Daily rounds

🚀 We're Hiring: QA Engineer - II | Bangalore (On-site)
📍 Location: Bangalore | 🧪 Team: Tech - QA II

At Marrow, we're transforming how doctors learn and grow. As India's leading medical learning platform with 5 lakh+ users and the preferred choice for NEET PG toppers, we're looking to expand our QA team!

Are you a QA enthusiast with 2–3 years of experience who's passionate about building quality products used by doctors across the country?

What you'll do:
✅ Drive both manual & automation testing across Android, iOS & Web
✅ Own end-to-end test plans, cases & execution
✅ Work closely with Product, Design & Dev teams to ensure seamless releases
✅ Use tools like Charles Proxy, ADB, Appium, Playwright & JIRA
✅ Debug using Firebase & Mixpanel
✅ Continuously improve QA processes & strategies

Who you are:
🧠 Deep understanding of mobile apps
🔍 Expert in functional + non-functional testing
💼 Hands-on with Charles Proxy, Android Studio, Appium
🎯 Detail-oriented, analytical & collaborative

I'm Sindhu.T from HIKING IT, We are looking for ETL QA Engineer.

Job Title: Quality Assurance – ETL QA Engineer - Lead (6–10 Years)
Location: Bangalore
Job Type: Full Time(Remote)
company: Bahwan Cyber Tek
Notice period: 30 Days

About the Role:

As a Lead ETL QA Engineer, you will drive the QA strategy and execution for a major data pipeline modernization initiative on Azure and Snowflake. This role requires a deep understanding of data quality frameworks, test planning, and stakeholder engagement. The candidate should possess leadership capabilities and be hands-on with SQL and automation.

Key Responsibilities:

Own QA strategy and execution for Azure-based data engineering projects.

Define test plans and ensure traceability across test artifacts, requirements, and defects.

Lead validation of Snowflake-based data lakes, transformations, and Power BI dashboards.

Guide the QA team in testing complex SQL logic, Data Vault structures, and downstream integrations.

Coordinate with product owners, architects, and developers to align test coverage with business logic.

Manage test data setup, environment readiness, and pipeline triggers for testing in CI/CD workflows.

Mentor junior team members and review their test deliverables for completeness and accuracy.

Drive test automation initiatives using Python and Selenium, where applicable.

Prepare quality metrics and test status reports for leadership and stakeholders.

Desired Skills and Experience:

Must Have:

6–10 years of QA experience with strong exposure to Azure Data Factory pipelines.

Expert in SQL, data profiling, complex joins, set operations, and anomaly detection.

Experience validating Snowflake external/internal tables and pipeline integrations.

Knowledge of Power BI reporting and back-end data validation.

Experience with test management tools, Agile ceremonies, and client interaction.

Ability to lead end-to-end test planning and delivery for large data programs.

Good to Have:

Working knowledge of Data Vault modeling and related test patterns.

Automation knowledge using Selenium with Python for data workflow and business logic
validations.

Familiarity with DevOps pipelines for test integration and execution.

MBL NO: 7396122525
==================
At **Incresco**, We're looking for hungry, ambitious people who want to grow fast and work on
real challenges.

We are hiring for:

Software Engineers (Full Stack - Minimum 2 years of experience)
Test Engineers (QA - Minimum 2 years of experience)
AI/ML Engineer (Internship)
Founder's Office Associates (strategy, operations, business growth - Minimum 2 years of
experience)
Founder's Office Interns (2025 pass-outs – PPO)
HR / Business Development / Marketing Interns (2025 pass-outs – PPO)

Why join us?

Because you won't just "do tasks" here. You'll:

Solve real customer problems
Build products end-to-end with full ownership
Work directly with founders & senior leadership
Grow faster than you ever imagined

Who we're looking for:

People who thrive in fast-paced, high-ownership environments
Strong fundamentals in your craft (coding, strategy, ops, people)
Curiosity, adaptability, and bias for action
Students (for internships) or professionals ready to break comfort zones

Location: **#HSRLayout**, **#Bangalore**

==================
🚨 We're Hiring: QA Engineer – API Testing

Are you passionate about ensuring software quality with precision and efficiency? We are
looking for experienced QA Engineers with API Testing expertise to join our growing team.
📍 Location: Bangalore

🧾 Experience: 3 to 8 Years

🎓 Qualification: BE/**B.Tech/ME/M.Tech**

🔧 Job Summary:
As a QA Engineer, you will be responsible for functional, performance, and API testing using
industry-standard tools and frameworks. Your strong programming skills in Java and Python,
combined with experience in tools like Postman, Selenium, REST Assured, JMeter, and
Robot Framework, will be key in delivering high-quality software solutions.

✅ Key Responsibilities:

Perform functional, load & performance testing of web apps using JMeter, Postman.
Automate web testing using Selenium with Java.
Design & implement REST API tests with REST Assured.
Execute acceptance testing with Robot Framework (Python).
Collaborate with dev teams to debug and resolve defects.
Conduct end-to-end testing to ensure system functionality and quality.
Ensure test case coverage for functional and non-functional aspects of releases.

💡 Required Skill Set:

Postman API Testing
Java (for Selenium & REST Assured scripting)
JMeter – Load and performance testing
Selenium with Java – Functional automation
REST Assured – REST API validation
Robot Framework (Python-based test automation)

🌐 Nice-to-Have Skills:

Networking Knowledge (especially RAN, ORAN, SMO, RIC, OSS/BSS)
Experience with Prometheus, Grafana, Kafka for monitoring
Familiarity with Keycloak (Identity & Access Management)
🔍 Why Join Us?
Work on real-time, scalable systems in telecom/networking domains.
Collaborative and growth-oriented work culture.
Exposure to cutting-edge test automation and monitoring tools.
👉 Ready to take the next step?
 Apply now or DM us for more details!

Job Vacancy for Generative AI QA Lead – Bangalore - Immediate

Job Title: Generative AI QA Lead
Experience Required: 8-10 Years
Location: [Bangalore]
Employment Type: [3 Months Contract]

Job Summary

We are seeking a highly skilled Generative AI QA Lead with deep expertise in testing AI
models and applications, specifically focusing on Large Language Models (LLMs) and
Generative AI concepts. The ideal candidate will have a strong background in AI testing
strategies, automation, and quality assurance practices for AI-driven solutions. You will lead
QA efforts, design test strategies, and ensure the delivery of high-quality AI products.

Key Responsibilities:

Lead QA initiatives for Generative AI applications and solutions.

Develop and execute AI testing frameworks, methodologies, and test plans tailored to LLMs
and Gen AI workflows.

Evaluate AI model performance, accuracy, fairness, bias, and robustness.

Collaborate with AI/ML engineers, data scientists, and product teams to define quality metrics and acceptance criteria.

Drive automation of AI testing, including prompt testing, output validation, and integration testing.

Analyze model outputs, identify anomalies, and report issues with actionable insights.

Ensure compliance with ethical AI guidelines, data privacy, and regulatory requirements.

Mentor junior QA engineers and drive best practices in AI QA.

Required Skills & Experience:

8–10 years of experience in software testing with at least 3–4 years in AI/ML application testing.

Strong hands-on experience with Generative AI, Large Language Models (LLMs), and AI-driven systems.

Expertise in testing techniques for AI models, including validation, bias testing, explainability, and performance benchmarking.

Experience with AI testing tools, frameworks, and libraries (e.g., TensorFlow Extended testing, MLflow, PyTorch testing utilities).

Knowledge of prompt engineering and output evaluation strategies for Gen AI models.

Proficiency in scripting languages (Python preferred) and automation frameworks.

Strong understanding of AI lifecycle, MLOps, and continuous testing approaches.

Excellent communication, leadership, and stakeholder management skills.

Good to Have:

Exposure to cloud AI platforms (AWS Sagemaker, Azure AI, Google Vertex AI).

Experience with security, compliance, and ethical testing of AI systems.

Familiarity with NLP evaluation metrics (BLEU, ROUGE, Perplexity, etc.).

Education:

Bachelor's or Master's degree in Computer Science, AI/ML, Data Science, or related field.

Regards,
Naveen G
Ph.No: 6362315086
Email ID: gnaveen@v4info.com
==================
Job Title: Senior System Testing QA Engineer (Python & Ruby)
📍 Location: [Bangalore / Remote as applicable]
🕐 Experience: 8+ Years
💼 Employment Type: Full-time

Job Summary:
We are seeking a highly skilled and experienced Senior System Testing QA Engineer with
deep domain expertise in system-level testing of enterprise switches and strong scripting
capabilities in Python and Ruby. The ideal candidate will have a solid background in
networking protocols, performance/stress testing, and debugging complex systems in Linux
and cloud-based environments.

Key Responsibilities:
 • Design, implement, and execute system-level test plans, scale/stress tests, and
performance simulations that reflect real-world enterprise network scenarios.
 • Validate Layer 2 and Layer 3 networking protocols, including but not limited to:
STP, RSTP, MSTP, VLAN, Link Aggregation (LAG), OSPF, BGP, VRRP, DHCP, Multicast, IPv4,
IPv6, and related security features.
 • Debug complex system-level issues and work closely with developers and product teams
to resolve problems and improve product quality.
 • Develop automation scripts using Python and Ruby for test orchestration, execution, and
data analysis.
 • Work with Linux-based systems, perform command-line testing, and log analysis.
 • Ensure compliance with test methodologies, and contribute to CI/CD pipelines and
automated test frameworks.
 • Implement and validate SIFOs and PoE-related functionalities in enterprise switch
platforms.
 • Manage lifecycle testing, from initial requirements validation through major releases,
patches, and feature updates.
 • Maintain detailed documentation of test cases, test results, and test environments.

Required Skills & Experience:
 • 8+ years of relevant experience in system or software QA, preferably in enterprise
networking.
 • Strong expertise in system-level testing of networking hardware (switches, routers).
 • Hands-on experience with IXIA or equivalent traffic generation tools.
 • Deep understanding of core networking protocols and technologies (Layer 2/3).
 • Proficient in Linux environments and shell-based command-line usage.
 • Solid scripting skills using Python and Ruby for test automation.
 • Experience working in cloud-configured network environments, with familiarity in Cisco
IOS, Cisco Meraki, and Catalyst switches.

- Understanding of PoE, SIFOs, and device security features is a plus.
- Familiarity with CI/CD pipelines, Jenkins, or similar tools.
- Excellent communication and documentation skills.

Preferred Qualifications:
- Bachelor's or Master's degree in Computer Science, Electrical Engineering, or a related technical field.
- Cisco certifications (e.g., CCNP, CCIE) would be an added advantage.
- Experience in test frameworks and version control tools (Git, Jenkins, etc.).

Salesforce QA Senior Analyst

Location : Bangalore

Salesforce Configuration Knowledge: A deep understanding of standard and custom objects, relationships, page layouts, security models, validation rules, and other declarative features within Salesforce is essential for testing and validating the platform's functionality.
Testing Methodologies & Test Planning: Expertise in various testing methodologies (e.g., functional, regression, performance, security), test planning, test case design, test execution, and defect reporting is crucial.
Automation Tools & Frameworks: Proficiency in test automation frameworks and tools is increasingly important for efficiency and scalability in testing. Requirements Analysis: The ability to translate business requirements into test scenarios and test cases is vital to ensure that the Salesforce solution meets the intended needs.
Understanding of Agile Methodologies: A strong grasp of agile principles and frameworks and how testing fits into the iterative development process and participate effectively in ceremonies like sprint planning, daily stand-ups, and retrospectives.
Time Management: Efficiently handling tasks and meeting deadlines is a valuable asset for a QA professional
Effective Communication: Clear and concise communication, both verbal and written, is key for collaborating with developers, business analysts, stakeholders, and optimally reporting bugs and test results.
Analytical & Problem-Solving Skills: The ability to analyze sophisticated systems, identify potential risks and vulnerabilities, troubleshoot issues, and propose solutions is crucial for ensuring the quality and reliability of the Salesforce platform.
Basic SQL Knowledge: The ability to validate data integrity and migrations using SQL can be effective. · Collaboration:
Working optimally with multi-functional teams is crucial for successful project delivery.
Continuous Learning: Staying updated with the latest Salesforce releases, testing tools, and industry trends is important in this evolving field.

🖊 We're Hiring: SDET – Python
📍 Location: Chennai
🕐 Experience: 5+ Years
🔍 Job Overview
We are looking for a highly motivated and detail-oriented Software Development Engineer
in Test (SDET) with strong expertise in Python and test automation. The ideal candidate
should also have working knowledge of Perl and hands-on experience with Robocorp or RPA
development.
✅ Key Responsibilities
Design, develop, and maintain automated test scripts using Python, Selenium, or other
frameworks like Pytest or Robot Framework.
Perform unit, integration, regression, and system testing of software applications.
Create and manage automation test cases and test data.
Collaborate with developers, QA, and DevOps teams to ensure CI/CD processes are efficient
and effective.
Troubleshoot automation issues and contribute to continuous improvement of the test
automation framework.
🔧 Required Skills
5+ years of software development and test automation experience.
4+ years of hands-on experience in Python, Perl, and SDET practices.
Proficiency in automation frameworks like Pytest, Selenium, or Robot Framework.
Strong grasp of testing methodologies and QA best practices.

Experience with CI/CD tools (Jenkins, GitHub Actions, Azure DevOps).
Version control experience with Git.
Strong communication, documentation, and collaboration skills.
⭐ Nice to Have
Experience with Robocorp or other RPA solutions.
Familiarity with cloud platforms (AWS, Azure, GCP).
Agile/Scrum environment exposure.
📩 **sejal.inamdar@ampcustech.com**
==================
🚀 We're Hiring – Associate Test Manager 🚀
📍 Location: Chennai (Work from Office)
💼 Experience: 9 to 12 years
⌛ Employment Type: Full-time

About the Role:

We're looking for a highly skilled Associate Test Manager to lead our test automation efforts
and ensure the highest levels of software quality across complex enterprise systems.

This role demands hands-on expertise in automation frameworks, API testing, CI/CD
pipelines, and test strategy, combined with strong team leadership capabilities.

🔍 What You'll Do:

🎯 Test Automation Leadership
Lead the design and implementation of robust automation frameworks (Selenium,
Playwright, TestNG, JUnit).
Drive automation strategy for web, API, and mobile testing across projects.
🎯 API Testing & CI/CD Integration
Perform end-to-end API testing using tools like Postman, Swagger.
Integrate automated tests within CI/CD pipelines using Jenkins, GitHub Actions, Azure
DevOps.
🎯 DevOps & Scripting
Develop automation scripts in C# or JavaScript.
Collaborate closely with DevOps teams to ensure quality at every stage of deployment.
🎯 Test Strategy & Execution
Define test strategy, review test plans, and oversee execution.
Ensure rigorous performance, load, and stress testing using tools like JMeter.
🎯 Team Management & Quality Oversight
Mentor and lead a team of test engineers, ensuring adherence to QA best practices.
Conduct code reviews and enforce high standards in scripting and documentation.

✅ What You Bring:

✨ 9+ years of experience in software testing, with strong automation and leadership skills
✨ Hands-on with tools like Selenium, Playwright, Postman, JMeter, Swagger

✨ CI/CD experience with Jenkins, GitHub Actions, Azure DevOps
✨ Scripting knowledge in C# or JavaScript
✨ Strong knowledge of Agile, Scrum, test management tools (e.g., JIRA, Azure Test Plans), and Git
✨ Experience in test data and environment management
✨ Excellent communication, problem-solving, and mentoring skills

Join us @**Congruent Solutions** and help us build and deliver high-quality, reliable software products that matter. 💻🛠️

📩 Apply now at **lekha.v@cspl.com**.

Let's redefine QA excellence, together!
