Quality Assurance Leader
Location: Hyderabad
Exp: 8-12 Years

Key Responsibilities
• Develop and executive a forward-thinking QA strategy that leverages AI, intelligent
automation, and data-driven insights to enhance efficiency, coverage, and cost-
effectiveness.
• Lead, mentor, and expand a high-performing QA team, cultivating future QA leaders.
• Foster a culture of innovation and continuous improvement, promoting the adoption of
advanced tools, frameworks, and AI-driven testing methodologies.
• Collaborate with Engineering, DevOps, and Product teams to integrate QA seamlessly into
the SDLC through modern CI/CD pipelines.
• Drive the adoption of intelligent test automation, predictive analytics, self-healing test

suites, and AI-enhanced defect detection.
• Stay hands-on and technically credible — review automation frameworks, support architectural decisions, and help solve complex quality challenges.
Champion clear, actionable quality metrics; bring transparency and accountability to clients and stakeholders
• Build and maintain strong client relationships, serving as a trusted advisor on quality best practices and innovation.
• Exemplify core values, setting a standard for integrity, accountability, and respect throughout the team.
• Scale the QA function by attracting and retaining top talent through defined career paths, mentorship, and a supportive culture.

Required Skills & Qualifications
• 10+ years of QA/QE experience in software services or product development, with at least 3–5 years leading large QA organizations (50+).
• Visionary and pragmatic, you anticipate the future direction of QA and implement effective strategies in the present.
• Proactive innovator, driving the adoption of AI, machine learning, and automation.
• Principled leader, fostering trust and upholding high standards among teams and peers.
• Excellent communicator, adept at influencing executives, clients, and technical teams.
• Data-driven decision maker, leveraging metrics and insights to achieve quality objectives.
• Agile and adaptable, demonstrating a startup mindset and readiness to address challenges directly.

Preferred Qualifications
Demonstrated expertise in designing and implementing advanced test automation strategies, including the application of AI and machine learning in testing.
• Strong technical proficiency with test automation frameworks such as Selenium, Cypress, and Playwright, as well as experience in performance and security testing and modern cloud architectures.
• Hands-on experience in CI/CD, DevOps practices, and the integration of quality gates.
• Advanced skills in leveraging AI tools for test generation, predictive analytics, and self-healing automation.
• Experience managing distributed teams across multiple time zones is advantageous.

Urgent Hiring
JOB TITLE : QA Specialist
Qualification: Bachelor's degree in Computer Science, Engineering
Experience : 13 plus years Embedded QA
Minimum 7 years of relevant experience in QA and software testing.
Location : Hyderabad
Employment Type: Full Time

About the Role:-
As a QA Specialist, you will be part of the Smart Home Solutions team, contributing to the

quality assurance of cutting-edge smart home technologies. You will work closely with cross-functional teams on testing systems that span hardware, firmware, cloud, and mobile platforms. The role demands both hands-on validation and leadership in developing and implementing automated and exploratory test strategies for next-generation products.

Key Responsibilities:-
Lead and mentor QA team members with deep expertise in software testing and domain knowledge of Fire & Security products.
Design, develop, and execute test strategies and plans based on system requirements.
Validate interfaces such as RS-232/485, TCP/IP, UDP, Wi-Fi, Sub-GHz, and Bluetooth protocols.
Develop automation scripts for desktop, web, and mobile applications using programming languages such as C, C#, Java, or Python.
Build and maintain test automation frameworks using tools such as Selenium (TDD, BDD), Jenkins, and CI/CD pipelines.
Perform REST and SOAP web service testing and automation.
Utilize tools such as JMeter for load testing and Git, JIRA for version control and project tracking.
Contribute to and manage test estimations, planning, execution, and release support.
Collaborate with global stakeholders and participate in Agile/Scrum methodologies.
Operates in embedded environments including RTOS and Linux.

Qualifications & Requirements:
Bachelor's degree in Computer Science, Engineering, or a related field (or equivalent experience).
Minimum 7 years of relevant experience in QA and software testing.
Hands-on experience with firmware, mobile, cloud-based testing, and system integration.
Experience working in global teams and across time zones.
Strong analytical and troubleshooting skills.
Excellent communication and mentoring abilities.

Preferred Tools & Technologies
Programming: C, C#, Java, Python
Automation: Selenium, Jenkins, CI/CD, TDD/BDD Frameworks
Protocols: RS-232/485, TCP/IP, Wi-Fi, Bluetooth
Platforms: RTOS, Linux
Tools: JIRA, Git, JMeter

Benefits:-
Competitive retirement savings plan
Comprehensive health insurance coverage
Flexible schedules, parental leave, and holiday purchase schemes
Career development and professional growth opportunities
Employee Assistance Programme for personal and professional support
Interested candidates please mail your resume to: **krupa.kashronquest@outlook.com**

We're Hiring: QA Automation Engineer | Hyderabad | Hybrid (3 Days Office)

📍 Location: Hyderabad

General

👷 Work Model: Hybrid (3 days from office)
📅 Experience Required: 7+ Years

Role Summary:
 We're on the lookout for a seasoned QA Automation Engineer with over 7 years of
experience in automation testing using Selenium WebDriver (Java), SQL for backend
validations, and Postman for API testing. You'll work closely with Agile delivery teams,
contribute to scalable automation suites, and ensure data integrity across platforms.
If you love diving deep into test frameworks, debugging scripts, and driving quality in every
release, this role is for you!
✅ Must-Have Skills
Selenium WebDriver (Java): Expertise in dynamic UI testing, POM, and synchronization
strategies.
SQL (Oracle/MySQL/SQL Server): Strong hands-on with joins, subqueries, and data
validation.
API Testing with Postman: Experience in validating REST endpoints, headers, and JSON/XML
payloads.
JUnit/TestNG: Managing test lifecycle with annotations, test groups, and assertions.
Maven: Build lifecycle management, dependencies setup.
BDD (Cucumber): Feature file creation and business collaboration.
JIRA & Git: Hands-on with test case management, bug tracking, Agile boards, and version
control.

📣 We're Hiring: QA Engineer (Manual + Automation)
📍 Locations: Chennai | Hyderabad | Bangalore
📌 Full-Time
📧 Apply: **recruiter@skillontap.in**

Are you a detail-driven QA Engineer with 3–7 years of experience in functional and
automation testing? We're looking for professionals who are passionate about ensuring
software excellence across fast-paced, Agile environments — especially those with
experience in the Telecom domain.

🔧 What You'll Work On:
Perform end-to-end testing, regression, system, integration, and UAT.
Develop and maintain robust automation frameworks using Selenium / Robot Framework.
Collaborate with developers and analysts to understand requirements and create
comprehensive test cases.
Execute manual test cases and track bugs using tools like JIRA, TestRail, Zephyr, and HP
ALM.
Contribute to performance, load, and security testing strategies.
Improve test automation and CI/CD integration.
✅ What You Bring:
Solid experience in both manual and automation testing in Telecom Domain.
Strong knowledge of Java or Python for scripting test cases.
Experience with automation tools like Selenium, Robot Framework, etc.
Proficiency with test management tools like JIRA, ALM, Zephyr.
Familiarity with Agile/Scrum methodologies.
Good understanding of SQL and database validation is a plus.
Excellent problem-solving, analytical, and communication skills.

🎓 Education: Bachelor's in Computer Science (preferred)
📜 Certifications in QA/testing tools or Agile practices are a bonus.

If you're looking to grow with a high-performing QA team, contribute to high-impact projects, and work in a collaborative environment — we'd love to hear from you.

==================
