We are Hiring !!

 Job Title: QA Engineer
Location: Hybrid – Hyderabad
Experience: 4–6 Years
Work Mode: Hybrid

Job Description:

We are looking for a skilled QA Engineer with a strong background in test automation for
enterprise applications.

Key Responsibilities:

** Take ownership of end-to-end functional testing and ensure the overall quality of
assigned projects in the RUN phase.
** Troubleshoot, debug, and diagnose application issues and communicate progress,
blockers, and status effectively.
** Design and implement automation test strategies, plans, and cases across functional

teams, supporting CI/CD initiatives.
** Enhance or build automation frameworks from scratch using Selenium or other relevant tools.
** Automate testing across UI, services, and database layers to cover both functional and non-functional requirements.
** Maintain and optimize automation scripts and regularly generate test reports to feed engineering dashboards.
** Contribute to establishing best practices, tools, and streamlined processes for continuous improvement.
** Collaborate with cross-functional teams to ensure effective testing coverage and timely releases.

Required Skills and Qualifications:

** Bachelor's degree in Engineering (B.Tech/BE) or equivalent.
** 4–6 years of hands-on experience in test automation using Selenium, C#, Playwright, Cucumber, or similar open-source tools.
** Experience with PHP upgrade projects is a strong plus.
** Proficiency in SCM tools like TFS, Git.
** Experience with CI/CD tools such as Jenkins.
** Solid understanding of Agile methodologies and experience working in agile teams.
** Excellent communication and interpersonal skills.
** Strong problem-solving and analytical abilities.

🚀 We're Hiring: QA Automation Engineer | 5+ Years Experience | Hybrid – Hyderabad
📍 Location: Hyderabad
🏢 Work Model: Hybrid (3 days from office)
🌐 Client: US-based multinational banking institution
👤 Role Type: Individual Contributor (IC)

🧪 Role Summary:
Join a dynamic Agile team as a QA Automation Engineer with one of the leading global
banks. You'll work closely within squads to test UI flows, API integrations, and database
validations using both manual and automation testing techniques.
If you're confident in Selenium with Java, have hands-on experience with Postman,
Cucumber, and SQL, this role is a great match for you! 💥

🔧 Must-Have Skills:
🧩 Selenium with Java – Basic test case creation, element locators, waits, assertions, and
POM patterns
🧳 Cucumber (BDD) – Gherkin syntax, step definitions in Java, basic feature tagging
🌐 Postman (API Testing) – REST requests, response validations, headers, and status codes
🧠 SQL / DB Testing – SELECT queries, WHERE clauses, basic JOIN understanding
📈 Agile Methodology – Participated in sprints, stand-ups, retrospectives
📋 Jira – Bug logging, ticket tracking, user story updates
🔄 SDLC/STLC Understanding – From test planning to defect logging and regression
🗣️ Communication – Clear in updates and test reporting during team discussions

=================
🚀 We're Hiring: Domain QA Manager at Phenom!
Are you passionate about quality that goes beyond bugs and breakpoints? Do you believe
that true QA starts with understanding the customer?
At Phenom, we're reimagining QA from the outside-in and we're looking for a Domain QA
Manager who's excited to lead that charge.
🧠 What You'll Do:
As a Domain QA Manager, you'll drive validation strategies that focus on real business
outcomes, not just test cases. You'll lead a team of domain-focused QA specialists, working
closely with Product, Engineering, UX, and Customer teams to ensure every release reflects
the workflows, expectations, and needs of our customers.
🔍 In This Role, You'll:

✔️ Champion customer-centric quality across the Phenom platform
✔️ Lead domain-specific test planning rooted in real-world use cases
✔️ Collaborate cross-functionally to drive business-aligned product validation
✔️ Own and evolve domain QA strategy for enterprise-grade HR tech
✔️ Use data and field feedback to constantly improve product quality
🎯 We're Looking For:
✅ 8+ years in software QA, with at least 3 years in a domain-driven QA or Business Analyst role
✅ A strong grasp of HR tech workflows — recruiting, CRM, onboarding, talent marketing, etc.
✅ Someone who thinks in end-to-end business processes, not just functional specs
✅ An analytical, collaborative mindset with a bias toward action
📍 Location:Hyderabad
💡 If you're a Business Analyst turned QA Manager or a QA expert with deep domain expertise - we'd love to connect!
📝 Apply now or tag someone who fits this role.
https://lnkd.in/dMygsvzB
=================
📌 Hiring: Test Automation Engineer – Cypress
📍 Location: Gurugram/Pune/Bangalore/Hyderabad/Mumbai
💼 Experience: 6 to 8 Years

Required Skills & Qualifications
Hands-on test automation experience, with a strong focus on Cypress.
Proven ability in automating complex web applications (UI & API testing) using Cypress.
Familiarity with CI/CD tools and integration of automated tests into build pipelines.
Knowledge of automation design patterns and Cypress best practices.
Basic knowledge of JavaScript.
Expertise in Manual Testing.
Proficiency in Azure DevOps (Project management tool).

Why Join Us?
Work with a modern tech stack and cutting-edge automation tools.
Opportunity to influence automation strategy and best practices.
Collaborative, innovation-driven environment.

📩 Apply Now – Send your CV to **rmishra@deqode.com**

🚀 Hiring: Functional Test Lead – Adobe Commerce (Magento)
📍 Location: (Bangalore, Hyderabad, Pune, Mumbai, Gurugram, Chennai, Kolkata)
🕐 Notice Period: Immediate to 15 Days
📄 Employment Type: Contract-to-Hire (C2H)
About the Role:
We are looking for a highly skilled Functional Test Lead with hands-on experience in Adobe Commerce (Magento) and API testing to join our fast-paced team. The ideal candidate will lead end-to-end testing activities, mentor junior team members, and work closely with cross-functional teams in an Agile environment.
Key Responsibilities:
Design and execute functional, regression, and integration tests for Adobe Commerce (Magento) applications and related APIs
Develop and maintain detailed test plans, test cases, and test data
Perform API testing using tools like Postman or SoapUI
Identify, document, and track defects, and work closely with developers to ensure timely resolution
Collaborate with product owners, developers, and QA teams to ensure high-quality deliverables
Mentor junior testers and help drive test process improvements
Required Skills:
4+ years of hands-on experience in functional testing
2+ years of experience specifically with Adobe Commerce (Magento)
Strong experience in REST/SOAP API testing
Familiarity with test management and defect tracking tools (JIRA, Bugzilla, etc.)
Solid understanding of e-commerce workflows and customer journey validation
Strong communication, analytical, and problem-solving skills
Experience working in Agile environments
Nice to Have:
Exposure to accessibility testing tools (e.g., AXE, NVDA)
Understanding of CI/CD and test automation concepts

Apply at [**recruitments@ethxsoftcon.com**]

Salesforce QA - Onsite
Experience: 6+ Years
Location: Ahmedabad, Bangalore, Hyderabad, Mumbai, Pune.
Work mode: Hybrid (Working 2 days from Office is mandatory)
Notice: Immediate

We are seeking a detail-oriented and experienced Salesforce QA Tester to join our team. The ideal candidate will have hands-on experience in manual testing, API testing, SQL, and Salesforce platform testing. You will be responsible for ensuring the quality and reliability of Salesforce applications and integrations through rigorous testing processes.

Key Responsibilities:
Design, develop, and execute manual test cases for Salesforce applications.
Perform API testing using tools like Postman or SoapUI.
Write and execute SQL queries to validate data integrity and backend processes.
Conduct end-to-end testing of Salesforce features, workflows, and customizations.
Collaborate with developers, business analysts, and stakeholders to understand
requirements and ensure test coverage.
Identify, document, and track bugs and issues using tools like JIRA.
Participate in regression, smoke, and UAT testing cycles.
Ensure compliance with QA standards and best practices.

Required Skills & Qualifications:
Bachelor's degree in Computer Science, Information Technology, or related field.
5+ years of experience in Salesforce testing.
6+ Years of experience in Manual Testing.
Strong experience in API testing and tools like Postman or similar.
Proficiency in SQL for data validation and backend testing.
Hands-on experience with Salesforce testing (Salesforce Classic and Lightning).
Familiarity with Agile/Scrum methodologies.
Excellent analytical and problem-solving skills.
Strong communication and documentation abilities.

Preferred Qualifications:
Salesforce certifications (e.g., Salesforce Administrator, Platform App Builder).
Experience with automation tools (e.g., Selenium, TestNG) is a plus.
Knowledge of CI/CD pipelines and version control systems like Git.

🚨 We Are Hiring | Senior QA Engineer (Integration Platforms)
📍 Location: Hyderabad or Remote (Pan-India)
🚨 Experience: 7+ years
🕐 Notice Period: Immediate to 20 days only
💻 Interview Mode: Microsoft Teams
Are you a strong QA professional with experience in API and integration platform testing?
We're looking for a Senior QA Engineer to join our growing QA team focused on integration platforms and automation at scale.
🔍 What You'll Do:
Design and execute API tests using Rest Assured for complex background integrations.
Validate Middleware/API integrations across platforms like MuleSoft, Oracle Integration Cloud, Dell Boomi, etc.
 (Note: Salesforce is not in scope.)
Develop and maintain test automation frameworks using script-based tools (Selenium, Rest Assured, or similar).
Perform SQL-based validations for backend data integrity.
Collaborate closely with developers, integration engineers, and DevOps for seamless CI/CD and test coverage.
Own the QA process and drive quality in fast-paced sprints.
✅ Mandatory Skills:
✅ Rest Assured (for API Testing of background integrations)
✅ Middleware API Testing (MuleSoft, OIC, Boomi, etc.)
✅ Strong scripting-based automation (No record/play tools like Tosca)
✅ Proficient in SQL
✅ Excellent communication & collaboration skills
🎁 What We Offer:
Work on cutting-edge integration platforms powering real-world business systems.
A remote-friendly, collaborative work environment with smart and driven teams.
Competitive salary and performance-based growth opportunities.
Ownership, learning, and a chance to influence QA best practices.

🚫 Note: Please DO NOT apply if you're on bench or have a notice period exceeding 20 days.
Only candidates available to join immediately or within 20 days will be considered.
📫 share Cvs to:
geetanjali.pusapati@webpipl.com

We at TechStar are **#Hiring**!

📌 Position: Test Engineer

📌 Experience: 4+ Years

📌 Location: Hyderabad

📌 Work Mode: Work From Office (WFO)

📌 Notice Period: Immediate

Job Summary:
We are looking for a skilled and experienced Test Engineer with 4+ years of hands-on
experience in automation testing. The ideal candidate will have strong expertise in Cypress,
TypeScript, Object-Oriented Programming (OOP), SQL, and proficiency in programming
languages like C# or Java. You will be a key contributor in building reliable, scalable, and
maintainable automation frameworks and ensuring high product quality.

Key Responsibilities:
Design, develop, and execute automated test scripts using Cypress.
Leverage TypeScript and apply OOP principles to create efficient test solutions.
Write and optimize SQL queries for data validation and backend testing.
Collaborate with cross-functional teams to understand product requirements and test
coverage needs.
Perform defect analysis, root cause identification, and work with developers to resolve
issues.
Enhance automation frameworks and contribute to CI/CD integration.
Review peer test cases and support junior QA members when required.

Required Skills:
4+ years of experience in software testing with a focus on automation.
Hands-on experience with Cypress and TypeScript.
Strong understanding of OOP concepts.
Proficiency in SQL for querying and validating data.
Experience in at least one programming language – C# or Java.
Familiarity with source control (e.g., Git) and CI/CD pipelines.
Strong analytical, debugging, and communication skills.

Nice to Have:
API testing experience (Postman, REST Assured, etc.).
Experience working in Agile/Scrum teams.
Knowledge of performance testing tools and basic scripting.

📬 How to Apply:
 If you or someone you know is interested, please share your updated resume to:
 📧 **vadivel.a@techstargroup.com**

📢 Hiring Alert: Senior QA Specialist !

We are looking for a seasoned QA Specialist with 5–7 years of experience to lead quality assurance efforts across software projects built on Oracle Technologies. This role demands a hands-on professional with a strong foundation in testing enterprise applications, proficiency in test management tools, and a deep understanding of modern QA practices. Functional knowledge of Oracle Cloud Applications will be an added advantage.
You will play a key role in defining test strategies, executing both manual and automated tests, managing defect life cycles, and mentoring junior QA team members.

Key Responsibilities:

* Design and implement comprehensive test strategies, plans, and test cases for new functionalities and regression cycles.
* Perform manual and automation testing across functional, integration, system, and UAT stages.
* Manage the entire defect lifecycle, from identification to closure, using tools such as Jira.
* Leverage test management tools to track progress and deliver test coverage and defect metrics dashboards/reports.
* Collaborate with product, development, and business teams to ensure high-quality deliverables.
* Support Oracle Cloud Applications (Fusion, Commerce, Sales, Service) from a QA perspective when required.
* Mentor and guide QA engineers, encouraging best practices and process improvements.

Ideal Candidate Profile:

* 5–7 years of QA experience in a software product or enterprise SaaS environment.
* Strong understanding of SDLC, STLC, QA methodologies, and test documentation.
* Proven experience in manual testing and basic exposure to test automation tools/frameworks.
* Familiarity with test management and defect tracking tools (e.g., Jira, Zephyr, TestRail).
* Functional experience with cloud-based platforms; experience with Oracle applications is a strong plus.

* Excellent analytical skills, attention to detail, and a problem-solving mindset.
* Strong communication skills and the ability to work effectively with cross-functional teams.
* Demonstrated ability to lead QA initiatives independently and mentor junior team members.

==================
🔐 We're Hiring: Penetration Tester (Cybersecurity + Mobile)
📍 Location: Hyderabad
🕐 Experience: 4+ Years
📅 Joining: Immediate to 30 Days

Are you passionate about identifying vulnerabilities and securing systems before attackers do? We're looking for a Penetration Tester with expertise in Mobile Application Security (Android/iOS) and a solid foundation in Cybersecurity.

✅ Key Responsibilities:
Conduct penetration testing across web, mobile (Android/iOS), and infrastructure environments
Identify and exploit vulnerabilities in applications, APIs, and networks
Perform static and dynamic analysis on mobile applications
Collaborate with development and security teams to remediate findings
Prepare detailed assessment reports, risk ratings, and actionable recommendations

Simulate real-world attacks to assess organizational security posture
Work within security standards such as OWASP, MITRE ATT&CK, etc.

🔍 Required Skills:
4+ years in Penetration Testing / Ethical Hacking
Strong experience with Mobile App Security Testing
Good understanding of Android & iOS architecture, OWASP Mobile Top 10
Familiar with tools like Burp Suite, MobSF, Frida, OWASP ZAP, Metasploit, etc.
Experience in vulnerability assessment, report writing, and remediation tracking
Solid foundation in network security, web app testing, and secure coding principles

🎯 Preferred:
Relevant certifications (e.g., OSCP, CEH, GPEN, or Mobile-specific certs)
Familiarity with CI/CD security and cloud environments

💼 What We Offer:
Dynamic projects with cutting-edge security challenges
Opportunity to work with an expert cybersecurity team
Competitive compensation
Work-from-office in Hyderabad with flexible environment

🚀 We're Hiring: Performance Test Engineer (5–9 Years Experience)
📍 Location: Bangalore/Hyderabad/Gurgaon
🕐 Experience: 5 to 9 years
🛠 Primary Skill: LoadRunner | Performance Engineering | Cloud (AWS/Azure)
Are you passionate about ensuring scalable, high-performing systems? Join our dynamic team and take charge of the complete performance testing lifecycle.

🔍 What You'll Do
Drive end-to-end performance testing, from requirements to analysis and reporting.
Utilize LoadRunner (all protocols) for hands-on scripting and test execution.
Analyze and debug issues from a developer's perspective.
Design and execute SQL queries for backend validation.
Develop test scripts, workload models, and identify key test parameters.
Collaborate cross-functionally to identify and resolve performance bottlenecks.
Monitor infrastructure components including Kubernetes, servers, and services.
Use advanced monitoring tools to generate performance insights.

🧠 What You Bring
5–9 years in Performance Engineering.
Strong LoadRunner proficiency.
Familiarity with AWS and/or Azure.
Solid understanding of non-functional requirements (SLAs).
Experience with performance monitoring, data interpretation, and reporting.

Bachelor's or Master's in Computer Science, Engineering, or related field.

Hiring: FPGA Software Testing Engineer – Hyderabad | 2+ Years Experience
🚀 We're hiring an FPGA Software Testing Engineer to join our growing team in Hyderabad.
If you're passionate about digital design, FPGA workflows, and scripting with hands-on
experience in RTL coding and Vivado, we want to hear from you!
📍 Location: Hyderabad
🧠 Experience Required: 2+ Years
🔍 Role Type: Full-time | Onsite

Interested? Drop your CV at: **karthik.adasu@Proxilera.com**

Key Responsibilities:
·   Perform FPGA software testing using Vivado tools (synthesis and other stages).
·   Apply strong understanding of FPGA flow, logic design, and digital design principles.
·   Work with RTL coding in Verilog, SystemVerilog, or VHDL.
·   Use scripting knowledge in Tcl and Python to enhance automation and workflows.
·   Engage in tasks that are purely software testing focused – no hardware or silicon RTL
development.
Required Skills:
·   Proficiency in RTL coding using Verilog, SystemVerilog, or VHDL.
·   Solid understanding of FPGA architecture and FPGA development lifecycle.
·   Familiarity with Vivado tools and their use in FPGA software testing.
·   Scripting experience in Tcl and Python.
·   Strong technical communication – written and verbal – to convey information clearly.
·   Customer-focused attitude with excellent organizational and multitasking abilities.

🚀 We're Hiring: Power & Performance Tester | 3–5 Years Experience | Location : Hyderabad

We are looking for an innovative and self-motivated Power & Performance Tester to join our dynamic team! If you're passionate about embedded systems, performance KPIs, and collaborating across architecture, validation, and software teams—this opportunity is for you.

🔧 What You'll Do:

Drive manual and automated testing for mobile/IoT platforms

Generate and analyze power & performance KPIs for diverse use cases

Collaborate with cross-functional teams across architecture, hardware, validation, and software

Contribute to device characterization, benchmarking, and test automation

Support multimedia, AI, and BSP module testing

Work in a fast-paced, agile environment with ownership of key components

🧠 What We're Looking For:

3–5 years of hands-on experience in mobile/IoT or embedded system testing

Strong manual testing background, Python scripting is a plus

Good exposure to multimedia, AI, and low-level BSP modules

Bonus: Experience with memory/storage systems or embedded development

Excellent analytical and communication skills

Familiarity with Agile/Scrum workflows

🎓 Qualifications:

B.Tech in Computer Science / Electronics / Electrical Engineering

Prior experience in embedded systems, power optimization, or device performance validation is highly preferred

💼 Type: Full-Time

📅 Start: Immediate - 15 days

🔗 If this sounds like your next career move, we'd love to connect!

📧 Apply via DM or send your CV to **akram.m@acesoftlabs.com**
