Job Openings : QA Automation Engineer (Python + Selenium)

Location: Hybrid – Noida, Gurgaon, Hyderabad, Bangalore
Work Model: 8 days/month onsite (approx. 2 days/week)
Budget: ₹13 LPA (₹1.10 LPM)
Shift Timing: 11:00 AM to 8:30 PM

Experience: 5+ Years.

Job Description:

We are hiring a QA Automation Engineer with solid expertise in Python and Selenium to join our growing QA team. You will be responsible for designing, developing, and maintaining automation frameworks and test scripts for web and API testing in a fast-paced, Agile environment.

Key Responsibilities:

Develop and maintain test automation scripts using Python.
Build scalable test frameworks using Selenium, PyTest, or Robot Framework.
Conduct API testing using Postman or Python libraries like requests.
Collaborate closely with development teams to design effective test strategies.
Perform regression testing, analyze test results, and report bugs via JIRA.
Improve automation coverage and streamline test execution in CI/CD pipelines (Jenkins, GitHub Actions).
Maintain clear documentation for test cases, test data, and results.

Required Skills & Qualifications:

5+ years of hands-on QA automation experience.
Proficient in Python scripting and test automation frameworks.
Strong experience with Selenium WebDriver, PyTest.
API testing and automation proficiency (REST/SOAP).
Familiar with CI/CD tools (Jenkins, GitHub Actions) and Git.
Sound understanding of Agile/Scrum, SDLC, and defect lifecycle.
Strong analytical, debugging, and communication skills.

INNOVA IS HIRING SFMC QA.

Location   : Pune/Bangalore/Gurgaon/Noida
Exp Range   : 4 to 6 Years
Work Mode   : Hybrid

Job Description-

Marketing Cloud Quality Assurance (QA) Tester is responsible for ensuring the quality and
functionality of marketing campaigns and assets developed within the Salesforce Marketing
Cloud platform. They perform thorough testing of content, email templates, automation
workflows, landing pages, data integrations, and other marketing assets to identify any
defects or issues before deployment. This role involves collaborating with stakeholders to
understand requirements, developing test plans, executing test cases, and providing
feedback for improvements.

Duties & Responsibilities

Develop robust test strategy and test plans from feature requirements
Submit defects and follow-up with the development team

Identify qualify defects on the product and work with development for faster resolution and verification
Help development teams to narrow down failures.
Perform thorough testing of dynamic content/ampsrcript, email templates, automation workflows, landing pages, data integrations, and other marketing assets to identify any defects or issues before deployment.
 Executing functional, regression, and performance testing of marketing assets within Salesforce Marketing Cloud.
Providing feedback and recommendations for improving the user experience and overall quality of marketing campaigns.
Maintaining test documentation and reporting on testing progress and results.

Specifications

Education and Experience

3+ years professional experience testing enterprise products
Strong manual testing experience, development/execution of test cases.
Ability to test both back-end and front-end items in SFMC, including email, landing pages, integrations, data extensions, automations and journeys
Knowledge of SQL, AMPscript programming languages to validate logic of code.
Experience with enterprise CRM/Database/ESP platforms.
Experience testing within Salesforce Marketing Cloud (Email Studio, Journey Builder, Automation Studio).
Familiarity with Litmus or similar email testing platforms.
Understanding of email marketing best practices, CAN-SPAM Act, GDPR, and other relevant regulations.
QA background including communications (Email, SMS, Push Notifications) is a must.

Preferred technical and professional experience

• Bachelor's degree in computer science or similar
• Salesforce Marketing Cloud Administrator certification
• Salesforce Marketing Cloud Email Specialist
• Workflow tool experience (Jira, Workfront, etc.)
• Knowledge of HTML, CSS, and JavaScript is a plus, as it relates to testing email templates and landing pages.
• Experience with Salesforce Marketing Cloud or similar marketing automation platforms.

JOB DESCRIPTION
Role and Responsibilities

Develop and implement comprehensive test strategies for the Accounting and Reporting workstream.
Lead and manage the testing team, ensuring all test activities are completed on time and within budget.
Coordinate with project managers, developers, and business analysts to ensure alignment on testing requirements and objectives.
Oversee the creation and execution of test plans, test cases, and test scripts.
Ensure thorough testing of all modules, including Reporting, Chart of Accounts, General Ledger, Accounting Model, IFRS17 and Actuarial, Insurance, Re-insurance, Investment, Payroll, Procurement, Expense Allocation, and Consolidation.
Manage the integration testing with Azure Databricks Data Repository.
Identify, document, and track defects and ensure their resolution.
Implement and manage test automation frameworks using Selenium, Java, and Python.
Provide regular updates and reports on testing progress, issues, and risks to stakeholders.
Ensure compliance with industry standards and best practices in testing.

Qualifications
Experience Level: Proven experience in facilitating Agile teams that work on complex technical projects, preferably in data-driven environments
Bachelor's degree in Computer Science, Information Technology, Finance, or a related field.
Proven experience as a Test Manager, preferably in the finance or insurance industry.
Strong knowledge of Oracle Fusion and its modules.
Experience with test automation tools and frameworks, particularly Selenium, Java, and Python.
Familiarity with Azure Databricks and data integration processes.
Excellent leadership and team management skills.
Strong analytical and problem-solving abilities.
Exceptional communication and interpersonal skills.
Ability to work under pressure and manage multiple priorities.

Preferred skills
Certification in software testing (e.g., **#ISTQB**).
Experience with **#IFRS17** and actuarial processes.
Knowledge of insurance and re-insurance operations.
Familiarity with investment, payroll, procurement, and expense allocation processes.

🚀 **We're Hiring**: **SDET (Software Development Engineer in Test)** | Fully Remote |
Immediate Joiners! 🔍
Are you passionate about building world-class test automation systems? Do you enjoy
solving complex problems at scale while working with cutting-edge tech? This is your
opportunity to be a part of something big. 🌐

🔧 **Tech Stack You'll Love**:

✅ API Automation using Rest Assured

✅ Core Java programming

✅ TestNG, Maven, JMeter, Jackson, Jersey

✅ Strong with SQL queries and DB design

✅ Bonus if you've worked with Big Data or ML models!

🧠 What You'll Be Doing:

💡 Design and implement scalable test strategies (Functional, Non-Functional, Analytics, Automation)

🛠️ Build & optimize robust automation frameworks

📊 Collaborate with cross-functional teams to ensure high product quality

📈 Be the driving force behind test efficiency and performance reporting

📍 **Location**: Fully Remote (Bangalore-based team)

📄 **Employment**: Contract-to-Hire (6 months, extendable)

📅 **Notice Period**: Immediate Joiners Preferred

👥 Open Roles: 3 positions available

💬 If you're an independent executioner with strong communication skills and a passion for quality engineering — let's talk!

🔗 **DM me or drop your CV at** - hr@winfrox.com

feel free to apply or refer them to us. Only shortlisted candidates will be contacted

📩 For more details or to apply, please DM me or share your profile at
namrata_yadav@epam.com 👍

==================
We are Hiring for our Client

Job title. QA ENGINEER

Preferred Location: Bangalore (onsite – WFO)

Interview: Virtual mode

JOB RESPONSIBILITIES:
As a member of the QA team, you will collaborate with other SDETs to build up automated
regression test capability, enhance debugging, and improve test coverage for the enterprise

applications.

Write a detailed test plan, test cases, and execute tests manually and automated tests. You will document product failures, test procedures, analysis, etc. in internal tools such as Jira, Quip, TestRail etc.

BASIC QUALIFICATIONS:
- 7+ years of test automation frameworks and tools like Selenium, Robot Framework, Pytest, and building experience
- 4+ Experience with Python programming
- Ability to understand functional/technical specifications and analyze data
- Ability to write test plans and test strategy documents based on product requirements
- Experience in Rest API Automation, UI Automation
- Experience with cross-platform testing and debugging across different devices and operating systems
- Bachelor's degree in computer science, Software Engineering, or related technical field, or equivalent practical experience

PREFERRED QUALIFICATIONS:
- Knowledge of overall system architecture, scalability, reliability, and performance in a database environment
- Knowledge of performance testing
- Good cross-organizational communication skills – ability to evangelize ideas and concerns clearly and persuasively, both verbally and in writing
- Experience with AWS tech stack
- Experience building and scaling test automation infrastructure using both traditional and GenAI-based approaches
- Experience building test automations on or working with Product Lifecycle Management (PLM) applications like Windchill, Teamcenter, Agile, etc.

Please share your resume @ career@shivsoftexperts.com
==================
🛠 Now Hiring: Quality Engineer
📍 Location: Bangalore, India
🧭 Experience: 5 to 10 Years
🏢 Industry: Oil & Gas | EPC | Capital Projects
📧 Apply at: G.nair@in.ey.com

We are seeking a skilled Quality Engineer with expertise in QA/QC and certification in Nondestructive Examination (NDE). This role is pivotal in ensuring adherence to engineering standards, international codes, and project-specific quality mandates for capital projects.

🌟 Key Responsibilities:
- Develop and uphold Project Quality Plans, Inspection & Test Plans (ITPs), and Quality Assurance Procedures (QAPs)
- Perform vendor inspections, site audits, and surveillance activities
- Validate NDE reports, material certificates, and welding documentation

- Ensure compliance with ASME, API, ISO, and other industry standards
- Assist in Non-Conformance Reports (NCRs), root cause analysis, and final documentation
- Collaborate with diverse project teams and external inspectors
- Oversee fabrication and construction processes to ensure QA/QC conformity.

✅ Ideal Candidate:
- 5 to 10 years of quality engineering experience in oil & gas, petrochemical, or EPC projects
- NDE Level II or III certification in UT, RT, MT, or PT (as per ASNT, ISO 9712, or equivalent)
- Profound knowledge of welding procedures, inspection techniques, and QA systems
- Sound understanding of global quality norms and construction methodologies
- Excellent communication, coordination, and documentation proficiencies.

We ADR group Looking for Automation Architect.

Role: Automation Architect
Experience: 7-9 years.
Location : Bangalore

Responsibilities:

Test Automation Architect - functional automation and CI tools (GitHub/AZURE Devops)- 6
years' relevant experience/expertise in Selenium/Appium test automation using Python /
Python Behave

The Test Automation Architect will lead the effort to build test frameworks and extend
existing frameworks.
• The tool/s accommodates both functional automation and CI tools (GitHub/AZURE
Devops).
• These frameworks allow us to perform end-to-end testing in multi-component
environments.
• The framework should be designed in such a way that it increases and speeds up their
productivity & effective reporting abilities. Must be able to take on leadership
responsibilities and influence the direction of the automation effort, and its schedule and
prioritization.
• Additionally, candidates will also be involved in supporting the build master
implement/improve build test processes, environments, and scripts.
• These build tests ensure that the code drops to quality assurance are of the highest
quality.
• Candidates will provide a practical approach to complex testing, specifically in the areas of
the automation of test cases for the purposes of regression testing.
• You will be a creative and proactive thinker, and you will make use of current technologies
to provide extensible automation infrastructures.
Candidate will be part of a team focusing on automation of an identified set of migration
tests, checking they run correctly and working within the infrastructure.
The team would focus on developing and test these automation buckets which would be
executed by other teams. Good to have hands on expertise in Docker/Kubernetes, Cloud
based Execution.
• Requirements: 6 years' relevant experience/expertise in Selenium/Appium test
automation using Python.
• Hands-on current experience authoring, building, and adopting large scale, cross-
functional Selenium/ Protractor automation frameworks with well-balanced coverage
across UI, back-end integration, database levels.
• Good understanding of solid design principles & various framework design pattern
implementation.
• Deep understanding of different test automation approaches (keyword-driven, Data-
driven, BDD, hybrid) and technology stacks (JavaScript, Python) .
• Deep practical experience with cutting edge tools for Web, Mobile, DB and Web-service
testing.

• Hands on experience to CI/CD Educational Qualifications - Bachelor's Degree 6+ years of experience in QA Automation of Web Applications, Web Services and REST APIs

🚀 We're Hiring Interns!
Are you passionate about learning, growing, and building real-world experience in a fast-paced environment?
We're looking for a motivated QA Automation Intern to join our team!
This is a great opportunity to gain hands-on experience, work with an amazing team, and make a real impact. Explore the role and apply today!!

Job Title: QA Automation Intern
 Location: Perungudi, Chennai.
 Duration: 3 Months
Application Form: **https://lnkd.in/etzuerHp**

About the Role:
We are looking for a detail-oriented and motivated QA Automation Intern to join our
Quality Assurance team. This role is a great opportunity to gain hands-on experience in
software testing and automation while working closely with developers, QA engineers, and
product managers.
As a QA Automation Intern, you will help ensure the quality of our products by developing
and executing automated test scripts, identifying bugs, and collaborating with the team to
improve the overall testing process.

Key Responsibilities:

· Assist in the design, development, and execution of automated test cases using tools like
Selenium, Cypress, or similar frameworks.
· Collaborate with developers and senior QA engineers to understand system requirements
and create appropriate test strategies.
· Identify, record, and document bugs clearly.
· Conduct Manual testing as needed to validate test cases and support the automation
process.
· Analyze test results and work with the team to troubleshoot issues.

Qualifications:
 *   Bachelor's degree in Computer Science, Engineering, or a related field.
 *   Familiarity with any programming language (e.g., Python, Java, JavaScript).
 *   Basic understanding of software development and testing life cycles.
 *   Exposure to any automation framework or tool (e.g., Selenium, Playwright, Cypress).

 * Good problem-solving and communication skills.

Benefits:
 ·   Hands-on experience in QA automation in a real-world setting.
 ·   Mentorship from experienced QA engineers and developers.

How to Apply:
Comment **#interested** and submit your application via the link below.
Google form: **https://lnkd.in/etzuerHp**
For Queries call: 9488156640(Mon-Fri, 10AM-5PM)
=================
Bank of America is looking for Test Automation specialists with experience in Selenium and
Java Technologies for the Enterprise Payment Technology Development team. The
incumbent will work on Merchant Services Business Applications and will be responsible to

🚨 **#Hiring** Now: Business Analyst – 10+ Years Exp🚨
📍 Location: Chennai or Hyderabad- **#INDIA**
💼 Experience: 10+ Years

Are you a seasoned Business Analyst with a decade of experience driving transformation, bridging business and tech teams, and working in Agile environments?
We're looking for someone who can own the end-to-end lifecycle — from requirements gathering to testing and stakeholder alignment — in a fast-paced, delivery-driven setup.

Please share your resume at **anuj@fstonetechnologies.com**

🔍Role Highlights:
✅Collaborate with cross-functional stakeholders to capture and analyze business needs
✅Lead process mapping, gap analysis, and optimization initiatives
✅Act as a strategic liaison between business and tech teams
✅Drive **#Agile** practices (stand-ups, retrospectives, grooming, planning)
✅Own documentation, roadmaps, and review decks
✅Support **#QA** and testing through detailed scenario design and validation

🔧 What We're Looking For:
✔️ 10+ years as a Business Analyst or Functional Consultant
✔️ Strong experience with **#JIRA**, **#Confluence**, and **#Agile** methodologies
✔️ Excellent communication, stakeholder management, and decision-making skills
✔️ Proficiency in process modeling, use cases, and change impact analysis
✔️ Proven track record in large-scale digital or system transformation projects

Greeting from Clarium Tech

We have job opening for Performance & Resiliency Testing Engineer in Chennai
location. Let me know your Interested level for this role.

If you interested in this role and location. Kindly share me your CV to the below mail :
ranjithkumarVR@clarium.tech

Job Title: Performance & Resiliency Testing Engineer
Experience: 6 to 12 Years
 Location: Chennai (Work from Office)
 Employment Type: Full-Time

JD:
Job Summary
We are seeking a Performance & Resiliency Testing Engineer with 5+ years of hands-on
experience in performance engineering, resiliency testing, and enterprise-grade
optimization. This role demands expertise in performance testing tools (LoadRunner,
JMeter), observability platforms (Dynatrace, AppDynamics), and resilience validation
strategies such as CL0 validation and support for audit initiatives (e.g., Audit issue IS -
17556). You will be responsible for identifying performance bottlenecks, enhancing system
reliability, and ensuring operational stability across containerized environments and cloud-
native platforms.
Key Responsibilities Performance Engineering & Observability
• Design, execute, and maintain performance tests using LoadRunner, JMeter, or similar
tools.
• Identify application bottlenecks and optimize performance with recommendations.
 • Leverage APM tools (Dynatrace, AppDynamics, New Relic) for end-to-end monitoring and
root cause analysis. Resiliency Testing & Audit Support
• Perform resiliency validation using frameworks like CL0 testing to ensure application
robustness during outages and failovers.
• Lead and support operational resiliency efforts across platforms (e.g., Travis K space),
ensuring enterprise-grade uptime and recovery preparedness. Cloud & Containerization •
Execute performance/resiliency testing in Docker, Kubernetes, and OpenShift environments.
• Align testing strategies with cloud-native architectures and microservices best practices.

CI/CD Integration & Agile Collaboration
• Integrate performance and resiliency validation in CI/CD pipelines.
• Collaborate with cross-functional Agile/DevOps teams to embed performance KPIs within
sprint goals.
• Participate in backlog grooming and iteration planning for system capability assessments.
Required Skills & Qualifications
• 5+ years in performance engineering and testing roles.
 • Proficient with LoadRunner, JMeter, and APM tools (Dynatrace, New Relic, AppDynamics).
• Experience in resiliency testing, CL0 validation, and incident/audit support.
 • Familiar with container and orchestration platforms like Docker, Kubernetes, and
OpenShift.

• Good understanding of CI/CD, Agile, and DevOps practices.
• Excellent analytical, problem-solving, and communication skills.
==================

🚨 We're Hiring | Selenium Automation Tester 🚨
📄 Type: Contract Role
🏢 Hybrid – Bangalore (3 Days Onsite)
📅 Experience: 8+ Years
🌟 Relevant Experience: 5+ Years in Selenium using JAVA
🕐 Shift: 12 PM to 9 PM IST
Are you a seasoned Automation Tester with strong hands-on expertise in Selenium with
Java and a passion for building robust automation frameworks?
We're hiring for a contract-based Selenium Automation Tester role for one of our top
clients. The ideal candidate should be a problem solver with excellent coding, debugging,
and test execution skills in an Agile setup.

🔧 What You'll Work On:
✔️ Designing, executing & debugging automation scripts
✔️ Collaborating on daily test automation challenges
✔️ Working in Agile teams to support fast-paced delivery
✔️ Preparing test data and ensuring automation coverage
✔️ CI/CD integration with tools like Maven, GitHub/GitLab

🎓 Preferred Skills & Tools:
✔️ Strong OOPs & Java programming for automation
✔️ Selenium framework expertise
✔️ Familiarity with JIRA, TestRail, or Azure DevOps
✔️ CI/CD tools: GitHub, GitLab Pipelines, Maven
✔️ Deep understanding of QA best practices

📩 Interested for the role Let's connect!

🔴 Hello connections,
☑️ We are still **#hiring**! Know anyone who might be interested?
✅ Cynergy Services is Urgently hiring Test Manager(A&R).
🔴 Please share your resume at - **gborde@cynergyservices.org**

🔷 Role: Test Manager(A&R)
🔷 Exp – 10+yrs
🔷 Location - Bangalore
🔷 Notice Period: Immediate to 30days

🟢 JOB SUMMARY

🔷 We are seeking a highly skilled and experienced Test Manager to lead the testing efforts for our Accounting and Reporting workstream. This role is pivotal in our transition from the current Accounting and Reporting solution to a new Oracle Fusion solution. The successful candidate will oversee the testing of various modules, including Reporting, Chart of Accounts, General Ledger, Accounting Model, IFRS17 and Actuarial, Insurance, Re-insurance, Investment, Payroll, Procurement, Expense Allocation, and Consolidation. Additionally, this role will involve integration with our Azure Databricks Data Repository.

✅ JOB DESCRIPTION

➡️ Role and Responsibilities

Develop and implement comprehensive test strategies for the Accounting and Reporting workstream.

Lead and manage the testing team, ensuring all test activities are completed on time and within budget.

Coordinate with project managers, developers, and business analysts to ensure alignment on testing requirements and objectives.

Oversee the creation and execution of test plans, test cases, and test scripts.

Ensure thorough testing of all modules, including Reporting, Chart of Accounts, General Ledger, Accounting Model, IFRS17 and Actuarial, Insurance, Re-insurance, Investment, Payroll, Procurement, Expense Allocation, and Consolidation.

Manage the integration testing with Azure Databricks Data Repository.

Identify, document, and track defects and ensure their resolution.

Implement and manage test automation frameworks using Selenium, Java, and Python.

Provide regular updates and reports on testing progress, issues, and risks to stakeholders.

Ensure compliance with industry standards and best practices in testing.

🟢 Qualifications

Experience Level: Proven experience in facilitating Agile teams that work on complex technical projects, preferably in data-driven environments

Bachelor's degree in Computer Science, Information Technology, Finance, or a related field.
==================

chetlur.srividya@zinnia.com
=================
Greetings from **BOSE Software Services**

We invite talented professionals to apply for current openings

Position: 🚀 Database Tester 🚀
Experience: 7+ Years
Location: Bangalore

Roles and Responsibilities

- Design, develop, and execute SQL queries to validate data accuracy and integrity.
- Conduct thorough data validation, reconciliation, and back-end testing processes.
- Work closely with developers, QA engineers, and analysts to define data requirements and test cases.

• Participate in test planning, test case design, and execution for database-driven applications.
• Track and report defects using tools like Azure DevOps.
Support ETL and data migration testing in collaboration with BI/ETL teams.

Must-Have Skills:

⚪ Strong proficiency in complex SQL query writing for large datasets.
⚪ ETL Testing experience, including validation of data transformations and loads.
⚪ Hands-on experience with test management and defect tracking tools (e.g., Azure DevOps, JIRA).
⚪ Good understanding of data structures, schemas, and data quality validation.

Preferred Skills:

🔷 Experience with SSIS (SQL Server Integration Services).
🔷 Exposure to data migration projects.
🔷 Background in BFSI/Enterprise domains will be an advantage.

Interested candidates can drop your CV to 📧 **bhagyasri.m@bosesoftware.com**
=================
We're Hiring: Salesforce Lead – Automation QA
📍 Location: Bangalore / Pune (Hybrid)
🕐 Experience: 12+ Years
💼 Domain: Salesforce QA + Automation

Are you a passionate QA leader with hands-on Salesforce testing and automation experience? Do you thrive in high-performance teams and enjoy building reliable test automation for Salesforce ecosystems?

We're looking for someone who can:
✅ Lead automation and functional testing for complex Salesforce applications
✅ Bring strong expertise in Cypress (TypeScript), with exposure to Selenium & Java
✅ Drive end-to-end test strategies – from planning to execution and defect management
✅ Collaborate cross-functionally and manage internal & external QA stakeholders
✅ Guide the team through Agile processes and integration testing across Salesforce clouds
✅ Handle SOQL/SQL, data migration, and test Sales/Service/Experience Cloud setups

Must-Have Skills:
🔷 12+ years in QA & Test Automation
🔷 Salesforce functional & automation testing (Cypress, Selenium, JavaScript/TypeScript)
🔷 Strong leadership and communication skills
🔷 Experience with Jira/ALM, agile methods, and defect tracking
🔷 Good understanding of Salesforce architecture, SOQL, and integration services

🚀 We're Hiring: QA Tester
📍 Location: Delhi/NCR , Pune and Bangalore
🕐 Notice Period: Immediate to 30 Days
📅 Experience: 5 to 6 Years

🔍 What You'll Do:
1. Analyze software specs and create detailed test cases/scripts for manual and automated testing.
2. Perform functional, regression, integration, UAT, performance, and security testing using tools like Selenium with Python, JMeter, or LoadRunner.
3. Log, prioritize, and track defects using tools like JIRA; collaborate with developers for issue resolution.
4. Develop and maintain automation frameworks; test RESTful APIs for functionality and reliability.
5. Conduct load, stress, penetration, and vulnerability tests; analyze metrics and suggest improvements.
6. Work closely with cross-functional teams, participate in Agile ceremonies, and deliver clear test reports and documentation.

✅ What We're Looking For:
1. 2–5 years of hands-on experience
2. Proven experience in software quality assurance
3. Experience with testing tools (e.g., Selenium with Python, Postman, JIRA).
4. Effective communication and teamwork abilities.
