QA Lead Mumbai
rane.vaishnavi@miko.ai

We are looking for a QA Lead to join our Mumbai office. In this role, you will play a pivotal role in ensuring the quality, performance, and reliability of our Miko products. You will collaborate closely with software developers, product managers, and quality assurance teams to design, develop, and execute automated tests, identify defects, and drive improvements in our product's functionality.
Location: Mumbai
Responsibilities:
    Establishing and evolving formal QA processes in collaboration with the QA Manager, ensuring that the team adheres to industry-accepted best practices.
    Overseeing all aspects of quality assurance, including setting up metrics, applying best practices, and developing new tools and processes to meet quality goals.
    Acting as the main point of contact for all QA aspects of product releases, providing QA services, and coordinating QA resources both internally and externally.
    Providing the team with a clear vision of project objectives and deliverables.
    Developing and executing detailed test cases, scripts, plans, and procedures to ensure product quality.
    Leading, coordinating, and executing Quality Assurance testing activities for products and maintenance activities across different phases of the software development lifecycle.
    Prioritizing work and assigning tasks to the Quality Engineering (QE) Team(SIT+UAT).
    Performing incident management in collaboration with the Customer Service team to enhance customer satisfaction.
    Setting KPIs and other metrics to measure team performance.
     Possessing knowledge or experience in testing IoT devices, chatbots, and voice assistant devices, contributing to comprehensive test coverage in these areas.
     Requiring good experience in Rest API testing and mobile application testing to ensure comprehensive coverage and quality across all platforms.
    Must have significant experience in conducting User Acceptance Testing (UAT), guiding and validating the products meets business expectations.

Work Experience & Qualifications:
   Bachelor's degree in Computer Science, Software Engineering, or a related field (or equivalent experience).
   5 years or higher industry experience in Quality Assurance.
   Strong knowledge of software testing methodologies, QA processes, and best practices.
   Familiarity with voice recognition technology and natural language processing is a plus.
   Excellent problem-solving and analytical skills.
   Strong communication and collaboration skills.
=================
Looking for Automation+API Testing
exp: 6+ years
Location: Pune

If interested please share your resume
saritha.n@ibridgetechsoft.com

The purpose of this role is to assess software quality through designing and executing manual and automated test, alongside leading one of the Test phases, i.e., System Test, System Integration Test, UAT. Responsible for ensuring our products, application and systems work correctly by providing accurate test evidence.

Working closely with the Test Manager, Scrum Master, Solution Architect, Business Analysis, Software Engineer, Product owner, to define the test design and execute the tests in line with the Test Strategy, Plan and Test Controls. Responsible creating and implementing the test plan and outcome report, accurately reporting if the test has met the acceptance criteria and where it hasn't raising defects, providing clear and accurate evidence to ensure the defect can be resolved within the agreed SLA's. Working with the Test Manager to own driving continuous improvements, with a quality first mindset to ensure the optimised number of tests are designed and executed either via an automated or manual test.

Accountable for designing traceable test cases to the requirement, ensuring the test case, expected result and evidence is captured in the agreed test tool, producing dashboards to meet the stakeholder's requirements.

The Senior QA tester has a deep understanding of the products, applications and interfaces that underpin the end-to-end business processes

==============
We're Hiring | Quality Engineer – IT QA (Automation/Specialized)
 Locations: Gurugram, Noida, Pune, Bengaluru, Hyderabad (Initial Remote)
 Off-shore Opportunity

Are you passionate about building trustworthy AI systems? We're looking for a Quality
Engineer with a deep focus on AI-driven applications and Retrieval-Augmented Generation
(RAG) models. If you're excited by automation, NLP, and AI reliability, this could be your
next great role.

What You'll Do:
· Design & implement quality strategies for RAG-based AI systems
· Build and automate test cases to ensure accuracy, reliability & performance
· Dive deep into root-cause analysis of model or system defects
· Partner across teams to improve user experience & AI trustworthiness
· Apply AI-specific QA methodologies including model evaluation metrics

What You Bring:
· 3+ years of QA/QE experience (AI-focused preferred)
· Hands-on with tools like Selenium, Cypress, JUnit, Postman
· Knowledge of AI/ML testing, NLP systems, embedding-based retrieval, vector DBs
(Pinecone, Weaviate, etc.)
· Familiarity with metrics like BLEU, ROUGE, F1-score, Precision, Recall
· Experience with performance/load testing tools like JMeter or Gatling

· Strong analytical + communication skills – you're a collaborative problem solver

 If you're driven to improve AI quality and build intelligent systems that people can trust — we want to hear from you!

 Apply now or DM me to know more. "adam.carter@pwsrecruit.com"

==============
We're Hiring | Software Development Engineer III (SDE III)
 Are you a C++ pro on Linux with a passion for clean code, architecture, and mentoring? This
is your chance to work on next-gen embedded systems in a fast-paced, high-impact
environment.

 Location: Pune
 Position Type: Full-Time | Permanent
 Experience: 5 to 8 Years
 Apply Now: Send your CV to vicky@theglove.co.in

 Why This Role is Exciting
 Join a top-tier engineering team where your code goes into real-world production, not just
POCs. You'll lead by example, own delivery pipelines, and guide the next generation of
engineers — all while working on cutting-edge Linux-based systems with industry-grade
performance requirements.

 Your Role in Action:
 Build and maintain embedded C++ software on Linux
 Own end-to-end SDLC — from design to CI/CD deployment
 Collaborate across QA, DevOps & Product to deliver solid features
 Drive Agile sprints, reviews, and retrospectives
 Use GitLab/SVN, Eclipse/VS, and write shell scripts for automation
 Focus on system performance, stability, and debugging

 What You Bring:
 5–8 years of Embedded C++ experience on Linux
 Deep understanding of OOP, memory management, multithreading
 CI/CD, GitLab, and Agile fluency
 Solid grip on debugging tools and system-level problem-solving
 Bonus: Docker, Kubernetes, Jenkins experience
 A mindset for mentorship and clean engineering culture

 Perks of the Role:
 High-impact work with real-world deployment
 Leadership & ownership in product delivery
 Work with cross-functional, skilled tech teams
 Growth, learning, and recognition in a senior engineering role

==============

Contract-to-Hire Job Opportunity

Job Title: Software Development Test Engineer (SDET)/Lead Software Development Test
Engineer (SDET)
Location: Kalyani Nagar, Pune
Duration: 6-12 months contract to hire

Work mode: Hybrid (But the candidate has to be flexible working from the office)

Software Development Test Engineer (SDET) 5+ years of experience
Lead Software Development Test Engineer (SDET) 9 + years of experience

Job Role
We are looking for a highly skilled Software Development Test Engineer (SDET) with
expertise in test automation framework development. The ideal candidate should have
experience working in CI/CD environments, be proficient in shift-left testing strategies, and
have hands-on experience with cloud platforms (AWS preferred), Docker, and Kubernetes.
The candidate should be self-driven, a strong problem solver, and capable of contributing to
multiple projects simultaneously.

Key Responsibilities:
• Develop and maintain test automation frameworks using C# .NET (preferred), Python, or
Java.
• Implement shift-left testing strategies to enhance test efficiency and early defect
detection.
• Design, write, and execute automated and manual test cases for web applications, APIs,
and microservices.
• Collaborate with developers, DevOps, and product teams to integrate testing into CI/CD
pipelines (GitHub Actions preferred).
• Build and maintain automated test pipelines in a cloud-based environment (AWS
preferred).
• Work with Docker and Kubernetes to create test environments and deploy applications for
testing.
• Perform performance, security, and reliability testing as part of an end-to-end test
strategy.
• Troubleshoot test failures, analyze root causes, and provide insights for improvement.
• Participate in code reviews, test planning, and strategy discussions to enhance software
quality.
• Ensure adherence to QA best practices and contribute to process improvements.

Required Skills & Experience:
• 5+ years of hands-on experience in software testing and test automation.
• Proficiency in C# .NET (preferred), Python, or Java for test automation.
• Strong experience in test automation framework development.
• Understanding of shift-left testing methodologies and early defect detection.
• Hands-on experience with CI/CD pipelines (GitHub Actions preferred).
• Experience with Docker, Kubernetes, and containerized application testing.
• Familiarity with AWS cloud services for test automation and deployment.

We have Urgent Senior QA Lead – Oracle Cloud Fusion Job Opening
Remote || Pune
Mainly looking for
Department: Quality Assurance
8+ years of QA experience, with at least 3 years in Oracle Cloud Fusion ERP testing
Lead QA efforts for quarterly Oracle Cloud Fusion patch testing, ensuring minimal disruption
to business operations.

If Interested Please share your resume to bhagyashree@hr-hyre.com & contact us @ 99025
68612
==============
Job Opportunity: QA Lead – Oracle Cloud Fusion (Contract)
Location: Pune (Hybrid or Remote)
Duration: 6 to 9 Months (with potential extension)
Start Date: 28th July 2025
Work Type: Contract
Experience: 8+ Years
Notice Period: Immediate Joiners Only
Interview Mode: Virtual

 Role Overview:
We are looking for an experienced QA Lead to support an enterprise-wide transformation
initiative — replacing the legacy Oracle 11i ERP system with Oracle Cloud Fusion (OCF). You
will play a key role in ensuring the quality and stability of quarterly Oracle Cloud patches
and a smooth transition to the new platform.

 Key Responsibilities:
Lead QA efforts for Oracle Cloud quarterly patch testing.

Collaborate with cross-functional teams (BA, developers, consultants) to analyze impacts.

Design, implement, and execute test strategies, plans, and cases for OCF modules:

Financials

Procurement

Source to Pay

Invoice to Cash

Record to Report

Coordinate SIT, UAT, and regression testing cycles.

Analyze patch release notes and conduct impact analysis.

Maintain traceability of test cases and documentation.

Use tools like Codebeamer for test and defect management.

Provide QA sign-off for production and support post-deployment validation.

Required Qualifications:
Bachelor's degree in Computer Science, IT, or related field.

8+ years of overall QA experience.

3+ years hands-on experience with Oracle Cloud Fusion ERP testing.

Familiarity with quarterly patching cycles and legacy-to-cloud transitions.

Strong communication, analytical, and leadership skills.

Ability to handle multiple priorities independently.

Preferred Skills:
ISTQB or equivalent QA certification.

Integration testing experience with third-party systems (e.g., Salesforce, RevPro).

Experience in Agile/Scrum methodologies.

Apply Now:
Email: Aishu@hr-hyre.com
Contact: +91 9902968612

Location: Mumbai(Andheri East)
Experience: 3–5 Years
Notice Period: Immediate Joiners

We're looking for a detail-driven and quality-obsessed #QAEngineer to join our agile team! If you have solid experience in #AutomationTesting, #RESTAPI, #Selenium, #Playwright, and #SQL, and are passionate about delivering high-quality, reliable software this could be your next big opportunity.

Must have:
2–5 years of hands-on experience in software #QA
1–2 years focused on test automation using tools like #Selenium, #Playwright, or #Pytest
Experience with #RESTAPI testing using #Postman or #RESTassured
Strong understanding of software QA methodologies & best practices
Proficiency in scripting with #Java, #Python, #JavaScript, or #TypeScript
Excellent SQL skills for backend and data validation
Familiarity with tools like #JIRA, #Git, and #CICD pipelines
Strong debugging, documentation, and communication skills

 Good to Have:
Experience with performance testing tools like JMeter or LoadRunner
Exposure to AI/ML-driven platforms and data-heavy applications
Knowledge of Jenkins, GitLab, or other CI/CD tools

Let's ensure every feature works like magic- Together!

Qualifications
⌐ Bachelor's degree in computer science, Information Technology, or related field.
⌐ RPA QA experience is required clear understanding of PDD (Process Design Document),
SDD (Solution
Design Document), and the overall RPA project lifecycle.
⌐ Minimum of 3 years of manual testing experience, preferably in projects related to the
Banking domain.
⌐ Proven experience as a Manual QA Engineer or in a similar role focused on software
testing.
⌐ Strong understanding of software development lifecycle (SDLC) and software testing
methodologies.
⌐ Proficiency in programming languages such as Java, Python, or JavaScript for test
automation.
⌐ Experience in executing and managing test cases using manual testing techniques and test
management tools.
⌐ Familiarity with version control systems such as Git.
⌐ Knowledge of CI/CD tools such as Jenkins, Bamboo, or GitLab CI.
⌐ Excellent analytical and problem-solving skills.
⌐ Strong attention to detail and ability to identify subtle issues and bugs.
⌐ Good communication and teamwork skills.
⌐ Ability to work independently and manage multiple tasks simultaneously.

Preferred Qualifications
⌉ Experience with performance testing tools such as JMeter or LoadRunner.
⌉ Knowledge of SQL and ability to write basic queries for database testing.
⌉ Understanding of web technologies (HTML, CSS, JavaScript) and experience with web application
testing.
⌉ Familiarity with cloud platforms such as AWS, Azure, or Google Cloud.

Key Responsibilities
⌉ Develop, maintain, and execute manual test cases to ensure software functionality, reliability, and
adherence to business requirements.
⌉ Design and implement manual testing strategies to ensure comprehensive coverage across functional,
regression, and integration testing scenarios.
⌉ Work closely with developers, BAs, and RPA teams to understand business requirements, PDDs, and
workflows, and provide feedback on test scenarios and process validations.
⌉ Identify, document, and track software defects using tracking tools such as JIRA or Bugzilla.
⌉ Conduct code reviews and provide feedback on a test case written by peers.
⌉ Maintain and refine manual test scenarios to improve efficiency and coverage.
⌉ Integrate automated tests into the CI/CD pipeline using tools such as Jenkins, Bamboo, or GitLab CI.
⌉ Perform manual testing when necessary to ensure thorough coverage of all test scenarios.
⌉ Analyze test results, generate reports, and provide insights into the quality of the software.
⌉ Stay up-to-date with industry best practices and emerging technologies in testing.
