[#Hiring](#) [#QAAutomation](#) [#UIAutomation](#) [#Chennai](#) [#Bangalore](#) [#Hyderabad](#)

Perficient India is actively seeking experienced professionals for QA Automation Tester with a Min. 6+ years of Exp.

Ideal candidates who can join within 15 days are highly preferred.

We are open Chennai/Bangalore/Hyderabad.

Interested can reach out to nithya.jayakumar@perficient.com.

Join us in shaping the future of digital transformation!

=====

 We're Hiring in Hyderabad!

Do you break things just to make them better?

We're looking for a QA Engineer to join us onsite in Hyderabad, India.

 Manual & Automation Testing

 Mobile & Functional Testing

 Strong API experience is a must!

 Send your resume to: abkhan@master-works.sa

Let's build bug-free brilliance together 

=====

 We're Hiring: QA Engineer – On-site | Hyderabad

Are you passionate about software quality and reliability? Join our growing team and play a key role in ensuring our products meet the highest standards.

 Location: Hyderabad (On-site)

 Type: Full-time

 Role Overview:

As a QA Engineer, you will:

Design and execute test plans

Perform manual and automated testing

Identify, document, and track defects

Shared by **Job Curator** - Join us on Telegram: <https://t.me/testingexperiencedopenings>

Collaborate closely with developers and cross-functional teams
Ensure application quality, performance, and compliance with requirements
Maintain test documentation and drive continuous QA improvements

🎯 What We're Looking For:

- ✅ Experience in both Manual & Automated Testing
- ✅ Strong QA methodologies knowledge
- ✅ Skilled in test planning, execution, and defect reporting
- ✅ Familiarity with bug tracking/test management tools (e.g., JIRA, TestRail)
- ✅ Strong problem-solving and analytical skills
- ✅ Bachelor's degree in Computer Science, Engineering, or related field
- ✅ Understanding of Agile methodologies

★ Bonus: Experience in AI or software product development environments

If you're looking for an opportunity to make a real impact in a dynamic and collaborative environment — we'd love to connect!

✉ DM me or tag someone who might be a great fit.

nshravan@master-works.sa

=====

🚀 We're Hiring: Data Engineer QA (ETL + Selenium)

📍 Location: Remote – 1–2 days/month at Office (Noida, Bangalore, Pune, Chennai, Hyderabad, Gurgaon, Indore)

🕒 Shift Timing: 11:00 AM – 8:30 PM IST

👛 Experience: 5+ Years

📄 Background Verification (BGV): Mandatory

✉ Apply Now: careers@teamteki.com

Are you a detail-oriented QA professional with a passion for data integrity and automation? Join TeamTeki and help us ensure the reliability of mission-critical data pipelines and systems!

🔧 Key Responsibilities

Build and maintain robust ETL test frameworks to validate complex data pipelines and transformations.

Conduct functional and regression testing across workflows and integrations.

Develop and manage automated test scripts using Selenium with Java or Python.

Perform data validation and reconciliation between source and target systems.

Collaborate with data engineers and analysts to ensure data accuracy, completeness, and integrity.

Align testing strategies with project goals through close coordination with QA leads, developers, and business analysts.

Document detailed test plans, test cases, and test results.

✅ Required Skills

5+ years of experience in QA and ETL testing

Strong hands-on expertise in ETL testing, including data validation and transformation logic

Proficiency in Selenium automation (Java or Python)

Experience with SQL, large datasets, and data profiling tools

Familiarity with Agile/Scrum methodologies and tools like JIRA

Shared by **Job Curator** - Join us on Telegram: <https://t.me/testingexperiencedopenings>

Excellent problem-solving, analytical, and communication skills

 Nice to Have

Experience with cloud data platforms (Azure, AWS, GCP)

Knowledge of data warehouses (Snowflake, Redshift, BigQuery)

Exposure to CI/CD pipelines and test automation tools

🌟 If you're passionate about data quality and automation, and thrive in a collaborative, fast-paced environment—we want to hear from you!

=====

 We're Hiring: QA Tester (Software + Unity)

 Hyderabad |  Full-time Bug Slayer |  Real Humans Only

 Do you:

See bugs in your dreams?

Find joy in breaking things on purpose?

Think “regression” is more terrifying than a horror movie?

Then congratulations — you might be our next QA Tester at Spatial Grid!

We're not just looking for someone to click buttons. We want someone who will hunt bugs like it's an Olympic sport, interrogate Unity like a detective, and spot broken UX from a mile away.

 What you'll be poking (and testing):

VR/AR/MR/Web3D apps made in Unity (yes, the future is wild)

UI flows, gesture inputs, and spatial logic

Test plans so detailed, even NASA would be impressed

Controller interactions that don't suddenly make people fly off maps

 You, ideally:

Have 1+ years of QA experience

Can write and run test cases like a pro (software & Unity)

Have battle-tested VR/AR content before

Speak fluent Jira, Trello, or “whatever-the-devs-will-actually-use”

Don't scream when Unity crashes (again)

Bonus points if you:

Know a bit of JavaScript, C#, or C++

Understand how 3D performance tanks — and how to fix it

 What's in it for you?

Work on spatial magic (not the Hogwarts kind, the tech kind)

Collaborate with a wicked-smart team of devs, artists, and spatial nerds

Grow into QA leadership or product roles

Free bugs (just kidding, you're supposed to get rid of them)

 Ready to join the grid?

Send your resume to software@spatialgrid.ai

=====

 We're Hiring! | QA Engineer

 Location: Hyderabad

Work Mode: Hybrid (3 days from office)

Availability: Immediate joiners or candidates with a max 10-day notice period preferred

Key Requirements:

B.Tech/BE with 4–6 years of hands-on experience in test automation

Proficient in open-source tools like Selenium, C#, Playwright, and Cucumber

Experience working on PHP upgrade projects is a plus

Good knowledge of SCM tools: TFS, Git

Familiar with CI/CD pipelines using tools like Jenkins

Experience in Agile development environments

Strong communication, interpersonal, and problem-solving skills

Excellent analytical thinking and attention to detail

Send your resume to:

jagadeesh11.b@bs.nttdata.com

 PragmaEdge is Hiring! 

We have requirement for a "Product Manager"

Shared by **Job Curator** - Join us on Telegram: <https://t.me/testingexperiencedopenings>

Experience: 5-10 Years

Notice: Immediate - 15 days

Location: Hyderabad

Job Summary:

We are seeking a dynamic and detail-oriented Product Manager to lead the development and delivery of Java-based enterprise products. The ideal candidate will have strong expertise in Agile methodologies, sprint planning, backlog management, and proficiency with Azure DevOps. This is a customer-facing role that requires excellent communication skills, the ability to gather requirements, and translate them into actionable deliverables for development teams.

◆ Key Responsibilities:

- Act as the bridge between customers, stakeholders, and development teams to define and deliver high-value product features.
- Own and manage the product backlog, ensuring it is well-groomed, prioritized, and aligned with business goals.
- Lead sprint planning, retrospectives, and daily stand-ups, ensuring Agile best practices are followed.
- Collaborate closely with engineering teams working on Java-based backend systems and applications.
- Use Azure DevOps to manage user stories, tasks, bugs, and sprints.

Conduct customer interviews, demos, and feedback sessions to shape product enhancements and roadmap priorities.

- Work with UX/UI designers, QA, and dev teams to ensure high-quality product delivery.
- Maintain a clear product vision and communicate the roadmap to both technical and non-technical stakeholders.
- Analyze product performance and make data-driven decisions for continuous improvement.

◆ Required Skills & Qualifications:

- 5+ years of experience as a Product Manager or Product Owner in an Agile environment.
- Proven experience working on Java-based software products.
- Hands-on experience with Azure DevOps for backlog and sprint management.
- Strong understanding of Agile/Scrum principles.
- Exceptional skills in sprint planning, user story writing, and backlog grooming.
- Customer-facing experience with excellent verbal and written communication skills.
- Ability to work closely with cross-functional teams including development, QA, UX, and business stakeholders.
- Strong problem-solving skills with a proactive and results-oriented mindset.

◆ Preferred Qualifications:

- Familiarity with REST APIs, microservices, or cloud technologies.
- Experience in B2B enterprise product environments.
- Certifications like CSPO, SAFe PM/PO, or PMP are a plus.

Greetings from My3Tech.

Role: Senior / Lead QA Engineer (Manual + Automation)

Location: Madhapur, Hyderabad

Type: Full-time-Onsite

Experience: 8+ years (with proven experience leading QA efforts and implementing automation)

Overview:

We are seeking a Senior / Lead QA Engineer to lead the quality engineering function across our web, mobile, and backend platforms. The current testing process is predominantly manual, and this role requires someone capable of defining the QA vision, establishing test strategy, and implementing a scalable automation framework from the ground up. You'll be responsible for ensuring end-to-end quality in a tech stack that includes Node.js, Vue, React, Flutter, REST, GraphQL, and both SQL/NoSQL databases.

This is a senior leadership role, ideal for someone with hands-on skills and the strategic mindset to guide the team and influence product quality across the organization.

Required Skills:

- 8+ years of professional experience in QA engineering with both manual and automation focus.
- Strong understanding of modern tech stacks including:
 - o Web: Node.js, Vue.js, React.js
 - o Mobile: Flutter, iOS and Android platforms
 - o APIs: REST, GraphQL
 - o Databases: SQL, NoSQL

Shared by **Job Curator** - Join us on Telegram: <https://t.me/testingexperiencedopenings>

- Hands-on experience setting up and maintaining test automation frameworks and tools.
- Expertise in writing and executing detailed test cases, plans, and bug reports.
- Proficiency in test case management tools (e.g., TestRail), bug tracking (e.g., Jira), and source control (Git).

Preferred Qualifications:

- Prior experience in leading QA teams or projects.
- Exposure to native mobile automation or manual testing with Swift, Kotlin, or React Native apps.
- Familiarity with performance testing, load testing, and accessibility testing tools.
- Working knowledge of CI/CD systems, cloud environments (AWS, Azure), and containerized test environments (Docker).
- Experience in fast-paced startup or agile product delivery teams.

Please drop in resume to priyanka.s@my3tech.com

We're Hiring! QA Engineer – Cloud Engineering

Location: Hyderabad, India

Experience: 7–10 Years

Are you passionate about data quality, ETL testing, and ensuring seamless system integrations? Join our team as a QA Engineer and play a critical role in validating large-scale data workflows and integration points in a dynamic cloud environment.

What you'll do:

Test complex ETL pipelines & data transformations

Validate XML files and file-based data movements

Write and execute advanced SQL queries

Collaborate with cross-functional engineering & analytics teams

Own integration, system, and data validation testing end-to-end

What we're looking for:

7–10 years of QA experience in ETL/Data testing

Expertise in SQL Server & XML file validation

Strong understanding of data warehouse & integration concepts

Proven experience in test planning, defect tracking, and reporting

Familiarity with SDLC, STLC, Agile/Waterfall methodologies

If you thrive in a technically challenging role and have a sharp eye for data accuracy —
