🚨 Now Hiring: Database Tester – Functional & Database QA

📍 Location: Bangalore, India
🕐 Contract Duration: Full-Time (Project-Based)
🎯 Experience: Relevant experience in functional and database testing (Treasury/Trading
domain preferred)

We're hiring a Database Tester with strong functional testing skills and deep understanding
of database validation and automation. If you're passionate about delivering accurate, high-
quality testing in a fast-paced environment — especially in the Treasury and Trading domain
— this is the role for you.

🔧 Your Responsibilities Will Include:

✅ Functional Testing
* Design and execute test cases for various application functionalities
* Perform functional, regression, and integration testing
* Identify, document, and track functional defects
* Collaborate with developers and participate in code reviews
* Develop and maintain automated functional test scripts

✅ Database Testing
* Design and execute test plans for database functionality, performance, and security
* Conduct data validation, consistency, and integrity checks
* Write SQL queries to verify data accuracy and completeness
* Track and resolve database-related defects with DBAs and developers
* Develop and maintain automated database test scripts
* Monitor database performance and detect bottlenecks

✅ General Contributions
* Enhance testing methodologies and stay updated with industry trends
* Communicate effectively with cross-functional teams and stakeholders

🧠 What You Bring
✔️ Strong experience in both functional and database testing
✔️ Proficiency in writing SQL queries and test scripts
✔️ Knowledge of automation tools for functional and DB testing
✔️ Background in testing Trading or Treasury applications is a strong advantage
✔️ Strong communication and collaboration skills

If you're ready to ensure the quality of high-stakes financial systems with precision and

speed, we want to hear from you.

📩 Apply now or DM for details: **careers@technohandz.com**

Write and execute end-to-end automated test scripts.
Collaborate with QA, DevOps, and Development teams to ensure quality across the SDLC.
Integrate automated tests into CI/CD pipelines using tools like Jenkins, Azure DevOps, or
GitHub Actions.
Troubleshoot test failures and work with developers to resolve issues.
Document test strategies, scenarios, and results.
Continuously improve test coverage, efficiency, and reliability.

✅ Requirements:
🎓 Education:
B.E (Bachelor of Engineering) or equivalent.

💼 Experience:
3–5 years in software test automation.
Minimum 1–2 years of hands-on experience with Playwright.

🛠 Skills:
Proficient in Java or C# (at least one is a must).
Experience building and maintaining automation frameworks.
Hands-on with Git and CI/CD tools (Jenkins, Azure DevOps, GitHub Actions).
Understanding of Agile methodologies and SDLC.
Experience in API testing and automation.
Familiarity with Docker, BDD frameworks (Cucumber or SpecFlow), and reporting tools
(Allure, Extent Reports).
ISTQB certification is a plus.

✨ Why Join Us?
Work with cutting-edge test automation tools.
Hybrid flexibility in Bangalore.
Opportunity to grow in QA, DevOps, and automation leadership.

🚀 Hiring Alert: Looking for a Software Development Engineer in Test (SDET) - C2H🚀
Employment Type: Contract for 6 months (can be extended based on performance and business requirements)
No. of positions: 3
Base Location: Bengaluru (Fully Remote role)
Budget: ₹8 LPA
Years of Experience: 1–4 years
Notice Period: Immediate

Job Type: Payroll

📌Mandatory Skills:
✔️Minimum 2+ years of hands-on experience as an SDET
✔️Strong experience in API Automation using Rest Assured
✔️Strong programming skills in Java

👀 What qualities are we looking for?
✅Must be an independent executioner and have prior experience of handling complex projects with stakeholders
✅Must have prior experience in creating optimal test strategies (including ✅Functional, Non-Functional, Analytics, and automation) and test plans for short- and long-term projects
✅Strong verbal and written communication skills
✅Very good design skills
✅Understanding and implementation-level experience on design patterns
✅Prior experience in creating test automation frameworks and self-serve tools
✅Automation experience for REST-based web services using Java tools and libraries like TestNG, Maven, HttpClient, Rest Assured, JAXB, JAX-RS, Jersey, Jackson, JMeter.
✅Strong hands-on experience in functional and non-functional automation for Web and REST services
✅Strong in writing complex SQL queries using joins
✅Hands-on experience in designing database schemas for self-serve utilities
✅Exposure to Big Data and Data Science models implementation is a big plus.

📌What will you get to do here?
✔️Responsible for finding innovative ways to optimize the test strategy to maximize ROI from automation
✔️Add new capabilities and features to the automation framework used by the QA team
✔️Manage and maintain test coverage through periodic reports to engineering and stakeholders
✔️Hands-on contribution to single or multiple projects
✔️Create optimal test strategies (Functional, Non-Functional, Analytics, Automation) for both short- and long-term projects
✔️Apply and implement design patterns effectively

📌Must have Skills
#Java (All Versions) - 2 Years
#SQL - 2 Years
#REST - 2 Years
#ApacheMaven - 2 Years
#ApiAutomation - 2 Years
#TestAutomation - 2 Years
#Jackson - 2 Years
#DatabaseDesign - 2 Years

#FunctionalTesting - 1 Year

We have immediate openings for below postion for our Client .

Job Role: T24 Testing
Exp: 15 Years
Location: Chennai
Notice Period : Immediate to 30 Days

Job Summary:

 We are looking for an experienced Testing Lead to drive the testing strategy, planning, and
delivery for large-scale T24 projects within the private banking domain.
The ideal candidate will lead functional, regression, automation, and non-functional
testing across complex end-to-end systems and drive upstream quality improvements by
collaborating with business analysts, development teams, and stakeholders.

Roles and Responsibilities:

Lead Testing Strategy: Define and execute the overall testing strategy, plans, and delivery
for large T24 transformation and upgrade programs. Scope & Planning: Review business
requirements, system specifications, and design documents to define test scope, approach,
and effort estimation.
· End-to-End Testing: Oversee functional, regression, automation, and non-functional
testing across integrated systems and channels.
· Automation: Implement and govern test automation frameworks using tools like Selenium,
integrating with DevOps pipelines where applicable.
· Defect Management: Collaborate with cross-functional teams to manage defect triage,
resolution, and reporting.
· Quality Improvements: Drive upstream quality initiatives by working closely with business
analysts and development teams to prevent defects early.
· Team Leadership: Lead, mentor, and manage distributed testing teams, ensuring effective
delivery and adherence to quality standards.
· Stakeholder Management: Provide clear and regular updates to stakeholders, project
managers, and leadership on test progress, risks, and mitigations.

Hope you are doing well !!!

Role : UI/UX Automation QA Engineer
Location :Bangalore
Experience :6 to 9 Years
Notice Period : Immediate to 15 days

Job Description:

● Develop automated UI test scripts using Tosca, focusing on dynamic and component-based interfaces.
● Build and maintain reliable regression suites that support cross-browser and responsive testing.
● Perform manual exploratory testing to validate visual fidelity, interaction behavior, and user experience flow.
● Attend and participate in design reviews to bring early awareness to otherwise unforeseen use cases that should be considered.
● Validate components built with Angular, Kendo, and Web Components for visual and behavioral consistency.

● Ensure alignment with design specifications and accessibility standards (WCAG), including keyboard navigation, ARIA roles, and contrast compliance.
 ● Collaborate closely with designers to test against mockups and UX patterns. ● Participate in Agile/SAFe ceremonies and work collaboratively with cross-functional
teams to deliver high-quality features.
● Maintain and manage QA test environments and validate deployments.
● Capture and analyze QA metrics and report insights to the team.
● Contribute to test documentation, reusable test strategies, and overall process improvements.
● Mentor junior QA engineers and provide guidance on best practices in UI/UX-focused testing.

Qualifications & Skills:

● 6+ years of experience in software quality assurance, with 3–5 years in frontend/UI-focused roles.
● Hands-on expertise with Tosca for UI test automation and debugging.
● Strong understanding of component-based UI frameworks like Angular, Kendo, and Web Components.
● Proven experience in cross-browser and responsive testing practices.
● Familiarity with visual regression testing tools.
● Knowledge of accessibility standards (WCAG), including testing for screen readers, keyboard support, and semantic HTML.
● Skilled in Azure DevOps for test execution, tracking, and CI integration.
● Excellent attention to detail, communication skills, and collaborative mindset. ●
Experience working in Agile/SAFe environments with designers, developers, and product

🌟 WE ARE HIRING 🌟

Job Title: DevSecOps Engineer
Location: Bangalore / Pune
Experience: 8–10 Years

Job Summary:
We are seeking a seasoned DevSecOps Engineer with 8–10 years of experience to lead the design, implementation, and maintenance of secure, scalable, and efficient CI/CD pipelines across diverse application stacks. The ideal candidate will bring deep technical expertise in automation, security integration, and cloud-native tools to support digital transformation initiatives in Public and Hybrid Cloud environments.

Key Responsibilities:
Design, build, and maintain robust DevSecOps CI/CD pipelines for diverse application architectures.
✅ Drive the integration of security practices into DevOps processes, ensuring compliance and resilience across environments.
✅ Administer and support DevSecOps tools and platforms, including Jenkins, Azure DevOps, GitHub/GitLab/Bitbucket, SonarQube, and Artifactory/Nexus.
✅ Collaborate with cross-functional teams including Developers, QA, Architects, and IT Operations to deliver secure, automated solutions.
✅ Develop and maintain automation scripts using Helm, Groovy, Python, PowerShell, MS Build, and Terraform.

Required Skills & Experience:
✍️ 7+ years of hands-on experience in DevOps/DevSecOps Engineering roles.
✍️ Proficiency in scripting languages: Python, PowerShell, Groovy, Helm, and Terraform.
✍️ Deep understanding of CI/CD pipeline tools: Azure DevOps, Jenkins, GitHub/GitLab, SonarQube, Nexus/Artifactory.
✍️ Experience with application stacks such as Apache, JBoss, Node.js, Spring Boot, Tomcat.
✍️ Strong experience with container technologies and RedHat tools: Docker, Podman, Skopeo, Buildah.
✍️ Solid experience in container orchestration using Kubernetes, OpenShift, and Azure Kubernetes Service (AKS).
✍️ Exposure to SecOps tools like Snyk for vulnerability scanning and remediation.

⭐ Interested candidates please comment me and share your resume.! ⭐

Good Morning everyone, we are looking for below positions as immediate.

Experience: 4-6 years
Designation: Test Specialist
Education: Graduate/Post-Graduate
Location: Bangalore (on-site)
Job type: Permanent
Industry: Information Technology and Consulting Services

Job Description:

We are looking for engineering professionals who can revolutionize customer experience & convenience in the digital environment by creating scalable and seamless multi-channel experiences by connecting buyers & sellers of all types and sizes across the nation.
*You'll have the opportunity to design, develop and support innovative solutions across a variety of applications, platforms and environments, building tomorrow's technologies.
*You'll put your skills, experience and passion to work in an entrepreneurial environment where success is rewarded.
*As a Software Development Engineer in Test, you will collaborate with developers and product managers to identify unambiguous software requirements, then develop and execute strategies to get that software into customer's hands in an efficient and high-quality fashion.
Responsibilities :
*Writing high quality code, participating in code reviews, participating in designing/architecting systems of varying complexity and scope, and creating testing framework supporting the design/coding tasks.
*Plan to automate and execute performance test website and all back-end services for every release and as requested
*Participating in team meetings, stand-ups, and architecture/design discussions. *Identify areas of improvement in our frameworks, tools, processes and strive to make them better
*Evaluate our success metrics and evolve our reporting systems.
*Dive deep into the catalog data, understand different functional areas, and use your creativity to come up with techniques to improve the quality of our solutions.
*Own and drive the testing of our entire ecosystem that consists of several applications, workflows and processes.
*Spearhead a process driven approach to software testing and collaborate with your colleagues to maintain high quality standards of our deliverables.
Skills:
• Experience in developing and designing automation testing frameworks
• Expertise in Automation testing.
• Minimum 4+ years' experience developing scripts and test automation (Java and knowledge on shell scripts will be add on).
• Experience in Backend testing, Frontend testing & automation testing using selenium webdriver
• Proficient in functional testing, API/Web-Services testing on Desktop and Mobile devices
• Experience with relational databases, designing schemas and formulating complex SQL queries.
• Familiarity with Linux or other UNIX server class operating systems.
• Good to have knowledge on Hybris, Jenkin, repositories and automation using appium.

Drop your resumes to **Praveen@nteksol.com**

Hiring for Quality Engineer-Automation

Location: - Bangalore only

Experience range: - 3 to 9 Years

Need Immediate joiners // Less than 15 days notice

CTC: - 3 to 6 years- Upto 9.20 LPA

API testing- 3-6 Yrs

• Design, implement, and maintain automated API tests using Rest Assured and Cucumber.

• Integrate automated test cases into CI/CD pipelines using GitHub Actions to ensure continuous integration and delivery.

• Perform manual testing of APIs using tools such as Postman or Insomnia to verify functionality and critical endpoints before they go live.

• Work collaboratively with the development and product teams to test new APIs, verify their correctness, and ensure they meet high-quality standards.

• Utilize JMeter for load testing, performance testing, and validating the scalability of APIs. • Help define and implement test automation strategies aligned with the testing pyramid (unit tests, integration tests, and end-to-end tests).

• Investigate and debug issues found in production, ensuring that defects are identified, tracked, and resolved efficiently.

• Contribute to the improvement of automation frameworks, test processes, and methodologies.

Selenium- 3-6 Yrs

Key Responsibilities:

Design, develop, and maintain automated test scripts using TestNG, REST Assured, Cucumber, Selenium, and Java.
• Create and execute automated test plans and test cases.
• Identify, document, and track bugs, ensuring issues are resolved in a timely manner.
• Collaborate with development, QA, and product management teams to understand requirements and develop appropriate testing strategies.
• Enhance and maintain the existing automation framework to support new features and improve test coverage.
• Continuously improve testing processes, tools, and methodologies to ensure high-quality software releases.
• Perform code reviews and provide constructive feedback to team members. • Stay updated with the latest industry trends and best practices in test automation.

Testing- 6- 9 Years

CTC- Upto 16 LPA

• Design and execute test cases based on requirements and user stories.
• Perform functional, regression, integration, and system testing.
• Identify, document, and track bugs using tools like Jira or Bugzilla.
• Collaborate closely with developers and product teams to understand features and
functionality.
• Perform manual testing across various devices, browsers, and platforms.
• Support in setting up and maintaining test environments.
• Assist in developing and executing automated test scripts using Selenium.
• Ensure timely delivery of high-quality releases through continuous testing.

• Provide feedback and suggestions to improve application usability and user
experienceexperience

we are hiring!!
Job Title: Test Engineer
Location: Nagawara, Bangalore
Experience: 6 – 7 Years
Employment Type: Full Time – On Site.

Job Summary:
We are seeking a highly skilled Test Engineer with deep expertise in Platform/API test automation and Web UI test automation. The ideal candidate will possess strong programming skills, experience in building and maintaining automation frameworks, and the ability to test complex microservices and web platforms using modern tools like Playwright, Selenium, Pact, and Postman.

Key Responsibilities:
Platform Test Automation:
Develop and maintain scalable API test automation frameworks using C#, TypeScript, .NET.
Conduct exploratory and automated testing for REST APIs and Microservices.
Utilize Postman, SoapUI, and similar tools for API validation and workflow testing.
Perform contract testing using Pact, ensuring integration between services adheres to expectations.
Set up and manage testing environments using Docker and cloud infrastructure like

Microsoft Azure.
Execute performance testing for cloud-based and on-premises platforms (experience desirable).
Use Visual Studio/VS Code, Git/SourceTree, and related tools for version control and development support.
Web Test Automation:
Design and implement UI automation frameworks for web applications using Playwright, Selenium, or similar tools.
Test across browsers, platforms, and configurations, with a deep understanding of web browser statistics and responsive behavior.
Integrate web testing with CI/CD pipelines for continuous validation.
Monitor application behavior using analytics tools like Dynatrace, Splunk, and debug with Charles Proxy, Fiddler, etc.
Understand web performance testing principles and contribute to performance optimization.

Skills & Qualifications:
Technical Skills:
Proficient in C#, TypeScript, and .NET technologies.
Experience with API test automation frameworks and tools: Postman, SoapUI, RestAssured, Pact.
Proficient with Web UI test automation tools: Playwright, Selenium.
Familiarity with cloud infrastructure (Azure preferred) and Docker-based test execution.
Strong with version control and IDE tools: Visual Studio, VS Code, Git, Sourcetree.
Solid understanding of API and UI testing strategies, exploratory testing, and microservices architecture.

Let me know if you can join immediately please share your updated cv at **hr@qoreweb.in** and **info@qoreweb.in**

==================
Job Title: Full-Stack Software Engineer Intern (React.js • Node.js)
Location: Bangalore (onsite)
Stipend Internship
No. of openings: 1

Role Overview
You'll work closely with senior engineers to design, build, and ship full-stack web applications using React and Node.js. This hands-on role is perfect for students or recent grads looking to launch a career in software engineering.

📌 Key Responsibilities
Develop responsive front-end UIs using React.js with state management (Redux, Context API)

Design and implement backend services and RESTful APIs using Node.js and Express.js

Integrate with SQL and NoSQL databases (e.g., PostgreSQL, MongoDB)

Write clean, maintainable code and participate in code reviews

Help implement authentication, authorization, and follow security best practices

Ensure a smooth CI/CD workflow (e.g., Git, Docker, basic cloud deployment)

Collaborate with cross-functional teams—design, product, QA—to deliver impactful features

Contribute to unit/integration testing using Jest, Mocha, or similar tools

🎯 Required Qualifications
Pursuing or recently graduated with a degree in Computer Science, Software Engineering, or related field

Solid grasp of JavaScript (ES6+), HTML5, and CSS3

Familiarity with React.js and build tools (Webpack, Babel, CSS-in-JS)

Experience with Node.js, Express, and RESTful API design

Understanding of relational and/or NoSQL databases (PostgreSQL, MongoDB)

Basic knowledge of version control (Git) and desire to learn DevOps practices

Strong problem-solving skills and attention to detail

🏅 Nice-to-Have Skills
Experience with TypeScript and/or GraphQL

Familiarity with AWS, Azure, or GCP

Exposure to Docker, Kubernetes, or CI/CD pipeline tools

Knowledge of unit testing frameworks like Jest, Mocha, Chai

Understanding of serverless architectures or microservices

🚀 Internship Benefits
Hands-on mentorship with senior developers

Real-world full-stack project ownership

Stipend or hourly compensation

Professional development: workshops, code reviews, tech talks

📩 How to Apply
Please submit your résumé, GitHub/portfolio showcasing full-stack projects, and a brief
statement of interest. Highlight any React + Node.js work—even personal or academic—
where you owned both ends of the stack.

Email: **nancydhanya@gmail.com**

➡ Exp – 10+yrs
➡ Location - Bangalore
➡ Notice Period: Immediate to 30days
➡ Skills:- ERP testing , Oracle fusion, accounting , reports, Business analyst.

JOB SUMMARY

We are seeking a highly skilled and experienced Test Manager to lead the testing efforts for

Shared by **Job Curator** - Join us on Telegram: https://t.me/testingexperiencedopenings

our Accounting and Reporting workstream. This role is pivotal in our transition from the current Accounting and Reporting solution to a new Oracle Fusion solution. The successful candidate will oversee the testing of various modules, including Reporting, Chart of Accounts, General Ledger, Accounting Model, IFRS17 and Actuarial, Insurance, Re-insurance, Investment, Payroll, Procurement, Expense Allocation, and Consolidation. Additionally, this role will involve integration with our Azure Databricks Data Repository.

JOB DESCRIPTION

Role and Responsibilities
Develop and implement comprehensive test strategies for the Accounting and Reporting workstream.
Lead and manage the testing team, ensuring all test activities are completed on time and within budget.
Coordinate with project managers, developers, and business analysts to ensure alignment on testing requirements and objectives.
Oversee the creation and execution of test plans, test cases, and test scripts.
Ensure thorough testing of all modules, including Reporting, Chart of Accounts, General Ledger, Accounting Model, IFRS17 and Actuarial, Insurance, Re-insurance, Investment, Payroll, Procurement, Expense Allocation, and Consolidation.
Manage the integration testing with Azure Databricks Data Repository.
Identify, document, and track defects and ensure their resolution.
Implement and manage test automation frameworks using Selenium, Java, and Python.
Provide regular updates and reports on testing progress, issues, and risks to stakeholders.
Ensure compliance with industry standards and best practices in testing.

Qualifications
Experience Level: Proven experience in facilitating Agile teams that work on complex technical projects, preferably in data-driven environments
Bachelor's degree in Computer Science, Information Technology, Finance, or a related field.
Proven experience as a Test Manager, preferably in the finance or insurance industry.
Strong knowledge of Oracle Fusion and its modules.
Experience with test automation tools and frameworks, particularly Selenium, Java, and Python.

Ability to work under pressure and manage multiple priorities.

🚀 We're Hiring: QA Engineer

About Us:

We're Primetrace Technologies, a Sequoia and Tiger Global-backed company ($25M+
raised), and the team behind:

📱 Crafto – 100M+ downloads- **https://crafto.app/**
📱 Kutumb – 100M+ downloads- **https://lnkd.in/gvZYRBZV**

Job Location: Bangalore (work from office)

Responsibilities:

🎯Understand the product in and out.
🎯 Responsible for giving GO signals for all deployments.
🎯 Making sure that we ship out fast without killing the experience for our users. Testing the
Product across different versions of the app.
🎯 Troubleshoot issues raised by Users and Internal Team.
🎯 Perform cause analysis of user issues via in-depth research and analysis.
🎯 Collaborate with Engineering and Product Management to fix product issues quickly and
to provide product improvement ideas.
🎯 Respond to the user and internal team queries.

Requirements:

✅ 2+ years of experience in assuring the quality of multiple applications.
✅ Curiosity about how things work.
✅ Good understanding of HTTP, HTTPS, RESTful architecture, and SQL. Can own the
problems end to end.
✅ Exposure to AWS infra would be an advantage.
✅ If you are well versed in written and spoken Hindi since our application is currently
available in the Hindi language.

What we offer:

👉 High pace of learning

Shared by **Job Curator** - Join us on Telegram: https://t.me/testingexperiencedopenings

👉 Opportunity to build the product from scratch
👉 High autonomy and ownership
👉 A great and ambitious team to work with
👉 Opportunity to work on something that really matters

👉 Ready to shape a bug-free experience? Drop your resume at **titir.roy@kutumbapp.com**
=================
