==================
Are you a passionate QA Engineer who's ready to make a real-world impact? At H&P Technologies, we're transforming the future of gas and oil drilling through smart, scalable, cloud-based solutions — and we want you on the journey.
We're on the lookout for a sharp-eyed Software QA Engineer to join our Product Development team in Noida (UP) or Panaji (Goa). If you're all about quality, collaboration, and automation wizardry, then keep reading — this might interest you.

🔍 What You'll Be Doing (a.k.a. Your QA Superpowers):
🧪 Craft and execute test plans across microservices, integrations, and slick UI layers
🤖 Build robust automation scripts in UI or in API using Playwright or Cypress and other BDD Tools
🔄 Team up with developers to champion quality in CI/CD pipelines
⛽ Put your drilling domain know-how to use and keep tabs on real-time field operations

💡 What You'll Bring to the Team:

👷 3–12 years of solid QA experience testing web apps (HTML, CSS, JavaScript, REST APIs — all the usual suspects)

💼 Hands-on skills with tools like Postman, Jira, TestRail, BurpSuite

🎯 Bonus points if you speak the language of directional drilling, wellbore surveys, or MWD techniques

🎓 A degree in Computer Science, Petroleum Engineering, or something equal will be awesome

Interested Candidates can forward their resume to **kapil.gupta@hpinc.com**

==============

We are seeking a skilled RPA Developer with expertise in Microsoft Power Automate to design, develop, and implement automation workflows that improve operational efficiency across the organization. The ideal candidate will have hands-on experience building scalable and reliable automation solutions using Power Automate and integrating with various business applications.
Key Responsibilities:
· Design, develop, test, and deploy automation workflows using Microsoft Power Automate (formerly Flow).
· Collaborate with business analysts and stakeholders to gather requirements and translate them into automated solutions.
· Analyze existing business processes and identify automation opportunities.
· Integrate Power Automate workflows with Microsoft 365, SharePoint, Dynamics 365, and third-party applications.
· Monitor, troubleshoot, and optimize deployed workflows for performance and reliability.
· Maintain documentation for automated processes and assist in training end-users.
· Work closely with the IT and business teams to ensure smooth automation adoption.
· Stay updated with the latest RPA trends and Power Platform features.
Required Skills and Qualifications:
· Proven experience in RPA development, specifically with Microsoft Power Automate.
· Strong understanding of Microsoft Power Platform components (Power Automate, Power Apps, Power BI).
· Familiarity with SharePoint, Dynamics 365, and other Microsoft 365 services.
· Good knowledge of APIs, connectors, and integration techniques.
· Experience in process mapping, workflow design, and automation best practices.
· Basic understanding of scripting languages such as PowerShell or JavaScript is a plus.
· Strong analytical and problem-solving skills.
· Excellent communication and teamwork abilities.
· Bachelor's degree in computer science, Information Technology, or related field preferred.
Preferred Qualifications:
· Microsoft Power Platform certifications (e.g., PL-900, PL-100, or PL-400).
· Good to have Blue Prism experience.
· Knowledge of Agile methodologies and DevOps practice

We're hiring!
Exciting opportunity for a Sr. Product Manager at our company!

Join our team as a Sr. Product Manager at peopleconnectpvt in Gurgaon. We're looking for a Product Management Expert to drive innovation and customer satisfaction within our Digital & Technology function.

In this role, you'll analyze customer feedback and market data to identify opportunities for product and technology improvements. You'll prioritize hypotheses, conduct agile testing, and ensure we deliver solutions that meet customer and business needs. Collaborate with stakeholders to create customer-centric designs and strategies.

You'll develop and execute a product strategy and roadmap, focusing on short-term wins and long-term sustainability. Create detailed product requirements, user stories, and sprint plans. Work with internal teams and third parties to ensure timely and quality delivery.

Define success metrics for each product and track performance daily. Use data-driven insights to enhance user experiences and build compelling business cases with cross-functional teams. Communicate effectively across the organization and with franchise partners, ensuring alignment and accountability.

Collaborate with the Global D&T team to align market initiatives with global priorities and governance. Maintain transparency and foster strong relationships with franchise partners.

Stipend: Competitive, based on industry standards

We're a fast-growing tech startup in Noida building innovative solutions to empower
businesses and redefine user experiences. We're looking for passionate Software Developer
Interns for three distinct roles: Node.js Developer, React Developer, and DevOps Engineer.
This is your chance to work on exciting projects, gain hands-on experience, and grow with a
dynamic team!

Node.js Developer Intern

Responsibilities:

Build and maintain server-side applications using Node.js.
Develop RESTful APIs and integrate with front-end systems.
Write clean, scalable, and well-documented code.
Collaborate with teams to design and implement backend features.
Debug and optimize performance of backend services.

React Developer Intern

Responsibilities:

Develop responsive and interactive web interfaces using React.
Implement UI/UX designs with HTML, CSS, and JavaScript.
Work with backend developers to integrate APIs.
Ensure cross-browser compatibility and optimize front-end performance.
Participate in code reviews and testing.

DevOps Engineer Intern

Responsibilities:

Assist in building and maintaining CI/CD pipelines.
Support cloud infrastructure setup and management (e.g., AWS, Azure).
Work with containerization tools like Docker and Kubernetes.
Monitor and optimize system performance and reliability.
Collaborate with development teams to streamline deployment processes.

Qualifications:

Enrolled in **B.Tech/M.Tech** (or equivalent) in Computer Science/IT at a top-tier institute.

Shared by **Job Curator** - Join us on Telegram: https://t.me/testingexperiencedopenings

Basic knowledge of DevOps tools (e.g., Git, Jenkins, Docker).
Familiarity with cloud platforms and scripting (e.g., Bash, Python).
Enthusiasm for automation and system optimization.

Why Join Us?
Hands-on experience with cutting-edge technologies.
Mentorship from experienced engineers in a collaborative environment.
Opportunity to convert to a full-time role based on performance.
Vibrant office culture with regular team activities.

How to Apply

We're excited to hear from students at IITs, NITs, BITS, IIITs, DTU, NSIT, and other premier
engineering colleges! Please send your resume, a brief cover letter specifying your preferred
role (Node.js, React, or DevOps), and links to your GitHub/Portfolio (if available) to
hr@appvintech.com.

Use the subject line: Intern Application - [Preferred Role] - [Your Name].

Application Deadline: August 15, 2025
