We're Hiring: QA Engineer (Manual + Automation)

Locations: Chennai | Hyderabad | Bangalore

Experience: 3 - 7 Years Full-Time or Contract

Apply: recruiter@skillontap.in

Are you a detail-driven QA Engineer with 3–7 years of experience in functional and automation testing? We're looking for professionals who are passionate about ensuring software excellence across fast-paced, Agile environments — especially those with experience in the Telecom domain.

# What You'll Work On:

Perform end-to-end testing, regression, system, integration, and UAT.

Develop and maintain robust automation frameworks using Selenium / Robot Framework. Collaborate with developers and analysts to understand requirements and create comprehensive test cases.

Execute manual test cases and track bugs using tools like JIRA, TestRail, Zephyr, and HP ALM.

Contribute to performance, load, and security testing strategies. Improve test automation and CI/CD integration.

✓ What You Bring:

Solid experience in both manual and automation testing.

Strong knowledge of Java or Python for scripting test cases.

Experience with automation tools like Selenium, Robot Framework, etc.

Proficiency with test management tools like JIRA, ALM, Zephyr.

Familiarity with Agile/Scrum methodologies.

Good understanding of SQL and database validation is a plus.

Excellent problem-solving, analytical, and communication skills.

Education: Bachelor's in Computer Science (preferred)

Certifications in QA/testing tools or Agile practices are a bonus.

If you're looking to grow with a high-performing QA team, contribute to high-impact projects, and work in a collaborative environment — we'd love to hear from you.

# Hiring Now: Lead Engineer – Automation (Telco Domain)

📍 Location: Bangalore / Chennai / Hyderabad

Experience: 6–8 Years

Apply at: umme@infogrowth.in

We are looking for a highly skilled Lead Engineer with strong expertise in the Telecom domain and a proven track record in automation testing. This is an exciting opportunity to work on innovative projects, contribute to building robust automation frameworks, and lead quality assurance initiatives.

# ◆ Key Responsibilities:

Lead automation testing initiatives for complex telecom projects.

Design, develop, and maintain automation frameworks using Selenium Java.

Implement frameworks such as Cucumber, BDD, Serenity for behavior-driven development. Collaborate with cross-functional teams to ensure high-quality product releases. Mentor junior team members and drive automation best practices.

### Must-Have Skills:

Strong experience in the Telco domain (Telecommunication industry).

Hands-on expertise in Selenium Java and automation framework design.

Proficiency with Cucumber, BDD, Serenity frameworks.

Ability to analyze requirements and create efficient automated test scripts.

Excellent problem-solving and leadership skills.

# \* Added Advantage:

Prior experience working on Verizon projects.

If you're passionate about automation, thrive in a challenging telecom environment, and want to lead impactful projects—we want to hear from you!

### =============

🚨 We Are Hiring – SAP Security Technical Manager 🚨

Location: Hyderabad (Hybrid – 3 days/week in-office)

Notice Period: 0-30 Days Remote Option: Not available

We are looking for an exceptional SAP Security Technical Manager / Senior Technical Lead to join our internal team at Callaway Digital Technologies. This is a Technical Manager role in a fast-paced, global environment with exposure to complex SAP landscapes and the latest technologies.

If you're passionate about SAP Security and ready to lead a dynamic team, we want to hear from you!

- To apply, send your resume to:
- Madhusmita.das@callawaygolf.com
- Or reach out via our internal job group: <a href="mailto:CDTalentScout@callawaygolf.com">CDTalentScout@callawaygolf.com</a>
- Key Responsibilities:

Lead and mentor a team of 5–7 offshore SAP Security professionals.

Align team priorities with business needs, project timelines, and delivery commitments. Design and implement complex SAP security solutions across modules like MM, SD, FI, CO, QM, APO, SRM, and EWM.

Drive security initiatives across project life cycle: design, implementation, testing, deployment, and support.

Manage SAP GRC Access Control and mitigate SoD conflicts in coordination with business stakeholders.

Ensure SOX compliance and work closely with internal/external auditors to eliminate gaps. Research, debug, and resolve system anomalies related to security.

Enforce and refine support policies and documentation processes.

Act as a self-starter and a motivational leader, ensuring operational excellence in both project and support tracks.

Bachelor's degree in Computer Science or a related field (or equivalent work experience). 15–19 years of experience in SAP Security, including at least 8 years of hands-on SAP GRC experience.

3+ years of team leading and people management experience.

Experience with ERP system security in a SOX-compliant, multi-brand, and global user environment.

2–3 years of experience in Identity & Access Management (IAM).

This is a fantastic opportunity to be part of a high-impact leadership team driving security excellence across global SAP platforms.

We're Hiring Sr Business Analyst with HR & Payroll Domain

Location: Hyderabad, Bengaluru, Visakhapatnam

Work Model: Hybrid

We're looking for a seasoned Business Analyst with deep expertise in AI chatbot solutions within the HR and Payroll domain to join our team in Hyderabad.

## **About the Role**

As a Business Analyst – AI Chatbots, you will play a pivotal role in shaping and implementing intelligent chat interfaces that enhance employee engagement and streamline HR and payroll services. This is a critical position that bridges business needs with cutting-edge AI technologies, ensuring seamless integration with platforms like Workday and delivering localized, multi-lingual support across the organization.

### **Key Responsibilities**

- Collaborate with stakeholders across HR, Payroll, and IT to gather, define, and prioritize chatbot-related business requirements.
- Design user-centric conversational journeys, intent models, and multilingual support for Al-powered HR chatbots.
- Lead the integration of chatbot platforms with Workday to enable accurate dissemination of policy, payroll, and benefits information.
- Create and maintain business requirement documents (BRDs), user stories, use cases, process flow diagrams, and integration mapping documents.
- Work closely with developers and UX teams to implement and test chatbot flows.
- Drive User Acceptance Testing (UAT), prepare training materials, and support end-user adoption.
- Analyze chatbot performance and continuously improve functionality based on data

insights and user feedback.

• Ensure compliance with data privacy regulations (e.g., GDPR) and enterprise-level security standards.

# What We're Looking For

- Bachelor's degree in Business Administration, Information Technology, or a related field.
- 6+ years of experience as a Business Analyst, with 4+ years focused on AI/HR chatbot platforms.
- Strong understanding of HR and Payroll processes, with a proven ability to translate business needs into scalable tech solutions.
- Hands-on experience with chatbot platforms such as IBM Watson, Microsoft Bot Framework, Google Dialogflow, or similar.
- Familiarity with Natural Language Processing (NLP) and multi-lingual chatbot implementations.
- Exceptional communication, analytical thinking, and stakeholder management skills.
- Working knowledge of data privacy regulations and best practices in handling sensitive employee information.

If you're excited about building next-generation digital employee experiences and have a passion for AI-powered solutions, we'd love to connect with you.

If you think you'd be a perfect fit for this role or any references, please share the relevant profiles at <a href="mailto:sshovan24@gmail.com">sshovan24@gmail.com</a>
