Position: Pharmacovigilance Tester

Location - Bangalore, Noida, Hyderabad (Hybrid)

Experience – 3 – 5 Years

Job Description

The main function of a QA test analyst is to develop and execute software test plans in order to identify software problems and their causes.

An entry level QA test analyst will typically run scripts given to them; as they progress, the analyst is responsible for the development of scripts.

Job Responsibilities:

- · Design test plans, scenarios, scripts or procedures.
- Test system modifications to prepare for implementation.
- Develop testing programs that addresses areas such as database impacts, software scenarios, or usability.
- Document software defects, using a bug tracking system, and report defects to software developers.
- · Identify, analyze and document problems with program function, output, online screen or content.
- · Monitor bug resolution efforts and track successes. Create or maintain databases of known test defects.
- · Plan test schedules or strategies in accordance with project scope or delivery dates.

Skills:

- · Verbal and written communication skills, problem solving skills, customer service and interpersonal skills
- Pharmacovigilance
- · Ability to work independently and manage one's time.
- · Basic mentoring skills necessary to provide support and constructive performance feedback.
- · Knowledge of circuit boards, processors, chips, electronic equipment, and computer hardware and software, including applications and programming.
- · Knowledge of design techniques, tools, and principles involved in production of precision technical plans, blueprints, drawings, and models.
- · Knowledge of the practical application of engineering science and technology. Knowledge of computer development software, such as Microsoft Visual Basic, Linux, JavaScript, etc.
- Education/Experience: Bachelor's degree in computer science, computer engineering or relevant field required.

TestingXperts is Hiring!

Join a team that's building intelligent, high-performing digital systems for global enterprises.

We're looking for:

◆Test Engineer-Playwright:

Senior Test Engineer with 7+ years' experience in software testing, specializing in Playwright automation and JavaScript/TypeScript. Experience with mobile and cloud-based testing tools, plus familiarity with other automation technologies, is an added advantage.

Senior ETL Test Engineer:

Design, develop, and execute comprehensive ETL test cases, ensuring data accuracy and integrity across transformation and migration processes. Hands-on experience with ETL tools (Informatica, Talend, SSIS, or DataStage), strong SQL/database skills, and familiarity with data warehousing concepts are essential.

◆Automation Test Engineer:

Senior Test Engineer with 4+ years' experience in automation testing, specializing in analytical skills to design and execute manual and automated test cases across functional, integration, and regression scenarios. Experience in API testing, UI automation (using Selenium, Cypress, Playwright, or similar), and familiarity with Agile methodologies, test management, and defect tracking tools is essential.

◆Manual Testing:

Manual Test Engineer with 4+ years of experience in designing and executing detailed test cases for web and mobile applications. The ideal candidate will have a strong grasp of SDLC/STLC processes, defect tracking tools, and functional, integration, and regression testing practices.

Locations: Noida | Chandigarh | Hyderabad | Bengaluru

Experience: 5-15 years in relevant roles

Why Tx?

- One of the Top 3 pure-play Quality Engineering companies globally
- Great Place to Work 5 years in a row
- Deep focus on innovation, Al-first engineering, and modern tech stacks
- Agile, diverse, and people-first culture

Ready to make your next big move?

Apply here: apply@testingxperts.com

We're Hiring: Senior Automation Test Engineer

↑ Location: Hyderabad ✓ Experience: 5+ Years

💼 Employment Type: Full-Time

Job Description

Join our QA team to drive automation initiatives and ensure high-quality product delivery. You will design, develop, and maintain robust automated test frameworks and play a critical role in identifying issues and improving the overall software quality.

Key Responsibilities

- ☑ Design and develop automation test scripts using Selenium, TestNG, or similar tools
- ✓ Integrate automated tests into CI/CD pipelines (e.g., Jenkins, GitLab CI)
- Perform functional, regression, and performance testing
- ✓ Collaborate closely with developers, BA, and QA teams
- Review requirements, specifications, and technical design documents
- Identify, record, and track bugs thoroughly

Must-Have Skills

- Strong experience in Selenium WebDriver, Java/Python
- ◆ Hands-on with tools like JIRA, Git, Jenkins, Postman
- Good knowledge of testing REST APIs
- Experience with automation frameworks (Hybrid, Data-Driven, POM)
- Excellent problem-solving and communication skills

Nice to Have

- **+** Knowledge of BDD (Cucumber)
- + Experience in cloud-based testing platforms (e.g., BrowserStack, Sauce Labs)

SDET – Software Development Engineer in Test

Hyderabad/Bangalore

5 to 8 years

Summary:

Seeking a SDET to design, develop, and maintain automated testing frameworks. The ideal candidate will collaborate closely with developers to integrate testing into the software development lifecycle, ensuring robust and scalable applications.

Responsibilities:

- Design, develop, and maintain automated test frameworks for functional, performance, and security testing using tools like Selenium, Playwright, and JMeter.
- Write and execute automated test scripts using tools such as Selenium, Playwright, and Aldriven platforms such as Functionize.
- Collaborate with developers to implement Test-Driven Development (TDD) and set up CI/CD pipelines using tools like GitHub Actions, and Azure DevOps in Azure environments.
- Perform API testing using tools like Postman, Karate, and REST Assured.
- Leverage all-in-one automation platforms like Katalon Studio, TestComplete, or Functionize to support Web, and API testing.
- Write and execute SQL queries to validate backend data and ensure data integrity.
- Identify, document, and track defects using JIRA, or similar issue tracking tools.
- Participate in code reviews to ensure testability, maintainability, and adherence to quality standards.
- Continuously optimize and scale test automation strategies for improved efficiency, coverage, and reliability.

Requirements:

- 2-4 years of experience as SDET within Healthcare Technology or Pharmacy Benefit Management, (PBM)
- Strong programming skills in JavaScript, Python, SQL, and familiarity with Alassisted scripting.
- Experience with test automation frameworks and building CI/CD pipelines.
- Understanding of cloud-based testing environments, particularly in Azure.
- Familiarity with performance testing concepts and tools.
- Solid grasp of API testing, database validation, and test data management.
- Knowledge of Agile methodologies and DevOps practices.
- Ability to collaborate effectively with cross-functional teams and contribute to quality assurance strategies.

#ETLTester | Hyderabad | 4+ years in the game

Because every bit of data deserves a safe, beautiful journey to the cloud.

We're looking for someone who:

Thinks in #SQL

Talks #Talend or #Informatica

Loves clean data and elegant test cases

Can guide data gently into #Snowflake

> Leads with heart — onshore & offshore

If you're a QA soul who dances with structure, dreams in precision, and guides data on flawless journeys — come craft test cases that sing stories.

Together, let's turn every data migration into a masterpiece.

Ready to guide data on its next beautiful journey? Send your resume to "ythanda@willspired.com"

Know a QA unicorn who speaks fluent SQL and leads like a data wizard? Share this **#opportunity**, and let's catch our next cloud-crushing legend!

We have a scheduled drive for Automation Test Engineer for our Hyderabad based new client:

Expr: 5 to 8 yrs

Job Location: Hyderabad/Bangalore

Automation Test Engineer

5+ years of experience in Manual and automation testing (using Selenium Java, Postman,

Rest Assured, Cucumber, Test NG framework) Strong JAVA-Selenium programming skills

Experience with Agile Scrum Methodology

core skills (Manual & Automation Testing, UAT Testing, and Payments Domain expertise) are in high demand, especially in fintech, banking, and digital payments.

Below is a detailed breakdown of each skill, its importance, and recommendations for improvement.

Experience in UAT testing

Payment's domain experience

UAT ensures the application meets business and end-user requirements before going live. In payments testing, UAT is critical for validating: Payment workflows (credit/debit, UPI, wallets, etc.), Transaction success / failure scenarios, Refund and chargeback processes...etc
