==================
Title: IT Quality Assurance (QA) Engineer – Web Applications
 Location: Hyderabad
Experience Level: Minimum 5 Years
 Job Type: Fill time

Job Summary:
We are seeking a detail-oriented and experienced IT QA Engineer with a strong background
in testing front-end web applications, preferably in Salesforce Cloud Commerce
(SFCC) environments. The ideal candidate will have a minimum of 5 years of hands-on
experience in software quality assurance, including writing test cases, performing functional
and UI testing, and collaborating closely with development teams. Experience in test
automation is highly desirable.

Key Responsibilities:
Design, develop, and execute manual and automated test cases for front-end web
applications.
Validate UI/UX workflows, responsive behavior, and cross-browser compatibility.
Work closely with developers, product managers, and designers to understand
requirements and deliver high-quality features.
Identify, document, and track bugs and issues using tools such as Jira.
Ensure full test coverage through detailed test plans, test cases, and test reports.
Participate in sprint planning, daily stand-ups, and retrospectives as part of the Agile/Scrum
team.
Collaborate in regression testing, smoke testing, and performance testing cycles.
Contribute to the continuous improvement of QA processes, test strategies, and tools.
Leverage test automation tools (e.g., Selenium, Cypress, Playwright) to improve coverage
and efficiency.

Preferred Qualifications:
5+ years of QA experience, with a focus on web front-end testing.
Hands-on experience testing applications built on Salesforce Commerce Cloud (SFCC) is
a strong plus.
Strong proficiency in writing and executing test cases, test scripts, and test plans.
Solid understanding of HTML, CSS, JavaScript, and browser behavior.
Familiarity with test automation frameworks and CI/CD pipelines.
Experience using tools such as Jira, TestRail, Postman, and Git.
Excellent analytical, communication, and collaboration skills.
Bachelor's degree in computer science, Information Systems, or related field (or equivalent
experience).

Nice to Have:
Experience with API testing and tools like Postman or REST Assured.
Knowledge of performance testing tools like JMeter or LoadRunner.
ISTQB or other QA certifications.

Hiring **#SeniorAutomationTestEngineer** for one of our product based MNC client.
Role: Senior Automation Test Engineer
Experience: 5+ years
Qualification: B.Engg / BSc in Computer Science
Location: Hyderabad (On-site)
Shift : Mid-Shift (preferably (1PM – 10PM), 5-day week.

JOB DESCRIPTION:

#KeyResponsibilities:
* Design and develop automated test suites using a customized Robot Framework based automation framework with Python and Selenium for robotics systems utilizing the **#ROS** operating system.
* Design, implement and test automated test scripts that meet the overall business requirements of overall system functionality including graphical user interface.
* Document automated tests in JIRA with emphasis on correctness and completeness.
* Integrate Jenkins with bitbucket to automate the process of continuous integration and deployment.
* Perform initial diagnosis of bugs found in automation and communicate failures to stakeholders using Jira.
* Identify opportunities to improve the test automation framework and test methodologies.
* Perform some level of manual testing to ensure our automated tests are accurate.

#RequiredSkillsandExperience:
* B.Engg / BSc in Computer Science, or Software Engineering or similar.
* Strong experience in developing and maintaining test automation frameworks using **#RobotFramework**.
* 5+ years experience with software development and test automation.
* Demonstrated expertise in Python programming with knowledge of scripting, data analysis, data structures, algorithms, and **#objectorientedprogramming**.
* Strong knowledge with **#Python** Selenium, **#PyAutoGui** and **#PyYAML**.
* Strong understanding of test methodologies, processes, and tools including continuous integration and continuous delivery.
* Effective functional, performance, regression and E2E automation experience.
* Extensive background in Linux operating systems (3+ years), including Command Line Interface, shell scripting and system configuration.
* Experienced with using **#Git**, **#Bitbucket**, **#Jenkins**, **#Jira** and **#Confluence**.
* Effective communication and collaboration skills working in a team environment.
* Ability to work independently on tasks assigned
* Willingness to work afternoon shift (preferably 1 PM to 10 PM) to have an overlap with team in Canada

 Nice to have:
* Knowledge with the Robot Operating System (ROS)
* Familiarity with Docker, Ansible, and Beautifulsoup.

* Should be able to develop an automated test framework from scratch.

🚶 Walk-In Drive | 24th July 2025 | Hyderabad | Bangalore | Kolkata | ETL / Database Tester
– Banking Domain (5 - 8 Years) 🚶

Hello Everyone,

Are you an experienced ETL / Database Tester ready to take on challenging projects in the

Banking domain? Don't miss this exciting walk-in opportunity to work with leading teams where your SQL and ETL testing skills will drive high-impact solutions!

👨‍💼 Position:

ETL / Database Tester – Banking Domain

📍 Walk-In Locations:

Hyderabad | Bangalore | Kolkata

📍 Work Location:

Hyderabad / Bangalore / Kolkata

📅 Walk-In Date:

Thursday, 24th July 2025

🕐 Mode:

Face-to-Face Interview

💼 Employment Type:

Contract-to-Hire

🔢 Experience Required:

5 - 8 Years

🔍 Who We're Looking For:

We are seeking Database / ETL Testing professionals with a proven track record in data validation, strong SQL knowledge, and exposure to the banking and financial services domain. Ideal candidates should be analytical, communicative, and detail-oriented.

✅ Mandatory Skills:

Strong hands-on experience in ETL Testing / Database Testing
Proficiency in SQL (complex queries, joins, aggregations)
Good understanding of ETL processes and data warehousing
Experience in Banking or Financial Services domain
Sound knowledge of testing methodologies (STLC, defect lifecycle)
Good communication skills and positive attitude

🛠 Job Highlights:

Execute and validate ETL workflows and data pipelines
Design and perform SQL-based data validations and checks
Collaborate with dev and business teams to resolve data issues
Participate in test planning, defect tracking, and production support
Work on high-volume datasets and ensure data integrity

We (**Intellectt Inc**) are looking for a highly skilled *Tosca Test Lead* to join our team in
Hyderabad. The successful candidate will lead the test automation efforts using Tosca,
ensuring efficient and effective testing processes are implemented. The ideal candidate will
have extensive experience in test automation, test strategy development, and leadership in
Tosca-based projects.

Job Role: Tosca Test Lead
Experience: 7+ Years (3+ Years as test lead and 3+ years in Tosca)
Location: Hyderabad
Work Mode: Hybrid (3 days from office)
Notice Period: Immediate Joiners

Key Responsibilities:
- Lead the test automation initiatives using Tosca within the project.
- Develop and implement comprehensive test strategies, test plans, and test cases.
- Collaborate with development, business analysts, and project management teams to
understand functional and non-functional requirements.
- Manage a team of test automation engineers, providing guidance, support, and

mentorship.
- Execute and monitor automated test scripts, ensuring high-quality delivery.
- Review and optimize test automation frameworks, ensuring best practices and Tosca standards are followed.
- Identify test coverage gaps, recommend improvements, and ensure full coverage.
- Work closely with stakeholders to report test progress, issues, and risks, ensuring timely resolution.
- Ensure smooth integration of test automation within DevOps pipelines for continuous integration/continuous deployment (CI/CD).
- Conduct defect tracking, bug reporting, and follow-ups to ensure resolution.

Qualifications:
- 7+ years of experience in test automation, with at least 3+ years as a Test Lead.
- Expertise in Tosca Test Suite, including designing and developing test cases using Tosca.
- Strong understanding of automation frameworks and integration with CI/CD pipelines.
- Proficiency in test management tools and defect tracking systems.
- Demonstrated ability to lead and mentor teams, ensuring high-quality work output.
- Excellent understanding of the SDLC, STLC, and Agile methodologies.
- Strong problem-solving skills and the ability to troubleshoot complex test automation issues.
- Proven ability to work in a fast-paced environment and manage multiple tasks simultaneously.

Preferred Skills:
- Experience in Agile/Scrum environments.
- Familiarity with other test automation tools and frameworks is a plus.
- Strong communication and interpersonal skills, with the ability to interact with clients and stakeholders effectively.

Interested candidate please share your updated resume to
