Hiring Alert | SAP Tester (FI/CO) | Pune / Chennai

We are hiring experienced SAP Testers with strong expertise in SAP Finance testing, greenfield implementations, and upgrade testing.

Location: Pune / Chennai (Preferred)

Work Timing: 12 PM – 9 PM IST

Experience: 5–8 Years

Work Mode: Hybrid / Work From Office

Notice Period: Immediate to 30 Days Preferred

Role: SAP Tester – Mid Level (Greenfield, Finance & Upgrade Testing)

Role Summary:

We are looking for a skilled SAP Tester with hands-on experience in SAP Greenfield Implementations, SAP Upgrade Testing, and SAP FI/CO functional validation. The ideal candidate should have strong end-to-end testing expertise and the ability to collaborate effectively with business and technical teams to ensure successful project delivery and business readiness.

Key Responsibilities:

- ✓ Participate in SAP Greenfield implementations from blueprint to go-live
- ✓ Design and execute SIT, E2E, Regression, and UAT testing activities
- ✓ Validate SAP Finance (FI/CO) business processes including GL, AP, AR, AA, and CO
- ✓ Perform SAP ECC / S/4HANA upgrade testing and regression validation
- ✓ Support data migration testing and reconciliation activities
- ✓ Validate interfaces, custom developments, reports, and integrations
- ✓ Track and manage defects using SAP Solution Manager, HP ALM, Jira, or Azure DevOps
- ✓ Collaborate with Finance users, SAP consultants, and project stakeholders
- ✓ Support cutover, mock runs, and hypercare activities

Required Skills:

- ✓ 5–8 years of hands-on SAP functional testing experience
- ✓ Strong experience in SAP Greenfield implementation projects
- ✓ Expertise in SAP FI/CO testing and finance business process validation
- ✓ Experience in SAP upgrade and regression testing
- ✓ Strong understanding of SIT, UAT, E2E, and Regression testing lifecycle
- ✓ Hands-on experience with test management and defect tracking tools
- ✓ Excellent communication, coordination, and documentation skills

Good to Have:

- ★ Exposure to SAP S/4HANA projects
- ★ Experience with SAP automation tools like Tricentis Tosca, Worksoft, or CBTA
- ★ Knowledge of SAP Activate, Agile, or hybrid delivery models
- ★ Understanding of MM, SD, or other SAP module integrations

Educational Qualification:

- 🎓 Bachelor's degree in Computer Science, IT, Engineering, or related field

If interested or if you know suitable candidates, please share updated resumes.

Are you expert in **#Cybersecurity**, It's time to explore your skills in Mahindra.
Mahindra & Mahindra is hiring Lead Engineer **#Cybersecurity** for Chennai location.
Interested candidates share your profile s.nandhini2@mahindra.com

Job description:

Experience: 9-13 years

Location: Chennai

- Lead end-to-end **#cybersecurity** engineering for safety-critical powertrain ECUs (Engine ECU, VCU, MCU, BMS, HCU, ODCD) across ICE, Hybrid, and Electric platforms.
- Act as **#CybersecurityTechnicalOwner** for assigned powertrain programs, accountable for design robustness, compliance, and SOP readiness.
- Define, review, and approve secure ECU architectures, including secure boot, secure flashing, secure communication, OTA/FOTA security, HSM integration, and key lifecycle management.
- Perform and lead **#ThreatAnalysisandRiskAssessment (#TARA)** in compliance with **#ISOSAE21434**, ensuring traceability to cybersecurity goals and mitigations.
- Translate cybersecurity threats into clear system and software security requirements aligned with vehicle and powertrain performance goals.
- Ensure cross-functional execution by coordinating cybersecurity activities with system, software, hardware, validation, vehicle integration, and supplier teams.
- Lead cybersecurity design and compliance reviews with internal stakeholders, vehicle

programs, and Tier-1 suppliers.

- Oversee vulnerability management, incident response, and post-SOP cybersecurity monitoring for powertrain ECUs.
- Define and execute penetration testing, fuzz testing, and robustness validation to close vulnerabilities during development and validation phases.
- ISO/SAE 21434-compliant cybersecurity lifecycle execution for powertrain ECUs.
- UNECE R155 / R156 (AIS 189 / AIS 190) evidence readiness supporting vehicle type approval.
- Cyber-secure ECU architectures protecting torque, propulsion, charging, and energy management functions.
- Demonstrated alignment between cybersecurity and functional safety (ISO 26262) without system trade-offs.
- Zero critical cybersecurity non-conformities at SOP and regulatory audits.

Job Title: Senior Automation Tester

Location: Only Bangalore

Notice Period: Only Immediate Joiners

Experience: 7+ years in QA, 4+ years in Selenium BDD Framework

Role Overview:

We are seeking a Senior Automation Tester to join a small Agile/Scrum to plan, develop, and execute end-to-end testing activities for complex web applications and services. The role involves close collaboration with Test Managers, Product Managers, Business Analysts, and Developers to ensure high-quality deliverables.

Key Responsibilities:

Develop, execute, and maintain automated and manual test scripts for Web Applications, Web Services, and REST APIs.

Design and implement test strategies, plans, test conditions, scripts, data, and expected results for Product, Integration, Technical, and Deployment testing.

Participate in Agile ceremonies and work collaboratively within the feature team.

Identify, report, and manage defects, and support risk-based testing approaches.

Recommend and implement process improvements to optimize test delivery and quality.

Communicate effectively with management, peers, and stakeholders regarding risks, progress, and quality metrics.

Ensure adherence to standard QA tools, frameworks, and Shell's quality delivery practices.

Mandatory Skills:

Strong proficiency in Python and Selenium, with 4+ years experience in BDD frameworks (SpecFlow / Python Behave).

Experience in QA Automation for Web Applications, Web Services, and REST APIs.

Solid understanding of SDLC, manual testing, and test case design & execution.

Hands-on experience with automation & quality engineering tools and methods.

Strong analytical, organizational, and communication skills.

Key Responsibilities

Design, develop, and maintain automated test frameworks and test scripts.

Perform API testing using TypeScript-based automation frameworks.

Develop and execute functional, regression, integration, and end-to-end test cases.

Work with Selenium WebDriver for UI automation.

Implement BDD/TDD practices using SpecFlow.

Collaborate with developers, business analysts, and QA teams to identify test scenarios.

Analyze test results, log defects, and track issue resolution.

Participate in CI/CD and automation strategy discussions.

Ensure software quality standards and best testing practices are followed.

Required Skills:

4–7 years of experience in QA Automation Testing.

Strong hands-on experience with:

TypeScript

Selenium WebDriver

SpecFlow

C#

API Automation Testing

Experience with automation frameworks and testing methodologies.

Good understanding of REST APIs and API validation techniques.

Familiarity with Agile/Scrum methodologies.

Strong debugging and analytical skills.

Good to Have:

Experience with CI/CD tools such as Jenkins, Azure DevOps, or GitHub Actions.

Exposure to performance or security testing.

Knowledge of SQL and database testing.

Preferred Candidate Profile

Strong communication and collaboration skills.

Ability to work independently in a fast-paced environment.

Immediate joiners or candidates with short notice periods will be given preference.

Interested?

 Locations: Bangalore | Pune | Mumbai

 Work Mode: Hybrid

 Experience: 5 to 10 Years

Key Skills Required:

- Functional, Regression & System Testing
- UI Automation using Playwright or Cypress (mandatory)
- API Testing (REST APIs / Postman)
- Agile / Scrum experience
- CI/CD exposure (Jenkins or similar)
- JIRA & defect tracking tools
- Basic knowledge of JavaScript / TypeScript preferred

What we are looking for:

Strong QA professionals who can design, develop, and execute both manual and automation test cases for web applications, ensuring high-quality and reliable software delivery.

If interested, please share your profile or reach out at gaurav.singh@mnr solutions.in

=====

TITLE: QA Automation Test Engineer QA role with C# Automation

5 – 8 Years of experience in Automation and Manual Testing

Tier1/2/Product based only

WORKING LOCATION: Bangalore

Responsibilities

Translate test cases to automation script using C# for GUI / API tests

Adhere to coding standard and guidelines defined for automation

Perform manual testing of web-based applications, web services in a client–server environment.

Should be proactive in working for both manual and automation testing.

Should have good understanding of web-based architecture and should manage to debug any web or server error.

Understanding of functional, Database, Sanity, Functional, End-to-End integration and Regression testing independently adhering to SCRUM guidelines.

Review code and fix any issue identified in scheduled automation runs.

Perform root cause analysis of script failures/logged Bugs.
Submit and track automation identified defects.
Identify automatable test cases in existing test suite and help in planning for automation.
Test data setup & Test execution of the automated Test cases
Provide effective communication to QA Manager/Lead regarding issues, objectives, initiatives and performance to plan
Contribute to delivery in accordance with project scope/delivery dates.
Adhere to the test strategies and test plans to ensure that product delivered is of high quality.
Work collaboratively with all stakeholders like Development, QA, Project Manager, BA and onsite teams for successful test coverage and quality.
Escalate and follow-up in a timely manner about all blocking issues and issue deviation from SOP's etc.
Very good knowledge in SDLC and STLC process.
Technical knowledge:
Solid knowledge in automation testing.
Good experience in C#
Experience in testing web services, Rest REST APIs.
Hand-on experience in Services testing tools like Fiddler, SOAP UI, POSTMAN.
Strong understanding of SQA methodologies
Good knowledge in Database & SQL. Ability to create & mine data using SQL queries
Experience in any automation tools like Selenium, Protractor, Playwright etc.
Exposure to create Automation framework like Modular, BDD, POM etc.
Knowledge and experience in TFS/MTM.
Understanding of Agile/Scrum methodology and working experience in agile environment.
Experience in Test data setup across multiple modules & ability to understand the data dependencies
Should have good knowledge of Defect Management process.
Knowledge in testing web services is desirable.

 Hiring: QA Lead / QA Manager

 Location: Bangalore

 Experience Required: 7–10 years

We are looking for an experienced QA Lead to join our team and drive end-to-end Quality Assurance for high-performing software products. This role is ideal for someone who has deep QA expertise, strong leadership abilities, and hands-on experience with both manual and automation testing frameworks.

Key Responsibilities

✓ Lead, mentor, and manage a team of QA Engineers while providing continuous guidance, support, and training.

✓ Develop and implement comprehensive test plans and test strategies aligned with project requirements and technical specifications.

✓ Create, maintain, and review test cases, test scenarios, and test data ensuring complete test coverage.

✓ Collaborate with cross-functional teams — Project Managers, Developers, and Business Teams — to prioritize testing activities and timelines.

- ✓ Perform manual testing, analyze test results, and track defects through the entire SDLC.
- ✓ Conduct detailed root cause analysis, ensuring timely defect resolution in coordination with development teams.
- ✓ Drive continuous improvement by evaluating and enhancing QA processes, methodologies, and best practices.
- ✓ Stay updated with the latest QA trends, tools, frameworks, and technologies.
- ✓ Communicate test progress, defect reports, and overall QA status to project stakeholders.
- ✓ Ensure alignment across teams on quality standards, expectations, and objectives.

Required Skills & Expertise

- ✓ 7–10 years of strong experience in Software Quality Assurance, including Manual Testing & Functional Design for Web, Client/Server, and Mobile Applications.
- ✓ Solid working experience in Agile Methodology – SCRUM.
- ✓ Expertise in Functional Testing, Smoke Testing, Sanity Testing, and Cross-Browser Testing.
- ✓ Hands-on experience with:
 - POM (Page Object Model)
 - TestNG
 - Data-Driven Frameworks
 - Git
 - Jenkins
- ✓ Ability to implement RestAssured for API automation.
- ✓ Experience preparing and executing detailed test cases, collecting test data, and reporting test results.
- ✓ Strong programming knowledge in Java, Python, or JavaScript.
- ✓ Bachelor's degree in Computer Science, Engineering, or a related field.
- ✓ Excellent analytical thinking, problem-solving skills, and attention to detail.
- ✓ Strong communication and interpersonal skills with the ability to collaborate across

teams.
