Job Title: Playwright Automation Engineer

Experience: 2 to 3 Years Location: JP Nagar, Bangalore

F2F is Mandatory

Job Description:

We are seeking a dedicated and experienced Playwright Automation Engineer with 2 to 3 years of hands-on experience in automating web applications using Playwright. The ideal candidate will have a strong foundation in automation testing with a primary focus on Playwright and a passion for quality engineering.

Key Responsibilities:

- Design, develop, and maintain end-to-end test automation scripts using Playwright
- Collaborate with development and QA teams to understand test requirements
- Execute test automation as part of CI/CD pipelines
- Report and document test results and raise bugs
- Troubleshoot test failures and resolve issues effectively

Required Skills:

- 2–3 years of experience in automation testing using Playwright (JavaScript preferred)
- Strong understanding of automation frameworks and best practices
- Experience with version control systems like Git
- Familiarity with CI/CD tools (e.g., Jenkins, GitHub Actions)
- Good communication and problem-solving skills

Note: We are specifically looking for candidates with exclusive Playwright automation experience.

Urgent Requirement!

OT Security Expert Location: Bangalore Experience: 7-9 years Industry: Automotive

Job Description:

We are seeking a highly skilled OT Security Expert with 7-9 years of experience to join our team in the automotive industry. The ideal candidate will have hands-on experience in OT security, proficiency with the OT vulnerability management tools, and the ability to draft process documents. This role requires a deep understanding of operational technology security and its application within the automotive sector.

Key Responsibilities:

- Drive OT security strategies-initiative globally.
- Develop and implement OT security strategies and policies to protect automotive manufacturing systems and networks.
- Conduct risk assessments and vulnerability analyses to identify and mitigate security
- Utilize the Otorio tool to monitor, detect, and respond to security incidents within OT environments.
- Draft and maintain comprehensive process documents, including security protocols, incident response plans, and compliance reports.
- Collaborate with cross-functional teams to ensure the integration of security measures into automotive production processes.
- Provide training and guidance to staff on OT security best practices and procedures.
- Stay updated with the latest industry trends, threats, and technologies in OT security.
- Design and implement network segmentation and access control measures to safeguard OT systems.
- Perform regular security audits and assessments to ensure compliance with industry

standards and regulations.

- Develop and execute incident response plans to effectively address and recover from security breaches.
- Work closely with IT and engineering teams to ensure seamless integration of OT security measures with existing infrastructure.
- Conduct forensic analysis and root cause investigations of security incidents to prevent future occurrences.
- Participate in the development and testing of disaster recovery and business continuity plans.

Qualifications:

- Bachelor's degree in Computer Science, Information Technology, Cybersecurity, or a related field.
- 7-9 years of experience in OT security, preferably within the automotive industry.

Ikastar is **#hiring** a QA test engineer for Chennai, Tamilnadu.Apply today or share it with your network.

Job Title:

QA Automation Test Engineer – Selenium & SQL (8+ Years Experience)

Location:

Chennai (Onsite)
Shift: Day Shift

Joining: Immediate Joiners Preferred

Job Summary:

We are seeking a highly skilled and experienced QA Automation Test Engineer with a strong background in Selenium and SQL. The ideal candidate will have at least 8 years of experience in designing, developing, and executing automation test scripts. The role involves close collaboration with development teams to ensure product quality and performance.

Key Responsibilities:

- 1. Design and develop robust, reusable, and scalable automation test scripts using Selenium.
- 2. Create and maintain automated test frameworks.
- 3. Write complex SQL queries for validating backend data and test results.
- 4. Perform end-to-end testing of web applications and APIs.
- 5.Collaborate with cross-functional teams (Dev, Product, DevOps) to understand business requirements and ensure test coverage.

- 6. Analyze test results, identify bugs, and provide detailed reports.
- 7.Participate in Agile/Scrum meetings and contribute to sprint planning, demos, and retrospectives.
- 8. Mentor junior QA engineers and ensure testing best practices are followed.

Required Skills & Qualifications:

- 1. Minimum 8 years of hands-on experience in QA automation.
- 2. Proficiency in Selenium WebDriver with Java/Python.
- 3.Strong experience in SQL (Oracle/MySQL/PostgreSQL) for data validation.
- 4. Experience with test frameworks like TestNG, JUnit, or similar.
- 5. Working knowledge of CI/CD tools like Jenkins, Git.
- 6. Solid understanding of SDLC, STLC, Agile methodologies.
- 7. Good exposure to bug tracking tools like JIRA, Bugzilla, etc.
- 8. Excellent analytical and problem-solving skills.
- 9.Strong communication and documentation skills.

Preferred Skills:

- 1. Experience in API testing (using tools like Postman, Rest Assured).
- 2. Knowledge of cloud platforms like AWS/Azure is a plus.
- 3. Experience in performance testing tools like JMeter is an advantage.

Education:

Bachelor's or Master's degree in Computer Science, Information Technology, or a related field.

Interested candidates whose profile matches the above JD kindly share their resume to careers@ikastar.com

◆ Job Title: Product Owner – Financial & Accounting Domain

Location: Chennai (Work From Office)

Job Type: Permanent
Notice Period: 7 Days
Experience: 8+ years

Apply by Sharing your Resume on shweta@manasthtech.com

Job Description:

We are looking for an experienced and detail-oriented Product Owner with deep expertise

in the Financial & Accounting domain, particularly in the US market. In this role, you will be the strategic link between business stakeholders and development teams, ensuring our products align with US financial regulations, market needs, and compliance requirements. You will own the product backlog, drive product vision, and leverage Agile methodologies to deliver impactful solutions.

Key Responsibilities

Define and communicate product vision and roadmap aligned with US GAAP, SEC regulations, SOX compliance, and market trends.

Gather, analyze, and prioritize requirements from finance, operations, compliance, legal, and customer stakeholders.

Write clear user stories and acceptance criteria to guide development teams.

Collaborate with engineering, UX, QA, and business analysts to deliver high-quality product releases.

Conduct market research and competitor analysis to identify opportunities and inform enhancements.

Engage with customers and internal users for feedback and product validation.

Monitor product performance metrics and drive continuous improvement.

Facilitate Agile ceremonies such as sprint planning, backlog grooming, and sprint reviews.

Communicate progress, risks, and updates effectively to stakeholders.

Qualifications

Bachelor's degree in Finance, Accounting, Business Administration, or related field.

MBA, CPA, or CFA certification is a plus.

9+ years overall experience with at least 3+ years as a Product Owner or Business Analyst in the financial services/accounting domain.

Strong understanding of US financial regulations, accounting standards, and compliance requirements.

Proven experience in Agile/Scrum environments.

Excellent communication, analytical, and stakeholder management skills.

Experience with ERP systems, accounting platforms, and financial reporting tools.

Exposure to US-based clients and market nuances.

Preferred Skills

Knowledge of SOX, SEC filings, tax compliance.

Experience in AP, AR, bank reconciliation, profit & loss, journal entries, balance sheet reconciliation, month-end closing.

Familiarity with BI tools and financial data analytics.

Proficiency with Jira, Confluence, Big Picture, Trello or similar tools.

Ability to work with distributed and cross-functional teams.

We're Hiring! − <u>#SeniorQAAutomationEngineer</u> / <u>#SDET</u>

Locations: Bangalore
Experience: 5–8Years
Work Mode: Hybrid

We're on the lookout for a highly skilled <u>#SeniorQAAutomationEngineer</u> / SDET to join our dynamic engineering team. If you're passionate about building reliable, scalable automation frameworks and enjoy working in a collaborative Agile environment — this role is for you.

What You'll Do:

- Architect and develop scalable, maintainable automation frameworks using <u>#Java</u>, #Selenium, #RestAssured, #TestNG
- Lead end-to-end **#API** and **#UI** testing initiatives ensuring product excellence
- Collaborate in <u>#Agile</u> teams and drive quality within CI/CD pipelines using tools like #GitLab, #Jenkins, #Azure DevOps
- ✓ Manage test cases and defects with tools like #JIRA, #Zephyr, #HP ALM
- Mentor juniors and share best practices in automation and testing

What We're Looking For:

- ✓ 5-8 years of proven experience in #QA Automation / SDET roles
- Expertise in <u>#Java</u>-based automation and tools like <u>#Selenium</u> and <u>#RestAssured</u>
- ✓ Solid understanding of #API testing, #UI testing, and testing methodologies
- ✓ Hands-on experience with <u>#Agile</u> development and CI/CD workflows
- ✓ Familiarity with test management and bug tracking tools
- Ready to make an impact? Send your resume to Habiba.s@sureminds.co.in or DM me directly!
- Sknow someone perfect for this? Please share or tag them!

↓ Job Title:

Senior QA / Test Automation Engineer

Locations:

Pune, Bangalore, Mysore

Experience & Compensation:

10+ years of hands-on experience in Test Automation

Required Technical Skills:

Selenium for robust web UI automation

Strong C# development skills, including writing clean, maintainable automation code SpecFlow expertise for BDD (Behavior-Driven Development) using Gherkin syntax Experience with Azure DevOps (ADO) for test case management, pipelines, and reporting Solid practice of TDD/BDD methodologies in test-driven or behavior-focused automation Proficiency in API Automation, using tools such as RestSharp, HttpClient, or similar Working knowledge of CI/CD pipelines, ideally via Azure Pipelines, Jenkins, or GitHub Actions

© Key Responsibilities:

Design, build, and maintain scalable automation frameworks integrating Selenium with C# Implement SpecFlow-based BDD test suites for both UI and API layers

Collaborate with cross-functional teams (DevOps, Developers, Product, QA) throughout the SDLC

Drive the adoption of test automation best practices, including automated builds, deployments, test runs, and feedback loops

Design and implement API automation suites for RESTful services

Mentor junior engineers in automation techniques and quality best practices Monitor test results, analyze failures, and continuously improve test suite stability What We're Looking For:

You've solved complex automation challenges and delivered reliable test suites in largescale enterprise environments

Excellent communication skills, especially for articulating BDD feature files and automation logic to stakeholders

Strong problem-solving mindset, resourcefulness in debugging flaky or failing tests Proven ability to work in fast-paced, Agile/DevOps environments

Passion for quality, continuous improvement, and automation excellence

Bonus (but highly valued):

Experience with cloud-based test execution (e.g., Selenium Grid, Sauce Labs, or Azure Test Plans)

Familiarity with performance testing tools (e.g. JMeter, k6)

Prior hands-on exposure to mobile automation (Appium, Xamarin, etc.)

Certifications like Microsoft Azure DevOps, ISTQB, or similar

How to Apply: nischitha@varite.com

Please apply with your updated resume highlighting:

Your core experience in Selenium/C# automation

BDD test suites written using SpecFlow, including feature samples if possible

Azure DevOps integration and test pipeline examples

API automation and CI/CD pipeline contributions

Feel free to include relevant links (GitHub projects, blogs, sample code).

Why You'd Enjoy Working With Us:

Collaborative culture with access to global projects and modern DevOps tools Opportunity to lead test automation strategy and mentor others Continuous learning environment with room to explore new tech and frameworks

INNOV IS HIRING Senior Associate QA L1.

Exp level – 5 to 10 years Location – Bangalore

Required Skills:

Proficiency in Selenium and Java.

Experience with UI testing.

Familiarity with version control, defect tracking, and test management tools (GIT, JIRA). Mandatory Skills - AEM experience OR Catslite experience, API testing.

Interested candidates can share their resumes to pralipta@uritechnologies.com

- Hello connections,
- We are still #hiring! Know anyone who might be interested?
- Cynergy Services is Urgently hiring Test Engineer.(Actuarial)
- Interested Candidate share your Resume at -gborde@cynergyservices.org
- Role: Test Engineer(Actuarial)
- ◆ Exp 8+ yrs
- Location Bangalore
- Notice Period: Immediate to 15 days
- JOB SUMMARY

As a Test Engineer, you will play a critical role in supporting the Test Engineer in executing comprehensive testing strategies and plans for our actuarial systems and models, including FIS Prophet. You will design, execute, and analyze automated tests to ensure the quality, reliability, and scalability of our actuarial solutions. We are looking for individuals who "Do the right thing", are Open and Transparent, and want to build and work within our Global Technology Product team. This role will support the PMCS re-hosting and the transformation of the Actuarial ecosystem and Actuarial model convergence (FFP) projects.

JOB DESCRIPTION

Role and Responsibilities

Develop and execute test plans and test cases for actuarial systems and models, including FIS Prophet.

Design, develop, and maintain automated test scripts using Selenium, Python, or Java. Implement and manage test automation frameworks and tools to improve testing efficiency and coverage for actuarial solutions.

Conduct performance testing to ensure actuarial systems meet performance and scalability requirements.

Collaborate with actuaries, developers, and other stakeholders to understand actuarial requirements, identify testing needs, and address issues throughout the development lifecycle.

Participate in the continuous integration and delivery (CI/CD) pipeline to integrate automated tests.

Analyze test results, identify defects, and work with developers to resolve issues. Contribute to the continuous improvement of testing processes and methodologies. Create and maintain detailed test plans, test cases, test scripts, and test reports, ensuring comprehensive documentation of testing activities and results.

Qualifications

Bachelor's degree in Computer Science, Software Engineering, Actuarial Science, or a related field.

Proven experience in test automation using Selenium, Python, or Java.

Strong understanding of actuarial testing methodologies and actuarial models.

Experience with performance testing tools such as JMeter.

Familiarity with CI/CD tools like Azure DevOps.

Excellent analytical and problem-solving skills.

Strong communication and collaboration skills.

Attention to detail and a commitment to quality.

Hi All below are the current oportunities in my org interested candidate can send the resume to shabinabi.Mulla@aptean.com

Lead Engineer QA (Integration testing)

Work Experience 7-10 years

Knowledge, Skills and Abilities

- 7+ years of experience in QA, with at least 3 years leading SIT efforts.
- · Strong knowledge of system integration principles, APIs, middleware, and data exchanges.
- Experience testing enterprise applications (ERP, CRM, Supply Chain, etc.)
- Proficiency in tools like Postman, JIRA, Zephyr, Jenkins, and API testing tools.

- · Good understanding of SQL and data validation practices.
- Exposure to microservices, REST/SOAP APIs, and enterprise middleware platforms.
- · Strong understanding of CI/CD pipelines and experience integrating test automation into DevOps workflows.
- · Proficiency in writing test scripts using JavaScript, Python, Selenium or other scripting languages.
- · Experience in API testing using tools like Postman, RestAssured, or Karate.
- · Strong knowledge of cloud-based testing environments (AWS, Azure, or GCP) and containerization tools (Docker, Kubernetes).
- Experience in AI/ML-driven testing methodologies and predictive analytics in QA.

Job Title: Senior Engineer, Devops

Location Bangalore What You'll Do

Design and implement CI/CD pipelines using Azure DevOps, GitHub Actions, and GitOps principles

Define and manage cloud infrastructure using Infastructure as Code practices that enable reproducibility, automation, and version control

Own and operate production-grade Kubernetes environments across multiple workloads Drive deployment automation and reliability across both Windows and Linux systems Define and maintain end-to-end observability using tools such as OpenTelemetry, Prometheus, Grafana, and related telemetry stacks

Work cross-functionally in an agile environment to support product delivery and platform scalability

Promote cloud-native and security-first practices across the engineering organization What We're Looking For

5+ years of experience in DevOps or infrastructure engineering in a cloud-native SaaS environment

Proven expertise with Azure Cloud, Azure DevOps, and GitHub platforms for CI/CD and infrastructure automation

Deep, hands-on experience managing and optimizing Kubernetes clusters Strong command of modern observability practices and tools, including OpenTelemetry, Prometheus, and Grafana

Proficiency with infrastructure automation using Terraform and/or Bicep Solid understanding of deployment pipelines, operational resilience, and systems design Clear communicator with the ability to collaborate effectively across teams

Excellent problem-solving skills and ability to work in a fast-paced, Agile environment.

Looking for a Senior Software Engineer – QA Validation to join our dynamic team at ALIF Semiconductor, Bangalore, India.

If you have strong 5+yrs of experience in QA validation, embedded systems, and a passion for ensuring product quality—let's connect!

Marian DM me or drop your resume at chaitra.srinivas@alifsemi.com

Tag someone who might be a great fit!

We are hiring for Scrum Master for 3-5yrs of Experience.

No of positions:1

Location: Bangalore

Immediate to 30 days Preferable

Key Responsibilities:

- Facilitate Scrum ceremonies: Stand-ups, Planning, Reviews, Retrospectives, and Backlog Refinement.
- Apply Agile, Lean, and Scrum principles to evolve team practices. 2.
- 3. Partner with Product Owners on story writing, backlog prioritization, and release planning.
- Lead estimation and planning to ensure accurate delivery forecasting.
- Track sprint health using burn-down charts, velocity, and Agile metrics. 5.
- 6. Identify and remove blockers to optimize team performance.
- Serve as a servant leader, fostering ownership, accountability, and continuous improvement.
- Coach team members on Agile values and practices. 8.
- Bridge communication between technical and non-technical stakeholders.
- 10. Shield the team from disruptions to maintain focus.
- 11. Promote cross-functional collaboration across teams.
- 12. Contribute to organization-wide Agile adoption and transformation.

Required Technical Skills:

Core Technical Skills (Proficiency Level: Mature)

- Experience with Java-based applications in product development or delivery. 1.
- 2. Solid understanding of SDLC in Java environments.
- 3. Strong collaboration with developers, QA, and architects on timelines and dependencies.
- 4. Familiar with Java build tools (Maven, Gradle), Git, and CI/CD pipelines.
- 5. Knowledge of microservices, REST APIs, and Java frameworks like Spring Boot.
- 6. Deep understanding of Agile frameworks: Scrum, Kanban, SAFe, and Lean.
- 7. Skilled in facilitation, conflict resolution, and decision-making.
- Proficient in JIRA, Confluence, and Agile work tracking.
- Experienced in user story writing, requirement management, and backlog grooming.
- 10. Proficient with Agile metrics for tracking and forecasting.

- 11. Strong communicator across technical teams and executive stakeholders.
- 12. Experience managing Agile delivery in product or SaaS environments.
