Exciting Opportunity in Bangalore! 💢

We're hiring QA interns for our Bangalore office! #QAJobs #TestingJobs #BangaloreTestingJobs #QualityAssuranceJobs

Key Requirements:

- Strong English communication skills 🚣
- Exceptional bug-finding abilities
- Proficient in leveraging AI for enhanced performance 🎬

We're Hiring: SDET 1 & SDET 2 @ Cashfree Payments

P Location: Bengaluru (On-site)

Experience: 1–5 years

Full-Time | Quality-first | Engineering-led

As we continue to scale our platforms and products, quality is not a checkbox - it's foundational to everything we do. We are looking for engineers who are passionate about automation, care deeply about user experience, and have the curiosity to break systems so we can make them better.

If you're someone who thrives on building things that don't just work, but scale, recover, and self-validate, you'll love what we're building.

7 Open roles:

◆ SDET 2 (3–5 yrs): https://lnkd.in/g-275Y9q

◆ SDET 1 (1–3 yrs): https://lnkd.in/gGAmdyVP

Job Opportunity ₩

Are you a Mobile & Automation Testing Engineer with 3–4 years of experience? We have an exciting opportunity in Bangalore at WTC or Baghmane Tech Park, Mahadevpura. This contract is extendable for 6 to 8 months with an immediate joining timeline.

i Company Type: Product-based companies only

Preferred Profile: Candidates with ex-Amazon background (Accenture alumni excluded; 125-day cooling period applies before rejoining)

Testing Focus: Mobile and automation testing

11 Interview Process: Two face-to-face interview rounds

Shift: Day shift with no cab facility provided

If you meet the requirements and are ready to take on this challenge, please share your updated resume with saranya.r@varite.com. Don't miss out on this opportunity to showcase your skills and expertise in the field! ##JobOpening #BangaloreTechJobs

We're Hiring − 5G System Test Engineer | Wireless Domain Expert

P Location: Bangalore

Experience: 5–10 Years in Wireless (5G)

We are looking for a highly skilled System Test Engineer (CWF) to join our dynamic SI&T team. If you have strong 5G SA protocol knowledge, end-to-end system testing skills, and a passion for next-gen wireless technologies, we want to hear from you!

What You'll Be Doing:

Drive end-to-end 5G feature verification (test planning, execution, RCA, automation, and integration).

Understand and test 5G SA/NSA features, messages, and call flows.

Work closely with the dev team for feature readiness, bug triage, and log analysis.

What We're Looking For:

5–10 years of experience in 5G wireless testing.

Strong understanding of 5G NR protocol stacks (PHY/MAC/RLC/PDCP/RRC/NAS/Core Network).

Hands-on experience with QXDM, Wireshark, and protocol debugging.

Excellent scripting skills (Python, Linux) for automation.

Solid grasp of TCP/IP and networking principles.

Good to Have:

Familiarity with Kubernetes, Ansible, Docker, GitLab, and Jira.

Experience in 5G NR software development.

Exposure to lab tools like Spectrum Analyzer, Oscilloscope, Multimeter.

If you or someone in your network fits this description, feel free to connect or DM me. Let's build the future of wireless together!

Urgent requirement -SDET

Software Development in Test - III (Manual + Automations)

Experience: 6+ years Budget upto 1.5

Location: Bangalore (Hybrid with flexibility)

If you have matching the below criteria, please share your resume at share-war-mishra@syner.com

What you'll do

- Develop automated tests and test frameworks to enhance software quality.
- Conduct functional and non-functional testing, including performance, security, resiliency, and chaos testing.
- Optimize and improve CI/CD pipelines for faster and more efficient deployments.

Identify and implement quality processes to enhance engineering efficiency.

- Automate various aspects of the software development lifecycle.
- Review code and designs, providing constructive feedback for improvement.
- Continuously upskill and mentor team members to drive growth and excellence.

What you'll bring

Our Tech Stack is broad, and can vary from Application to Application, therefore we are looking to speak with Engineers with 5+ years of experience across a number of the following areas (by no means do we expect you to have experience with all!):

- Strong automation testing expertise for REST APIs, with coding proficiency in Python or Java.
- Prior software development experience before transitioning into testing and automation is a plus.
- Hands-on experience with testing frameworks and CI/CD tools like Jenkins or GitHub Actions.
- Experience working with Docker, Kubernetes, and Nomad for containerised environments.
- Familiarity with cloud platforms, particularly AWS,
- Experience with observability and monitoring tools like Grafana and Kibana.

- Ensure comprehensive test coverage through automation and manual testing where necessary.
- Research automation tools and infrastructure for improvement
- Review plans and consult junior QAs
- Excellent problem-solving skills and attention to detail.
- Strong communication and interpersonal skills.
- Define E2E testing requirements (scenarios, conditions, testing types, metrics for monitoring)
- Execute E2E manual tests
- Automate E2E regression.

We are hiring L2 Security Engineer Experience Required - 2+ years Mode: - Work from office Bangalore: - Bangalore Notice:- Immediate only

Job Description

We are looking for a skilled and proactive L2 Security Engineer to strengthen our Security Operations team. In this role, you will play a critical part in safeguarding our digital assets by managing security tools, detecting and analyzing threats, and supporting compliance initiatives. This role requires hands-on experience with SIEM, EDR, vulnerability management, and a keen understanding of modern threat landscapes.

Key Responsibilities

- SIEM Operations: Administer and fine-tune the Wazuh SIEM platform for real-time threat detection, log aggregation, and security alert optimization.
- Endpoint Security: Monitor and manage EDR and antivirus platforms to ensure endpoint protection across the enterprise.
- Network Security Oversight: Collaborate with infrastructure and network teams to evaluate and update firewall and Web Application Firewall (WAF) rules in response to threat intelligence and operational needs.
- Threat Detection: Analyze logs from firewalls and WAFs to detect anomalous behavior and potential intrusions.
- Vulnerability Management: Lead coordination of external Vulnerability Assessments and Penetration Testing (VAPT) exercises; ensure prompt remediation and tracking of vulnerabilities.
- Threat Research: Stay informed on emerging threats, vulnerabilities, exploits, and malware campaigns relevant to our environment and technologies.
- Patch Management: Support structured patching cycles to address critical vulnerabilities and verify successful remediation.
- Compliance & Darticipate in internal audits and compliance reviews; maintain documentation and provide evidence to support audit readiness.

- Security Best Practices: Contribute to the improvement of security policies, procedures, and incident response strategies in line with industry frameworks. Requirements
- Experience: 2 4 years in cybersecurity or security operations.
- Education: Bachelor's degree in Computer Science, Cybersecurity, or a related technical field.
- Technical Proficiency:
- o In-depth experience with Wazuh or similar SIEM platforms.
- o Strong familiarity with EDR tools and antivirus/malware protection solutions.
- o Competence in analysing and managing firewall and WAF rules and logs.
- o Demonstrated ability to manage VAPT cycles and track remediation efforts.
- o Understanding of patch management systems and processes.
- Framework Knowledge: Working knowledge of threat intelligence concepts, MITRE, ATT& amp; CK, OWASP, NIST, and incident response frameworks.
- Certifications: Preferred certifications include CEH, CompTIA Security+, and CySA.

Need very good communication skills.

- Apply Now: ayesha@lltech.in | \$\sqrt{9347981691}\$

Urgent requirement -SDET

Software Development in Test - III (Manual + Automations)

Experience: 6+ years

Budget as per market standards

Location: Bangalore (Hybrid with flexibility)

If you have matching the below criteria, please share your resume at **shanteswar.mishra@syner.com**

What you'll do

- Develop automated tests and test frameworks to enhance software quality.
- Conduct functional and non-functional testing, including performance, security, resiliency, and chaos testing.
- Optimize and improve CI/CD pipelines for faster and more efficient deployments.

Identify and implement quality processes to enhance engineering efficiency.

- Automate various aspects of the software development lifecycle.
- Review code and designs, providing constructive feedback for improvement.
- Continuously upskill and mentor team members to drive growth and excellence.

What you'll bring

Our Tech Stack is broad, and can vary from Application to Application, therefore we are looking to speak with Engineers with 5+ years of experience across a number of the following areas (by no means do we expect you to have experience with all!):

- Strong automation testing expertise for REST APIs, with coding proficiency in Python or Java.
- Prior software development experience before transitioning into testing and automation is a plus.
- Hands-on experience with testing frameworks and CI/CD tools like Jenkins or GitHub Actions.
- Experience working with Docker, Kubernetes, and Nomad for containerised environments.

- Familiarity with cloud platforms, particularly AWS,
- Experience with observability and monitoring tools like Grafana and Kibana.
- Ensure comprehensive test coverage through automation and manual testing where necessary.
- Research automation tools and infrastructure for improvement
- Review plans and consult junior QAs
- Excellent problem-solving skills and attention to detail.
- Strong communication and interpersonal skills.
- Define E2E testing requirements (scenarios, conditions, testing types, metrics for monitoring)
- Execute E2E manual tests
- Automate E2E regression.

============

P Location: Bangalore (Whitefield) – Hybrid

Experience: 4+ Years

Notice Period: Immediate to 15 Days
Apply Now: suresh@doodleblue.com

Are you a skilled Software Development Engineer in Test (SDET) with strong experience in Java and Selenium? Join our growing QA team where you'll work on automation strategy using the #AlgoQA framework and drive quality across high-impact projects.

✓ Must-Have Skills:

We're Hiring: Automation Test Engineer @ Fifthgen Tech Solution

P Location: Hyderabad (Primary) | Bangalore (Secondary)

Shared by **Job Curator** - Join us on Telegram: https://t.me/testingexperiencedopenings

Experience: 5 – 8 Years

Are you passionate about quality assurance and automation? Join Fifthgen Tech Solution, where innovation meets precision.

We are looking for a highly skilled Automation Test Engineer with deep experience in Manual & Automation Testing—especially within the Payments Domain.

Key Skills & Must-Haves:

- **✓** 5+ years of Manual & Automation Testing experience
- ✓ Strong Java-Selenium programming (Selenium Java, Cucumber, TestNG)
- ☑ REST API testing using Postman & Rest Assured
- ✓ UAT Testing experience, especially in payment ecosystems
- ☑ Deep knowledge of Payment Workflows (UPI, credit/debit cards, wallets, refunds, chargebacks)
- Agile/Scrum working environment experience
- ✓ Strong problem-solving & communication skills
- **★** Why this role matters:

UAT is critical in FinTech and Digital Payments to ensure seamless and secure transaction flows. We're looking for QA experts who understand both technical depth and real-world business needs.

Interested? Send your resume to [Vishal.kuamr@fifthgentechs.com] or DM me directly.

We are hiring for "Test automation engineer" (Selenium, core java, API)

Location: Bangalore (Hybrid working)

Experience: 6+years

Design, build, and maintain robust automated test suites for web and mobile applications using Selenium and BDD frameworks (Cucumber).

Develop and scale test automation frameworks for web, mobile, and API services, supporting Tesco's high-traffic applications.

Perform API testing and automation using Postman or RestAssured (we'll train you on either if needed).

Enhance and extend our API/Web Service automation frameworks to keep up with evolving product needs.

Write and manage clear test plans, test cases, and test scripts to ensure traceability and coverage.

Execute manual and automated test cases; report, track, and manage defects using Jira. Estimate, prioritize, and plan testing activities within agile delivery teams.

Perform functional and integration testing of complex systems, ensuring that all services, components, and integrations work seamlessly.

Integrate test suites into CI/CD pipelines with Git, Gradle/Maven, and Jenkins.

Participate in sprint ceremonies, product demos, and release reviews, acting as the quality champion in your squad.

Continuously improve Tesco's test practices, frameworks, and tooling, staying ahead of industry trends.

Support the team with end-to-end manual testing when automation isn't feasible. Share knowledge and mentor junior testers when needed

If interested kindly share your updated CV to yoshitha.n@agamininv.com
