QA Remote

We are seeking a highly skilled and proactive Senior QA Tech. Lead with over 7 years of hands-on experience in quality assurance, with a strong focus on Salesforce testing, API validation, and the lending domain. The ideal candidate will have a proven track record in ensuring the reliability and performance of financial applications, especially within loan origination, servicing, or credit systems. Experience with monitoring tools like Grafana and Dynatrace is a significant plus.

Key Responsibilities:

    Design and execute test strategies and detailed test cases for applications built on the Salesforce platform.

    Perform functional, integration, regression, and end-to-end testing for complex workflows within the lending domain.

    Conduct comprehensive API testing using tools like Postman, REST Assured, or similar.

    Collaborate closely with product managers, developers, and business analysts to ensure requirements are well understood and testable.

    Validate data flows and ensure data integrity across Salesforce and integrated systems.

    Monitor application health and performance using tools such as Grafana and Dynatrace; assist in root cause analysis for production issues.

    Contribute to the automation framework, especially around Salesforce and backend APIs.

    Participate actively in Agile ceremonies (standups, sprint planning, retrospectives) ● Mentor junior QA team members and help establish best QA practices.

Mandatory Skills and Qualifications:

    7+ years of QA experience with strong functional and technical testing skills.

    Deep experience with Salesforce CRM and Salesforce testing (e.g., Lightning components, workflows, Apex triggers).

    Strong hands-on expertise in API testing (REST/SOAP) using Postman, REST Assured, Swagger, or similar tools.

    Solid knowledge of the lending domain, including loan origination, credit evaluation, and servicing.

    Familiarity with monitoring and observability tools like Grafana and Dynatrace.

    Exposure to automation frameworks and scripting languages (e.g., Java, Python, JavaScript).

    Good understanding of SQL and data validation across systems.

    Experience in Agile/Scrum environments.

    Proficient in using test management tools (e.g. Zephyr) and issue tracking systems like JIRA.

    Experience in preparing and presenting QA reports (test coverage, defect metrics, test execution progress, etc.) to stakeholders.

    Excellent communication skills with the ability to explain technical issues to non-technical stakeholders

Good to Have:

    Experience in writing and executing automated test scripts using Selenium or similar frameworks.

    Knowledge Jof JavaScript/TypeScript for automation scripting.

    Basic understanding of CI/CD pipelines and test integration.

    ISTQB or equivalent QA certification.

QA Remote
adela@dautom.com

Client Introduction:
In this role, you will have the opportunity to work closely with one of our esteemed clients.
This client is a global leader in the IT Industry, known for its commitment to quality and
innovation. They have chosen Dautom as their trusted partner for their upcoming projects.
   Develop and execute detailed test plans and test cases, ensuring comprehensive coverage
of all testing categories for custom-built applications developed on Oracle Fusion PaaS layer.
   Collaborate closely with both the QA team and project teams to align testing activities
with project goals and timelines.
   Manage team reporting, providing necessary technical guidance and support to ensure
effective testing practices.
   Utilize automation testing tools to enhance testing efficiency and accuracy.
   Gather and analyze project-related information to plan, schedule, execute, and deliver
testing activities.
   Validate testing reports and outputs against each release to ensure quality and reliability.
   Ensure all testing procedures comply with Quality Standards, including CMMI.
   Contribute to continuous improvement initiatives to enhance test effectiveness and
overall project quality.
   Be well-versed in the Testing Life Cycle and all types of testing.
   Ensure effective communication and collaboration with stakeholders to meet project
requirements and deadlines.
8 Years' experience in the following.
   Testing ERP solutions, with focus on Oracle Fusion Financials, HCM, and Procurement
modules.
   Testing cloud-based applications.
   Proficiency in the Testing Life Cycle.
   Competence in developing test cases, test specifications, and test scenarios.
   Expertise in developing and maintaining test automation scripts for Oracle Fusion
applications.
   Achieving high test effectiveness, with a proficiency rate of 80% or higher.
   High proficiency in bug tracking and reporting.
   Applying project management methodologies to software projects.
   Conducting SQERT-based project analysis.
   Knowledge of processes and standards such as CMMI and ITIL.
   Managing and guiding teams.
Planning, scheduling, and work allocation.

SQA Engineer – Manual (2 Years Experience)
(Remote)
Ensure product quality with detailed manual testing and documentation. Experience with test planning and bug tracking is a must.
Interested candidates can share their resume through talent@awesometechinc.com
==============
One of our client is Hiring for below role, if interested, please share your updated resume at mikej@j2bglobal.com or you can call me at 762 200 6246

Position :- QA Specialist
Location :- USA/Remote
Duration :- Contract

Job Description
The ideal candidate brings hands-on experience designing and executing test plans across web platforms, has strong familiarity with accessibility standards (WCAG), and excels at collaborating with stakeholders to translate user requirements into rigorous QA protocols.
Key Responsibilities

Design and execute comprehensive test plans for digital products, including:
LMS and associated customizations
System integrations (e.g., Salesforce, ERP, HubSpot)

Conduct cross-browser, cross-device, and accessibility (WCAG 2.1+) testing.
Collaborate with product owners, engineers, and stakeholders to define acceptance criteria and testing scripts.
Interview internal users and stakeholders to gather user scenarios and real-world workflows for validation.
Track and report issues using ticketing/project management tools.
Validate bug fixes and enhancements in staging environments before production releases.
Recommend QA processes and build reusable testing templates where applicable.
Qualifications
5+ years of experience in QA testing for web-based applications and digital platforms.
Strong expertise in manual testing, UX evaluation, and accessibility standards (e.g., WCAG, ARIA roles).
Experience working with LMS platforms (e.g., Thought Industries), CMS, and modern web tech stacks.
Familiarity with enterprise integrations (Salesforce, ERP, HubSpot, SSO).
Strong analytical, communication, and documentation skills.
Ability to manage testing in fast-paced, iterative environments.
Nice to Have
Experience testing multilingual or region-specific user experiences.
Background in EdTech, certification programs, or nonprofit membership organizations.
==============
Title: Sr QA Engg - Tosca/Typescript
Location : Remote

Mandatory skills
6+ years of experience in Quality Assurance with exposure to both manual and automated testing.
Proficient in writing test scripts using tools like TOSCA, Cypress, or Playwright.
Experience testing RESTful APIs, with tools like Postman or Supertest.
Familiarity with performance testing tools (JMeter, Azure Load Testing).
Strong understanding of SDLC, Agile methodologies, and regression planning.
Working knowledge of Microsoft Azure environments and deployment processes.
Ability to work in cross-functional teams and contribute across planning, execution, and reporting

Good to have skills: -
Healthcare/Pharma domain experience, ideally with prior authorization or patient access platforms.
Experience in data validation with PostgreSQL or SQL-based systems.
Familiarity with CI/CD pipelines in Azure DevOps.
Knowledge of secure data handling (HIPAA/PHI masking, encryption standards)

Please send me your resume to venkatesh@keypixelusa.com.
==============
Now Hiring: QA Analyst – Manual Testing (PBM Domain)
 Client: CVS Health
 Location: Remote (USA)
 Employment Type: W2 Only.
 Preference: Former CTS or CVS Employees Only
Job Summary:
We are seeking an experienced QA Analyst – Manual Testing professional with a strong
background in the Pharmacy Benefit Management (PBM) domain. This is a W2-only
opportunity to support CVS Health's ongoing healthcare technology initiatives. Candidates
with prior experience at CVS or Cognizant (CTS) are highly preferred.
Key Requirements:
4+ years of hands-on experience in Manual Testing
2+ years of domain expertise in PBM
Deep understanding of:
Claims lifecycle
Eligibility and enrollment processes
Formulary management
Benefit configuration
Experience with EDI transactions such as NCPDP, 837, 834, 835 is a strong plus
Familiarity with HIPAA and healthcare regulatory standards
Proficient in QA tools including JIRA, TestRail, ALM, and Excel
Strong analytical, communication, and problem-solving skills
Ability to work both independently and within collaborative teams

==============
Now Hiring: SDET / QA Automation Engineer
Location: Remote (occasional onsite in Atlanta, GA)
Type: Contract – Deliverable-Based / Time & Materials
Tentative Start Date: September 2025

Project Overview:
We are looking for a Software Development Engineer in Test (SDET) to help ensure the
quality and accessibility of a public-facing web app and internal tools. If you're passionate
about automation, compliance, and making user-friendly systems, this role is for you.

Key Responsibilities:
• Develop and maintain automated test scripts for web components
• Conduct functional, regression, and UAT testing
• Perform accessibility compliance checks (ADA/Section 508/WCAG 2.1)
• Validate workflows: property submissions, dashboards, logins
• Test across sandbox, dev, and production environments
• Log, track, and resolve bugs using test case management tools
• Collaborate with developers, BAs, and stakeholders to define quality goals

Requirements:
• 4–6 years in SDET or QA automation roles
• Strong with Selenium, Cypress, Postman (or similar tools)
• Experience testing responsive web apps
• Familiarity with tools like Axe, WAVE, JAWS, Lighthouse
• Excellent debugging, analytical, and communication skills

• Solid knowledge of SDLC, test plans, and documentation

Nice to Have:
• Experience with government portals or e-governance projects
• Knowledge of Esri ArcGIS, SharePoint-hosted forms, PDF workflows
• Exposure to CI/CD pipelines and automated testing frameworks

Engagement Details:
• Must be U.S.-based (offshore candidates not accepted per SOR)

Interested or know someone perfect for this role?
DM me or email your updated resume to neelam.tyagi@offsoar.com.

==============
Job Title: Senior Test Automation Engineer / Senior SDET (Hybrid Roles – TX & CA)
 Locations: Westlake/Austin, TX and Palo Alto, CA (Locals Preferred)
 Work Model: Hybrid (3 days onsite, 2 days remote)
 Experience: 8–10 Years Required
 Work Authorization: H1B or H4 EAD with Valid Passport Number

We are currently hiring for two critical hybrid roles – one in Westlake/Austin, TX and the
other in Palo Alto, CA. Both positions require a strong background in test automation, QA
strategy, and DevOps tooling. These are client-facing roles, and we are strictly prioritizing
local candidates due to the hybrid work model.

Role 1: Senior Test Automation Engineer (Austin/Westlake, TX)
Project Overview:
 Support mobile application automation efforts using Appium with Java. You'll be developing
and maintaining functional test scripts, working closely with leadership to implement Test-
Driven Development practices, and driving automation strategies in a cross-functional
environment.
Key Responsibilities:
Build and maintain test automation scripts for mobile applications using Appium (Java).
Ensure automation suites run reliably and report issues proactively.
Collaborate with leadership to implement best testing practices and TDD methodologies.
Coordinate environment needs and tooling with internal/external teams.
Support QA tooling strategies across distributed teams.
Mandatory Skills:
3+ years of mobile app development (Android/iOS).
XCUI and/or Espresso, Kotlin or Swift.
5+ years in automation testing (Java or other OOP languages).
4+ years with test automation frameworks.
Solid knowledge of CI/CD and DevOps practices.
Tools: Jira, Zephyr, MTM, HPQ.
Nice to Have:
Experience in financial or trading applications.

 Role 2: Senior SDET (Palo Alto, CA)
Project Overview:
 Join a team focused on testing cloud platforms and services (AWS/GCP), covering
infrastructure and managed services. You'll be involved in functional, regression, and
performance testing with a focus on GKE, Go, and Terraform automation.
Required Skills & Tech Stack:
5+ years in Software QA with public cloud platform knowledge (IAM, Compute Engine, Cloud
Storage, GKE/EKS, Networking, Monitoring).
Experience with Terraform/Terratest and testing IaC.
OS: Linux (RedHat/CentOS/Ubuntu), Ansible, SSH, service management.
Programming: Java, Groovy, Go, JSON, Spring (nice to have).
Automation: JUnit, TestNG, Selenium, Go Terratest (plus), Cucumber/Serenity BDD (plus).
Tools: Jenkins, GitHub Actions, IntelliJ, Goland, Postman, curl, Confluence, Jira.

Submission Requirements
Please submit only candidates with 8–10 years of experience and who are local to the job
location. The following documents are required for submission:
Visa Copy with Passport Number (H1B or H4 only)
LinkedIn URL
Local Driver's License Copy
Updated Resume
Two Manager-Level Professional References
For submissions or inquiries, please contact Shahed at shahed@dataqinc.com
==============
We're Hiring – QA Automation SME (Playwright + C#)

Remote | Long-Term Contract | USC/GC Only

We @Octigo Solutions Inc HIRING for a contract positions.
Looking for Min 8 to 10+ Years experience consultants

Share you details : Aaron@octigo-solutions.com

Position: QA Tester – Policy Decision (Insurity)
Location: [Insert Location – Remote/Onsite/Hybrid]
Client: [Confidential – P&C Insurance Client]
Duration: [Long-Term Contract / C2C]
Rate: [Best in Market / Negotiable]

Job Description:
We are seeking an experienced QA Tester with strong domain expertise in Property &
Casualty (P&C) Insurance and hands-on experience working with Insurity's Policy Decision
platform. This is a long-term contract opportunity with one of our leading insurance clients.
The ideal candidate will have deep knowledge of policy administration systems, solid
manual testing skills, and the ability to work collaboratively with cross-functional teams in
an Agile environment.

Key Responsibilities:
Perform end-to-end QA testing for Insurity's Policy Decision platform, including new
business, endorsements, renewals, and cancellations.
Design, develop, and execute detailed test plans, test cases, and test scripts based on
business requirements and specifications.
Validate the accuracy of rating logic, rules configuration, policy form selection, and system
workflows.
Conduct functional, regression, integration, and system testing to ensure quality and
compliance.
Perform data validation and backend testing using SQL to verify correct data processing and
storage.
Log, track, and manage defects using tools like JIRA, ensuring timely resolution.
Collaborate with BAs, developers, and product owners in daily stand-ups, sprint planning,
and reviews.
Support User Acceptance Testing (UAT) and ensure business rules are accurately
implemented.

 Required Skills:
5+ years of Quality Assurance / Software Testing experience.
Hands-on experience with Insurity Policy Decision platform (must-have).
Strong domain knowledge in Property & Casualty Insurance – particularly in policy lifecycle
processes.
Proficiency in manual testing, including functional, regression, and integration testing.
Familiarity with test management and defect tracking tools like JIRA, ALM, or TestRail.
Experience with SQL for data validation.

Basic knowledge of API testing (Postman, SoapUI) – nice to have.
Experience working in Agile/Scrum development environments.
Excellent communication and interpersonal skills.

Preferred Qualifications:
Prior experience testing policy systems or rating engines in insurance domain.
Exposure to other Insurity products or platforms (e.g., Billing, Claims).
Familiarity with automation tools (Selenium, UFT) is a plus, though not mandatory.

#Hiring #SDET (APi Testing, Performance Testing, Javascript, Typescript, playwright) -
Remote Opportunity! from anywhere in INDIA with our direct client based in LA, CA. This is a
full-time contract position, Monday to Friday, 8 hours per day. If you're interested, please
share your resume to sameer.kumar@meridianit.com

Job Title: Senior SDET (APi Testing, Performance Testing, Javascript, Typescript, playwright)
Location: [Remote] Anywhere in India
Duration: 8 hours per day Monday to Friday and Long Term Contract
Timings: 4 PM IST onwards

Job Description:
We are seeking a highly skilled #SDET with 10 years of experience to join our team and
contribute to building robust, scalable, and automated testing solutions for our applications.
The ideal candidate will have strong expertise in test automation frameworks and hands-on
experience with tools like Playwright, Selenium, Cypress, Appium, and programming
languages such as JavaScript and TypeScript. Additionally, expertise in API Testing and
Performance Testing is required.

Key Responsibilities:
Design, develop, and execute automated test scripts for web, mobile, and backend
applications.
Build robust test automation frameworks using tools like
Playwright/CodeceptJS/Selenium/Cypress/RestAssured, and Appium.
Perform functional, regression, API, integration, performance, and end-to-end testing.
Develop and execute API test cases using tools like Postman, RestAssured, and other
relevant frameworks.
Implement performance testing strategies and execute tests using tools like JMeter or k6.
Work closely with the development team to integrate testing into the CI/CD pipeline.
Troubleshoot, debug, and resolve issues in the automation test suites.
Leverage tools like Elastic Search for analyzing test data and logs.
Participate in code reviews and contribute to improving the overall quality of the product.
Collaborate with cross-functional teams to ensure quality across the software development
lifecycle.
Analyze test results, report defects, and validate fixes promptly.

Required Skills:
10 years of experience required.
Proficiency in JavaScript and TypeScript.

Hands-on experience with automation frameworks/tools:
Playwright, Selenium, Cypress (web automation)
Appium (mobile automation)
RestAssured (API automation)
Strong understanding of testing concepts: functional, regression, API, and performance testing.
Experience in integrating tests with CI/CD pipelines (Jenkins, GitHub Actions, etc.).
Familiarity with Elastic Search for logs or analytics is a plus.
Solid understanding of RESTful APIs and API testing tools (Postman, RestAssured).
Hands-on experience with performance testing tools such as JMeter, k6, or similar.
Experience with version control tools like Git.
Good knowledge of Agile/Scrum methodologies.

Job Title: Automation Testing - SDET (Software Development Engineer in Test)
Location: USA (Remote/Hybrid/Onsite)
Job Type: Full-Time

American IT Systems is a rapidly growing staffing and recruitment firm specializing in
providing comprehensive hiring solutions across the United States. With a focus on both
technical and non-technical roles, the agency offers flexible staffing options, including
contract, contract-to-hire, and permanent placements, to meet the diverse needs of its
clients.

Job Responsibilities:
Develop and maintain automated test scripts for web, mobile, and API testing.
Design and implement test automation frameworks using Selenium, Cypress, Playwright, or
similar tools.
Work closely with developers, DevOps, and product teams to integrate automated testing
into CI/CD pipelines.
Perform functional, regression, performance, and security testing.
Develop and execute test plans, test cases, and test data strategies.
Identify, track, and troubleshoot defects and performance issues.
Utilize APIs and database queries for backend testing.
Implement and maintain best practices for test automation and software quality assurance.
Required Qualifications:
3+ years of experience in software test automation.
Proficiency in Selenium, Cypress, Playwright, or Appium for UI automation.
Strong programming skills in Java, Python, JavaScript, or C#.
Experience with API testing using Postman, REST Assured, or similar tools.
Familiarity with CI/CD pipelines, Jenkins, Git, and Docker.
Hands-on experience with BDD frameworks like Cucumber or SpecFlow.
Strong knowledge of SQL and database testing.
Excellent debugging and troubleshooting skills.
Preferred Skills:
Experience with cloud-based testing platforms (AWS, Azure, GCP).
Exposure to performance testing tools (JMeter, LoadRunner).
Security testing experience is a plus.

If you are interested in this exciting opportunity, please send your resume
to careers@americanitsystems.com.

 URGENT HIRING: Oracle RMS Test Lead

Location: Remote (BYOD)
Start Date: Immediate | Contract: Long-Term

We're looking for a highly experienced Oracle RMS Quality Engineer ready to lead testing
efforts within a dynamic retail environment. If you thrive on efficiency, excellence, and
impact, this role is for you.

Key Responsibilities
Design & execute comprehensive test cases for RMS and modules (ReIM, SIM, RPM, SIOCS)
Validate E2E data flows (RMS, POS, WMS, Finance, OMS)
Troubleshoot complex system & data issues (logs, DB, middleware)
Lead SIT/UAT planning and defect triage coordination
Perform impact analysis for changes & patch deployments
Automate test cases using Selenium, Tosca, etc.
Collaborate with development, business, and support teams to ensure robust releases

Required Skills & Experience
10+ years in software testing with 5+ years in Oracle RMS & retail modules
Deep RMS, SIOCS & ILS integration knowledge
SQL expertise for backend data validation
Strong troubleshooting & RCA skills (application, DB, middleware)
Agile/Scrum experience
Familiarity with defect tracking & test management tools (JIRA, ALM)
Excellent communication & documentation skills
Experience with Oracle Retail Cloud (SaaS) or upgrades
Solid understanding of retail processes (item mgmt, PO, inventory)
Bonus: Automation frameworks exposure

Why IndicoLite?
Our clients trust us for efficiency, excellence, and results that scale globally. Be part of a
team where leadership, quality, and innovation drive success every day.

Apply now / DM me for details
consult@indicolite.co.in | WhatsApp +918310710900

We're Hiring! Python Automation Engineer

Location: Remote
Employment Type: Full-Time (8 hrs/day, 6 days/week — Saturday OFF)
Salary: $150 - $250
Fresh Talent | 0–1 Yr Exp | Eager to Learn | Growing Every Day

We are looking for a Python Automation Engineer to join our growing tech team! If you're
passionate about writing clean automation code, building robust web automation solutions,
and creating efficient APIs, we'd love to hear from you.

Key Responsibilities:

Develop and maintain Python scripts for automation tasks.
Design and implement browser automation using Selenium WebDriver (Chrome, Firefox).
Write reliable scripts using XPath and CSS selectors.
Build and maintain RESTful APIs using FastAPI.
Work with JSON, HTTP methods, and third-party API integration.
Collaborate with backend and QA teams to improve test coverage and workflows.

Required Skills:

Proficient in Python programming for scripting and automation.
Hands-on experience with Selenium WebDriver.
Strong in XPath, CSS selectors, and browser automation.
Familiar with FastAPI — building endpoints, handling requests/responses.
Knowledge of RESTful APIs, JSON, and HTTP protocols.

Bonus (Nice to Have):

Experience with CI/CD tools.
Familiarity with Docker.
Understanding of async programming in Python.

If you're ready to take ownership of automation challenges and make an impact, apply now

or DM us directly!

 Send your CV to: aahmadkhan07@outlook.com

 Duration: 6 Months (Possible Extension)
 Schedule: Must overlap 3–5 hours with CST
 Start Date: Immediate availability required
 Industry Experience: Manufacturing domain is a MUST
 Core Skills:
SQL Testing (Automated + Manual)
ETL Testing (SSIS)
CI/CD Integration
Strong Data Validation & Transformation logic
 Nice to Have:
tSQLt for SQL unit testing
Azure Data Factory (ADF)
SQL Linting tools

Agile/Scrum methodology exposure
Role Overview:
Join a dynamic Data & Analytics team! You'll design and develop automated SQL test cases, validate ETL pipelines, and ensure data quality across platforms. You'll work closely with Data Engineers, QA Analysts, and DevOps teams in a CI/CD environment.
Let's connect and make it happen!

W2

Role: Lead QA Automation Test Engineer
Location: Remote
LinkedIn needed

Job Description:
Lead QA Automation Test Engineer
Qualifications/Skills Needed:
Required: Bachelors & ISTQB
Top 3 must-have hard skills stack-ranked by importance
•   Extensive experience in ETL and SQL. Knowledge of Databases
•   SDLC, Agile, Scrum
•   Manual Testing
Years of experience required: 5-7
Disqualifiers: missing hands on experience with listed requirements
Additional qualities to look for: Healthcare
Day to Day Responsibilities of Role:
Hand-down tester with lead expertise needed for the ETL & SQL testing team.
Must be comfortable with and have experience with test automation especially back end (APIs).
Must be comfortable with and have experience with adobe products (AEM and CJA)
Must have ands on experience with CI/CD
Must have experience with and be familiar with automation tools such as Cypress and frameworks (Cucumber for example).
Remote opportunity in an enterprise level environment.
Job Summary:
Leads the team and perform hands-down testing on data validation, injection, extraction and transformation using ETL processes. Help with creating, maintaining and updating SQL queries to perform validations on databases.
Education/Experience:
A Bachelor's degree in a quantitative or business field (e.g., statistics, mathematics, engineering, computer science) and requires 5 – 7 years of related experience.
Or equivalent experience acquired through accomplishments of applicable knowledge, duties, scope and skill reflective of the level of this position.
Technical Skills:
One or more of the following skills are desired.
Extensive experience in ETL
Extensive experience in SQL

Knowledge of databases.
Experience in SDLC, Agile, Scrum
Experience in Manual Testing, Testing Tools (qTest, HP ALM etc.)
Knowledge of how to lead teams but also willing to perform hand-down testing.
Soft Skills:
Intermediate - Seeks to acquire knowledge in area of specialty
Intermediate - Ability to identify basic problems and procedural irregularities, collect data,
establish facts, and draw valid conclusions
Intermediate - Ability to work independently
Intermediate - Demonstrated analytical skills
Intermediate - Demonstrated project management skills
Intermediate - Demonstrates a high level of accuracy, even under pressure
Intermediate - Demonstrates excellent judgment and decision-making skills
Intermediate - Ability to communicate and make recommendations to upper management
Intermediate - Ability to drive multiple projects to successful completion
Intermediate - Possesses technical aptitude

Job Title: Sr. RPA Developer
Location: [Remote]

Job Summary:
We are looking for a Senior RPA UiPath Developer with extensive hands-on experience in
designing, developing, and managing scalable automation solutions. The ideal candidate will
lead end-to-end RPA initiatives, mentor junior developers, and work with stakeholders to
deliver automation that drives measurable business impact. This is a strategic role for a
high-impact individual contributor who thrives in fast-paced environments and brings a
deep understanding of automation frameworks and UiPath best practices.

Key Responsibilities:

Lead the design and architecture of complex automation workflows using UiPath Studio, Orchestrator, and REFramework.
Collaborate with business stakeholders and process SMEs to assess automation opportunities and translate business requirements into technical solutions.
Provide technical leadership in the development, testing, and deployment of RPA bots, ensuring maintainability and scalability.
Design robust error handling, logging, and security in line with enterprise-grade development standards.
Mentor and support junior RPA developers, code reviews, and enforce development standards.
Drive best practices for version control, CI/CD, exception handling, reusability, and bot orchestration.
Interface with IT teams to ensure secure and compliant bot deployment, including API integration and infrastructure requirements.
Lead post-deployment support, performance tuning, and monitoring of bots in production.
Stay current on RPA trends and UiPath platform updates to propose continuous improvement.

Required Qualifications:
5+ years of experience in RPA development with at least 3+ years using UiPath in enterprise environments.
Proven experience designing and implementing large-scale, end-to-end RPA solutions.
Deep knowledge of UiPath Studio, Orchestrator, REFramework, and Queue Management.
Strong development skills in VB.NET, C#, Python, or other scripting languages used in automation.
Experience integrating bots with REST/SOAP APIs, SQL databases, legacy systems, and cloud services (Azure, AWS).
Proficient in secure development practices, including credential vaulting, encryption, and audit logging.
Experience with version control (Git) and CI/CD pipelines for RPA deployments.
Strong communication and stakeholder management skills; ability to lead cross-functional teams.

Preferred Qualifications:
UiPath Certified Advanced RPA Developer (UiARD).
Experience deploying RPA in cloud-native or hybrid environments.
Background in process mining or intelligent automation (e.g., AI/ML, OCR with Document Understanding, UiPath AI Center).
Knowledge of Agile/Scrum methodologies and Jira/Confluence tools.
Prior experience in regulated industries (e.g., banking, healthcare, insurance).

 We're Hiring: Senior QA Engineer – Salesforce + Tosca
 Location: [Delhi NCR, Chennai, Remote] |
 Experience: 7+ Years |
 Full-Time
Are you a passionate QA professional with deep expertise in Salesforce testing and Tosca
automation? Join our growing team and help us deliver high-quality Salesforce solutions at
scale!
 What You'll Do:
 Design and implement automated test cases for Salesforce (Classic & Lightning) using
Tricentis Tosca
  Collaborate with cross-functional teams to analyze business requirements and define test
strategies
  Lead functional, integration, regression, and UAT testing across Salesforce clouds (Sales,
Service, etc.)
  Ensure quality through continuous testing, automation, and CI/CD integration
  Mentor junior testers and drive test automation best practices
 What We're Looking For:
 7+ years of QA experience, with 3+ years in Salesforce testing and 2+ years with Tosca
 Strong understanding of Salesforce platform, including Apex, SOQL, Lightning components
 Hands-on experience with Tosca Modules, ExecutionLists, and Test Data
 Familiarity with tools like JIRA, TestRail, Jenkins, or Azure DevOps
 Excellent problem-solving and communication skills

              Nice to Have:
 Salesforce Certifications (e.g., Admin, Platform App Builder)
 Tosca Certification
 Experience with Salesforce API testing and integrations
 Why Join Us?
 Competitive salary + bonus
 Remote flexibility & great team culture
 Training, certifications & growth opportunities
 Health benefits and wellness perks
 Interested or know someone perfect for this?

Now Hiring: Quality Assurance Analyst - Project Lead
 Location: Hybrid (3 Days Onsite, 2 Days Remote – First Month Fully Onsite) Local
candidates only
 Duration: 1+ Year
 Job ID: 7512

We are seeking a local QA Analyst - Project Lead to join our client's team on a long-term project. This is a great opportunity for professionals with a strong background in Python automation, ETL validation, SQL, and Selenium who are passionate about data quality and testing.

Key Responsibilities:
Develop and implement test strategies for data pipelines and ETL processes
Automate ETL validation using Python + Pytest
Perform Web UI automation with Selenium
Write advanced SQL queries for data validation across SQL Server/Oracle
Build reusable Python-based test frameworks
Automate REST API and CI/CD testing workflows
Collaborate with engineers, analysts, and business users
Utilize tools like Git, JIRA, Azure DevOps, Airflow/Prefect
Required Experience:
5+ years Python test automation (ETL + Pytest)
3+ years translating requirements into test cases
3+ years writing advanced SQL
1+ year Selenium Web UI automation

Preferred:
Healthcare (Medicaid) domain experience
Experience in Agile & Waterfall SDLC environments
Familiarity with Atlassian tools (JIRA, Confluence)
Local candidates only due to the onsite requirement.
Interested or know someone who might be a fit?

Send your resume to kirank@arkinfotech.com
==============
We're Hiring: Automation Tester Intern
Location: Remote
Duration: 2-3 month
Type: flexible working hours

What You'll Do:
Develop and execute automated test scripts (Selenium, Cypress, etc.)
Collaborate with developers & QA to understand features and functionality
Detect, document, and report bugs clearly
Participate in regression and performance testing
Contribute to improving test coverage and reliability

What We're Looking For:
Students or recent grads in CS/IT or related fields
Basic knowledge of manual and automation testing
Familiarity with Selenium, TestNG, JUnit, or Postman
Coding skills in Java/Python/JavaScript (basic level is fine!)
Team player with a passion for learning

What You'll Gain:
Hands-on experience in automation testing
Mentorship from QA professionals
Exposure to agile development
Internship certificate + potential for full-time offer

Interested? Apply Now: digitalsolutiontech.com

We're Hiring: ServiceNow Tester | Remote – Canada
 Location: 100% Remote (Canada-based candidates only)
 Apply: Send your resume to Prateek.singh@diverselynx.com

Are you experienced in testing ServiceNow applications and workflows? We're looking for a detail-oriented ServiceNow Tester to join our QA team and ensure the quality and reliability of ServiceNow implementations across ITSM, ITOM, and HR modules.
 Key Responsibilities:
Design and execute test cases for ServiceNow modules (ITSM, ITOM, HRSD, CMDB)
Perform functional, integration, regression, and end-to-end testing
Validate workflows, forms, and UI elements for correctness and compliance
Work with developers, business analysts, and stakeholders to understand requirements
Log, track, and retest defects using tools like JIRA, TestRail, or Zephyr
Automate repetitive test scenarios using ATF (Automated Test Framework) or Selenium (if applicable)
 Required Skills:
3+ years of experience in manual and automated ServiceNow testing
Strong understanding of ServiceNow modules, workflows, and ITIL processes
Hands-on experience with ATF, test planning, and defect lifecycle management
Solid knowledge of QA tools and agile delivery practices
Excellent communication and documentation skills
Must be currently residing in Canada and authorized to work remotely
If you're passionate about quality, detail-driven testing, and want to work with one of the top platforms in enterprise IT — we want to hear from you.

Greetings from Strategic Resources International Inc!

Below is the immediate role. We have interview slots available for the below roles.

Job Title: QA Architect – UI Path (Remote)
Location: Remote (Open to all time zones)
Employment Type: Contract

About the Role:
We are seeking a highly experienced and visionary QA Architect with strong hands-on

experience in UI Path to lead and mentor our QA team. This is a fully remote position and a critical role in driving quality engineering strategies, designing test automation frameworks, and ensuring robust RPA (Robotic Process Automation) test coverage.

As a QA Architect, you will work closely with cross-functional teams, including development, product, and DevOps, to define and implement scalable automation solutions. You'll also serve as a mentor and guide for a team of QA Engineers, fostering best practices and continuous improvement.

Key Responsibilities:
Architect, design, and implement automation test frameworks, with a focus on UI Path-based RPA solutions.
Collaborate with development and business teams to define test strategies and integrate quality at every stage.
Lead technical discussions and design reviews to ensure testability and performance optimization.
Provide mentorship and technical guidance to QA team members across automation, manual testing, and CI/CD integration.
Drive adoption of test automation tools, frameworks, and industry best practices.
Monitor automation test results and ensure rapid resolution of issues.
Evaluate and recommend tools, technologies, and processes to improve test automation and quality.

Required Qualifications:
8+ years of experience in Quality Assurance with 3+ years in a QA Architect or Lead Automation role.
Hands-on experience with UI Path, including automation testing strategies for RPA workflows.
Strong understanding of QA methodologies, testing strategies, and automation frameworks.
Experience with CI/CD pipelines and integrating test automation into DevOps workflows.
Proven experience mentoring and leading QA teams.
Excellent analytical, problem-solving, and communication skills.

Nice to Have:
Experience with other RPA platforms like Blue Prism or Automation Anywhere.
ISTQB or other QA-related certifications.
Exposure to cloud platforms (AWS, Azure, or GCP).

Please send your resume along with a brief note on your UI Path experience and leadership background to sagarp@sriusa.com.
