Join a US-based IT company focused on innovation and growth!
Quality Assurance Leader
Location: Hyderabad

Exp: 8-12 Years

Key Responsibilities
• Develop and executive a forward-thinking QA strategy that leverages AI, intelligent automation, and data-driven insights to enhance efficiency, coverage, and cost-effectiveness.
• Lead, mentor, and expand a high-performing QA team, cultivating future QA leaders.
• Foster a culture of innovation and continuous improvement, promoting the adoption of advanced tools, frameworks, and AI-driven testing methodologies.
• Collaborate with Engineering, DevOps, and Product teams to integrate QA seamlessly into the SDLC through modern CI/CD pipelines.
• Drive the adoption of intelligent test automation, predictive analytics, self-healing test suites, and AI-enhanced defect detection.
• Stay hands-on and technically credible — review automation frameworks, support architectural decisions, and help solve complex quality challenges.
Champion clear, actionable quality metrics; bring transparency and accountability to clients and stakeholders
• Build and maintain strong client relationships, serving as a trusted advisor on quality best practices and innovation.
• Exemplify core values, setting a standard for integrity, accountability, and respect throughout the team.
• Scale the QA function by attracting and retaining top talent through defined career paths, mentorship, and a supportive culture.

Required Skills & Qualifications
• 10+ years of QA/QE experience in software services or product development, with at least 3–5 years leading large QA organizations (50+).
• Visionary and pragmatic, you anticipate the future direction of QA and implement effective strategies in the present.
• Proactive innovator, driving the adoption of AI, machine learning, and automation.
• Principled leader, fostering trust and upholding high standards among teams and peers.
• Excellent communicator, adept at influencing executives, clients, and technical teams.
• Data-driven decision maker, leveraging metrics and insights to achieve quality objectives.
• Agile and adaptable, demonstrating a startup mindset and readiness to address challenges directly.

Preferred Qualifications
Demonstrated expertise in designing and implementing advanced test automation strategies, including the application of AI and machine learning in testing.
• Strong technical proficiency with test automation frameworks such as Selenium, Cypress, and Playwright, as well as experience in performance and security testing and modern cloud architectures.
• Hands-on experience in CI/CD, DevOps practices, and the integration of quality gates.
• Advanced skills in leveraging AI tools for test generation, predictive analytics, and self-healing automation.
• Experience managing distributed teams across multiple time zones is advantageous.

#HiringAlert
 Hiring : QA Automation Engineer (Python + Selenium)

📍 Location: Hybrid – 8 days/month onsite (Noida, Gurgaon, Hyderabad, or Bangalore)
💰 Salary : ₹13 LPA (₹1.10 LPM)
🧠 Experience: 5+ Years
🕐 Shift Timing: 11:00 AM – 8:30 PM IST

🚀 About the Role

 We are looking for a skilled QA Automation Engineer with strong Python and Selenium
expertise to join our growing team. This is a hands-on role where you'll be responsible for
building and maintaining robust test automation frameworks for web and API testing in a
fast-paced Agile environment.

🛠 Key Responsibilities:

Design, develop, and maintain automated test scripts using Python.
Build and maintain automation frameworks (Selenium, PyTest, Robot Framework).
Collaborate with development teams to design test strategies aligned with business
requirements.
Perform API testing (REST/SOAP) using Postman or Python libraries (e.g., Requests).
Execute regression suites, analyze results, and log defects using JIRA or similar tools.
Contribute to and maintain CI/CD automation pipelines (Jenkins, GitHub Actions).
Continuously enhance test coverage, performance, and reporting.
Document test cases, test plans, and test results clearly and concisely.

🎯 Required Skills & Qualifications:

Strong hands-on experience in Python scripting.
Solid knowledge of Selenium WebDriver and frameworks like PyTest.
Practical experience in API testing and automation.
Familiarity with version control (Git) and CI/CD tools (e.g., Jenkins, GitHub Actions).
Good understanding of SDLC, Agile/Scrum workflows, and defect tracking lifecycle.
Excellent analytical, problem-solving, and debugging skills.

Interested ? send your resumes at **kashish.delphic@gmail.com**
==================
🎯 Job Title: Sr. Technical Test Consultant
📍 Location: Chennai | Hyderabad | Noida | Bangalore
💼 Experience: 7 to 12 Years
🕐 Employment Type: Full-Time
📅 Interview Drive: Saturday & Sunday | 10 AM – 6 PM

📌 Openings: 10 Positions

🔎 About the Role:
We are hiring Sr. Technical Test Consultants to lead and deliver high-impact test automation solutions across diverse teams. If you're a hands-on SDET with deep C#, BDD (SpecFlow), and API automation skills, this is the perfect opportunity to bring your framework-building expertise into play and shape the future of quality engineering.

✏️ Key Responsibilities:
✅ Build and implement test automation frameworks from scratch
✅ Lead QA automation efforts within agile teams
✅ Collaborate with developers, BAs, and product teams to ensure quality delivery
✅ Own API and integration testing strategy and implementation
✅ Translate test requirements into maintainable and scalable automation scripts

💡 Must-Have Skills:
💻 Strong hands-on experience with C# programming
🧬 Expertise in BDD frameworks like SpecFlow
🔍 Solid experience in API testing using tools like Postman, RestSharp, etc.
🏗️ Experience designing and maintaining automation test frameworks
🤝 Proven track record of client interaction and QA ownership

✨ Nice-to-Have:
🌐 Exposure to Java-based frameworks
🎭 Experience with front-end test tools like Playwright/Selenium
☁️ Knowledge of Salesforce testing is a plus

📣 Special Notes:
🚀 10 open roles – Refer your peers!
🗒️ Weekend Interview Drives: Saturday/Sunday, 10 AM – 6 PM
💡 Looking for self-starters who can own the automation journey
🎟️ Ready to lead the charge in Test Automation?
Apply now and let's innovate quality, together! 💥

📧 Send your resume to: **swetha.karenna@dprsolutionsinc.com**

Job Post: Software Engineer – QA (Quality Assurance and Testing) – Hyderabad

We Are Hiring | Full Time | Permanent

Location: Hyderabad, India
Department: Software Engineering – QA (Quality Assurance and Testing)
About the Role
Seeking a motivated and detail-oriented Software Engineer – QA with 2-3 years of experience for a fast-paced engineering team in Hyderabad. This position focuses on testing modern applications and ensuring their quality across various platforms including web, desktop, and mobile.

Key Responsibilities
Design, write, and execute detailed test cases to ensure thorough validation of features.
Develop, maintain, and enhance automated test scripts using industry-standard frameworks.
Log, report, and manage defects throughout the testing lifecycle; proactively track issues to closure.
Conduct comprehensive regression testing during releases and post-fix deployments.
Collaborate with developers, product owners, and business analysts to clarify requirements and resolve defects.
Prepare testing documentation, such as test plans and coverage analysis, and keep test artifacts up to date.
Set up and configure required test environments and data as per project needs.
Identify opportunities for test automation, contribute to continuous improvement of quality assurance processes.

Requirements
2-3 years of hands-on experience in software testing, including web and API testing.
Strong skills in writing and executing test cases from functional specs and user stories.
Practical experience in automation frameworks (such as Selenium, Cucumber, or similar).
Good understanding of SQL and database validation.
Familiarity with test management tools (JIRA, TestRail, or similar).
Excellent communication and documentation abilities.
Bachelor's or Master's degree in Computer Science, Engineering, or equivalent.
Experience in Agile/Scrum environments is a plus.

🕐 Notice Period: Immediate to 20 days only
💻 Interview Mode: Microsoft Teams

Are you a strong QA professional with experience in API and integration platform testing?
We're looking for a Senior QA Engineer to join our growing QA team focused on integration
platforms and automation at scale.
🔍 What You'll Do:
Design and execute API tests using Rest Assured for complex background integrations.
Validate Middleware/API integrations across platforms like MuleSoft, **Tray.io**, Oracle
Integration Cloud, Dell Boomi, etc.
 (Note: Salesforce is not in scope.)
Develop and maintain test automation frameworks using script-based tools (Selenium, Rest
Assured, or similar).
Perform SQL-based validations for backend data integrity.
Collaborate closely with developers, integration engineers, and DevOps for seamless CI/CD
and test coverage.
Own the QA process and drive quality in fast-paced sprints.
✅ Mandatory Skills:
✅ Rest Assured (for API Testing of background integrations)
✅ Middleware API Testing (MuleSoft, OIC, Boomi, etc.)
✅ Strong scripting-based automation (No record/play tools like Tosca)
✅ Proficient in SQL
✅ Excellent communication & collaboration skills
🎁 What We Offer:
Work on cutting-edge integration platforms powering real-world business systems.
A remote-friendly, collaborative work environment with smart and driven teams.
Competitive salary and performance-based growth opportunities.
Ownership, learning, and a chance to influence QA best practices.
🚫 Note: Please DO NOT apply if you're on bench or have a notice period exceeding 20 days.
Only candidates available to join immediately or within 20 days will be considered.

We are looking for Pen Tester
Location: Hyderabad
Timings: Full Time (As per company timings)
Notice Period: (Immediate Joiner - Only)
Experience: 5-7 Years

(General Shift & UK shift), 5days work from the Office, a Cab facility is there.
Job responsibilities:
· Conducting and coordinating comprehensive Attack Surface Discovery, Penetration tests, and Cloud on system and network levels, employing advanced ethical hacking techniques.
· Application Penetration Testing (Browser-based, API, Mobile, IoT)
· Threat Modeling
· Source Code Review
· Perform red team exercises to determine weaknesses in the client's infrastructure and how it should be remediated.
· Organizing and delivering technical security operational briefings for both technical and non-technical audiences.
· Set scope, objectives, and timelines for penetration testing engagements and leverage data to create useful metrics.
· Dynamic application security testing (DAST) scans on the identified targets without credentials.

General

· Perform credentialed DAST scans on known client URLs.
· Research to identify new attack vectors.
· Review and provide feedback for all Security Artifacts.
· Play a critical role in building an AppSec program that has a wide scope and impact.
· Researching open-source emerging technologies, developing required frameworks and capabilities to perform red team exercises on new technologies adopted by clients.
· Preparing and delivering clear, accurate, and concise written and oral technical reports for management.

 Job specifications:
Qualification:
· Bachelor's degree in Engineering or closely related coursework in technology development disciplines
· Certifications like OSCP, CEH, OSCE, OSWE, GPEN, GCIH, GWAPT, or GXPN are desirable

 Desired Skills:
Knowledge and Experience:
· Offensive Security Certified Professional (OSCP) and/or Offensive Security Certified Expert (OSCE).
· A thorough understanding of the Secure Development Life Cycle
· Have familiarity with common threat tactics and tools (Nmap, Metasploit, Kali Linux, Burp Suite Pro, CobaltStrike, App Detective, Web Inspect, etc.)
· Cloud Service penetration testing tradecraft and methodologies across one or more service providers (e.g., AWS, GCP, etc.)
· Mobile platform penetration testing tradecraft and methodologies across widely-used platforms (iOS and/or Android).
· Microservices testing
· Ability to find and exploit bugs in:
· C++, Java, JavaScript, Go, and Python
· Kubernetes, AWS, GCP, or Azure
· Memory management, namespaces, cgroups, etc.
· Passion for writing code to solve problems, combined with an interest in Offensive Security.
· Ability to demonstrate a strong background in one of the following languages:
· Golang, Python, Java, JavaScript, C++, C

📢 We're Hiring: Business Analyst – Equity Compensation | Hyderabad (Hybrid)

🚀 We're hiring for a **Business Analyst – Equity Compensation** role based in
Hyderabad! If you have 5+ years of experience as a Business Analyst (with at least 2
years in the Equity Compensation domain), this is an exciting opportunity to work on the
design, implementation, and enhancement of equity-based programs like RSUs, Stock
Options, and ESPP. You'll collaborate with cross-functional teams—HR, Legal, Finance, and
Tech—to drive system improvements, ensure compliance with SOX/SEC/IFRS, and manage
platforms like Shareworks, Carta, E*TRADE, or Fidelity.
Your expertise in drafting user stories, testing plans, and data analysis (Excel/SQL) will be
critical in refining processes and supporting executive reporting.

A Certified Equity Professional (CEP) credential or familiarity with Agile/Scrum is a big plus. If
you're ready to dive into a high-impact role at the intersection of compensation,
compliance, and technology, send your CVs on **aainas@recruitsy.in** and let's talk!

Job Title: EMI/EMC Test Engineer
📍 Location: Hyderabad (Work from Office)
🕐 Experience: 3+ Years
💼 Employment Type: Full-Time

Send your updated resume to **keerthib@teizosoft.com**
🛠️ Job Overview
We are looking for an experienced EMI/EMC Test Engineer to join our cutting-edge testing
team in Hyderabad. The role demands hands-on expertise in executing compliance tests,
analyzing electromagnetic interference and compatibility results, and collaborating with
cross-functional teams to optimize product performance. If you're passionate about
precision and compliance, this is the role for you.
🔧 Key Responsibilities
Perform EMI/EMC testing as per international standards including CISPR, EN, MIL-STD-461,
and IEC
Operate and calibrate RF test equipment: spectrum analyzers, LISNs, antennas, signal
generators
Develop and maintain accurate test plans, procedures, and technical documentation
Analyze results to detect anomalies and provide engineering recommendations
Work closely with design and product teams to mitigate issues and ensure compliance
Maintain lab safety protocols and documentation for audits and certifications
📚 Required Qualifications
Bachelor's degree in Electrical/Electronics Engineering or a related field
Minimum 3 years of experience in EMI/EMC testing environments
Knowledge of regulatory standards (CISPR, EN, FCC, MIL-STD)
Hands-on proficiency with EMI receivers, RF signal generators, shielding techniques, and
diagnostic tools
Strong documentation and communication skills
🌟 Preferred Skills
Familiarity with PCB layout and high-speed circuit behavior
Exposure to pre-compliance tools and automation frameworks
Certification like iNARTE (a plus)
Ability to work independently and take ownership of lab operations
📨 How to Apply
Send your updated resume to **keerthib@teizosoft.com** with the subject line "Application for
EMI/EMC Test Engineer – Hyderabad."
=================
We are hiring Performance testing with Loadrunner with 5+ years of experience for
Hyderabad/Bangalore location.
Minimum of 5+ years of overall experience in delivering high quality enterprise software
products
5+ years of experience in Test Architect role in Application Performance testing
Strong understanding of performance testing methodologies and best practices.
Proficiency in performance testing tools like LoadRunner and JMeter.
Experience with performance monitoring and analysis tools.
Knowledge of software development lifecycles and testing methodologies.
Strong analytical and problem-solving skills.
Excellent communication and collaboration skills.
Ability to work independently and as part of a team.
Good hand-on experience in writing and implementing the test scripts based on the
scenarios for the application
Demonstrated proficiency with database technologies (Microsoft SQL Server)

Must be able to work cross functionally and effectively communicate with co-workers and
all levels both verbally and written
Interested can share their resume with **hr@intsemi.com**
=================
