==================
Performance test engineer

location (India) – Bangalore or Hyderabad or Gurugram
Mid-Level QA – 5+ Years of experience in PT and PE
A performance test engineer's primary responsibility is the creation and maintenance of
performance test plans, utilizing JMeter load testing software to inject load, analyzing
metrics from application and system logs, and simulating system behavior to improve the
performance and reliability of applications. A typical candidate should be able to handle the
performance testing from the beginning to end like requirements gatherings, test plans,
scripts execution, Analysis, and reporting with minimal supervision. Senior performance
engineer should be able to assist and demonstrate the best practices to do performance
testing. Nice to have performance analysis skills using any tools for Application Monitoring,
DB analysis and Network traces. Nice to have knowledge on Git, App Dynamics.

Job Description

· Overall, 5+ years of IT work experience with good communication skills.

· At least 5+ years of experience in Performance Testing & Engineering activities using
Jmeter*, Python* & AWS*

Shared by **Job Curator** - Join us on Telegram:  https://t.me/testingexperiencedopenings

This document is for Subscribed Members only. If you notice this is shared publicly by anyone pls report to us on info@jobcurator.in or whatsapp +91 9014875399

General

· Expertise in Collecting Non-Functional Requirements, Analyze Historical Data and developing Workload Patterns, Develop Performance Strategy, and implement them.

· Develop Automated Test Scripts, Execute Performance Test Runs, Server Monitoring, Result collation and Analysis.

· Tools Knowledge: JMeter, Performance Center, Load Runner, Monitoring tools (AppDynamics/ CloudWatch/Splunk)

· Knowledge of Performance trouble shooting (heap dump & thread dump analysis) is preferred.

· Should have strong co-ordination, communication & reporting, analytical skills.
if anyone is interested please share your profiles at **hr@qoreweb.in** and **info@qoreweb.in**

🔍 We're Hiring: QA Tester
📍 Location: Noida
🕐 Experience: 3–5 Years
📅 Type: 6 Months Contract
🏢 Work Mode: Onsite

🖊 Job Summary
We're looking for a detail-oriented and motivated QA Tester with 3–5 years of experience in
manual testing and a basic understanding of automation and DevOps tools. The ideal

General

candidate will have strong knowledge of functional, regression, and system integration testing, and be confident using tools like JIRA, SVN, and Docker.

💼 Key Responsibilities
✅ Design, write, and maintain detailed test cases based on business and technical requirements
✅ Execute manual testing including functional, regression, and system integration testing
✅ Document test results, track defects using JIRA
✅ Collaborate with developers and product managers in Agile/Scrum teams
✅ Use SVN for version control and support Docker-based build/deployment
✅ Contribute to test planning, reviews, and defect triage
✅ Optional: Assist in automation, performance, or security testing

✅ Must-Have Skills
🔷 3–5 years of manual testing experience
🔷 Functional, Regression, and System Integration Testing
🔷 Test Case Design, Execution & Defect Tracking
🔷 Tools: JIRA, SVN, Docker (basic knowledge)
🔷 Strong communication and collaboration skills

🌟 Good to Have
🔶 Exposure to automation tools – Selenium, Postman, etc.
🔶 Performance Testing – JMeter, LoadRunner
🔶 Security Testing Experience
🔶 Agile/Scrum familiarity
🔶 Scripting knowledge – Java, Python, etc.
🔶 Surveillance/Security domain knowledge

🎓 Qualifications:
Bachelor's degree in Computer Science, IT, Engineering, or related field
📨 Interested candidates can send their CV to **farheen@aligan.com**
