Greetings from **#Codersbrain**!

Codersbrain is hiring for Business analyst
#lifeinsurance
Experience : 5+ Years
Location : Gurugram

Key Responsibilities:
• Collaborate with development and Business teams to validate solutions meet business objectives.
• Conduct gap analysis, process mapping, and impact assessments related to changes in the CyberLife system.
• Prepare detailed use cases, test scenarios, and acceptance criteria for UAT.
• Lead or support User Acceptance Testing by coordinating with business testers, executing test scripts, tracking defects, and ensuring timely closure.
• Participate in Agile ceremonies or structured project meetings, providing updates on requirements, risks, and testing readiness.

• Act as a subject matter expert (SME) on life insurance processes, including policy lifecycle, billing, claims, underwriting, and benefits.
• Assist in data validation, legacy data mapping, and policy migration efforts when applicable.
• Translate business needs into functional and non-functional requirements with clarity and detail

Required Skills and Qualifications:
• Minimum 6+ years of experience as a Business Analyst in the insurance domain, with 2+ years working directly with CyberLife.
• Strong knowledge of life insurance products, policy administration processes, and regulatory requirements.
• Hands-on experience with CyberLife workflows, segment structures, and business rules.
• Proven ability to document BRDs, FRDs, user stories, process flows, and data dictionaries.

• Experience preparing and executing UAT test cases, with defect tracking and triage.
• Familiarity with mainframe systems, COBOL outputs, VSAM data, and JCL job dependencies from a business/testing perspective.
• Strong interpersonal and communication skills to interact with both technical teams and business users.
• Ability to work independently and handle multiple priorities in a fast-paced environment.

If you are Interested please share the CV at **bhoomika@codersbrain.com**
