🎯 Now Hiring: [#SeniorProjectManager](#) 🌐

📍 Location: [#Gurgaon](#) ([#Hybrid](#)) | 🕒 Shift: 6 AM – 2 PM IST ([#Australian](#) time zone)

📅 [#Immediatejoiners](#) preferred

We're hiring a [#ProjectManager](#) to join a fast-paced, collaborative environment supporting a [#globalbanking](#) client.

This is not your everyday PM role—this one sits at the intersection of delivery, testing, and global leadership.

 What You'll Do:

- 🔧 Drive project delivery through the SDLC
- 💬 Communicate with global business and tech stakeholders
- 📊 Build and publish clean, insightful dashboards
- 🧠 Support testing efforts and coordinate cross-functional teams
- 🕒 Work in Australian timezone (6 AM to 2 PM IST)
- 🏢 Be open to 2–3 days/week in office (hybrid)

✨ What You Bring:

- ✓ 10+ years of project management experience
- ✓ Strong command over delivery, risk handling, and reporting
- ✓ Ability to simplify the complex and keep everyone aligned
- ✓ Calm under pressure, clear in communication

This is a critical role with high visibility across regions.

Shared by **Job Curator** - Join us on Telegram: <https://t.me/testingexperiencedopenings>

You'll be contributing to a transformation that impacts thousands—while working alongside smart, driven people.

## INNOVA IS HIRING SFMC QA.

Location : Pune/Bangalore/Gurgaon/Noida  
Exp Range : 4 to 6 Years  
Work Mode : Hybrid

### Job Description-

Marketing Cloud Quality Assurance (QA) Tester is responsible for ensuring the quality and functionality of marketing campaigns and assets developed within the Salesforce Marketing Cloud platform. They perform thorough testing of content, email templates, automation workflows, landing pages, data integrations, and other marketing assets to identify any defects or issues before deployment. This role involves collaborating with stakeholders to understand requirements, developing test plans, executing test cases, and providing feedback for improvements.

### Duties & Responsibilities

- Develop robust test strategy and test plans from feature requirements
- Submit defects and follow-up with the development team
- Identify qualify defects on the product and work with development for faster resolution and verification
- Help development teams to narrow down failures.
- Perform thorough testing of dynamic content/ampscript, email templates, automation workflows, landing pages, data integrations, and other marketing assets to identify any defects or issues before deployment.
- Executing functional, regression, and performance testing of marketing assets within Salesforce Marketing Cloud.
- Providing feedback and recommendations for improving the user experience and overall quality of marketing campaigns.
- Maintaining test documentation and reporting on testing progress and results.

### Specifications

### Education and Experience

- 3+ years professional experience testing enterprise products
- Strong manual testing experience, development/execution of test cases.
- Ability to test both back-end and front-end items in SFMC, including email, landing pages, integrations, data extensions, automations and journeys
- Knowledge of SQL, AMPscript programming languages to validate logic of code.
- Experience with enterprise CRM/Database/ESP platforms.
- Experience testing within Salesforce Marketing Cloud (Email Studio, Journey Builder, Automation Studio).
- Familiarity with Litmus or similar email testing platforms.
- Understanding of email marketing best practices, CAN-SPAM Act, GDPR, and other relevant regulations.

QA background including communications (Email, SMS, Push Notifications) is a must.

Preferred technical and professional experience

- Bachelor's degree in computer science or similar
- Salesforce Marketing Cloud Administrator certification
- Salesforce Marketing Cloud Email Specialist
- Workflow tool experience (Jira, Workfront, etc.)
- Knowledge of HTML, CSS, and JavaScript is a plus, as it relates to testing email templates and landing pages.
- Experience with Salesforce Marketing Cloud or similar marketing automation platforms.

Truminds is hiring Python Automation professionals with experience in the Networking domain.

Company: Truminds Software Systems

Job Location: Bangalore/Hyderabad/Gurugram/Chennai

Experience: 6-12 years

Job Description:

1. Strong programming skills in Python.
2. Hands-on experience with automation framework development for networking systems.
3. Deep understanding of IP networking concepts such as TCP/IP, DHCP, DNS, VLANs, L2/L3 Routing Protocols (BGP, OSPF), MPLS, NAT, etc.
4. Experience working with network devices (routers, switches, firewalls) and CLI-based interactions.
5. Familiarity with REST APIs, SNMP, and other common network management interfaces.
6. Proficiency in using tools such as PyTest, Robot Framework, or custom-built frameworks.
7. Experience with Linux/Unix environments and shell scripting.
8. Exposure to CI/CD tools like Jenkins, GitLab, or similar.

Key Responsibilities

1. Lead the automation efforts for IP networking systems, including test strategy, framework design, and implementation.
2. Design and develop robust and reusable test automation scripts and libraries using Python.
3. Collaborate with DevOps, QA, and development teams to integrate automation into CI/CD pipelines.
4. Review and contribute to requirements, architecture, and design documents from an automation perspective.
5. Develop test plans and test cases for validating Layer 2/Layer 3 protocols, routing, switching, and other networking technologies.
6. Conduct regular code reviews and ensure best practices in software development and test automation.
7. Work with network simulators/emulators, physical and virtual test beds, and traffic generators.

Anyone interested to apply or seek more information, please email me your resume to

🚀 Be part of a dynamic team where quality meets innovation!

=====

📢 We're Hiring! Software Tester (QA)

🔍 Location: Noida | 🕒 Full-time

👛 Experience: 1–2 years

💰 CTC: Up to ₹5 LPA (incl. variable)

Are you passionate about quality and precision in software? ✨

We're on the lookout for a detail-oriented and highly motivated Software Tester to join our dynamic team!

If you thrive in fast-paced environments, love identifying bugs, and enjoy collaborating across teams 🤝 — we want to hear from you!

🔧 What You'll Do:

- Plan and design detailed test strategies and cases
- Execute manual and automated testing for software applications
- Track, document, and prioritize defects
- Develop and maintain automation scripts (e.g., Selenium with Python)
- Collaborate with development teams to integrate QA into CI/CD workflows
- Generate and share test reports with stakeholders
- Contribute to process improvement and QA best practices

🔧 What We're Looking For:

- Proven experience in software testing and QA
- Strong knowledge of testing methodologies
- Familiarity with automation tools (e.g., Selenium), version control (Git), and CI/CD
- Exposure to performance and security testing is a plus

🎓 Education & Skills:

- Bachelor's degree in Computer Science, IT, Engineering, or related field
- Strong analytical, problem-solving, and time management skills
- Excellent communication skills in English and Hindi
- Extreme attention to detail and a proactive attitude
