We are hiring Lead QA Engineer (Testing Engineer) !!!

Join us to lead quality assurance for cutting-edge F&B tech solutions.
Role
Must-Have Skills:
    Analyze requirements, functional specifications and create detailed level test cases.
    Collaborate with QA Team to implement effective strategies and test plans.
    Ability to identify a set of test cases that will be a good fit for automation and scope out
automation coverage for a particular project.
    Be ready to move test cases from manual to automation with pride.
    Contribute to the design and architecture of high-quality, complex systems and software.
environments focusing on mobile development, automation, and quality aspects.
    Execute test cases scripts scenarios on schedule (Functional, Systems Integration, and
Regression Testing), and open defects as needed.
    Develop build test automation strategy and focus specifically on maximizing reusability for
regression.
    Design, build and execute automated tests.
    Identify regression testing needs and create and maintain an Automated Regression Suite.
    Maintain automated scripts utilizing the existing framework, adhering to coding
standards.
    Create a weekly plan and weekly reports.
    Follow the Scrum process, participate in Scrum ceremonies and follow the incremental
delivery model.

Must have experience in integrating mobile cloud platforms like Browser stack / Perfecto with automation framework.

Practical experience with Selenium WebDriver for automated testing of web applications. Skilled in writing, executing, and maintaining test scripts, ensuring cross-browser compatibility.

Proficient in using JIRA for project management, GIT for version control, and databases for data storage and retrieval. Skilled in managing tasks, tracking progress, and performing database operations.

Experienced in developing, testing, and deploying applications in both Android and Windows environments. Proficient in utilizing specific tools and frameworks for each platform.

Strong understanding of API testing tools like SoapUI and Postman. Skilled in creating and executing test cases, validating responses, and ensuring API reliability, performance, and security.

Familiarity with both android and Windows environments.

Knowledge of API Testing tools such as SoapUI, Postman.

Good-to-Have Skills:

Educational background includes a degree (B.E/B.Tech/M.Tech) in Computer Science, Engineering, or a related field.

Total 5-8 years experience possess 2-3 years of hands-on experience in automation testing, including designing, implementing, and maintaining automated test scripts and frameworks. Demonstrated expertise in ensuring software quality and reliability through comprehensive automated testing processes.

Possess a strong command of programming languages such as Java and Python. Capable of writing efficient, maintainable code for automation scripts, and leveraging language-specific libraries and frameworks to enhance testing capabilities.

Experience working with Appium for mobile application automation testing. Skilled in setting up and configuring automation frameworks, ensuring seamless integration with testing processes for Android and iOS applications.

Experience in Maven for build automation, Jenkins for CI/CD, and TestNG for automated testing. Proficient in configuring and integrating these tools to streamline development workflows.

Greetings from **#Codersbrain**!

Codersbrain is hiring for API Tester (JMeter + API Automation)

Experience : 6+ Years
Location : Bangalore

Only female candidates may apply

Key Responsibilities:
Functional Testing: Validate API requests, responses, and data integrity.
Automation Testing: Develop and maintain automated API test scripts
using Postman, JMeter, Java, and Groovy.
Performance Testing:
Design and execute JMeter-based load/stress/scalability tests.
Understanding of Kubernetes, Cloud platforms (AWS/Azure), and Microservices
architecture.
End-to-end performance testing: strategy creation, scripting, execution, monitoring, RCA
(Root Cause Analysis), and reporting.
Log Analysis: Utilize Splunk for API log monitoring, error detection, and performance
optimization.
Defect Management: Log and manage defects using JIRA or HP ALM.
Test Data Management: Handle proper setup and management of test data for API
validation.
Reporting: Use reporting tools like Grafana to create performance and defect reports.
Database Validation: Hands-on with SQL/PostgreSQL for backend data verification and
validation.
Required Skill Set:
5–10 years of overall experience in QA Testing.
4+ years hands-on experience in API testing and automation using Postman and JMeter.
Proficiency in Java and Groovy for test scripting.
Strong understanding of JWT (JSON Web Tokens).
Expertise in performance testing with JMeter, covering load, stress, and scalability
scenarios.
Experience with Splunk for log analysis.
Working knowledge of CI/CD pipelines, cloud environments (AWS/Azure),
and microservices.
Good knowledge of databases (SQL/PostgreSQL) for data validation.
Exposure to MuleSoft Anypoint Platform is a plus.
Nice to Have:
Experience with MuleSoft API testing.
Familiarity with Grafana dashboards for monitoring and reporting.

If you are Interested please share the CV at **bhoomika@codersbrain.com**

Job Title: SDET QA (Automation-Focused)
Location: Bangalore, India
Experience: 5+ years experience
Employment Type: Full-Time

Job Description
We are looking for a highly skilled QA professional with strong expertise in Automation
Testing, working experience in SDET practices, and a solid understanding of Manual Testing.
The ideal candidate will have 5+ years of total experience, with at least 1 year of experience

in an SDET capacity.

Key Responsibilities
Ø Design, develop, and maintain robust automation frameworks for web and/or mobile applications.
Ø Write and maintain automated test scripts using tools like Selenium, Cypress, or Appium.
Ø Integrate test automation into CI/CD pipelines (Jenkins, GitLab CI/CD, Azure DevOps).
Ø Collaborate with developers, product managers, and DevOps engineers to ensure product quality.
Ø Write clear, concise, and comprehensive test plans and test cases for both manual and automated testing.
Ø Participate in code reviews for test automation code and contribute to test architecture.
Ø Implement and maintain testing best practices and standards.
Ø Develop utilities or tools to improve QA processes (SDET focus).

Required Skills :
Ø Total Experience: 5+ years in QA/Testing roles.
Ø Automation Testing: 4+ years of hands-on experience.
Ø Proficient in test automation tools and frameworks (Selenium, TestNG, JUnit, PyTest, Cypress, Playwright, etc.).
Ø Experience in scripting languages like Java or JavaScript.
Ø Manual Testing: 1+ year (should understand testing fundamentals and test case design).
Ø SDET: At least 1 year of experience in developing test tools/utilities or contributing to test infrastructure.
Ø Experience with REST API testing using tools like Postman or REST Assured.
Ø Good understanding of OOP principles, basic data structures, and algorithms.
Ø Exposure to version control systems (Git/GitHub/Bitbucket).
Ø Experience with bug tracking tools like JIRA and test management
tools like TestRail or Zephyr.
Ø Experience working in an Agile/Scrum environment.

Good to Have
Ø Knowledge of containerization tools like Docker.
Ø Familiarity with cloud platforms (AWS, Azure, or GCP).
Ø Performance testing experience with tools like JMeter or Gatling.
Ø Security testing basics.

Preferred:
Ø Candidates who can join immediately or within 15 days
Ø Prior experience in the fintech domain

🚀 We're Hiring – Test Engineers 🚀

 Greetings from **NIT DATA** !!!

🖊 Role: Core Administrative System Tester
🕐 Experience: 3 to 12 Years
📍 Location: Bangalore - WFO

Are you an experienced Test Engineer with hands-on expertise in Javelina or HealthPac?
We're on the lookout for professionals who thrive in detail-driven environments and have a
solid grasp of healthcare system testing.

Job Summary:
This role involves testing the Javelina system and related platforms to ensure support for
business requirements. You will be responsible for the testing of assigned functional areas
and will work closely with the business and technical teams.

🔍 Key Requirements:
Minimum 2 years of experience in core system administrative testing
Javelina or HealthPac testing experience is mandatory
Strong understanding of the health plan / TPA industry
Ability to translate test stories into executable test scripts
Familiarity with testing in areas like Claims, Plan Building, Provider Contracts/Fee Rules,
Premium Billing, Reinsurance, or JQS
Detail-oriented with strong troubleshooting and organisational skills
Excellent written and verbal communication skills

📧 Interested? Share your resume at: **shivanath@nitdata.com**
==================
🚀 Hiring Now: Application Testing Engineer (Microservices + Python Automation)
📍 Location: Hybrid – 3 Days/Week WFO (Pune, Bangalore, Noida, Mumbai, Hyderabad)
🕐 Duration: 6 Months (C2H / C2C)
👤 Experience: 5 – 7 Years
📑 Apply- **khushboo@aliqan.com**

✅ Must-Have Skills:
~ 5–7 years of experience in Application/Backend Testing
~ Hands-on testing experience with Microservices architecture
~ Strong skills in Python-based automation frameworks
~ Experience testing REST APIs, using tools like Postman, Pytest, or Robot Framework
~ Solid knowledge of JSON, HTTP protocols, and service mocking/stubbing
~ Experience with version control tools like Git and issue tracking in JIRA
==================
🚀 We're Hiring: QA Automation Engineer – Web, API & Mobile Testing
📍 Location: Bangalore - Hybrid

🖊 Experience: 5+ Years | 🧠 Tech: Python, Robot Framework, REST, gRPC, JMeter, GCP
💼 Full-time | Immediate Joiners Preferred

Are you a detail-obsessed tester with a passion for quality, performance, and automation?
We're looking for a QA Automation Engineer who thrives in Agile environments and loves
digging into everything from API testing to mobile regression.
Bring your expertise in Robot Framework, Python, and CI/CD pipelines to a team that builds
and tests cutting-edge platforms at scale!

🔧 What You'll Do
Design & execute test strategies across Web, API (REST/gRPC), and mobile platforms
Write, maintain, and run automation test scripts using Robot Framework (Python)
Perform functional, regression, and scalability testing with a focus on quality at speed
Collaborate with Dev and DevOps teams to integrate tests into CI/CD pipelines (Jenkins)
Own defect management lifecycle via JIRA & test management using SynapseRT
Contribute to API performance and security testing, leveraging tools like JMeter
Explore edge cases and ensure your testing goes beyond the obvious
Work closely in Agile teams to drive early testing, continuous feedback, and high test
coverage

✅ What You Bring
5+ years of hands-on testing experience (Web, API, functional, regression)
Proven expertise in API testing (REST & gRPC)
Solid command of Robot Framework with Python scripting
Comfortable designing test cases and strategies from scratch
Familiarity with microservices architecture and GCP environments
Experience testing Android or mobile apps across real-world devices
Know-how in performance testing tools like JMeter
CI/CD proficiency: integrating automation suites with Jenkins
Agile native — you've been part of fast-moving Scrum teams

💡 Bonus Points For:
Experience in API security testing
Hands-on work with gRPC automation frameworks
Experience with GCP tools and cloud-native testing approaches

📫 Ready to Apply?
Send your resume to **hr-india@datavedam.com**
==================
🚨 We're Hiring! | QA Engineer – ServiceNow
📍 Location: Noida / Bangalore (Hybrid)
📅 Experience: 5–8 Years
💰 Budget: ₹1.5 – 1.7 LPM (Based on experience)

Are you a detail-driven QA professional with hands-on ServiceNow experience? Join a
dynamic team where innovation meets quality. We're looking for a QA Engineer with
expertise in ServiceNow to play a key role in ensuring top-notch delivery across enterprise
platforms.

🔍 Your Key Responsibilities:

✅ Define test strategy, test scenarios, traceability matrix & success criteria
✅ Collaborate with functional consultants & client UAT teams
✅ Own defect triage, retesting, and sign-off processes
✅ Contribute to test automation planning, where applicable

✅ Must-Have Skills:

5–8 years of overall QA experience, with deep focus on ServiceNow platform

Strong exposure to ServiceNow SPM (Strategic Portfolio Management) and Enterprise
Architect (EA) modules

Hands-on experience with form design, business rules, flow designer, and custom scripts in
ServiceNow

Proficient in integration testing using REST/SOAP APIs

Good understanding of ITIL processes & best practices

Strong analytical, troubleshooting, and documentation skills

Excellent verbal and written communication

✅ ServiceNow System Administrator Certification – Mandatory

🔗 Apply Here
https://lnkd.in/gBZvPWQx
==================
🚨 We're Hiring: Senior SDET (QA + Automation Expert)
📍 Location: Marathahalli, Bangalore (Hybrid – 2 days/week)
💼 Experience: 7–10 Years (Min. 5.5 Years relevant)
💰 CTC: Up to ₹34 LPA
⚡ **Immediate Joiners Only**

We're on the lookout for a **Senior SDET** who thrives in a 60% Manual & 40%
Automation QA environment and understands project architecture from the ground up.

You'll play a key role in ensuring quality across the stack — from defining test strategies to
mentoring teams and driving test automation initiatives.

🛠 Must-Have Skills:
✔️ Strong core Java programming skills
✔️ REST API Testing (Automation + Manual)
✔️ Deep understanding of QA methodologies & E2E test cycles
✔️ Experience with AWS, CI/CD (Jenkins, GitHub Actions)
✔️ Docker/Kubernetes, Observability tools (Grafana, Kibana)

🧠 Nice-to-Have:
🔷 Prior dev background before QA transition
🔷 Familiarity with HashiCorp Nomad
🔷 Performance testing / security testing experience

🎯 What You'll Do:
🔶 Develop & maintain scalable test automation frameworks
🔶 Define, execute, and manage test strategies
🔶 Collaborate closely with developers and architects
🔶 Optimize QA infrastructure & tools for faster releases
🔶 Mentor junior QA engineers and help scale the team

📩 Interested or know someone great?
DM me or reach out at: **saurabh.mishra@quesscorp.com**

🚀 Now Hiring: Performance Test Engineer |

Are you a QA professional passionate about Performance Testing & Engineering?

We are looking for skilled individuals who can own the performance lifecycle—from
planning to analysis—with minimal supervision.

🔷 Role: **#Performance** Test Engineer

🔷 Experience: 5+ Years

🔷 Location: Bangalore, Hyderabad, or Gurugram (India)

🔷 Mode: Full-time | Mid-Level

Key Skills & Requirements:
✅ Strong experience with JMeter, Python, AWS
✅ Hands-on in test strategy, script development, execution & result analysis
✅ Exposure to tools like AppDynamics, CloudWatch, Splunk
✅ Nice to have: Git, DB & Network Analysis, Thread/Heap dump analysis
✅ Strong communication, coordination, and problem-solving skills

As a Performance Engineer, you'll work on improving application speed, stability, and scalability—playing a critical role in ensuring a seamless user experience. If you can lead end-to-end performance testing and demonstrate best practices, we'd love to connect!

We're Hiring: Senior Business Analyst! 💼

Are you passionate about bridging the gap between business goals and tech innovation? Do you thrive in fast-paced environments and have a strong eye for detail, documentation, and domain expertise? If yes, Flattrade is looking for you!

Role: Business Analyst – Senior (3–4 Years Experience)

We're on the lookout for a dynamic and driven Senior Business Analyst to join our growing team. As the crucial link between stakeholders and technology, you'll ensure that every solution we build is aligned with real business needs. From gathering and analyzing requirements to supporting project management and vendor coordination – you'll be involved in every step of the process.

What You'll Do:
✔️ Collaborate with stakeholders to gather and document business requirements
✔️ Create user stories, functional specs, use cases, and process flows
✔️ Analyze and optimize existing business processes
✔️ Ensure seamless communication between business and tech teams
✔️ Support QA, testing, and validation processes
✔️ Assist with project planning, timelines, and reporting
✔️ Provide training and end-user support
✔️ Manage vendor communications and project execution
✔️ Apply your domain expertise in stock market operations, NSE, BSE, MCX, and CDSL

What We're Looking For:
✅ Bachelor's or Master's in Business, Finance, Economics, or IT
✅ Strong analytical and problem-solving skills
✅ Excellent communication and collaboration abilities
✅ Ability to turn business needs into detailed functional specs
✅ Proactive mindset with a hunger to learn and grow

Location: Kochar Technology Park, Ambattur, Chennai (On-site only – no WFH)

I'm **#hiring** for a Senior QA Engineer at saasgenie. Location - Chennai, India.

Position Overview:

We are seeking an experienced and dedicated Senior QA Engineer to join our team. We're looking for candidates having 3 - 5 years of hands-on experience with Selenium and a solid understanding of Java. You will be responsible for ensuring the quality and performance of our products, working closely with the development
team to identify and resolve issues.

Roles & Responsibilities:

1. Develop and maintain automated test scripts using Selenium and Java.

2. Execute automated tests and analyze results to ensure the functionality and performance of the software.

3. Collaborate with developers to identify and resolve defects and issues.

4. Design and implement test plans, test cases, and test processes.

5. Perform thorough regression testing when bugs are resolved.

6. Document and report bugs and issues using tracking tools.

7. Continuously improve test automation frameworks and strategies.

8. Participate in code reviews and provide feedback on testability and quality.

Company Overview:

saasgenie specializes in maximizing the value of SaaS products for our customers, ensuring they derive the best possible benefits from their investments. We are committed to being the premier partner for SaaS companies, dedicated to unlocking the full potential of their products for their customers. Our ethos, "faster, better, and smarter", reflects our commitment to excellence and faster time to value championing agility, and fostering innovation. We deliver intelligent solutions that empower our customers to meet their business objectives efficiently. As a dynamic startup, saasgenie actively crafts the future, embracing challenges with unique strategies and creative thinking. Embark on our journey to enhance SaaS product deployment and adoption, steering the industry towards new horizons. As we continue to grow and expand our team, we are seeking experienced Java full-stack developers to join our journey and contribute to our
culture of excellence.

Qualifications:

1. Bachelor's degree in Computer Science, Engineering, or a related field.

2. 3 - 5 years of experience in software quality assurance.

3. Proficiency in Selenium for test automation.

4. Strong knowledge of Java programming.

5. Experience with bug tracking tools (e.g., JIRA, Bugzilla).

6. Understanding of software development lifecycle (SDLC) and software testing methodologies.

7. Excellent analytical and problem-solving skills.

8. Strong communication and teamwork abilities.

9. Preference to exp with automation tools & frameworks, version control systems, performance & security testing.

#Hiring Graduate Engineer Trainee – Design
📍 Location: Chennai
👷 Hiring For: Our esteemed client in the manufacturing/design sector
🎓 Experience: Freshers / 0–1 year
🕐 Employment Type: Full-time
🚀 About the Opportunity:
We are hiring on behalf of our reputed client for the position of Graduate Engineer Trainee
– Design at their Chennai location. This role offers a great launchpad for fresh engineering

graduates eager to build a strong foundation in product design, CAD, and new product development.

🎯 Key Responsibilities:

🔷 Primary Tasks

Assist in 3D CAD modeling, 2D drawing creation, and prototype assemblies
Support cost estimation, BOM preparation, and compliance documentation
Be available for short-notice travel to factories and vendor sites for approvals/follow-ups
Collaborate within the team to meet project goals and timelines

🔷 Secondary Tasks

Follow New Product Implementation (NPI) processes per input sheet
Maintain records of costs and activities in new product development
Support engineering pilots and final validation builds
Identify new vendors for project-specific requirements
Liaise with vendors and factories for product testing, sample prep, and trade fairs
Document all design and development activities for project traceability
Participate in status meetings and cross-functional coordination

✅ Candidate Requirements:

B.E. / **B.Tech** – Mechanical / Product Design / Industrial Engineering (Freshers preferred)
Basic proficiency in CAD tools (e.g., SolidWorks, Creo, AutoCAD, etc.)
Eagerness to learn and contribute to a dynamic product development environment
Excellent English communication (written & verbal)
Willingness to travel occasionally as per project needs
Strong organizational, documentation, and team-working skills

📧 How to Apply:

If you meet the criteria and are interested in starting your career with a dynamic design team, apply **latshr@latssolutions.com**

Greetings from **#Codersbrain**!

Codersbrain is hiring for Data quality with collibra
Experience : 4+ Years
Location : BANGALORE

Senior Data Engineer with a deep focus on data quality, validation frameworks, and reliability engineering. This role will be instrumental in ensuring the accuracy, integrity, and trustworthiness of data assets across our cloud-native infrastructure. The ideal candidate combines expert-level Python programming with practical experience
in data pipeline engineering, API integration, and managing cloud-native workloads
on AWS and Kubernetes.
Roles & Responsibilities
Design, develop, and deploy automated data validation and quality frameworks using Python.
Build scalable and fault-tolerant data pipelines that support quality checks
across data ingestion, transformation, and delivery.
Integrate with REST APIs to validate and enrich datasets across distributed systems.
Deploy and manage validation workflows using AWS services (EKS, EMR, EC2)
and Kubernetes clusters.
Collaborate with data engineers, analysts, and DevOps to embed quality checks into CI/CD

and ETL pipelines.
Develop monitoring and alerting systems for real-time detection of data anomalies and
inconsistencies.
Write clean, modular, and reusable Python code for automated testing, validation, and
reporting.
Lead root cause analysis for data quality incidents and design long-term solutions.
Maintain detailed technical documentation of data validation strategies, test cases, and
architecture.
Promote data quality best practices and evangelize a culture of data reliability within
the engineering teams.

Required Skills:
Experience with data quality platforms such as Great Expectations, Collibra Data Quality, or
similar tools.
Proficiency in Docker and container lifecycle management.
Familiarity with serverless compute environments (e.g., AWS Lambda, Azure Functions),
Python, PySpark
Relevant certifications in AWS, Kubernetes, or data quality technologies.
Prior experience working in big data ecosystems and real-time data environments.

If you are Interested please share the CV at **bhoomika@codersbrain.com**

Looking for Salesforce QA Engineer.

Experience Required - 6+ years
Notice period - 15 days
Location - Bangalore (Manyata Tech Park)
Mode of work - Hybrid (2 days work from office)

Job Title: Salesforce QA Engineer

Experience: 6+ Years

Location: Bangalore - Hybrid (Manyata Tech Park)

Job description:

6+ years of hands on experience with both Manual and Automated testing with strong
preference of experience using AccelQ on Salesforce ans SAP platforms.

Proven expertise in Salesforce particularly within the Sales Cloud module.

Proficient in writing complex SOQL and SQL queries for data validation and backend testing.

Extensive experience in designing and developing robust, reusable automated test scripts
for Salesforce environments.

Highly skilled at early issue detection, with a deep understanding of backend configurations,
process flows and validation rules.

Should have a strong background in Salesforce testing, with hands-on experience in
automation tools such as Selenium, Provar, or TestNG.

You will be responsible for creating and maintaining automated test scripts, executing test
cases, identifying bugs, and ensuring the quality and reliability of Salesforce applications.

A solid understanding of Salesforce modules (Sales Cloud, Service Cloud, etc.) and APIs is
essential.

Experience with CI/CD tools like Jenkins and version control systems like Git is preferred.

You will work closely with developers, business analysts, and stakeholders to define test
strategies and improve the overall QA process.

Interested candidates can share profiles at **g.ankita@ekloudservices.com**

☑️ **Cynergy Services** is Urgently hiring Test Manager(A&R)
✅ Please share your resume at - **mayuri.lute@cynergyservices.org**

➡️ Role: Test Manager(A&R)
➡️ Exp – 10+yrs
➡️ Location - Bangalore
➡️ Notice Period: Immediate to 30days
➡️ Skills:- ERP testing , Oracle fusion, accounting , reports, Business analyst.

JOB SUMMARY

We are seeking a highly skilled and experienced Test Manager to lead the testing efforts for our Accounting and Reporting workstream. This role is pivotal in our transition from the current Accounting and Reporting solution to a new Oracle Fusion solution. The successful candidate will oversee the testing of various modules, including Reporting, Chart of Accounts, General Ledger, Accounting Model, IFRS17 and Actuarial, Insurance, Re-insurance, Investment, Payroll, Procurement, Expense Allocation, and Consolidation. Additionally, this role will involve integration with our Azure Databricks Data Repository.

JOB DESCRIPTION

Role and Responsibilities
Develop and implement comprehensive test strategies for the Accounting and Reporting workstream.
Lead and manage the testing team, ensuring all test activities are completed on time and within budget.
Coordinate with project managers, developers, and business analysts to ensure alignment on testing requirements and objectives.
Oversee the creation and execution of test plans, test cases, and test scripts.
Ensure thorough testing of all modules, including Reporting, Chart of Accounts, General Ledger, Accounting Model, IFRS17 and Actuarial, Insurance, Re-insurance, Investment, Payroll, Procurement, Expense Allocation, and Consolidation.
Manage the integration testing with Azure Databricks Data Repository.
Identify, document, and track defects and ensure their resolution.
Implement and manage test automation frameworks using Selenium, Java, and Python.
Provide regular updates and reports on testing progress, issues, and risks to stakeholders.
Ensure compliance with industry standards and best practices in testing.

Qualifications
Experience Level: Proven experience in facilitating Agile teams that work on complex technical projects, preferably in data-driven environments
Bachelor's degree in Computer Science, Information Technology, Finance, or a related field.
Proven experience as a Test Manager, preferably in the finance or insurance industry.
Strong knowledge of Oracle Fusion and its modules.

Experience with test automation tools and frameworks, particularly Selenium, Java, and Python.

Ability to work under pressure and manage multiple priorities.
=================
🚀 We're Hiring: Senior QA Automation Engineer – Treasury Installer | Azure | Python | Kubernetes.

Are you passionate about quality engineering, cloud technologies, and automation? Join our dynamic team where innovation meets reliability. We're looking for an experienced Senior QA Automation Engineer to lead the testing and automation efforts for our Treasury Installer platform.

📍 Location: [Bangalore - Hybrid]
🕐 Experience: 5+ years
💼 Employment Type: [Full-Time]

🔍 Role Objectives
Conduct functional and regression testing for the Treasury Installer (deployment, security, performance, availability).
Design, develop, and maintain test automation frameworks using Python, Selenium, and CI/CD pipelines.
Manage cloud environments in line with company security and compliance standards.
Deploy and maintain infrastructure on Azure using Docker and Kubernetes.
Troubleshoot incidents, perform root cause analysis, and implement long-term fixes.

✅ Must-Have Skills

5+ years of hands-on experience as a QA Engineer or similar in software development/system administration.
Strong experience testing cloud applications and building automated test suites.
Proficient with Python and Selenium/Selenium Grid frameworks.
Solid experience with Docker, Kubernetes, and Helm for orchestration and deployment.
Familiarity with Azure Cloud Services and understanding of cloud-native architectures.
Knowledge of Linux/Unix, databases, and cybersecurity best practices.
Experience with GIT, CI/CD pipelines, and Jenkins (Groovy scripting).

🌟 Nice-to-Have Skills

Certifications: CKA, CKAD, or Azure (AZ-104, AZ-204, AZ-400).
Experience with AWS, GCP, or hybrid cloud environments.
Familiarity with Azure DevOps Pipelines, Prometheus, and Grafana for monitoring.
Strong analytical skills and ability to troubleshoot complex software/hardware issues.

💬 Why Join Us?

Be a key player in a critical domain where stability and performance matter.

Work with cutting-edge tech in a supportive, collaborative environment.
Opportunity to influence architecture and drive innovation in test automation and cloud infrastructure.

📩 Interested or know someone who fits?
 Apply now or DM to **manosh.m@itcinfotech.com**. Let's build something great together!

🔍 We're Hiring – SDET (Software Development Engineer in Test)
📍 Location: [Bangalore / Hybrid]
🖊 Tech Stack: Python | Pytest | Robot Framework | AWS or Azure or GCP | Automation Testing
Are you passionate about quality engineering and building world-class test automation frameworks?
We're looking for a driven and detail-oriented SDET to join our growing team. In this role, you'll work with modern technologies to ensure the performance and stability of mission-critical systems across multiple cloud environments.
What You'll Do:
✅ Build robust, scalable automation frameworks using Python, Pytest, and Robot Framework
✅ Collaborate with DevOps and Developers to integrate automation into CI/CD pipelines
✅ Test across AWS, Azure, and GCP environments
✅ Ensure best practices in automation, performance, and cloud testing
We value problem solvers, innovators, and those who are always thinking a step ahead. If that's you—or someone you know—let's connect!
