test environments are properly configured.

3. Collaboration and Communication:

- o Collaborate with cross-functional teams, including developers, business analysts, and project managers, to understand business requirements and translate them into test scenarios.

- o Participate in Agile/Scrum ceremonies such as sprint planning, daily stand-ups, and retrospectives, providing updates on testing progress and identifying any blockers.

Strong understanding of Guidewire modules (PolicyCenter, BillingCenter, ClaimCenter)

Hiring [#Cypress](#) [#Typescript](#) [#Java](#) # C# [#sql](#) [#Hyderabad](#) [#chennai](#) [#workfromoffice](#)
[#pallavaram](#)

Job Title: Test Engineer

Experience: 4+ Years

Location: Chennai(Pallavaram) or Hyderabad-WFO

Employment Type: Full-Time

Job Summary:

We are looking for a skilled and experienced Test Engineer with 4+ years of hands-on experience in automation testing. The ideal candidate will have strong expertise in Cypress, TypeScript, Object-Oriented Programming (OOP), SQL, and proficiency in programming languages like C# or Java. You will be a key contributor in building reliable, scalable, and maintainable automation frameworks and ensuring high product quality.

Key Responsibilities:

Design, develop, and execute automated test scripts using Cypress.
Leverage TypeScript and apply OOP principles to create efficient test solutions.
Write and optimize SQL queries for data validation and backend testing.
Collaborate with cross-functional teams to understand product requirements and test coverage needs.
Perform defect analysis, root cause identification, and work with developers to resolve issues.
Enhance automation frameworks and contribute to CI/CD integration.
Review peer test cases and support junior QA members when required.

Required Skills:

4+ years of experience in software testing with a focus on automation.
Hands-on experience with Cypress and TypeScript.
Strong understanding of OOP concepts.
Proficiency in SQL for querying and validating data.
Experience in at least one programming language – C# or Java.
Familiarity with source control (e.g., Git) and CI/CD pipelines.
Strong analytical, debugging, and communication skills.

Nice to Have:

API testing experience (Postman, REST Assured, etc.).
Experience working in Agile/Scrum teams.
Knowledge of performance testing tools and basic scripting.

Are you an experienced ETL/MDM Tester with a strong background in GxP validation? Join our team to work on exciting, compliance-driven projects in the life sciences/pharma domain!

🔍 What we're looking for:

- ✓ 3–5 years of hands-on experience in ETL & MDM testing
- ✓ Strong SQL skills and experience with tools like Informatica, Talend, Reltio or IBM MDM
- ✓ Solid understanding of GxP, 21 CFR Part 11, and validation lifecycle (CSV, IQ/OQ/PQ)
- ✓ Experience with defect tracking and test management tools (JIRA, ALM, etc.)
- ✓ Excellent communication & documentation skills

🌱 GxP Validation is a must – we're looking for professionals who can operate in regulated environments with a quality-first mindset.

📍 Location: On-site [Chennai, Pune]

🚀 Availability: Immediate joiners preferred

👤 Type: Full-time

If you're ready to contribute to high-impact projects in a collaborative team and grow your career in a regulated environment, we want to hear from you!

👉 Apply now or tag someone who'd be a great fit.

We're Hiring: Senior QA Engineer (Automation Testing)

📍 Location: Bangalore (Whitefield)

👤 Experience: 6–7 Years

🕒 Join Time: Immediate to 15 Days Preferred

Automation isn't the future — it's now.

At GammaStack, we're on the lookout for a Senior QA Engineer who's passionate about driving quality through smart, scalable, and robust automation systems.

This isn't just a QA role — it's an opportunity to build, innovate, collaborate, and lead testing strategies that keep us ahead of the curve.

What You'll Be Doing:

Design and Develop Automation Systems: Create automated processes and systems to streamline operations in manufacturing, IT, and other sectors.

Testing and Monitoring: Conduct rigorous testing of automated systems to ensure they meet performance standards and function correctly.

Collaboration: Work with cross-functional teams to identify opportunities for automation and align automation strategies with business goals.

Documentation: Maintain detailed documentation of projects, including materials, costs, and system specifications.

Troubleshooting: Identify and resolve issues within automated systems, providing technical support as needed.

Training: Educate staff on the operation and maintenance of automated systems.

What We're Looking For:

A sharp eye for detail, a proactive mindset, and the ability to solve complex problems with clean, scalable automation solutions.

✉ Sound like you?

Send your resume to 📧 gvani@gammastack.com

We're Hiring: AI-Based Automated Tester | Bangalore (Hybrid)
Location: Bangalore
Join within 15 days | Immediate joiners preferred
If you thrive at the intersection of AI, automation, and quality engineering, we want to hear from you.

✅ What We're Looking For:

5+ years in software/product testing

Hands-on with AI/ML-powered testing platforms or have built AI-assisted frameworks

Skilled in automation scripting using Python, JavaScript, Java, or similar

Deep understanding of TDD, BDD, and risk-based testing

Experience with tools like Selenium, Cypress, Playwright, Appium

Exposure to AI-enhanced QA tools: Testim, AppliTools, Mabl, etc.

Strong agile mindset – daily standups, sprint planning, retrospectives

Good at root cause analysis and driving quality improvements

Familiar with CI/CD and integrating AI tools into pipelines

Passionate about modern QA trends, performance, usability, and exploratory testing using AI

🔍 If you're someone who believes in smart testing over repetitive testing, who wants to automate not just scripts but thinking, then this role is for you.

We are hiring for UI/UX Automation QA Engineer

Location: Bangalore(Preferred) Or Remote (100%)

Essential Duties and Responsibilities

- Develop automated UI test scripts using Tosca, focusing on dynamic and component-based interfaces.
- Build and maintain reliable regression suites that support cross-browser and responsive

testing.

- Perform manual exploratory testing to validate visual fidelity, interaction behavior, and user experience flow.
- Attend and participate in design reviews to bring early awareness to otherwise unforeseen use cases that should be considered.
- Validate components built with Angular, Kendo, and Web Components for visual and behavioral consistency.
- Ensure alignment with design specifications and accessibility standards (WCAG), including keyboard navigation, ARIA roles, and contrast compliance.
- Collaborate closely with designers to test against mockups and UX patterns.
- Participate in Agile/SAFe ceremonies and work collaboratively with cross-functional teams to deliver high-quality features.
- Maintain and manage QA test environments and validate deployments.
- Capture and analyze QA metrics and report insights to the team.
- Contribute to test documentation, reusable test strategies, and overall process improvements.
- Mentor junior QA engineers and provide guidance on best practices in UI/UX-focused testing.

Qualifications & Skills

- 6+ years of experience in software quality assurance, with 3–5 years in frontend/UI-focused roles.
- Hands-on expertise with Tosca for UI test automation and debugging.
- Strong understanding of component-based UI frameworks like Angular, Kendo, and Web Components.
- Proven experience in cross-browser and responsive testing practices.
- Familiarity with visual regression testing tools.
- Knowledge of accessibility standards (WCAG), including testing for screen readers, keyboard support, and semantic HTML.
- Skilled in Azure DevOps for test execution, tracking, and CI integration.
- Excellent attention to detail, communication skills, and collaborative mindset.
- Experience working in Agile/SAFe environments with designers, developers, and product owners.

- ✅ Strong in JavaScript ES6+ for test automation
- ✅ Experience with REST API testing (Postman/JS)
- ✅ CI/CD integration using Jenkins
- ✅ Comfortable with Git workflows
- ✅ Familiar with JIRA/TestRail for test management
- ✅ Strong understanding of DOM, CSS Selectors, and browser debugging
- ✅ Agile environment experience with sprints, grooming, and test planning

Nice to Have:

✨ HyperExecute (LambdaTest), Docker, Lighthouse/Playwright for performance audits, and mentoring exposure.

This role will involve building and maintaining Playwright test suites for high-traffic, complex web applications, working closely with developers and product stakeholders in Agile teams.

📍 Location: Bangalore / Hyderabad (Hybrid, 3 days onsite)
