=================
🧠 We're Hiring SDET-2 @**Jupiter** | Build Automation. Drive Quality.

We're looking for engineers who can code, break, and rebuild — because testing is not a checkbox, it's engineering at its core. If you've built automation frameworks from the ground up, speak code fluently, and obsess over quality at scale, Jupiter is where your craft belongs.

📍 Location: Bangalore
🧠 Role: SDET-2
💼 Experience: 3-6 years

What makes you a fit:
1) 3–6 years building test automation in backend-heavy systems
2) Solid coding chops (Python preferred, but we speak all dialects of clean code)
3) Bonus: You've tested mobile, mentored juniors, or broken production (once... and learned from it)

🔗 Apply here→

"💼 AlgoShack is Hiring: Desktop Automation Engineers"

Are you a skilled automation expert with a passion for delivering quality solutions?
AlgoShack is looking for talented Desktop Automation Engineers
At AlgoShack, we're redefining automation with innovative solutions, offering flexibility,
growth opportunities, and a collaborative work culture.

Key Responsibilities:
✔️Develop, maintain, and execute automation scripts for desktop applications using C#.
✔️Implement and optimize test automation frameworks (e.g., FlaUI, WinAppDriver, White
Framework, or others).
✔️Collaborate with cross-functional teams to understand requirements, create test plans,
and deliver high-quality automation solutions.
✔️Write custom logic and reusable components to handle unique automation scenarios.
✔️Debug, analyze, and troubleshoot automation scripts to ensure reliability and efficiency.
✔️Provide detailed documentation for automation frameworks, test cases, and execution
results.
✔️Ensure robust test coverage, identify gaps, and propose solutions for continuous
improvement.

Required Skills and Qualifications:
🌟2-12 years of relevant experience in automation testing.
🌟Proficiency in C# for automation development.
🌟Expertise in desktop automation frameworks such as FlaUI, WinAppDriver, White
Framework, Coded UI, TestComplete, UFT, or LeanFT.
🌟Hands-on experience with SpecFlow for behavior-driven development (BDD).
🌟Strong debugging and problem-solving skills.
🌟Ability to design and implement custom logic for complex automation scenarios.

Preferred Attributes:
💡Passion for automation and testing best practices.
💡Effective communication and collaboration skills.
💡Detail-oriented and committed to delivering quality results.

📍 Location: Yelahanka, Bangalore
⏳ Experience Required: 2-12Years
💼 Role: Desktop Automation Engineer
📢 Availability: Immediate

UnicoTalent is hiring for a Bangalore-based organisation. Details are mentioned below :
 Experience: 5+ Years in ETL Testing
 Location: Remote
 Budget: Up to 15 LPA
Job Description
We are seeking a highly skilled ETL QA Automation Engineer with a strong background in ETL
testing, SQL, Unix/Shell scripting, and test automation. The ideal candidate will work closely
with the development and data teams to ensure high-quality data validation,
transformation, and load processes across various systems.
Key Responsibilities:
Design, develop, and execute ETL test cases, test scripts, and test plans based on business
and technical requirements.
Perform data validation and verification across source, staging, and target databases.
Use SQL extensively for data profiling, test data preparation, and result validation.
Create and maintain automated test frameworks and scripts using industry-standard tools.
Perform root cause analysis and report defects with proper documentation.
Work on Unix/Linux shell scripting for test automation and batch job validation.
Collaborate with developers, business analysts, and data engineers to identify gaps and
improve testing strategies.
Ensure timely and quality delivery in Agile/Scrum environment.
Required Skills:
ETL Testing: 5+ years of hands-on experience with data warehousing and ETL processes.
SQL: 3+ years of strong proficiency in writing complex queries for data validation and
analysis.
Unix/Shell Scripting: 2+ years of experience working with Linux/Unix environments.
Automation Testing: 2+ years of experience with automation tools like Selenium, Python,
Pytest, JUnit, or custom frameworks for ETL/data testing.
Understanding of data pipelines, data migration, and data transformation logic.
Familiarity with CI/CD tools like Jenkins is a plus.
Good to Have:
Knowledge of cloud platforms (AWS, GCP, Azure) and tools like Apache Airflow, Informatica,
or Talent.
Exposure to Big Data platforms (Hadoop, Spark).
Experience with reporting tools or BI dashboards (Tableau, Power BI) for data validation.

Role: Salesforce QA
Experience: 6+ yrs.
Location: Hybrid (Bangalore)
Mode: Contract
Job Description
We are seeking a detail-oriented and experienced Salesforce QA Tester to join our team.
The ideal candidate will have hands-on experience in manual testing, API testing, SQL, and
Salesforce platform testing. You will be responsible for ensuring the quality and reliability of
Salesforce applications and integrations through rigorous testing processes.
Key Responsibilities:
Design, develop, and execute manual test cases for Salesforce applications.
Perform API testing using tools like Postman or SoapUI.
Write and execute SQL queries to validate data integrity and backend processes.
Conduct end-to-end testing of Salesforce features, workflows, and customizations.
Collaborate with developers, business analysts, and stakeholders to understand
requirements and ensure test coverage.
Identify, document, and track bugs and issues using tools like JIRA.
Participate in regression, smoke, and UAT testing cycles.
Ensure compliance with QA standards and best practices.
Required Skills & Qualifications:
Bachelor's degree in Computer Science, Information Technology, or related field.
5+ years of experience in Salesforce testing.
6+ Years of experience in Manual Testing.
Strong experience in API testing and tools like Postman or similar.
Proficiency in SQL for data validation and backend testing.
Hands-on experience with Salesforce testing (Salesforce Classic and Lightning).
Familiarity with Agile/Scrum methodologies.
Excellent analytical and problem-solving skills.
Strong communication and documentation abilities.
Preferred Qualifications:
Salesforce certifications (e.g., Salesforce Administrator, Platform App Builder).
Experience with automation tools (e.g., Selenium, TestNG) is a plus.
Knowledge of CI/CD pipelines and version control systems like Git.
Interested Candidates Share your resume

🌟Join Our Team as an SDET-Full stack in Bangalore! 🌟

Hey folks!👋

We're on the hunt for a passionate SDET-Full stack to join our awesome team in Bangalore!

If you thrive in an Agile environment and have a knack for automation, we want to hear from you!

What We're Looking For:

Experience: You've got a solid background in Automation Testing and are well-versed in WebdriverIO.

Tech Skills: Proficient in JavaScript/TypeScript and have hands-on experience with Mobile Automation using Appium.

Testing Expertise: Strong skills in Manual Testing and a deep understanding of testing principles.

Coding Savvy: Comfortable writing test scripts and continuously improving our automation processes.

Adaptability: You thrive in an Agile environment and can pivot quickly as project needs evolve.

📍Location: Bangalore (Local candidates preferred – or at least you should be in Bangalore already!)

What You'll Do:

Create and maintain automated test scripts using WebdriverIO.

Collaborate closely with our development team to ensure top-notch quality in our products.

Engage in both manual and automated testing for web and mobile applications.

Keep pushing the boundaries of automation and testing practices!

Why You'll Love It Here:

Work with a vibrant team that values creativity and innovation.

Opportunities for growth and skill development in a supportive environment.

Competitive salary and benefits that recognize your hard work.

If you're based in Bangalore, have a passion for testing and coding, and are ready to take on new challenges, let's connect!

✉️ DM me or drop your resume at **anupamavs@testvagrant.com**

Let's build something great together! 💻✨

We're Hiring: Finacle Test Engineer – RLOS (Retail Loans)/ Treasury/ Trade Finance

📍 Location: Mumbai / Chennai |
💼 Experience: 2+ years |
📅 Notice Period: Immediate to 30 days
💼 Employment Type: Full-Time

About AQM Technologies:
 AQM Technologies is a trusted software testing consultancy specializing in the BFSI sector. We help financial institutions deliver high-quality, compliant, and reliable digital banking solutions.

🔍 Role Overview:

We're looking for a Finacle Test Engineer with strong hands-on experience in RLOS (Retail Loans), Treasury, or Trade Finance modules. You'll be involved in end-to-end functional testing of core banking applications built on the Finacle platform, collaborating closely with development and business teams.

🛠 Key Responsibilities:
Perform functional, regression, and integration testing on Finacle modules.
Design and execute detailed test cases; log and track defects.
Participate in UAT, environment migrations, patch validations, and upgrades.
Coordinate with cross-functional teams across Agile/Scrum environments.

✅ Skills & Experience Required:
3+ years of QA/testing experience in the banking domain (Finacle – RLOS / Treasury / Trade Finance).
Working knowledge of additional Finacle modules: Core, CRM, CASA, Loans, Payments.
Proficient in manual testing and defect management tools (JIRA / HP ALM / Bugzilla).
Familiarity with Agile methodologies.
Excellent communication and coordination skills.

Education: B.E./**B.Tech/MCA/M.Sc.(IT**) or **B.Sc**.(IT)/BCA with 2+ years of QA experience.

Certification: ISTQB (Foundation/Advanced) preferred.

🌟 Why Join Us?
Work with a team of domain experts in BFSI software testing.
Exposure to cutting-edge banking systems and large-scale implementation projects.
Opportunities for skill development and professional growth.

📩 Interested candidates can share their resume at:
📧 **khushee.dubey@aqmtechnologies.com**

=================
📢 We're Hiring: Test Engineer (RU) – System Test Lead
📍 Location: Chennai (Hybrid)
📅 Contract Duration: 6 Months
💼 Experience: 3 to 5 Years
🎓 Qualification: BE/**B.Tech/M.E/M.Tech** or equivalent
🔍 About the Role
We're seeking a Test Engineer (RU) with strong hands-on experience in system and
interoperability testing for Radio Units (RU). You will be an integral part of the testing team,
responsible for ensuring robust performance and conformance of wireless systems,
supporting product improvement, and validating performance at the system level.
🎯 Key Responsibilities
Create and maintain test plans and test environments
Perform Interoperability Testing (IOT) and RU-specific performance testing
Analyze test failures and provide actionable feedback for design improvements

Collaborate closely with Test Managers and other engineering teams
Prepare, calibrate, and maintain RF and test equipment setups
📡 Domain Skills
✅ Must-Have:
Basic understanding of wireless standards/protocols and air interface concepts
Exposure to NodeB-UE functional testing, E2E integration, and working with UEs and core
network
Familiarity with 3GPP and O-RAN standards for radio parameters
Experience handling test equipment such as Spectrum Analyser, VSA/VSG, UE
Strong test setup and calibration capabilities
Excellent communication skills and a proactive learning attitude
🌟 Good to Have:
Experience with RF equipment like Network Analyser (NA), ORAN Studio, Channel Emulator
Knowledge of RF System Conformance Testing and antenna measurements
RF Integration and Performance Validation experience
Automation of test equipment and environments (VSA, VSG, NA, UE, etc.)
Ability to debug field logs and reproduce issues in the lab
🤝 Why Join Us?
Be a part of a collaborative and cutting-edge environment, where you will contribute to
advanced wireless communication testing and help shape next-generation telecom
infrastructure.
📩 Apply Now
 If you're passionate about wireless systems testing and want to make an impact, share your
resume at [keerthanah.sekar@vriba.com].

Hiring for RPA Developer!!!

**Sreenath Reddy Aishwariya Sharnika Subashini G Visalakshi Muthuvairavan Prem Kumar
Niyash k**

Job Title: RPA Developer – Automation Anywhere
Location: Chennai
Experience Required: 4 to 6 Years of experience
Notice Period: Immediate - 30 days
Work Mode: WFO
Interview Mode: F2F is Must

Job Description:
We are looking for a highly motivated and experienced RPA Developer with strong expertise
in Automation Anywhere to join our Digital Automation team. The ideal candidate will be
responsible for designing, developing, and deploying robotic process automation solutions
to enhance operational efficiency and reduce manual efforts. This role requires hands-on

development experience and a solid understanding of RPA lifecycle and best practices.

Key Responsibilities:
Design, develop, test, and deploy automation solutions using Automation Anywhere (v11 or A360).
Build and maintain reusable bots and RPA components.
Collaborate with business and IT teams to understand automation requirements.
Develop and configure automation workflows with effective exception handling and logging.
Perform unit testing and support UAT and production deployments.
Monitor bots in production and resolve issues proactively.
Ensure compliance with RPA development standards and security protocols.
Document technical designs, process flows, and user manuals.

Required Skills:
4–6 years of overall IT experience, with at least 3 years hands-on in Automation Anywhere.
Strong knowledge of RPA lifecycle, bot development, and bot management using Control Room.
Proficiency in task bots, meta bots, error handling, and logging mechanisms.
Working knowledge of SQL, Excel automation, REST/SOAP APIs, and scripting languages (e.g., Python, JavaScript – nice to have).
Good understanding of process optimization and automation best practices.

To Apply: Please send your Updated profile to **mageswari.r@kiya.ai**
