Share your resume to **apoorva@watsoo.com**
=============
We are hiring QA Engineer (Manual Tester)

Location: Noida (on-site)
Experience: 1 to 2 Years (looking for junior profile only)
Notice Period - Immediate to 15 days (Not looking 45 to 90 days NP candidate as its
immediate hiring)

Freshers from Tier 1 and Tier 2 colleges are welcome to apply,
as we are also looking for interns with strong knowledge and learning potential

The Opportunity Luckpay Solutions is building a payments ecosystem with a vision to
disrupt, innovate, and challenge existing digital payments platforms and service providers.
We're gearing up to release our solutions and are looking for passionate individuals to join
our growing team. If you have the zeal to excel and want to be part of a challenging, fast-
paced fintech journey — this opportunity is for you.

Responsibilities

Ability to describe situations, articulate problems, scenarios, and results clearly.
Prepare and maintain functional documents and detailed test cases.
Work closely with cross-functional teams including Architecture and Development.
Analyze issues, troubleshoot efficiently, and propose practical solutions.
Ability to quickly grasp new tools, technologies, and working environments.
Your BackgroundExperience in Manual and Automation Testing.
Strong skills in preparing test scenarios, writing test cases, and reviewing test plans.
Knowledge of Agile Methodologies, Software Testing Life Cycle, Defect Life Cycle, and
experience with tools like JIRA, Bugzilla, etc.
Working knowledge of Linux operating systems.

Experience with RDBMS (Oracle, PostgreSQL, MSSQL) and NoSQL databases (MongoDB).
Hands-on experience with Postman, SOAP UI, and JMeter.
Proficient in API testing, Security testing, and Performance testing.
Familiarity with PCI-DSS compliance is an added advantage.

Good understanding of:

ISO 8583 messaging
JSON-based communication protocols
EMV, NFC, and digital payment application workflows

Why Join LuckPay? Be part of a fintech that's building the next-generation digital payments infrastructure.
Work in a collaborative, innovative, and growth-driven environment.
Take ownership and make real impact in a high-performance team.

Interested? Email your resume to: **hc@luckpay.in**

Company : Metalbook
Need Interns/Graduate Trainees for
3) QA/Tester

Looking for immediate joinees for Gurgaon Sector-44.

Please mail your CV at **tushara.joy@metalbook.com**
==============
🚀 **Febi.ai** is Hiring: Automation Tester

📍 Location: Gurgaon | Hybrid Mode
🕐 Type: Full-Time | 5 Days Working
⚡ Immediate Joiners Preferred

At **Febi.ai**, we are on a mission to reshape the fintech space through intelligent automation and quality is at the core of everything we build.

We're looking for a talented Automation Tester with 3–4 years of experience to join our growing QA team and help ensure our products are fast, reliable, and rock-solid.

🔍 What You'll Do:
• Develop and execute automation scripts using Selenium, Appium, or similar tools
• Create test plans for web, mobile, and API testing
• Perform regression, functional, and performance testing
• Collaborate with developers and QA teams in an agile environment
• Maintain automation frameworks and support CI/CD integration
• Log bugs, track issues, and contribute to a quality-first product mindset

✅ What We're Looking For:

- 3–4 years of experience in automation testing (web + mobile)
- Proficiency in Java, Python, or JavaScript
- Hands-on with JIRA, TestRail, and Postman
- Familiar with CI/CD pipelines, REST APIs, and basic cloud concepts
- Bonus: experience with JMeter, RestAssured, Docker, or AWS

📩 Think you're the one? Send your resume to **tanu.s@febi.ai** Or tag someone who fits this role!

📢 We Are Hiring! 🚀
📢 Role: QA Automation Tester🚀
📍 Location: Gurugram
🛠️ Job Type: Permanent
💼 Experience: 3+ years
 Notice period: 30 Days Max
Interview type: F2F, Noida location, Sector - 126

 Key Responsibilities:
Design, write, and execute automated test cases using Java and Selenium WebDriver.
Understand application requirements and write test scenarios accordingly.
Perform functional, regression, and smoke testing using automation scripts.
Maintain and update test scripts as the application evolves.
Log and track bugs using tools like JIRA or any bug tracking system.

📩 Interested candidates can DM or email **nagasai.g@mind-graph.com**
=============
🚨 We're Hiring! | QA Analyst Intern – Paid Internship 🚨

Location: Noida, Sector 2 (Hybrid – 1 day/week onsite)
Duration: 2 Months
Stipend: ₹7,000 – ₹10,000 per month
Company: Task Tracker Pvt Ltd
Website: **trackersuite.io**

🔍 What You'll Work On:
1. Create and execute test cases and test plans
2. Perform manual testing (web + mobile apps)
3. Support automation testing (Selenium/basic frameworks)
4. Participate in regression, UI, and smoke testing cycles
5. Report bugs, maintain documentation, and assist in retesting
6. Work alongside developers during SDLC and STLC
7. Learn and apply QA tools and best practices
8. Conduct integration, cross-browser, and ad-hoc testing

✅ What We're Looking For:
1. 0–2 years of QA/testing experience (internship/project experience counts!)

2. Basic understanding of manual testing
3. Familiarity with automation tools like Selenium
4. Understanding of SDLC/STLC
5. Strong attention to detail and analytical mindset
6. Good communication skills and eagerness to learn

🎁 Perks:
1. ₹7,000–₹10,000 stipend
2. Internship certificate
3. Exposure to live client projects
4. Opportunity for a performance-based full-time role

📩 To Apply:
 Send your resume to: **hr@tasktracker.in**
 Subject: QA Internship – [Your Name]
==============
Hiring Functional Testers – Agentic AI Solution (Banking & Wealth Management)
Location: Noida
Experience Level: 2–6 years Reports To: QA Lead / Product Manager
We are looking for an experienced Functional Tester to validate the business workflows,
compliance logic, and customer-facing features of an Agentic AI solution built for the
banking and wealth management domain. This solution leverages LLMs, retrieval-
augmented generation (RAG), and domain ontologies to provide intelligent data retrieval,
client interaction, and regulatory compliance automation.

Key Responsibilities:
•Understand functional and non-functional requirements for Agentic AI features (e.g.,
document Q&A, investment summarization, client onboarding, compliance tracking)
•Validate end-to-end user journeys across banking and wealth advisory use cases
•Test conversational workflows and agentic logic flows (multi-step LLM tasks)
•Verify outputs from LLMs for relevance, consistency, and context-awareness
•Ensure correct role-based access across advisors, relationship managers, and compliance
officers
Test Planning & Execution
•Prepare detailed test plans, test cases, and traceability matrices from EPICs, features, and
user stories
•Execute manual testing for user interfaces, APIs, and chat/agent interactions
•Perform regression testing across AI pipelines after prompt or model updates
•Log, track, and retest defects using tools like Azure DevOps, Jira, or TestRail
AI Model & RAG Testing
•Validate grounding of LLM responses from vector databases (e.g., Azure AI Search,
Pinecone)
•Check performance of RAG pipelines including hallucination mitigation, context window
boundaries, and fallback logic
•Test interaction of agent orchestration flows (LangChain/Autogen/semantic kernel)
•Verify prompt-based test cases for accuracy and coverage
Integration & Data Testing

•Validate PDF/statement extraction logic from custodians (e.g., Morgan Stanley, Pershing)
•Check structured data output (JSON, tables) from Azure Form Recognizer or OpenAI pipelines
•Ensure data integrity and lineage from ingestion → processing → user response
Must-Have Skills & Tools Category Tools/Tech Test Management Azure / AWA DevOps, Jira, TestRail, Azure Board Test Types Functional, UI, Integration, AI behavior Domain Knowledge Wealth Mgmt workflows, KYC, portfolio views, regulatory rules AI Concepts LLM output validation, RAG testing, prompt engineering basics Data JSON validation, SQL for test data setup Tools (Optional) Postman, Python (for test automation scripts), Excel-based test mapping
Preferred Qualifications
•Experience testing AI/ML solutions or conversational AI products
•Familiarity with Azure AI stack, OpenAI, or AWS Bedrock
•Exposure to compliance-heavy domains like banking, wealth, or insurance
•Ability to work with cross-functional Agile teams (product, engineering, AI/ML, compliance)
pls share your profile at **ruby.donald@dailoqa.com**
#functionaltestingengineer#Azure#DevOps#Jira#testing

We're Hiring | Quality Engineer – IT QA (Automation/Specialized)
📍 Locations: Gurugram, Noida, Pune, Bengaluru, Hyderabad (Initial Remote)
🌐 Off-shore Opportunity

Are you passionate about building trustworthy AI systems? We're looking for a Quality Engineer with a deep focus on AI-driven applications and Retrieval-Augmented Generation (RAG) models. If you're excited by automation, NLP, and AI reliability, this could be your

next great role.

What You'll Do:
· Design & implement quality strategies for RAG-based AI systems
· Build and automate test cases to ensure accuracy, reliability & performance
· Dive deep into root-cause analysis of model or system defects
· Partner across teams to improve user experience & AI trustworthiness
· Apply AI-specific QA methodologies including model evaluation metrics

What You Bring:
· 3+ years of QA/QE experience (AI-focused preferred)
· Hands-on with tools like Selenium, Cypress, JUnit, Postman
· Knowledge of AI/ML testing, NLP systems, embedding-based retrieval, vector DBs
(Pinecone, Weaviate, etc.)
· Familiarity with metrics like BLEU, ROUGE, F1-score, Precision, Recall
· Experience with performance/load testing tools like JMeter or Gatling
· Strong analytical + communication skills – you're a collaborative problem solver

💬 If you're driven to improve AI quality and build intelligent systems that people can trust
— we want to hear from you!

✉ Apply now or DM me to know more. "**adam.carter@pwsrecruit.com**"

📢 Hiring Alert: QA Engineer (1 Year Experience) | NOIDA | Full-Time | Work from Office
Department: Product Development
Reports To: QA Manager

Job Summary:

Key Responsibilities:
Understand functional requirements and convert them into detailed test cases
Execute manual test cases for web/mobile applications, APIs, and backend services
Identify, document, and report bugs clearly using tracking tools like Jira
Collaborate with developers and business analysts to clarify requirements and resolve issues
Participate in daily stand-ups, sprint planning, and retrospectives in an Agile environment
Contribute to test planning, effort estimation, and test reporting
Assist in maintaining QA documentation such as test plans and test case repositories
Learn and support automation initiatives (using tools like Selenium, Postman, or Cypress) as
needed
Required Qualifications:
Bachelor's degree in Computer Science, Information Technology, or a related field
Around 1 year of experience in software testing, preferably in a functional/manual QA role
Good understanding of SDLC and STLC processes
Experience in writing test scenarios, test cases, and defect reports
Exposure to bug tracking and test management tools like Jira, TestRail, or Zephyr
Strong communication and collaboration skills

Good to Have (Plus):
Exposure to test automation tools like Selenium, Cypress, or Postman
Familiarity with basic programming/scripting concepts

Basic understanding of API testing and tools like Postman.

✉ Interested candidates can apply by sending their CV to **stuti@mytat.co** with the subject
line: QA Engineer – NOIDA.

Job Title: QA Project Manager
Experience Required: 7+ Years
Location: Noida [Hybrid]
Job Type: Full-time

About the Role:
The ideal candidate will bring strong leadership skills, in-depth Salesforce testing
knowledge, and a forward-thinking mindset to incorporate AI-driven strategies into QA
processes, ensuring higher accuracy, scalability, and efficiency.

Key Responsibilities:
- Lead end-to-end QA efforts for Salesforce projects (Sales Cloud, Service Cloud, etc.),
ensuring high-quality delivery.
- Define and execute comprehensive QA strategies, integrating AI-powered testing tools and
automation frameworks where applicable.
- Utilize AI and analytics for smarter defect prediction, test coverage optimization, and
release readiness.
- Collaborate closely with cross-functional teams and clients to manage QA deliverables,
expectations, and reporting.

Why Join Us:
- Be part of a growing organization at the forefront of Salesforce and AI innovation.
- Collaborate with experienced teams and global clients on impactful digital transformation
projects.
- Flexible hybrid work model with a people-first culture.
