Network18 Media & Investments Limited is Hiring!

Role: Backend Automation SDET
📍 Location: Noida
💼 Experience: 5–7 Years

We are seeking a skilled and detail-oriented Backend Automation SDET to join our QA team. The ideal candidate will have hands-on experience in automating API/Microservices testing, strong programming skills, and a deep understanding of backend systems.

Key Responsibilities:
✔️ Design, develop, and maintain automated test scripts using tools like Rest Assured and Postman
✔️ Collaborate with cross-functional teams to define and execute test strategies
✔️ Integrate automated tests into CI/CD pipelines
✔️ Configure and manage test environments including Load/Performance Testing
✔️ Identify, report, and track bugs using tools such as JIRA
✔️ Document test cases and generate detailed test reports

Key Skills:
🔷 5–7 years of experience in QA or development with a focus on backend testing
🔷 Proficiency in Java/JavaScript, SQL/PostgreSQL
🔷 Experience with tools like Rest Assured, Postman, JMeter/Gatling
🔷 Strong understanding of JSON, API schema, and version control (Git)
🔷 Excellent analytical, communication, and problem-solving skills

📩 If you're passionate about quality engineering and backend automation, we'd love to hear from you. Apply now or refer a suitable candidate.

🕐 Employment Type: Full-time

🔧 What You'll Do:
✅ Design, develop, and maintain robust test automation frameworks using
JavaScript/Typescript and Playwright
✅ Collaborate with developers, product owners, and QA team to identify test scenarios and
ensure high product quality
✅ Integrate tests into CI/CD pipelines for fast feedback
Debug, triage, and log defects with clear documentation
✅ Advocate for testability, maintainability, and best QA practices

📝 What We're Looking For:
✅ 3–5 years of hands-on experience in automation testing using JavaScript and Playwright
✅ Strong understanding of software QA methodologies and agile processes
✅ Experience with API testing and tools like Postman
✅ Knowledge of Git, Jira, and continuous integration workflows
✅ Excellent problem-solving skills and attention to detail

🚀 Hiring: Salesforce Business Analyst
📍 Location: Greater Noida or Hyderabad
🧠 Experience: 8+ Years
Job Description:
We are looking for a skilled Salesforce Business Analyst with strong experience in customer service operations and Salesforce Service Cloud implementations.
Key Responsibilities:
Gather, document, and analyze business requirements from servicing teams (e.g., customer support, case management, call center).
Prepare High-Level Design (HLD) and System Design Documents (SDD) to translate business needs into functional and technical specifications.
Collaborate with developers, QA, and stakeholders to design and implement scalable Salesforce service solutions.
Conduct gap analyses and propose process improvements using Salesforce tools and automation (e.g., flows, macros, knowledge base).
Develop and maintain dashboards, reports, and performance metrics for service teams.
Act as a liaison between end users and technical teams throughout the development lifecycle.
Support UAT, training, and deployment of new features and updates.
Maintain data quality standards and ensure compliance with security and privacy requirements.
Preferred Skills:
Hands-on experience with Salesforce Service Cloud
Strong understanding of ITIL processes, ticketing tools (e.g., JIRA, ServiceNow), and DevOps tools (e.g., Maven, Jenkins, Azure CI/CD)
Familiarity with cloud architectures, JMS messaging, and platforms like ActiveMQ
Strong analytical and problem-solving skills
✉️ Interested candidates can share their profiles at:
Laxman.Boga@coforge.com
📅 Immediate joiners preferred!

L&T Technology Services

📣 We're Hiring: **#Mobile_Application_Tester**(Manual/Automation)
📍 Location: [Noida]
🕐 Experience: [5-7+ yrs]
💼 Employment Type: [Full-time]

Are you passionate about delivering bug-free, high-performance mobile applications? We're
looking for a Mobile Tester to join our QA team and help us ensure an exceptional user
experience across Android and iOS platforms.

💡 **#Key_Responsibilities**:

👉 Conduct manual and/or automated testing for mobile applications
👉 Create, maintain, and execute test cases and test plans
👉 Identify bugs, document them clearly, and track their resolution
👉 Collaborate with developers and product teams to resolve issues
👉 Ensure app compatibility across various devices and OS versions

✅ **#Required_Skills**:
✨ Strong understanding of mobile testing concepts and SDLC/STLC
✨ Experience with mobile testing tools (e.g., Appium, Espresso, XCUITest)
✨ Hands-on experience in manual testing (UI/Functional/Regression)
✨ Knowledge of bug tracking tools like JIRA, Bugzilla, etc.
✨ Familiarity with Android Studio and Xcode for basic testing/debugging
✨ Basic understanding of API testing using Postman or similar tools
✨ Excellent analytical, communication, and problem-solving skills

⭐ **#Good_to_Have**:
👍 Automation scripting experience in Java, Python, or similar languages
👍 Experience with CI/CD pipelines and testing in Agile environments
👍 Knowledge of performance testing tools (e.g., Firebase, Charles Proxy)
