We're Hiring: #Playwright Automation Test Engineers

P Location: #Bengaluru

Availability: Immediate or Short Notice Preferred

Are you passionate about quality and automation? Join our growing QA team as a Playwright Automation Test Engineer!

✓ Must-Have Skills:

3+ years of hands-on experience in <u>#Playwright</u> (Web + API Automation)
Strong expertise in <u>#JavaScript</u> / <u>#TypeScript</u>
Solid understanding of <u>#CICD</u> pipelines, test frameworks, and debugging tools.

If this sounds like you (or someone in your network), let's connect!

Send your resume to: Balakrishna.goba@gyansys.com

🚀 Join iFocus Systc as an <u>#AutomationQAEngineer</u>! 🖺 🖺

Location: Bangalore

Experience Required: 2–3 years Employment Type: Full-Time

About Us

At iFocus Systc, we believe in harnessing technology to drive quality and innovation. We're looking for bright, driven Automation QA Engineers to strengthen our team and help us set new benchmarks in software excellence. If you take pride in streamlined processes, enjoy working with the latest automation tools, and love collaborating with passionate professionals, you've found your next home!

What You'll Accomplish

Craft and Evolve Test Automation:

Write, refine, and expand sophisticated automated test scripts in Java using Selenium WebDriver and TestNG. 💢

Build with Confidence:

Design scalable, reusable test automation frameworks that stand the test of time and complexity.

Streamline Processes:

Manage builds and dependencies with Maven or Gradle to ensure smooth continuous integration.

Drive Quality in Every Release:

Integrate automation into CI/CD pipelines like Jenkins to maintain high standards. 💅 Collaborate Across the SDLC:

Partner with developers and stakeholders throughout the software lifecycle to deliver quality solutions. 💝

Contribute to Agile Success:

Engage in Agile ceremonies and help improve processes continuously. Investigate and Solve Challenges:

Analyze defects, resolve automation issues, and perform root cause analysis.

Good to Have:

Git/version control

Clear documentation and communication skills 🚣

Impactful Work: Shape automation strategy and raise quality standards. 📈 Growth Opportunities: Learn cutting-edge CI/CD and automation practices.

Apply today or tag someone who'd be perfect for this role!

yadhu.krishna@ifocussystc.com

Greetings of the day!!

We're hiring for one of our prestigious clients Quality Engineer (Data) ETL Testing.

Role: Quality Engineer (data) ETL Testing

Work Mode: Office

Experience

Total Yrs of Exp - 3-4 Years Relv Yrs of Exp - 3-4 Years

Mandatory Skills -

- 1.Data Management: Strong understanding of data management principles, Proficiency in working with different types of databases (SQL, NoSQL) and data formats (CSV, JSON, XML). 2.ETL (Extract, Transform, Load): Experience with ETL processes to extract data from various sources, transform it according to business rules, and load it into target systems. Knowledge of any ETL tools is beneficial. 3.Programming Skills: Proficiency in programming languages commonly used in data engineering such as Python, Java, or Scala with Spark. Knowledge of scripting languages like Bash or PowerShell can also be useful for automation tasks.
- 4.SQL: Strong SQL skills for querying and manipulating data in relational databases. This includes writing complex SQL queries, optimizing query performance, and understanding database indexing.
- 5.Testing Principles: Understanding of software testing principles, methodologies (e.g., Agile, Scrum), and best practices. Knowledge of test planning, test case design, and test execution strategies.
- 6.Data Visualization: Ability to visualize data effectively using tools like Tableau, Power BI, or matplotlib in Python. This skill helps in presenting test results and insights to stakeholders in a clear and understandable manner.
- 7. Version Control Systems: Proficiency in using version control systems such as Git for managing code and test data artifacts. Knowledge of branching strategies and collaborative development workflows is beneficial.
- 8. Automation Tools: Experience with automation tools and frameworks for test data provisioning and management. Familiarity with CI/CD pipelines for automated testing is also valuable, preferably on Azure DevOps. Knowledge of Azure databricks utilizing python and spark is a must.
- 9.Domain Knowledge: Understanding of the retail domain or industry. This helps in designing relevant test scenarios and ensuring data accuracy according to domain-specific requirements. 10.Communication and Collaboration: Effective communication skills to collaborate with cross-functional teams including developers, QA engineers, and business stakeholders. Ability to articulate technical concepts to non-technical audiences is important. 11.Problem-Solving Skills: Strong analytical and problem-solving skills to identify data-related issues, troubleshoot them efficiently, and propose effective solutions.

12. Test Management tools: Working Knowledge of test management tools like JIRA

Location: Bangalore
NP: Immediate -15 days
F2F Interview: Bangalore

SDET – Software Development Engineer in Test

Hyderabad/Bangalore

5 to 8 years

Summary:

Seeking a SDET to design, develop, and maintain automated testing frameworks. The ideal candidate will collaborate closely with developers to integrate testing into the software

development lifecycle, ensuring robust and scalable applications.

Responsibilities:

- Design, develop, and maintain automated test frameworks for functional, performance, and security testing using tools like Selenium, Playwright, and JMeter.
- Write and execute automated test scripts using tools such as Selenium, Playwright, and Aldriven platforms such as Functionize.
- Collaborate with developers to implement Test-Driven Development (TDD) and set up CI/CD pipelines using tools like GitHub Actions, and Azure DevOps in Azure environments.
- Perform API testing using tools like Postman, Karate, and REST Assured.
- Leverage all-in-one automation platforms like Katalon Studio, TestComplete, or Functionize to support Web, and API testing.
- Write and execute SQL queries to validate backend data and ensure data integrity.
- Identify, document, and track defects using JIRA, or similar issue tracking tools.
- Participate in code reviews to ensure testability, maintainability, and adherence to quality standards.
- Continuously optimize and scale test automation strategies for improved efficiency, coverage, and reliability.

Requirements:

- 2-4 years of experience as SDET within Healthcare Technology or Pharmacy Benefit Management, (PBM)
- Strong programming skills in JavaScript, Python, SQL, and familiarity with Alassisted scripting.
- Experience with test automation frameworks and building CI/CD pipelines.
- Understanding of cloud-based testing environments, particularly in Azure.
- Familiarity with performance testing concepts and tools.
- Solid grasp of API testing, database validation, and test data management.
- Knowledge of Agile methodologies and DevOps practices.
- Ability to collaborate effectively with cross-functional teams and contribute to quality assurance strategies.

Send your resumes to allan@teknosys-inc.com

Job Title: Senior Software Engineer – Playwright Automation

Company Description

Spearsoft is a dynamic start-up established in 2021, headquartered in Atlanta, USA, with an Offshore Delivery Centre (ODC) located in Hyderabad, India. The company specializes in providing diverse and high-quality IT solutions to clients at competitive prices through its

extensive network. In addition to IT services, Spearsoft is at the forefront of designing and developing cutting-edge robots that tackle real-world challenges. Spearsoft empowers individuals with technical skills through comprehensive training and staffing services, with a vision of pushing the boundaries of technical advancement. Join us on our journey towards a future of limitless possibilities.

Role Description

This is a full-time hybrid role for a Senior Software Engineer located in Bengaluru, with some work from home flexibility. The Senior Software Engineer will be responsible for designing, developing, and maintaining high-quality software solutions. Daily tasks include back-end development, programming, troubleshooting, and collaboration with cross-functional teams to deliver innovative products. The role requires in-depth technical knowledge and hands-on experience with software development and object-oriented programming methodologies.

Qualifications

Possess strong skills in Software Development, including Back-End Web Development and Programming

Experience with Computer Science principles and Object-Oriented Programming (OOP) methodology

Excellent analytical, problem-solving, and troubleshooting skills

Strong understanding of software development life cycle and agile methodologies

Ability to work effectively in a hybrid work environment

Experience in robotic solutions or similar innovative technology is a plus

Excellent verbal and written communication skills

Responsibilities

- Develop and maintain automated test scripts using Playwright with a strong focus on scalable, reusable, and reliable automation frameworks.
- Leverage 5 to 7 years of experience in Playwright automation to design, implement, and execute end-to-end testing strategies.
- Collaborate with cross-functional teams to define test requirements, ensure test coverage, and identify quality risks early in the development lifecycle.
- Execute manual testing when required, including exploratory, regression, and smoke testing.
- Participate actively in the Software Testing Life Cycle (STLC), including requirements analysis, test planning, test case development, execution, defect management, and test closure.
- Troubleshoot and resolve issues in automated test scripts, analyze test failures, and work closely with developers to reproduce and debug issues.
- Ensure timely delivery of high-quality releases by integrating automation into CI/CD pipelines.

Job Title: Business Analyst

Experience - 3+ Years

Location - Chennai

Job Summary:

We are seeking a detail-oriented and strategic Business Analyst to bridge the gap between business needs and technology solutions. The ideal candidate will analyze data, identify inefficiencies, and collaborate with stakeholders to develop actionable insights and drive business improvements.

Key Responsibilities:

- Collaborate with stakeholders to gather, document, and validate business requirements.
- Analyze business processes, workflows, and data to identify areas for improvement.
- Develop and present data-driven insights using tools like Excel, Power BI, or Tableau.
- Translate business needs into functional specifications or user stories for development teams.
- Facilitate communication between business units and IT teams to ensure alignment.
- Create detailed documentation including process maps, requirement specs, and reports.
- Support testing and validation of implemented solutions to ensure they meet business goals.
- Monitor solution performance and recommend enhancements based on feedback and evolving needs.

Required Skills and Qualifications:

- Bachelor's degree in Business Administration, Information Systems, or a related field.
- 2+ years of experience in business analysis or a similar role.
- Strong analytical and problem-solving skills with proficiency in data analysis tools.
- Excellent communication and stakeholder management abilities.
- Familiarity with Agile/Scrum methodologies and tools like JIRA or Confluence.
- Experience with process modeling tools (e.g., Visio, Lucidchart) is a plus.

Preferred Qualifications:

- Certification in Business Analysis (e.g., CBAP, CCBA) or Agile methodologies.
- Experience in logistics, supply chain, or IT operations is highly desirable.
