#Urgenthiring #PadmaTechnology

Position: Automation QA Engineer (5–8 Yrs)
Onsite: Ahmedabad, Pune (Onsite)
Availability: - Immediate
Job Type - Contract
Must Skills- Selenium, Cypress, Playwright, REST Assured

Position Name: QA Automation Engineer
We are seeking a highly skilled Functional & Automation Test Engineer
to support testing initiatives across our Oracle Opera Cloud Property
Management System (PMS) and Windsurfer Central Reservation System
(CRS) platforms, along with a broad ecosystem of integrated systems.
This is a hands-on role requiring deep functional understanding and
technical proficiency in modern testing practices, including
automation frameworks. The ideal candidate will possess a strong
understanding of hospitality distribution platforms, experience with
property and central reservation systems, and the ability to translate
business requirements into platform configurations. Familiarity with
interfacing systems such as PMS, IBE, GDS, and channel managers is
essential.

Key Responsibilities:
Design, develop, and execute test plans for Oracle Opera Cloud PMS
and Windsurfer CRS, covering:

■

Unit, functional, system integration, and end-to-end testing o Validate configurations in alignment with documented hotel operations, finance, marketing, and IT requirements o Build and maintain automated test scripts using modern frameworks (e.g., Selenium, Cypress, Playwright, REST Assured) o Collaborate with cross-functional teams and vendor representatives to test integrations with:

■

Trisept, SAP Commerce, Oracle Simphony POS, Saflok Key System, inroom systems, payment gateways, and more

■

Enterprise platforms like Snowflake, SailPoint, and SAP BRIM o Perform defect triage and root cause analysis across multiple interconnected systems o Ensure full test coverage across API layers and UI components o Support performance, regression, and data validation testing where applicable o Contribute to CI/CD pipeline integration for automated test execution and reporting

Head – Quality Assurance (Line & Boom Pumps)
Location: Goa | Industry: Construction Equipment / Automotive

About the Role
We are seeking an experienced and results-driven Head of Quality
Assurance to lead our QA operations across the manufacturing and
assembly lifecycle of line and boom pumps.

Key Responsibilities
Strategic Quality Leadership
Develop and implement quality assurance strategies aligned with
business goals and compliance standards.
Lead QA functions across Quality at Source (Pune), Inward Quality
(Goa), WIP/FG/PDI, and Field Quality.
Drive continuous improvement initiatives in collaboration with
cross-functional teams (Fabrication, Machining, Hydraulics,
Electrical, etc.).
Monitoring & Control
Conduct root cause analysis (RCA) and implement corrective/preventive
actions to reduce defects.
Supervise rework analysis and implement plans to minimize recurring issues.
Collaborate with Design & Production during New Product Development
(NPD) phases to maintain quality benchmarks.
Supplier Quality Management
Ensure suppliers adhere to company and regulatory quality standards.
Establish and monitor incoming inspection criteria and lead
performance reviews for import and local parts.
Customer & Field Quality
Monitor field performance and ensure timely resolution of quality
issues (hydraulic, electrical, functional).
Lead initiatives to address customer complaints with a focus on
preventive quality measures.
Compliance & Team Development
Ensure compliance with ISO 9001 and other relevant standards.
Build, mentor, and lead high-performing QA teams across Pune and Goa,
fostering a culture of quality ownership.

Qualifications & Experience
Education: B.E./B.Tech in Mechanical, Electrical, or Production Engineering.
Experience: Minimum 15 years in Quality Assurance, with at least 5
years in a leadership role within the construction equipment or
automotive industry.
Certifications (preferred):

Certified Manager of Quality/Organizational Excellence (CMQ/OE)
Certified Quality Engineer (CQE)
Skills & Competencies
Strong leadership & cross-functional team collaboration
Lean Manufacturing & Six Sigma methodologies
PLM tools and ERP systems
FMEA and Computer-Aided Quality (CAQ) tools
High attention to detail and a mindset for continuous improvement
Work Environment
Office-based with regular visits to factory and field sites.
Travel required as per business needs.
Performance Metrics
Reduction in rework and defect rates (line & boom pumps)
Adherence to quality KPIs across all stages: Source, Inward, WIP/FG,
PDI, and Field
Improved customer satisfaction and faster complaint resolution cycles
 Interested?
 Join us in shaping high-performance, reliable products that define
excellence in the construction equipment industry.

 Job Title: Manual Tester – Telecom BSS | E2E Testing | SQL
 Location: Pune
  Employment Type: Full-time/Contract

Experience Level: 3–6 years

About the Role

We are seeking a detail-oriented and experienced Manual Tester with a strong background in Telecom BSS (Business Support Systems) and End-to-End Testing. You will play a critical role in ensuring the quality and performance of our telecom solutions by designing, executing, and maintaining comprehensive test plans. Strong SQL knowledge is essential for validating backend processes and database validations.

Key Responsibilities

Design and execute manual test cases based on business and technical requirements.

Perform End-to-End (E2E) Testing across multiple systems within the telecom BSS stack (e.g., Billing, CRM, Order Management).

Collaborate closely with business analysts, developers, and product managers to understand requirements and ensure test coverage.

Participate in test planning, effort estimation, and status reporting.

Perform data validation using SQL queries on relational databases (e.g., Oracle, MySQL, PostgreSQL).

Log, track, and manage defects using tools like JIRA or Bugzilla.

Support User Acceptance Testing (UAT) and production deployment validations.

Identify test improvement opportunities and contribute to overall QA process enhancement.

Required Skills & Experience

3–6 years of hands-on experience in manual testing with a focus on telecom BSS domains (Billing, CRM, Mediation, Provisioning).

Proven experience in E2E testing involving integration across multiple telecom systems.

Strong working knowledge of SQL – ability to write complex queries for backend testing and data validation.

Good understanding of SDLC, STLC, and defect lifecycle.

Experience working in Agile/Scrum environments.

Excellent analytical and problem-solving skills.

Strong communication skills – both written and verbal.

Preferred Qualifications

Experience with telecom BSS platforms like Amdocs, Ericsson, Netcracker, or similar.

Exposure to APIs and ability to perform basic validation via tools like Postman or SoapUI.

Familiarity with test management tools such as TestRail, HP ALM, Zephyr, etc.

Basic understanding of automation testing tools is a plus (though not mandatory).

Interested Candidate who can attend F2F on Weekday please drop your CV on puspendra@exlneo.com or Call 9582620986

Design, develop, and maintain automated workflows using Power Automate
(Desktop & Cloud).
Collaborate with business users to understand automation requirements
and convert them into reliable automation flows.
Write and maintain C# test automation scripts, preferably using tools
like Playwright / NUnit .
Conduct end-to-end testing of automated processes to validate data
flow and business logic.
Perform integration testing between Power Automate flows and external
systems like Outlook, Power BI, SQL Server, REST APIs, etc.
Debug and troubleshoot automation issues and provide quick resolutions.
Document test cases, test results, and automation logic thoroughly.
Participate in Agile ceremonies and contribute to sprint planning and delivery.

Required Skills:
3+ years of hands-on experience in Microsoft Power Automate (RPA + Cloud Flows).
1+ years of experience with C# and .NET-based automation testing.
Strong understanding of test automation frameworks (e.g., NUnit).
Experience with Playwright / REST API testing in C#.
Proficient in writing SQL queries and validating data in SQL Server.
Familiarity with CI/CD pipelines, version control (Git), and Azure DevOps.
Experience with Power Platform components (PowerApps, Power BI) is a plus.
Good communication and analytical skills.

Nice to Have:
Microsoft certifications in Power Platform or Automation.
Experience integrating Power Automate with ERP/CRM systems.
Familiarity with Test Management Tools like Azure Test Plans, JIRA,
TestRail, etc.
Performance and load testing experience.

Education:
Bachelor's or Master's degree in Computer Science, Information
Technology, or a related field

Job Description – QA Automation Engineer, FDO

Location: Mumbai (hybrid need local candidates)

Experience: 8+ experience candidate needed

The QA Automation Engineering position is responsible for providing QA
automation capability across the Data Quality Governance and
Cataloging Fleet. This includes implementing a comprehensive, robust
automated testing strategy across the suite of tools that we provide
to the firm and integrations to other systems. The role will require
implementing the testing strategy through all squads across the fleet
in order to ensure that the quality of our products are increased and
maintained.

Job Responsibilities:

Implement QA automated testing strategy for the fleet to ensure
successful and high-quality product deliverables.
Implements strategies and techniques covering both functional (e.g.
Unit, Integration, System, Acceptance) and non-functional (e.g.
Performance/Load, Usability, Security) software testing
Define and implement KPIs (e.g. test automation coverage) to measure
success of the strategy.
Identify areas for improvements with test automation approach.

Stay current with test automation approaches and tooling.
Mentor and coach junior QA Automation Engineers.
Communicate with technical and non-technical audiences.

QUALIFICATIONS

Skills Required: Must Have

Bachelor's degree in Computer Science, Software Engineering or related field
8+ years of relevant professional experience in Software Testing and
Quality management, including hands on execution, automation as well
as reporting
Proven knowledge and experience of SDLC process and Agile
Methodologies and various types of both functional (e.g. Unit,
Integration, System, Acceptance) and non-functional (e.g.
Performance/Load, Usability, Security) software testing
Experience with TDD, BDD methodologies and frameworks
Experience with CI/CD (Continuous Integration/Continuous Delivery)
pipeline models and associated tools (e.g. Jenkins, Gitlab), Agile
project management and DevOps practices.
Thorough understanding of end to end testing processes
Experience in Test Automation (test and scripting tools) e.g. Selenium
/ Appium / Python / JMeter / Xunit / NUnit etc.
Able to demonstrate an understanding of the test phase life cycle, the
principles of testing including Test and Defect Management.
Strong problem-solving skills, business acumen, and demonstrated
excellent oral and written communication skills with both technical
and non-technical audiences

Skills Desired: Good to have

Knowledge of Data Governance
Experience in any Data Governance Tool like Collibra etc.
