 We're Hiring: Junior Business Analyst – Credit Risk | 4–6 Yrs | Immediate Joiners

 Locations: Bangalore | Hyderabad | Pune | Gurgaon

Are you passionate about credit risk and ready to make a meaningful impact in a fast-paced, highly collaborative environment? Join us as a Junior Business Analyst (Credit Risk) and play a vital role in shaping strategic financial initiatives that influence critical business decisions.

About Us

We're a leading global financial services organization with a strong commitment to innovation, regulatory excellence, and talent development. Our culture values integrity, ownership, and continuous learning, offering you a dynamic platform to grow alongside top industry professionals.

What You'll Do

As a Junior Business Analyst in the Credit Risk domain, you'll:

- Drive business analysis across PD, LGD, EAD, and RWA calculations
- Collaborate closely with business leads and cross-functional teams
- Lead change initiatives and ensure CRDVI compliance across the board
- Support implementation, testing, reporting, and regulatory documentation
- Act as the key liaison for internal stakeholders and regulatory bodies

What We're Looking For

-  4–6 years of experience in Business Analysis, preferably in Wholesale Banking
-  Strong understanding of credit risk concepts (PD, LGD, EAD, RWA)
-  Exposure to CRDVI implementation and regulatory compliance
-  Experience in data analysis, change management & process re-engineering
-  Excellent communication, stakeholder management, and analytical skills
-  Preferred certifications: CBAP, Change Management, Lean Six Sigma

Why Join Us?

- Be part of a transformation journey in a highly regulated and critical business function
- Work with experienced professionals across domains
- Continuous learning opportunities & career progression
- Inclusive work culture that promotes balance and innovation

Ready to Elevate Your Career?

If you're a motivated BA professional with immediate availability, we want to hear from you! Apply now or tag someone who fits this opportunity.

 DM us or send your CV to [devidas@idyllicservices.in / mufaddal@idyllicservices.in]

We're Hiring: Product Manager – Fintech (Bank/NBFC Collaboration)

 Location: Chennai |  Experience: 3–6 Years (flexible for the right candidate)

 Industry: Fintech / Financial Services |  Employment Type: Full-Time

We are looking for a sharp and proactive Product Manager to lead and deliver solutions at the intersection of technology and finance. If you've worked closely with Banks, NBFCs, or regulated fintech environments, this could be your next big career move!

Role Overview

This role will be the crucial link between partner banks/NBFCs and internal teams—responsible for defining product flows, managing delivery in agile sprints, and ensuring products align with compliance and business needs.

 Key Responsibilities:

Collaborate with partner Banks and NBFCs to understand business and regulatory requirements.

Translate partner inputs into PRDs, user stories, and product flows.

Manage the product roadmap, lead agile sprints, and work with cross-functional teams (engineering, QA, design).

Monitor KPIs, feedback, and improve product performance.

Ensure compliance and security requirements are integrated into product development.

Be the single point of contact for priorities, deliverables, and stakeholder expectations.

 Ideal Candidate Has:

3–6 years of Product Management experience in lending, payments, or banking tech.

Strong exposure to Bank/NBFC partnerships and familiarity with LMS/LOS platforms.

Experience working in agile/scrum environments with tools like Jira or Trello.

A track record of handling API integrations, regulatory workflows, and stakeholder communication.

Technical understanding to work effectively with development teams.

 Preferred Background:

Candidates with experience in Banks, NBFCs, or leading fintechs building lending/payment platforms.

 Interested or know someone suitable?

Send your resume to [balakumar@softonehr.com/Whatsapp- 7823907362] or DM for a quick discussion. Let's build the future of financial technology together!

We are hiring for Guidewire Testing for our MNC based client

Location: Hyderabad and Chennai

Experience: 4 to 6 Years

Notice Period : Immediate to 90 Days

Full-Time

Job Summary:

The Automation Guidewire Tester is responsible for designing, developing, and executing automated tests to ensure the quality and functionality of Guidewire applications. This role involves collaborating closely with developers, business analysts, and other QA team members to create and maintain automated test scripts that validate Guidewire software modules and integrations. The tester will also work on improving test coverage, reducing manual testing efforts, and ensuring that the Guidewire applications meet business requirements.

Key Responsibilities:

1. Automation Test Development:

Shared by **Job Curator** - Join us on Telegram: <https://t.me/testingexperiencedopenings>

- o Design, develop, and maintain automated test scripts for Guidewire applications (PolicyCenter, BillingCenter, ClaimCenter) using appropriate automation tools.
- o Build and enhance the existing test automation framework to improve efficiency and reusability.
- o Write clear and concise test cases that cover all aspects of functionality, integration, and performance.

2. Test Planning and Execution:

- o Develop and execute test plans, test cases, and test scripts for functional, regression, and performance testing.
- o Identify, document, and track bugs using defect management tools, ensuring they are addressed and resolved by the development team.
- o Perform test data preparation and work closely with the development team to ensure test environments are properly configured.

3. Collaboration and Communication:

- o Collaborate with cross-functional teams, including developers, business analysts, and project managers, to understand business requirements and translate them into test scenarios.
- o Participate in Agile/Scrum ceremonies such as sprint planning, daily stand-ups, and retrospectives, providing updates on testing progress and identifying any blockers.

Strong understanding of Guidewire modules (PolicyCenter, BillingCenter, ClaimCenter)

We're Hiring: Senior QA Engineer (Automation Testing)

📍 Location: Bangalore (Whitefield)

👩‍💻 Experience: 6–7 Years

⏰ Join Time: Immediate to 15 Days Preferred

Automation isn't the future — it's now.

At GammaStack, we're on the lookout for a Senior QA Engineer who's passionate about driving quality through smart, scalable, and robust automation systems.

This isn't just a QA role — it's an opportunity to build, innovate, collaborate, and lead testing strategies that keep us ahead of the curve.

What You'll Be Doing:

Design and Develop Automation Systems: Create automated processes and systems to streamline operations in manufacturing, IT, and other sectors.

Testing and Monitoring: Conduct rigorous testing of automated systems to ensure they meet performance standards and function correctly.

Collaboration: Work with cross-functional teams to identify opportunities for automation and align automation strategies with business goals.

Documentation: Maintain detailed documentation of projects, including materials, costs, and system specifications.

Troubleshooting: Identify and resolve issues within automated systems, providing technical support as needed.

Training: Educate staff on the operation and maintenance of automated systems.

What We're Looking For:

A sharp eye for detail, a proactive mindset, and the ability to solve complex problems with clean, scalable automation solutions.

✉ Sound like you?

Send your resume to ➡ gvani@gammastack.com

We're Hiring: AI-Based Automated Tester | Bangalore (Hybrid)

Location: Bangalore

Join within 15 days | Immediate joiners preferred

If you thrive at the intersection of AI, automation, and quality engineering, we want to hear from you.

What We're Looking For:

5+ years in software/product testing

Hands-on with AI/ML-powered testing platforms or have built AI-assisted frameworks

Skilled in automation scripting using Python, JavaScript, Java, or similar

Deep understanding of TDD, BDD, and risk-based testing

Experience with tools like Selenium, Cypress, Playwright, Appium

Exposure to AI-enhanced QA tools: Testim, AppliTools, Mabl, etc.

Strong agile mindset – daily standups, sprint planning, retrospectives

Good at root cause analysis and driving quality improvements

Familiar with CI/CD and integrating AI tools into pipelines

Passionate about modern QA trends, performance, usability, and exploratory testing using AI

🔍 If you're someone who believes in smart testing over repetitive testing, who wants to automate not just scripts but thinking, then this role is for you.

We are hiring for UI/UX Automation QA Engineer

Location: Bangalore(Preferred) Or Remote (100%)

Essential Duties and Responsibilities

- Develop automated UI test scripts using Tosca, focusing on dynamic and component-based interfaces.
- Build and maintain reliable regression suites that support cross-browser and responsive testing.
- Perform manual exploratory testing to validate visual fidelity, interaction behavior, and user experience flow.
- Attend and participate in design reviews to bring early awareness to otherwise unforeseen use cases that should be considered.
- Validate components built with Angular, Kendo, and Web Components for visual and behavioral consistency.
- Ensure alignment with design specifications and accessibility standards (WCAG), including keyboard navigation, ARIA roles, and contrast compliance.
- Collaborate closely with designers to test against mockups and UX patterns.
- Participate in Agile/SAFe ceremonies and work collaboratively with cross-functional teams to deliver high-quality features.
- Maintain and manage QA test environments and validate deployments.
- Capture and analyze QA metrics and report insights to the team.
- Contribute to test documentation, reusable test strategies, and overall process improvements.
- Mentor junior QA engineers and provide guidance on best practices in UI/UX-focused testing.

Qualifications & Skills

- 6+ years of experience in software quality assurance, with 3–5 years in frontend/UI-focused roles.
- Hands-on expertise with Tosca for UI test automation and debugging.
- Strong understanding of component-based UI frameworks like Angular, Kendo, and Web Components.
- Proven experience in cross-browser and responsive testing practices.
- Familiarity with visual regression testing tools.
- Knowledge of accessibility standards (WCAG), including testing for screen readers, keyboard support, and semantic HTML.
- Skilled in Azure DevOps for test execution, tracking, and CI integration.
- Excellent attention to detail, communication skills, and collaborative mindset.
- Experience working in Agile/SAFe environments with designers, developers, and product owners.

Interested candidates can apply directly to kiranmaik@techvestglobal.com

Urgent Hiring Alert for Bangalore Location

We are seeking a Full Stack QA Engineer with strong hands-on experience in WebdriverIO and a proven track record of working within Agile/Scrum sprint cycles. The ideal candidate will play a critical role in ensuring the quality and reliability of our web applications through comprehensive test coverage, automation, and sprint-level collaboration.

Domain : Banking

Notice Period : Immediate Joiners

Key Responsibilities

Design, implement, and maintain automated test suites using WebdriverIO for both front-end and back-end validation.

Shared by **Job Curator** - Join us on Telegram: <https://t.me/testingexperiencedopenings>

Collaborate daily with developers, product managers, and scrum team members to define acceptance criteria and ensure user stories are testable.

Participate in sprint planning, grooming, retrospectives, and daily stand-ups, contributing from a QA perspective.

Conduct manual and exploratory testing during sprints to validate new features before automation.

Perform API testing, data validation, and UI testing across multiple browsers and devices.

Integrate test automation into CI/CD pipelines for continuous feedback and fast releases.

Maintain detailed and well-documented test cases, test plans, and defect reports.

Ensure high quality of software releases by actively participating in sprint reviews and demos.

Required Skills and Experience

4+ years in software QA/testing with at least 2 years hands-on experience using WebdriverIO.

Strong command of JavaScript or TypeScript, and experience in Node.js-based test automation.

Deep understanding of Agile/Scrum practices and test planning in sprint-based workflows.

Experience with test automation frameworks like webdriver IO

Proficient with CI/CD tools such as Jenkins, GitLab CI, GitHub Actions, or similar.

Familiarity with Git, test management tools (e.g., JIRA, TestRail),

Interested resources can submit your cv to neha.shukla@qualitrix.com

Logic planet is hiring for (Automation testing with mobile testing, Test Planning)

6 + Yrs, Senior profiles with Automation testing Selenium, Appium, or similar testing frameworks

Location-Hyderabad only

Job Type: Contract (C2H) Long term

Experience : 6+ Years

jd

We are seeking a highly skilled and experienced Senior Quality Assurance (QA) Engineer to join our dynamic team. The ideal candidate will have a solid understanding of requirement gathering and analysis phase of SDLC. They should be well-versed in software testing methodologies and best practices, with hands-on experience ensuring the highest quality of software products.

As a Senior QA Engineer, you will collaborate closely with development teams, lead test strategy preparation and drive automation efforts. The Candidate should demonstrate strong analytical skills, especially in designing test strategies and conducting thorough impact analysis.

Core Skills:

Planning & Strategy:

- Requirement gathering & analysis.
- Strong experience in requirement analysis and test design based on impact analysis.
- Continuously monitoring and improvement of testing methods, tools, and techniques

Test Planning & Execution:

- Design and execute comprehensive test plans and test cases.
- Ensure Test cases are properly mapped to business expectation.
- Automate test scripts to validate application functionality.
- Create relevant test data as needed.
- Strong experience in impact-based requirement analysis and test design

Test Automation:

- Hands-on experience in building and maintaining automated test frameworks and scripts.
- Proficiency in tools like Selenium, Appium, or similar testing frameworks to improve efficiency.
- Experience with AccelQ is a plus.

Other Skills:

Collaboration:

- Work closely with developers, product managers, and other team members to gather requirements and provide feedback on software design and functionality.

•Actively participate in sprint planning, test case reviews, and debugging efforts

Bug Tracking and Reporting:

- Identify, document, and track defects with clear steps to reproduce, assess severity, and communicate impact.

- Maintain and update test results, to ensure accurate reporting to key stakeholders.

Mentoring & Training:

- Mentor junior QA engineers and support their technical growth.
- Lead by example to promote a culture of quality within the team.

Continuous Improvement:

- Stay current with the trends in testing and automation tools.
 - Proactively suggest enhancements to existing processes and tools
- Selenium, Appium, or similar testing frameworks

We're Hiring for Hyderabad location!!

Open Positions:

QA Engineer / Software Tester

Experience: 2 - 6 years

Apply or Refer

Email: Vamshi.v@thehirewings.com

=====

Hello LinkedIn folks,

Greetings from AschproIT Solutions !

We have an opening for a BA-Shadow in one of our reputed clients' companies in Hyderabad.

Key Responsibilities:

Requirements Gathering & Documentation:

- o Work with business stakeholders, payroll operations teams, and clients to understand and capture requirements for shadow payroll calculations, compensation policies, and payroll reporting needs.
- o Develop detailed business requirement documents (BRDs), process flows, and functional

specifications that translate business objectives into clear development tasks.

Solution Design:

- o Partner with developers and product managers to design and document business logic for complex payroll calculations, data aggregation, and compensation consolidation across disparate global payroll systems.
- o Identify data sources, define data mapping and transformation requirements, and help shape system integration strategies.

Stakeholder Engagement:

- o Act as the primary point of contact for clients on matters relating to payroll and compensation policies, ensuring accurate interpretation and translation of requirements.
- o Facilitate workshops, requirements sessions, and user acceptance testing (UAT) with clients and internal stakeholders.

Cross-Functional Collaboration:

- o Collaborate closely with technology, QA, and data teams to deliver high-quality software that meets business needs.
- o Support the development team in understanding requirements, resolving questions, and validating technical solutions.

Quality Assurance:

- o Assist in developing test cases, perform data validation, and participate in user acceptance testing to ensure accuracy of compensation aggregation and payroll calculations.

Required Skills & Qualifications:

Bachelor's degree in Business, Finance, Information Systems, or related field; advanced degree or certification in Payroll (e.g., CPP, GPA) is a plus.

3+ years of experience in business analysis, with a strong focus on payroll or compensation solutions (multi-country experience preferred).

In-depth understanding of payroll operations, payroll systems, and compensation policies. Experience documenting business and functional requirements for software solutions.

Demonstrated ability to translate complex business needs into actionable technical requirements and specifications.

Strong analytical, problem-solving, and data management skills.

Excellent communication and client-facing skills, with the ability to interact with senior stakeholders and technical teams.

Experience with payroll or HRIS systems (SAP, Workday, ADP, Oracle, etc.) is highly desirable.

Familiarity with data integration, data mapping, and compensation aggregation concepts.

Interested candidates can share their CV on manjula.k@aschpro.com

 Immediate Hiring Alert!  : QA Engineer – Java Selenium + API Automation

 Experience: 4-9 years

 Location: Hyderabad

 Notice Period: Immediate to 20 Days

Key Responsibilities

About the Role: We're looking for a QA Engineer with strong skills in Java Selenium and API automation to join our fast-paced team. You'll play a key role in building scalable, reliable test automation frameworks and ensuring product quality across platforms.

What You'll Do:

Design, develop, and maintain automated test scripts

Execute functional and regression testing

Collaborate cross-functionally to build effective test plans

Report bugs and support issue tracking

What We're Looking For:

Expertise in Java Selenium and API testing tools (REST Assured, Postman, etc.)

Understanding of CI/CD, Git, and Agile workflows

A collaborative mindset and strong communication skills

Apply Today: If you're passionate about automation and problem-solving, we'd love to hear from you!

#Interested candidates drop your CV to gobinath@vysystems.com

=====

 We are hiring 

Skill- Guidewire Testing (only Female candidate)

Experience - 4-12Y

Location- Hyderabad, Chennai

Notice Period : Immediate to 30 days NP

Job Description:

- Should have hands-on Knowledge on Guidewire ClaimCenter

Shared by **Job Curator** - Join us on Telegram: <https://t.me/testingexperiencedopenings>

- Play a crucial part in helping drive Quality to help build and ship better products.
- May manage smaller project/initiatives as an experienced individual contributor with specialized knowledge within assigned discipline.
- Responsible for developing and executing test plans for a single application, independently generating test data.
- Participates in project-level reviews, walkthroughs and inspections, and conducts test reviews, including test plans, requirements, cases and automation.
- Raises automation opportunities to more senior employees and implements simple automation efforts.
- Responsible for automation and Continuous Integration (CI).
- Work closely with development team to identify defects early in the cycle through requirements analysis and code reviews.
- Experience in multiple types of coding, software development, and/or using automation frameworks.
- Experience in advanced code development, quality review software development, and automation frameworks.
- Successfully developed high quality test strategies and test execution; recognized test environment preparation needs.
- Experience in agile and waterfall testing methodologies and tools, unit and integration testing, and data virtualization tools.
- Experience overseeing the coding, testing, and review process for unit and integration testing.
- Successfully ensured quality of one or more application codebases and alignment with development standard.
- Experience in building automation frameworks, acceptance and integration test automation scripts, integrating with other tools.
- Experience testing across a variety of platforms: APIs (SOAP)
- Testing Tools: Selenium WebDriver, Soap UI

We are hiring for Guidewire Testing for our MNC based client

Location: Hyderabad and Chennai

Experience: 4 to 6 Years

Notice Period : Immediate to 90 Days

Full-Time

Job Summary:

The Automation Guidewire Tester is responsible for designing, developing, and executing automated tests to ensure the quality and functionality of Guidewire applications. This role involves collaborating closely with developers, business analysts, and other QA team members to create and maintain automated test scripts that validate Guidewire software modules and integrations. The tester will also work on improving test coverage, reducing manual testing efforts, and ensuring that the Guidewire applications meet business requirements.

Key Responsibilities:

1. Automation Test Development:

- o Design, develop, and maintain automated test scripts for Guidewire applications (PolicyCenter, BillingCenter, ClaimCenter) using appropriate automation tools.
- o Build and enhance the existing test automation framework to improve efficiency and reusability.
- o Write clear and concise test cases that cover all aspects of functionality, integration, and performance.

2. Test Planning and Execution:

- o Develop and execute test plans, test cases, and test scripts for functional, regression, and performance testing.
- o Identify, document, and track bugs using defect management tools, ensuring they are addressed and resolved by the development team.
- o Perform test data preparation and work closely with the development team to ensure test environments are properly configured.

3. Collaboration and Communication:

- o Collaborate with cross-functional teams, including developers, business analysts, and project managers, to understand business requirements and translate them into test scenarios.
- o Participate in Agile/Scrum ceremonies such as sprint planning, daily stand-ups, and retrospectives, providing updates on testing progress and identifying any blockers.

Strong understanding of Guidewire modules (PolicyCenter, BillingCenter, ClaimCenter)

If Interested Please Send Profiles to
geetha@squaricletechnologies.co.in

Roll :: Automation Engineer with Tosca or Leapwork
Experience: 3+ years
Contract - 6 Month
Only immediate joiners
Excellent communication skills

Job Summary :

We are seeking a motivated and detail-oriented Automation Engineer with hands-on experience in Leapwork or Tosca automation tools. The ideal candidate will also be flexible to support manual testing efforts when required. This is a hybrid role based in Hyderabad, requiring at least two days of in-office presence per week.

The right candidate will have a strong learning mindset, good problem-solving skills, and the flexibility to collaborate with global teams working in the US time zone.

Key Responsibilities:

- Design, develop, and maintain test automation scripts using Leapwork or Tosca.
- Collaborate with QA leads and developers to understand application workflows and create effective test cases.
- Execute automated and manual test cases and report bugs in a timely manner.
- Analyze and troubleshoot test failures, providing detailed reports for defect tracking.
- Ensure test coverage, traceability, and consistent quality throughout the software development lifecycle.
- Participate in daily stand-ups, sprint planning, and defect triage meetings, working partially aligned with the US time zone.
- Document test plans, procedures, and results clearly and accurately.
- Contribute to continuous improvement initiatives within the QA process.

Requirements:

- 3–6 years of experience in test automation using Leapwork and/or Tosca.
- Willingness to support manual testing as per project needs.
- Ability to adapt quickly and learn new tools and technologies.
- Strong understanding of software testing life cycle (STLC) and defect life cycle.
- Good written and verbal communication skills.
- Strong collaboration skills and ability to work in a hybrid, global team environment.
- Flexible to work with partial US time zone overlap (not night shift).

If Interested, Please share your resume on Email.

We're Hiring: UFT Automation Tester (3–4 Years Experience)

Pune

Immediate Joiners Preferred

We are lookout for a passionate UFT Automation Tester with 3–4 years of hands-on experience in automation testing using Micro Focus UFT (Unified Functional Testing). If you're driven by innovation, excited to build test automation frameworks, and eager to collaborate across global teams — we want to hear from you!

What You'll Bring:

3–4 years of test automation experience using UFT

Strong command of VBScript for scripting

Proven experience in frameworks like Keyword-driven, Data-driven, Hybrid, or BDD

Hands-on with HP ALM / Quality Center

Exposure to CI/CD tools – Jenkins, Azure DevOps, Git, etc.

Solid grasp of SDLC, STLC, and Agile practices

Bonus: Experience with API testing using UFT One

Strong problem-solving and analytical skills

Excellent communication and collaboration abilities

What You'll Do:

Develop and maintain automated test scripts using UFT

Design scalable test automation frameworks

Collaborate with QA, development, and business teams to ensure quality

Perform test planning, execution, and defect tracking

Integrate UFT with ALM, Jenkins, or other CI/CD tools

Continuously improve test scripts and optimize automation execution

Document test plans, reports, and best practices

Troubleshoot and ensure test reliability and efficiency

Greetings from Cynergy Services

Role:- Senior Automation Engineer – Mobile (Java + Appium + Cucumber)

Experience:- 6+ years

Location:- Pune

Notice Period:- Immediate- 15 days

Job Summary:

We are seeking a highly skilled Senior Automation Engineer with deep expertise in #CoreJava, #Appium, #Cucumber, and #Mobile #Test #Automation. The ideal candidate

will play a critical role in building scalable, maintainable, and robust automation frameworks for #Android and #iOS #applications. This position demands hands-on experience with BDD practices and mobile test strategies, ensuring high-quality, efficient, and repeatable testing processes.

Key Responsibilities:

Design and develop robust and scalable mobile test automation frameworks using Java, Appium, and Cucumber (BDD).

Write feature files and implement step definitions following the #Gherkin #syntax for clear, business-readable test cases.

Automate test scenarios for Android and iOS apps across multiple devices and OS versions.

Integrate automated tests into #CICD #pipelines and maintain test execution in real-time environments.

Collaborate with QA, Dev, and Product teams to ensure coverage of functional and regression testing.

Review code, enforce best practices, and mentor junior team members in automation and BDD implementation.

Analyze test results, raise detailed bugs, and work with teams to resolve issues efficiently.

Maintain test scripts, data, and reporting dashboards for visibility and traceability.

Required Skills and Experience:

6+ years of experience in test automation, with strong focus on mobile platforms.

Expertise in Core Java, object-oriented design, and data structures.

Hands-on experience with Appium for mobile automation (native, hybrid, and web apps).

Strong command over #BDD #frameworks, especially Cucumber, and Gherkin-based test writing.

Familiarity with testing tools and frameworks like #TestNG, #JUnit, #Maven/ #Gradle, #Jenkins, and version control (e.g., #Git).

Experience with #cloud- #based #mobile #device #platforms such as Browser Stack, Sauce Labs, etc.

Solid grasp of mobile automation concepts like gestures, system alerts, background testing, and device logs.

Knowledge of Agile methodologies and experience working in Agile/Scrum teams.

Preferred Qualifications:

Experience in API test automation (e.g., Postman, RestAssured).

Exposure to performance testing tools for mobile (JMeter, Gatling).

Knowledge of security and accessibility testing in mobile environments.

ISTQB or similar QA/testing certifications.

Soft Skills:

Strong verbal and written communication skills.

Leadership capability to mentor junior testers and lead testing initiatives.

A team player with a solution-oriented and collaborative mindset.

Ability to work independently and take full ownership of automation modules.

Share resume to bharti@cynergyservices.org

Internship Objective:

As a Quality Assurance (QA) Intern, you will work closely with the QA team to evaluate customer interactions, assist in data collection, and gain exposure to quality frameworks and audit processes. This internship offers hands-on experience in quality analysis, process evaluation, and reporting—building a strong foundation for a career in QA or customer experience management.

Key Responsibilities:

Quality Audits

Review voice calls, emails, or chat interactions.
Record observations using structured audit checklists under guidance.
Learn QA parameters and quality evaluation methodologies.
Data Collection & Reporting
Support the creation of audit reports using Excel or Google Sheets.
Maintain performance trackers and audit score sheets.
Assist in identifying trends and recurring quality issues.

Learning & Development

Join internal calibration and feedback sessions.
Participate in daily huddles and training refreshers.
Shadow senior analysts to understand SOPs, dashboards, and CRM tools.

Required Skills & Qualifications:

Graduate or final-year student in any discipline.
Basic proficiency in Microsoft Excel or Google Sheets.
Good written and verbal communication skills.
Strong attention to detail and a disciplined work ethic.

Preferred (Nice to Have):

Prior exposure to customer service roles (EdTech, BPO, or support).
Familiarity with Google Workspace (Docs, Sheets, Slides).
Basic awareness of CRM or LMS platforms.

- Assist in compiling audit reports in Excel/Google Sheets.
- Maintain tracker sheets for daily audit performance and scores.
- Help with basic trend summaries and highlighting recurring issues.

?? Learning & Development

- Attend internal calibrations and feedback sessions.
- Participate in team huddles and training refreshers.
- Shadow senior analysts to understand SOPs, dashboards, and CRM navigation.

?? Required Skills & Qualifications:

- Graduate (or final year student) in any stream.
- Basic knowledge of MS Excel / Google Sheets.
- Good communication skills (written and spoken).
- High attention to detail and discipline in task execution.

?? Preferred (Good to Have):

- Prior exposure to inbound/outbound in EdTech, BPO, or customer support environments.
- Familiarity with Google Workspace (Docs, Sheets, Slides).
- Awareness of CRM or LMS tools (optional)

=====

Are you a passionate QA Engineer who's ready to make a real-world impact? At H&P Technologies, we're transforming the future of gas and oil drilling through smart, scalable, cloud-based solutions — and we want you on the journey.

We're on the lookout for a sharp-eyed Software QA Engineer to join our Product Development team in Noida (UP) or Panaji (Goa). If you're all about quality, collaboration, and automation wizardry, then keep reading — this might interest you.

 What You'll Be Doing (a.k.a. Your QA Superpowers):

 Craft and execute test plans across microservices, integrations, and slick UI layers

 Build robust automation scripts in UI or in API using Playwright or Cypress and other BDD Tools

 Team up with developers to champion quality in CI/CD pipelines

 Put your drilling domain know-how to use and keep tabs on real-time field operations

 What You'll Bring to the Team:

 3–12 years of solid QA experience testing web apps (HTML, CSS, JavaScript, REST APIs — all the usual suspects)

 Hands-on skills with tools like Postman, Jira, TestRail, BurpSuite

 Bonus points if you speak the language of directional drilling, wellbore surveys, or MWD techniques

 A degree in Computer Science, Petroleum Engineering, or something equal will be

awesome

Interested Candidates can forward their resume to kapil.gupta@hpinc.com

=====

We are seeking a skilled RPA Developer with expertise in Microsoft Power Automate to design, develop, and implement automation workflows that improve operational efficiency across the organization. The ideal candidate will have hands-on experience building scalable and reliable automation solutions using Power Automate and integrating with various business applications.

Key Responsibilities:

- Design, develop, test, and deploy automation workflows using Microsoft Power Automate (formerly Flow).
- Collaborate with business analysts and stakeholders to gather requirements and translate them into automated solutions.
- Analyze existing business processes and identify automation opportunities.
- Integrate Power Automate workflows with Microsoft 365, SharePoint, Dynamics 365, and third-party applications.
- Monitor, troubleshoot, and optimize deployed workflows for performance and reliability.
- Maintain documentation for automated processes and assist in training end-users.
- Work closely with the IT and business teams to ensure smooth automation adoption.
- Stay updated with the latest RPA trends and Power Platform features.

Required Skills and Qualifications:

- Proven experience in RPA development, specifically with Microsoft Power Automate.
- Strong understanding of Microsoft Power Platform components (Power Automate, Power Apps, Power BI).
- Familiarity with SharePoint, Dynamics 365, and other Microsoft 365 services.
- Good knowledge of APIs, connectors, and integration techniques.
- Experience in process mapping, workflow design, and automation best practices.
- Basic understanding of scripting languages such as PowerShell or JavaScript is a plus.
- Strong analytical and problem-solving skills.
- Excellent communication and teamwork abilities.
- Bachelor's degree in computer science, Information Technology, or related field preferred.

Preferred Qualifications:

- Microsoft Power Platform certifications (e.g., PL-900, PL-100, or PL-400).
- Good to have Blue Prism experience.
- Knowledge of Agile methodologies and DevOps practice

 Employment Type: Full-Time

About the Role:

We are looking for a passionate and detail-oriented QA Fresher to join our Quality Assurance team. As a QA Engineer, you will work closely with developers, product managers, and senior QA engineers to ensure the delivery of high-quality software solutions.

Responsibilities:

Understand requirements and create basic test cases
Execute manual test cases and report defects
Assist in identifying bugs and documenting them clearly
Collaborate with the development team for bug resolution
Learn and support basic automation testing tasks

Requirements:

Bachelor's degree in Computer Science, IT, or related field
Strong analytical and problem-solving skills
Basic understanding of SDLC and STLC
Good communication and teamwork abilities
Eagerness to learn new tools and technologies

Good to Have (Not Mandatory):

Exposure to any bug tracking tools (e.g., JIRA, Bugzilla)
Basic knowledge of automation tools (e.g., Selenium)
Internship or project experience in QA

Why Join Us?

- Work with a supportive and experienced QA team
- Great learning environment
- Career growth opportunities
- Flexible working hours (if applicable)

 To Apply:

Visit us www.productthinking.com and submit Form. Send your resume to deepak@productthinking.com with subject line “QA Fresher Application – [Your Name]”

=====

Appvin Technologies is hiring Software Developer Interns- Node.js, React, DevOps (Multiple Positions)

Location: Noida (Onsite/Hybrid)

Type: Intern to Hire

PPO Opportunity: Based on performance

Start Date: Immediate

Stipend: Competitive, based on industry standards

We're a fast-growing tech startup in Noida building innovative solutions to empower

Shared by **Job Curator** - Join us on Telegram: <https://t.me/testingexperiencedopenings>

businesses and redefine user experiences. We're looking for passionate Software Developer Interns for three distinct roles: Node.js Developer, React Developer, and DevOps Engineer. This is your chance to work on exciting projects, gain hands-on experience, and grow with a dynamic team!

Node.js Developer Intern

Responsibilities:

- Build and maintain server-side applications using Node.js.
- Develop RESTful APIs and integrate with front-end systems.
- Write clean, scalable, and well-documented code.
- Collaborate with teams to design and implement backend features.
- Debug and optimize performance of backend services.

React Developer Intern

Responsibilities:

- Develop responsive and interactive web interfaces using React.
- Implement UI/UX designs with HTML, CSS, and JavaScript.
- Work with backend developers to integrate APIs.
- Ensure cross-browser compatibility and optimize front-end performance.
- Participate in code reviews and testing.

DevOps Engineer Intern

Responsibilities:

- Assist in building and maintaining CI/CD pipelines.
- Support cloud infrastructure setup and management (e.g., AWS, Azure).
- Work with containerization tools like Docker and Kubernetes.
- Monitor and optimize system performance and reliability.
- Collaborate with development teams to streamline deployment processes.

Qualifications:

- Enrolled in **B.Tech/M.Tech** (or equivalent) in Computer Science/IT at a top-tier institute.
- Basic knowledge of DevOps tools (e.g., Git, Jenkins, Docker).
- Familiarity with cloud platforms and scripting (e.g., Bash, Python).
- Enthusiasm for automation and system optimization.

Why Join Us?

- Hands-on experience with cutting-edge technologies.
- Mentorship from experienced engineers in a collaborative environment.
- Opportunity to convert to a full-time role based on performance.

Vibrant office culture with regular team activities.

How to Apply

We're excited to hear from students at IITs, NITs, BITS, IIITs, DTU, NSIT, and other premier engineering colleges! Please send your resume, a brief cover letter specifying your preferred role (Node.js, React, or DevOps), and links to your GitHub/Portfolio (if available) to hr@appvintech.com.

Use the subject line: Intern Application - [Preferred Role] - [Your Name].

Application Deadline: August 15, 2025

We're Hiring | Software Quality Assurance (SQA) Analyst – Contractual | Kolkata
Are you passionate about quality, automation, and driving excellence
in software delivery? Join MOL Information Technology (MOL-IT)—the
digital transformation partner of Mitsui O.S.K. Lines (MOL)—as we lead
innovation across the global shipping and logistics landscape.

Position: Software Quality Assurance (SQA) Analyst

Location: Kolkata

Employment Type: Contractual

Reporting To: Manager

Experience: 5–7 years

CTC: As per industry standards

About MOL & MOL-IT

With over 140 years of maritime legacy, MOL is one of the world's largest multimodal deep-sea carriers, operating across all continents.

MOL-IT, established in 1997, powers the Group's digital transformation journey—driving automation, sustainability, and smart operations from our hubs in Kolkata, Mumbai, and Hyderabad.

Learn more about us | Watch our intro video

About the Role

As an SQA Analyst, you'll play a vital role in ensuring the delivery of high-quality software solutions. We're looking for detail-oriented professionals who can bring deep experience in manual and automated testing within dynamic project teams.

Key Responsibilities

Shared by **Job Curator** - Join us on Telegram: <https://t.me/testingexperiencedopenings>

Design, execute, and maintain robust test strategies and automation scripts
Conduct functional, non-functional, and UI testing
Perform end-to-end validation throughout the system lifecycle
Collaborate with cross-functional teams and stakeholders for seamless delivery

Requirements

5–7 years of hands-on experience in software quality assurance
Strong command over test design and execution
Proven experience in automation frameworks and tools
Excellent communication and team collaboration skills

Interested candidates kindly send your CV to rimli.de@molgroup.com

QA / Manual Tester

📍 Common Locations: Salt Lake City, UT | Orlando, FL | Remote

🛠 Skills: Test case creation, bug tracking, Selenium

💰 Avg Salary: \$55K-\$70K

📝 [#QualityAssurance #TestingJobs #QAEEngineer](#)

Kindly email on om.singh@onlineaxis.com

Oms942377@gmail.com

=====

We're looking for an experienced Manual QA Lead to set up, lead, and scale our QA operations.

This is not just another testing role - you will:

- Build processes from scratch for consistent, high-quality manual QA
- Hire, train, and manage junior QAs as we scale
- Directly handle key clients while managing multiple client accounts
- Ensure quality and efficiency across all projects, spotting gaps before anyone else does
- Be a mentor and problem-solver, creating a high-performance QA culture

You'll work directly with the founder and play a huge role in shaping QUMANS as we grow.

What We're Looking For

- 5+ years experience in Manual QA (SaaS or complex web apps preferred)
- Strong management & leadership skills - proven experience leading QA teams
- Excellent communicator (English fluency required - client-facing role)
- Process builder - able to design workflows, reporting, and training from scratch
- Detail-obsessed - you care deeply about UX and catching edge cases others miss
- Comfortable managing multiple clients and projects simultaneously
- Based in India, able to work full-time

What You'll Get

- A chance to lead and shape a fast-growing QA company from the ground up
- Ownership of QA processes, team building, and client delivery
- Work with high-growth SaaS clients worldwide
- Competitive salary + opportunity for leadership growth as we scale

How to Apply

Email us at hello@getqumans.com, attach your CV, and answer these questions in the email:

- Current salary (please note this will be checked with your previous employer)
- Expected salary
- Earliest possible start date
- Current notice period (if any)
- Years of Manual QA experience
- Some products you've worked on

=====

Greetings from Strategic Resources International Inc!

Below is the immediate role. We have interview slots available for the below roles.

Job Title: QA Architect – UI Path (Remote)

Location: Remote (Open to all time zones), United States.

Employment Type: Contract

About the Role:

We are seeking a highly experienced and visionary QA Architect with strong hands-on experience in UI Path to lead and mentor our QA team. This is a fully remote position and a critical role in driving quality engineering strategies, designing test automation frameworks, and ensuring robust RPA (Robotic Process Automation) test coverage.

As a QA Architect, you will work closely with cross-functional teams, including development, product, and DevOps, to define and implement scalable automation solutions. You'll also serve as a mentor and guide for a team of QA Engineers, fostering best practices and continuous improvement.

Key Responsibilities:

Architect, design, and implement automation test frameworks, with a focus on UI Path-based RPA solutions.

Collaborate with development and business teams to define test strategies and integrate quality at every stage.

Lead technical discussions and design reviews to ensure testability and performance optimization.

Provide mentorship and technical guidance to QA team members across automation, manual testing, and CI/CD integration.

Drive adoption of test automation tools, frameworks, and industry best practices.

Monitor automation test results and ensure rapid resolution of issues.

Evaluate and recommend tools, technologies, and processes to improve test automation and quality.

Required Qualifications:

8+ years of experience in Quality Assurance with 3+ years in a QA Architect or Lead Automation role.

Hands-on experience with UI Path, including automation testing

strategies for RPA workflows.

Strong understanding of QA methodologies, testing strategies, and automation frameworks.

Experience with CI/CD pipelines and integrating test automation into DevOps workflows.

Proven experience mentoring and leading QA teams.

Excellent analytical, problem-solving, and communication skills.

Nice to Have:

Experience with other RPA platforms like Blue Prism or Automation Anywhere.

ISTQB or other QA-related certifications.

Exposure to cloud platforms (AWS, Azure, or GCP).

Please send your resume along with a brief note on your UI Path experience and leadership background to sagarp@sriusa.com.

=====

Manual QA Tester

Remote – EST or CST hours

-Can be USC or GC holder

-looking to interview this week or early next week ideally

-must have experience with Anaplan

We are looking for a Manual QA Tester with experience testing Anaplan models to join our growing team. In this role, you will focus on ensuring the accuracy, performance, and reliability of Anaplan solutions used across critical business functions. The ideal candidate is detail-oriented, understands financial or operational modeling, and has hands-on experience testing Anaplan models and integrations.

Key Responsibilities:

Develop and execute manual test cases for Anaplan models, integrations, dashboards, and user workflows

Validate data inputs, calculations, and outputs across Anaplan modules

Identify, document, and track defects related to Anaplan

functionality, performance, or data accuracy

Collaborate with Anaplan model builders, business analysts, and end users to understand requirements and ensure testing covers business scenarios

Perform regression, functional, and UAT testing on Anaplan features and enhancements

Support data validation and reconciliation efforts between Anaplan and connected systems

Ensure Anaplan user roles, security settings, and access controls are tested thoroughly

Required Qualifications:

5+ years of experience in manual QA testing

Hands-on experience testing Anaplan models or working closely with

Anaplan implementations

Familiarity with testing techniques for data-heavy applications or business planning tools

Experience with QA documentation including test plans, test cases, and defect logs

Working knowledge of issue-tracking tools

Strong analytical and troubleshooting skills

Excellent written and verbal communication skills

please share resume akash.t@apetan.com

We are hiring for UI/UX Automation QA Engineer

Experience: 6 to 10 years

Location: Bangalore(Preferred) Or Remote (100%)

Essential Duties and Responsibilities

- Develop automated UI test scripts using Tosca, focusing on dynamic and component-based interfaces.
- Build and maintain reliable regression suites that support cross-browser and responsive testing.
- Perform manual exploratory testing to validate visual fidelity, interaction behavior, and user experience flow.

Shared by **Job Curator** - Join us on Telegram: <https://t.me/testingexperiencedopenings>

- Attend and participate in design reviews to bring early awareness to otherwise unforeseen use cases that should be considered.
- Validate components built with Angular, Kendo, and Web Components for visual and behavioral consistency.
- Ensure alignment with design specifications and accessibility standards (WCAG), including keyboard navigation, ARIA roles, and contrast compliance.
- Collaborate closely with designers to test against mockups and UX patterns.
- Participate in Agile/SAFe ceremonies and work collaboratively with cross-functional teams to deliver high-quality features.
- Maintain and manage QA test environments and validate deployments.
- Capture and analyze QA metrics and report insights to the team.
- Contribute to test documentation, reusable test strategies, and overall process improvements.
- Mentor junior QA engineers and provide guidance on best practices in UI/UX-focused testing.

Qualifications & Skills

- 6+ years of experience in software quality assurance, with 3–5 years in frontend/UI-focused roles.
- Hands-on expertise with Tosca for UI test automation and debugging.
- Strong understanding of component-based UI frameworks like Angular, Kendo, and Web Components.
- Proven experience in cross-browser and responsive testing practices.
- Familiarity with visual regression testing tools.
- Knowledge of accessibility standards (WCAG), including testing for screen readers, keyboard support, and semantic HTML.
- Skilled in Azure DevOps for test execution, tracking, and CI integration.
- Excellent attention to detail, communication skills, and collaborative mindset.
- Experience working in Agile/SAFe environments with designers, developers, and product owners.

Interested candidates can apply directly to kiranmaik@techvestglobal.com

=====

We're Hiring for QA Automation Test Engineer – Oracle Fusion SaaS (Remote)

Location: Remote (U.S. based)

Duration: 6–12 months (Contract)

Start Date: ASAP

Interview Mode: Video

About the Role:

We're looking for a hands-on Automation Test Engineer to join a centralized QA team supporting Oracle Fusion Cloud applications (Finance, SCM, or HCM). In this role, you'll lead quarterly patch testing cycles for SaaS customers and build/maintain test automation frameworks using Java, Selenium, and Cucumber.

This is not a manual QA role—we're seeking someone with strong automation experience, Oracle Fusion knowledge, and the ability to mentor others.

Key Responsibilities:

Design and execute automated test cases for Oracle Fusion applications.

Develop and enhance test automation frameworks (TDD/BDD).

Collaborate with functional teams to drive end-to-end testing.

Support quarterly patch testing cycles in a SaaS environment.

Mentor and guide junior QA engineers.

Integrate test automation with CI/CD pipelines (GitLab, Jenkins).

Work with test management tools (JIRA, ALM, Azure DevOps).

Must-Have Skills:

5–8 years of hands-on experience in test automation using:

Java, Selenium WebDriver, and Cucumber
Strong knowledge of Oracle Fusion Applications (Finance, SCM, or HCM).
Experience building/maintaining TDD/BDD automation frameworks.
Working knowledge of CI/CD tools (Jenkins, GitLab).
Comfortable with SQL, RDBMS, and Linux/Windows environments.
Familiarity with tools like JIRA, Azure DevOps, or ALM.
Strong debugging, documentation, and communication skills.

Nice to Have:

Experience in non-functional testing.
Prior work with SaaS testing environments.
Leadership or mentoring background in QA teams.

Interested or know someone who is?

Please send your resume to: abhi.dodiya@cybsearch.com

=====

Job Title: Software Development Engineer in Test (SDET)

Hiring Now: Software QA Engineer III – Automation & Performance Testing (Remote – India)

Are you a passionate QA Engineer looking to work with a fast-paced and innovative team? We are hiring for a Software QA Engineer III – Automation & Performance Testing for a remote position based in India.

Position: Software QA Engineer III – QA Automation

Location: Remote (India)

Duration: 3-month contract-to-hire

Time Zone Requirement: Must be available to work until 1 PM EST

Role Overview:

We're seeking a QA Automation Engineer who can build robust, scalable, and efficient test automation frameworks across platforms. This is a high-impact role that involves working closely with cross-functional teams, designing and executing automation strategies, and driving continuous improvement in QA practices.

Responsibilities:

- Design and execute UI/API automation strategies to ensure high product quality.
- Maintain and enhance automation frameworks using scalable, clean code.
- Collaborate with Development, QA, and DevOps to define testing strategies.
- Integrate test automation into CI/CD pipelines (e.g., Jenkins).
- Create custom test tools and utilities as needed.
- Document and promote best practices for test automation.
- Estimate automation efforts and deliver timely test solutions.
- Continuously improve QA processes and tools.

Required Qualifications:

- 4+ years of experience in Software QA.
- Proficient with UI test frameworks: Selenium, Cypress, Appium, or Playwright.
- Hands-on experience with API testing (REST, gRPC).
- Automation experience using Python, Java, Scala, or similar languages.
- Solid understanding of SQL, shell scripting, and web services.
- Familiarity with CI tools: Jenkins, Hudson, Bamboo.
- Experience with frameworks like Robot, Cucumber, or Behave.

Preferred Qualifications:

- Bachelor's degree in a relevant technology field.
- Experience with Robot Framework.
- Prior experience working in distributed team environments.

Interested candidates, please send your resume to

ajsrivastava@roseint.com

Job Title: Automation Testing Analyst (Remote - USA)

Location: Remote (USA)

Job Type: Full-Time

American IT Systems is a rapidly growing staffing and recruitment firm specializing in providing comprehensive hiring solutions across the United States. With a focus on both technical and non-technical roles, the agency offers flexible staffing options, including contract, contract-to-hire, and permanent placements, to meet the diverse needs of its clients.

Role Overview:

As an Automation Testing Analyst, you will be responsible for designing, developing, and executing automated test scripts to ensure the quality and reliability of software applications. You will collaborate with cross-functional teams to identify testing needs, improve automation frameworks, and enhance software quality processes.

Key Responsibilities:

Develop and maintain automated test scripts using tools such as Selenium, Cypress, or Playwright.

Perform functional, regression, performance, and API testing.

Design and implement test automation frameworks to improve efficiency.

Work closely with developers to identify and resolve software defects.

Integrate test automation into CI/CD pipelines using tools like Jenkins, GitLab CI/CD, or Azure DevOps.

Conduct manual testing when necessary to ensure comprehensive test coverage.

Document test plans, test cases, and test results for tracking and reporting.

Collaborate with product managers, developers, and business analysts to understand requirements and acceptance criteria.

Qualifications:

5+ years of experience in automation testing.

Strong proficiency with Selenium WebDriver, Cypress, or Playwright.

Hands-on experience with Java, Python, or JavaScript for test automation.

Familiarity with API testing using Postman, REST Assured, or SoapUI.
Experience with performance testing tools like JMeter or LoadRunner.
Knowledge of CI/CD pipelines and integration of automated tests.
Experience working in Agile/Scrum environments.
Strong analytical and problem-solving skills.

Preferred Skills:

Experience with cloud-based testing tools (AWS Device Farm, Sauce Labs, BrowserStack).

Knowledge of BDD frameworks like Cucumber or SpecFlow.

Familiarity with containerization technologies (Docker, Kubernetes).

ISTQB certification is a plus.

If you are interested in this exciting opportunity, please send your resume to careers@americanitsystems.com.

=====

Job Title: Guidewire QA Engineer – BDD / GTF / UI & API Testing

Location: [INDIA , USA ,CANADA “Remote”]

Interested Candidate kindly connect me at vandana@qatos.net

Experience: 4–8 years

Domain: P&C Insurance, Guidewire Platform Testing

Job Summary:

We are seeking an experienced Guidewire QA Engineer with strong hands-on expertise in the Guidewire Testing Framework (GTF), focusing on Behavior-Driven Development (BDD) methodologies. This role involves developing and executing automated tests for UI and API layers, contributing to continuous integration and fast-paced release cycles across Guidewire applications, including PolicyCenter, BillingCenter, or ClaimCenter.

Key Responsibilities:

Design, develop, and execute automated test cases using the Guidewire Testing Framework (GTF).

Leverage BDD tools like Cucumber or SpecFlow to create readable, maintainable test scenarios.

Perform UI Testing using Selenium-based frameworks and ensure consistent behavior across browsers and environments.

Execute API Testing using tools like RestAssured, Postman, or SOAP UI integrated into the GTF.

Collaborate closely with developers, product owners, and business analysts to understand requirements and acceptance criteria.

Participate in sprint planning, reviews, and retrospectives within Agile development teams.

Log, track, and retest defects in issue tracking systems such as JIRA.

Contribute to test automation strategies that support continuous integration and delivery (CI/CD).

Required Skills:

4+ years of QA experience, with 2+ years specifically in Guidewire Suite (PolicyCenter, BillingCenter, or ClaimCenter).

Experience with the Guidewire Testing Framework (GTF).
Strong hands-on experience with BDD tools (Cucumber, Gherkin syntax, etc.).
Proficient in UI automation using Selenium WebDriver or similar.
Skilled in API testing and validation with tools like Postman,
RestAssured, or SOAP UI.
Familiar with Agile/Scrum methodology and test-driven development practices.
Working knowledge of source control (e.g., Git) and CI/CD tools (e.g.,
Jenkins, Azure DevOps).
Solid understanding of insurance domain, especially P&C workflows.
Preferred Qualifications:
Guidewire certification (e.g., PolicyCenter QA, ClaimCenter QA).
Experience using Gherkin in enterprise QA environments.
Familiarity with SQL and database testing.
Knowledge of performance testing tools is a plus.

=====

We're Hiring: QA Engineer – AI Agentic System (Contract)
Remote | Contract Role
Work on cutting-edge AI Agent technology with LLMs, multi-agent
workflows, and voice communication tools.

What You'll Do:

Manually test workflows across Web UI, APIs, SMS, Email, and Voice (Twilio)
Design automated test scripts using Postman, PyTest, Playwright, Selenium
Validate LLM decisions and backend API consistency
Collaborate with AI, Voice, and Backend teams to ensure system reliability

What We're Looking For:

3–5+ yrs QA or SDET experience
API + Automation testing experience
Strong with tools like Postman, Selenium, PyTest
Bonus: Worked on AI/ML systems or staffing platforms
Tools You'll Use: GitHub, Jira, Postman, Azure Monitor, Twilio, Google Sheets
If you're passionate about testing innovative AI systems and
building stable agent-based products — we want to hear from you!

- Design and execute comprehensive manual and automated test cases

Shared by **Job Curator** - Join us on Telegram: <https://t.me/testingexperiencedopenings>

- Work closely with developers and product teams to ensure product quality
- Build and maintain test automation frameworks using Selenium, Appium, Robot Framework, and Python
- Integrate testing processes with CI/CD pipelines
- Monitor system performance and identify bottlenecks

What We're Looking For:

- Solid experience in both manual and automated QA testing
 - Proficiency in Selenium, Appium, CI/CD, Robot Framework, and Python
 - Strong understanding of QA methodologies and test lifecycle
 - Ability to work independently in a remote environment
 - Excellent problem-solving skills and attention to detail
- If you're passionate about quality, automation, and building impactful solutions—we'd love to hear from you!

Job Opportunity: Salesforce QA Engineer (Contract – 6 Months)

Location: Remote (India-based)

Timings: Full-time (10:00 AM – 7:00 PM IST)

Duration: 6 Months (Immediate Joiners Only)

Compensation: ₹80,000 month

Contact: ranjithkumar.t@rapinnotech.com

About the Role:

We are seeking a Salesforce QA Engineer with 6–8 years of experience in manual and automation testing, preferably with exposure to Salesforce applications. This role involves end-to-end testing ownership, working in an agile environment, and building robust test suites using Java/JavaScript-based automation frameworks like Selenium, Nightwatch, Playwright, etc.

What You'll Do:

Design, develop, and execute test plans and test cases for web-based applications.

Perform functional, regression, and exploratory testing.

Develop and maintain automated regression suites using tools like Selenium or Nightwatch.

Work with Software Engineers to understand the architecture and implementation of features.

Use JIRA for bug and test case management.

Review peer test scripts, execution results, and ensure proper documentation.

Contribute to CI/CD efforts by integrating testing into the pipeline.

Create artifacts, test reports, and provide clear status updates to

stakeholders.

Drive QA best practices, improve test processes, and ensure high product quality.

What You'll Need:

6–8 years of experience in QA (manual and automation).

Solid background in testing Salesforce (SFDC) applications is preferred.

Automation experience using Java/JavaScript with tools like Selenium, Nightwatch, Playwright.

Strong analytical skills with a keen eye for detail.

Hands-on experience with test methodologies (regression, exploratory, smoke, etc.).

Familiarity with Agile development environments.

Ability to take initiative, work independently, and communicate effectively.

Strong commitment to product usability and quality from an end-user perspective.
