Job Title: Informatica - Data Test Analyst
Location: Bangalore
Job Type: Full Time ,Onsite
Experience : 7+ Years
Job Type: Full-time
Mail id: **hr@data-prowess.com**

Job Summary:
We are seeking a skilled Informatica -Data Test Analyst to join our team. The ideal candidate will
have experience in ETL testing, data validation, and Informatica PowerCenter. The role involves
ensuring data integrity, validating ETL processes, and collaborating with business and
development teams to identify and resolve issues.
Key Responsibilities:
ETL Testing: Validate ETL workflows, data transformations, and data loads in Informatica
PowerCenter.
Data Validation: Perform source-to-target data validation to ensure accuracy and completeness.
Test Strategy & Planning: Develop test plans, test cases, and test scripts based on business
requirements.
SQL & Database Testing: Write complex SQL queries for data validation across RDBMS (Oracle,
SQL Server, MySQL, etc.).
Defect Management: Identify, document, and track defects using tools like JIRA, HP ALM, or
TestRail.
Automation: Implement ETL testing automation using tools like Selenium, Python, or Informatica
Data Validation (IDQ).
Collaboration: Work closely with ETL developers, business analysts, and QA teams to resolve
issues and ensure data quality.
Performance Testing: Identify bottlenecks in ETL jobs and recommend optimizations.
Required Skills & Experience:
7+ years of experience in ETL/Informatica Testing.
Strong hands-on experience with Informatica PowerCenter & ETL testing.
Expertise in SQL queries and database concepts (joins, indexing, performance tuning).
Experience in test case design, execution, and defect tracking.

Familiarity with data warehousing concepts and BI reporting tools.
Knowledge of Agile methodology and experience with tools like JIRA, Confluence, or Azure DevOps.
Strong analytical and problem-solving skills.
Preferred Skills:
Experience with cloud-based ETL solutions (AWS Glue, Azure Data Factory, Snowflake, etc.).
Knowledge of automation frameworks for ETL testing.
Exposure to big data technologies like Hadoop, Spark, or Kafka.
Educational Qualification:
Bachelor's degree in Computer Science, Information Technology, or a related field.
==================
📢 We're Hiring: QA Engineer – GenAI & Digital Solutions
📍 Location: Mangalore/ Bangalore / Hyderabad]
🏢 Company: MResult

Are you ready to be part of a team driving innovation in AI and digital solutions?
At MResult, we're on a mission to empower our clients through data-driven insights and cutting-edge technology—and we're looking for a QA Engineer to help us lead the way.

💼 What This Role Offers
In this role, you'll be a key contributor to MResult's mission, working on transformative projects that shape the future of Generative AI and digital platforms.
Every day brings exciting challenges and meaningful growth opportunities.

🧠 Key Skills for Success
✔ Bachelor's degree in Computer Science, Engineering, or related field (advanced degree preferred)
✔ 3+ years of experience in the IT domain with a focus on Quality Assurance
✔ Strong experience in Test Planning, Test Case Design, and Defect Reporting
✔ Hands-on experience with NLP and Conversational AI testing
✔ Experience with LLM-specific testing (OpenAI, GPT, RAG models)
✔ Familiarity with automation scripting:
 • Python (preferred) – for GenAI validation
 • Java – for Selenium UI testing

🌟 Nice to Have / Additional Skills
🔷 Experience with RAGAS or LangSmith for LLM response quality scoring
🔷 Performance testing using JMeter
🔷 Familiarity with observability tools and log tracing

Open Positions for the Test Engineer Role
Greetings from Tekaccel!

This is an excellent opportunity with us. If you have that unique and unlimited passion for
building world-class enterprise software products that turn into actionable intelligence, then we
have the right opportunity for you and your career.

Job Title: Test Engineer.
Location: Bengaluru
Experience: 3+ Years
Employment Type: Full-time/Permanent

Individuals in this role ensure software quality by designing and executing test plans, developing
automation frameworks, and integrating testing into CI/CD pipelines. They collaborate with
teams, resolve defects, mentor juniors, and optimize processes to deliver high-quality software
efficiently.

Key Responsibilities:
Manual Testing:
Analyze requirements and create detailed test plans and test cases.
Execute functional, integration, regression, and exploratory tests.
Identify, document, and track defects using tools like Azure, Jira ,etc
Ensure comprehensive test coverage for user interfaces, APIs, and databases.
Collaborate with stakeholders to clarify requirements and expectations.

Automation Testing:
Design, develop, and maintain scalable automation frameworks.
Create and execute automated test scripts using tools like Selenium, Cypress, or Appium.
Integrate test suites into CI/CD pipelines for continuous testing.
Optimize automation scripts for performance and reliability.
Perform API testing using tools like Postman or RestAssured.

General Responsibilities:
Analyze test results and perform root cause analysis for defects.
Ensure adherence to testing standards and best practices.
Communicate test progress, risks, and results to stakeholders.
Stay updated with the latest testing tools, trends, and techniques.

Requirements:

• Expertise with Web and mobile automation. Should be very good at Mobile automation using Appium.
•   Should be very good at creating efficient locators for Automation for both web and native.
•   Good working experience in API testing and automation.
•   Very strong language skills in either Java or Python. Should be capable of handling and solving problems involving data structures with efficient algorithms.
•   Proactive and collective in driving the team objectives and communicating with the stakeholders.
• Good to have framework design and implementation expertise.
• Experience with any test management tool (Jira or Azure DevOps).
• Experience with CI/CD tools (Jenkins or Azure pipelines).
• Good to have knowledge of working with any DB (SQL or NoSQL).
• Good working experience in agile-driven projects. Should be capable of providing viable and rightful estimates for individual and team tasks if required.
• Exposure to performance testing.
• Knowledge of BrowserStack is a plus (added advantage).

 If interested, candidates, please share your updated resume at **naveen@tekaccel.com** or WhatsApp at +91 7997763537

We are hiring!!!

PERFORMANCE TESTERS
Experience: 5-8 years
location: **#Chennai**

Job Description / Responsibilities
Design and implement performance testing strategies to evaluate the scalability, response times, and resource utilization of web, mobile, and SAP applications.
• Develop and execute performance **#testscripts** using **#JMeter** and **#LoadRunner**.
• Should be responsible for designing, implementing, and maintaining automated performance tests within a continuous integration and continuous delivery (**#CI**/CD) pipeline using **#AzureDevOps**.
• Simulate various workloads and user scenarios to identify performance bottlenecks across multiple application platforms.
• Utilize **#Dynatrace** and **#Splunk** to monitor the performance of web, mobile, and SAP applications in real-time.
• Collect and analyze performance metrics to detect trends, anomalies, and root causes of system inefficiencies.
• Create detailed performance reports with insights and recommendations tailored to each application type.
• Work closely with development, infrastructure, and **#DevOps** teams to troubleshoot and resolve performance issues in web, mobile, and SAP landscapes.
• Partner with stakeholders to define specific performance goals for each application type and ensure test environments replicate production setups.
• Communicate performance findings effectively to diverse audiences, including technical teams and business stakeholders.

• Identify and resolve performance issues in web, mobile, and SAP applications, including database and middleware interactions.
• Suggest and implement performance tuning strategies tailored to the unique requirements of each platform.
• Ensure all applications meet SLAs for performance, including response times, scalability, and user experience.
• Stay updated on performance testing methodologies, tools, and best practices for web, mobile, and SAP applications.
• Enhance existing performance testing frameworks to address the specific needs of diverse application platforms.
• Share knowledge and best practices with teams to foster continuous improvement in performance testing and monitoring processes.

Codersbrain is hiring for
AEM AUTOMATION QA
Location-Chennai(WFO)

We are seeking a detail-oriented offshore QA Engineer with 3–5 years of experience to
support quality assurance activities for our projects involving Adobe Experience Manager
(AEM) and Adobe Workfront Fusion integrations. This role will focus on validating workflows,
integrations, and web content delivery to ensure robust, high-quality solutions for our end
users.
What You'll Do
§ Develop and execute comprehensive test plans, test cases, and test
scripts for Workfront, Workfront fusion integrations, AEM applications
§ Validate tool specific solutions as well as end to end workflows, API
integrations, data flows from Workfront to AEM
§ Perform functional and non-functional, integration, regression, and
UAT support testing
§ Participate in all Scrum meetings
§ Be empowered to share thoughts, suggestions for continuous
improvement
§ Collaborate closely with offshore Delivery teams (PO, Dev leads)
§ Identify, document and track defects using Jira
§ Practice as per the Digital Ways of working to support optimal delivery
and consistent reporting
What You Bring
§ 3-5 years strong experience in automated testing (pytest) for
web applications and systems integrations
§ Familiarity with Adobe Tools – Workfront, Fusion, AEM are preferred
§ Good understanding of Integration testing principles, data validations
§ Excellent attention to detail, problem solving skills
§ Strong understanding of Agile, Scrum
§ Experience with QA tools such as TestRail, Postman, Chrome DevTools for
frontend debugging and troubleshoot
§ Any Adobe related certifications are preferred, but not necessary
§ Experience working across multiple time zones and cultures

🏠 Work Mode: Hybrid(2 or 3 Days work from office)

Key Responsibilities:
- Lead the design and implementation of robust, scalable, and maintainable test
automation frameworks
- Architect end-to-end testing strategies for web and API applications using
Selenium and Python
- Collaborate with cross-functional teams to define quality standards and
integrate automated tests into CI/CD pipelines
- Mentor SDET team members, promote automation best practices, and conduct code reviews
- Drive continuous improvement of test coverage, stability, and effectiveness
metrics
- Identify process gaps and implement automation and DevOps solutions
- Partner with Product, Development, and DevOps teams on feature requirements and technical
implementations

Mandatory Skills:
- Selenium WebDriver for web automation
- Advanced Python programming skills
- CI/CD pipeline integration (e.g., Jenkins, GitHub Actions, GitLab CI, Azure
DevOps)

Required Experience:
- 8+ years as an SDET, QA Automation Engineer, or Software Engineer in Test
- Proven track record designing and scaling enterprise-level automation
frameworks
- Expertise in REST API testing and Python frameworks such as PyTest
- Strong understanding of testing fundamentals: functional, performance,
security

Desired Qualifications:
- Experience with cloud platforms (AWS, Azure, GCP)
- Familiarity with Docker and Kubernetes
- Exposure to performance testing tools (JMeter, Gatling, k6)
- Knowledge of DevSecOps and security testing best practices

🚀 We're Hiring: Test Lead (6–9 Years Experience)
📍 Location: HSR Layout, Bangalore (On-site – 5 days a week)
🕐 Immediate Joiners Preferred

Are you a hands-on QA professional with a knack for leading teams and ensuring top-notch
product quality across web and mobile platforms?
We're looking for a Test Lead who thrives in fast-paced, high-scale environments — especially
from Gaming (real money or otherwise) or B2C product companies like Ola, Swiggy, Zomato,
Rappido, etc.

🔍 What You'll Do:

Lead and drive end-to-end testing across iOS, Android, and web apps
Define test strategy, drive execution, and manage QA deliverables
Collaborate with developers, product managers, and clients
Mentor junior testers and handle key QA metrics, defect triage, and delivery timelines

✅ What You'll Bring:

6–9 years of QA experience, with 2+ years in a lead role
Strong hands-on testing of web and mobile applications
Experience with Agile, JIRA, test planning, and cross-functional collaboration
Passion for building quality-first culture in high-scale, user-facing products

🐍 Python-Powered QA? We're Looking for You!
📣 Hiring: Senior Test Automation Engineer (Telecom Domain)
📍 Location: Pune / Bangalore | 🏠 Hybrid Work Mode
Are you a Python automation wizard from the telecom industry? Ready to take on complex
systems, lead agile squads, and build high-impact solutions? We want to hear from you!
🔥 Your Role at a Glance:
🚀 Lead a QA squad focused on end-to-end automation delivery
🐍 Build robust API test suites using Python, Robot Framework, JMeter, and Selenium
🌐 Leverage tools like Swagger/OpenAPI, Docker, Git, and cloud platforms (AWS)
📡 Apply your telecom expertise in testing network-heavy systems (Ethernet, IP, Routing)
🖊 Own the QA lifecycle – performance, load, and functional testing
👥 Mentor junior testers and champion automation best practices
💡 What You Must Have:
✔ 7+ years in QA automation
✔ Expert-level proficiency in Python for RESTful API testing
✔ Strong experience in telecom or network-based product environments
✔ Hands-on with CI/CD tools and cloud integration
✔ Tools like Jira, Bugzilla, Git, Docker – second nature
✔ Leadership experience in agile teams

✨ Bonus If You Bring:
📘 ISTQB certification
📗 Experience with BDD/TDD
🔒 Exposure to security or penetration testing
🔍 Why This Role?
 Because here, Python isn't just a skill – it's your superpower. Join a team where innovation meets execution, and telecom meets test automation at scale.
📩 Interested? Let's talk! DM me or send your resume to **naman@genesishrs.com** / 8890377950

🔍Job Title: SAP Test Automation Engineer (Worksoft Certify)
🎯Experience: 6+ Years (Minimum 5 years in Worksoft Certify)
👜Budget: Up to ₹18 LPA
📌Work Mode: Hybrid (Minimum 3 days/week Work from Office – subject to client requirements)

📢Job Description:
We are seeking a highly skilled SAP Test Automation Engineer with a strong background in
Worksoft Certify to join our dynamic team. The ideal candidate should have deep expertise in test
automation for SAP environments, excellent communication skills, and the ability to work
collaboratively in a client-facing role.

Key Responsibilities:
📍Design, develop, and execute automated test cases using Worksoft Certify.
📍Perform end-to-end testing of SAP applications including SAP ECC and/or SAP S/4HANA
environments.
📍Collaborate with cross-functional teams including developers, functional consultants, and QA
to ensure high-quality delivery.
📍Maintain and enhance existing test automation scripts as per project requirements.
📍Document test cases, test results, and defect reports using HP ALM or Micro Focus Octane.

📍 Work closely with clients to understand business processes and ensure test coverage aligns with functional needs.

Required Skills & Qualifications:
📍 Minimum 6 years of experience in test automation for SAP applications.
📍 At least 5 years of hands-on experience with Worksoft Certify automation tool.
📍 Strong understanding and working knowledge of SAP ECC and/or SAP S/4HANA.
📍 Proficiency with HP ALM or Octane for test and defect management.
📍 Excellent verbal and written communication skills.
📍 Ability to work independently and in a collaborative environment with global teams.

Mandatory Requirements:
📌 Valid PAN Card (Selfie not required).
📌 Must be open to 3 days Work from Office per week (subject to client needs).

Work Location Options:
🚀 Bangalore – UB City or Kodathi (90% priority)
🚀 Hyderabad – Sattva or Gopanapally (90% priority)
🚀 Pune – Candidates with 100% availability can be considered.

Apply Now:
If you are passionate about SAP testing and automation and meet the criteria above, we invite you to be part of our high-performing QA team.
The interested candidates can share their resumes with the subject line of Vandana - Worksoft Automation to **hr@novuminsightmanagement.com** or
Jatin@novuminsightmanagement.com
=================
🚨 Hiring Now – QA Analyst - Back end 🚨
🧠 Experience Required: 5 – 7 Years
📍 Location: Bangalore (Hybrid)
📅 Notice Period: Immediate to 30 Days

We are looking for a skilled QA Analyst - Back end with deep expertise in backend automation, testing frameworks, and performance testing. This is a highly technical QA role focused on ensuring the reliability, scalability, and quality of backend systems.

✅ Must-Have Skills:
To be considered, candidates must have proven experience with:
Backend Testing Frameworks: Hands-on with pytest, pytest-cov, pytest-mock, pytest-xdist
API Testing: Using Postman, REST clients, GraphQL testing approaches
Database Testing: Experience with test containers, in-memory databases, and strong SQL/data validation skills
Performance Testing: Experience with load testing tools (e.g., JMeter, Locust, or similar), benchmarking backend performance
Test Doubles: Proficiency with mocking, stubbing, and test isolation techniques for robust automation

Backend Technologies: Python with FastAPI (or similar backend frameworks)
Test Strategy: Knowledge of testing pyramid implementation and structured backend testing

methodologies

🌟 Nice to Have (Preferred):
Experience with BDD tools like pytest-bdd
Familiarity with CI/CD pipelines and test automation in DevOps workflows
Awareness of OWASP principles and security testing tools
Exposure to chaos engineering and resilience testing techniques
Strong understanding of asynchronous systems and message queues

==================
We are Hiring - **QA Lead**(**Senior Position**)
Location: Bangalore | Work Mode: Hybrid | Experience: 12+ Years

At Quixent Solutions, we are expanding our leadership team with a QA Lead who brings deep technical expertise and a proven track record of managing global QA teams.

This is a senior role designed for professionals who can balance hands-on coding (C/C++) with team leadership, especially within product-based companies and Foreign Exchange (FX) domains.

Key Responsibilities
· Deliver complex, high-impact applications with high quality and efficiency.
· Lead Agile ceremonies – standups, grooming, planning, retrospectives.
· Collaborate directly with international stakeholders and cross-functional teams.
· Manage a team of 20+ engineers with a 50% technical and 50% leadership focus.
· Drive QA strategy, automation, testing, risk management, and team development.

Required Skills and Qualifications
· 12+ years of total experience with 8–10 years in C, C++.
· Prior experience managing teams in product-based organizations is a must.
· 4–5 years in the Foreign Exchange (FX) domain.
· Strong understanding of Agile methodology and Scrum practices.
· Proven leadership in handling international teams and end-to-end project delivery.

Mandatory- **One of the Following Certifications**
· PSM I (Professional Scrum Master)
· OMT I / Equivalent Agile Certification
· PMP or equivalent project management certification

Preferred Backgrounds
·   QA Tech Manager
·   C/C++ Lead
·   Java Lead – from reputed product organizations

If this sounds like your next career move, we'd love to hear from you.

🚨 Urgent Hiring Alert: Test engineer Wanted! 🚨

We're hiring experienced Test Engineers for a leading service-based client! If you're ready to take on a challenging and rewarding role in a dynamic work environment, this is your moment. 💥

💼 Role: Test engineer
📍 Location: Bangalore
🎓 Education: **B.Tech/Graduate**
💼 Experience: 7 to 10 Years
🏢 Work Mode: Hybrid / Onsite
📝 Job Type: Permanent
👥 Openings: 4 Positions
💰 Client : Service Based Company
⚡ Notice Period: Immediate to 10 days Max.

🧩 Key Responsibilities:
✅Define QA strategy, approach, and execution across Software, Web, and Mobile products.
✅Act as QA Lead and collaborate with cross-functional leaders to elevate product quality.
✅Translate technical insights from stakeholders into actionable improvements.
✅Design and document QA processes, CI/CD pipelines, and improvement procedures.
✅Establish metrics to track quality and drive informed decisions.
✅Oversee test framework development—manual and automated.
✅Lead testing efforts across the full SDLC: design → deployment → maintenance.
✅Create and align automation strategies with organizational goals.
✅Collaborate with developers and QA teams to select high-impact automation test cases.
✅Influence and guide QA decisions across teams and leadership.

🔍 What We're Looking For:
✅ 5+ years in QA leadership within an agile SaaS environment
✅ Proven experience designing and implementing enterprise-scale testing solutions
✅ Strong grasp of QA methodologies, test principles, and validation techniques
✅ Hands-on experience with microservices-based API and load testing tools
✅ Experience in Big Data / ELT testing is a plus
✅ Familiarity with Jira, TestRail, or XRay
✅ Exposure to GCP or other cloud platforms

📩 How to Apply:
👉 Apply directly on LinkedIn -> **Avantika Nigam** & **Soni Singh**
👉 Send your CV to: [**avantika.nigam@digilogue.co.in**]
👉 Use the subject line: "Application for Test Engineer".
