Job Description – Software Tester (Power Systems / Grid Modelling)

Location: Bengaluru

Notice period: 0-15 days

Role Overview

We are hiring an experienced Software Tester to validate and ensure the quality, accuracy, and reliability of a cloud-based grid modelling and power system analysis platform. The role involves testing analytical workflows related to grid connectivity, network constraints, curtailment analysis, and electrical simulations.

The candidate will work closely with developers, power system engineers, and product teams to validate both functional performance and engineering correctness of the application.

Experience

8–10 Years

Mandatory Skills

Strong experience in Software Testing and Test Automation

Knowledge of Electrical Power Systems and Grid Integration concepts

Understanding of:

Load Flow Analysis

Network Constraints

Curtailment & Congestion Risks

Grid Interconnection Processes

Experience with power system tools like PowerFactory, PSS/E, PSCAD, ETAP, DigSILENT, or MATLAB

Automation testing using Selenium, PyTest, Playwright, or Cypress

API Testing and Microservices validation

Experience with CI/CD pipelines and Git

AWS cloud platform testing exposure

Experience validating simulation or mathematical software

Responsibilities

Design and execute test plans, test cases, and automation scripts

Perform Functional, Regression, Integration, System, and UAT testing

Validate grid modelling calculations and simulation outputs

Test backend APIs, cloud workflows, and frontend applications

Ensure compliance with electrical standards and grid regulations

Perform defect tracking, root cause analysis, and issue resolution

Collaborate with engineering and product teams for quality delivery

Tools & Technologies

Selenium, PyTest, Playwright, Cypress

Python, React
AWS, Git, CI/CD
JIRA, TestRail, Zephyr, HP ALM
Postman

Preferred Domain
Energy / Power Systems / Renewable Energy / Engineering Software

🔴 Hiring Now – Automation QA Engineer 🔴

We are actively hiring an Automation QA Engineer to join our growing engineering team in Chennai.

📍 Location: Chennai Only

⚡ Notice Period: Immediate Joiners Only

👛 Experience: 3–5 Years

🔧 Tech Stack:

Playwright | Selenium | Cypress | C# | JavaScript | TypeScript | REST API Testing | Azure DevOps | GitHub Actions

📌 Role Overview:

We are looking for a highly skilled QA Automation Engineer with strong experience in automation framework development, API testing, and CI/CD integration. The ideal candidate should have a shift-left testing mindset and be capable of driving quality throughout the development lifecycle.

◆ Key Responsibilities:

- Define and own automation test strategy and coverage for the squad
- Build and maintain scalable automation frameworks using Playwright/Selenium/Cypress
- Perform end-to-end, API, and integration testing
- Validate REST APIs independently using Postman or scripted API suites
- Integrate automated tests into Azure DevOps/GitHub Actions pipelines
- Identify flaky tests, investigate failures, and improve test stability
- Collaborate closely with developers during sprint planning and implementation
- Track and report quality metrics including automation pass rate and defect leakage

✅ Required Skills:

- 3–5 years of strong QA automation experience
 - Expertise in Playwright, Selenium, or Cypress frameworks
 - Hands-on scripting experience in C# or JavaScript/TypeScript
 - Strong REST API testing knowledge
 - Experience with Page Object Model (POM) or similar automation design patterns
 - CI/CD pipeline integration experience
 - Good understanding of test design techniques and agile methodologies
- 🎯 Looking for candidates who are passionate about quality engineering, automation best practices, and delivering stable, scalable applications.

✉ Interested candidates can share their updated resume via LinkedIn DM or email at rajeswari.m@bct-consulting.com

#Hiring for ETL/ Data Quality Test Engineer

#Company: TCS

#Experience: 4-8 years

#Location: Chennai

#Roles and Responsibilities:

#Role Summary:

We are looking for an ETL Testing professional with strong Data Warehouse validation experience, hands on Databricks exposure, excellent SQL skills, and working knowledge of Python to support data ingestion, transformation, and analytics validation across large scale enterprise data platforms.

#Key Responsibilities

- Validate end to end ETL/data pipeline workflows from source systems to target data warehouse layers
- Perform data reconciliation, data quality checks, and transformation validation across Bronze / Silver / Gold layers (or equivalent)
- Execute Databricks-based data validations using SQL, notebooks, and result comparisons
- Design and execute complex SQL queries for data profiling, completeness, accuracy, and referential integrity checks
- Validate Delta tables, fact/dimension tables, aggregates, and historical load logic
- Perform job failure analysis, data discrepancy RCA, and support defect triage
- Collaborate closely with Data Engineering, Analytics, and QA teams during releases
- Ensure test coverage for incremental loads, CDC, reprocessing, and batch schedules

#Technical Skills (Mandatory)

- ETL / Data Warehouse Testing:
 - o Strong experience in DWH concepts (Facts, Dimensions, Star/Snowflake schema)
 - o Hands on data validation across large datasets
- Databricks:
 - o Experience validating data pipelines built on Databricks

- o Working knowledge of notebooks and Delta Lake concepts
- SQL:
- o Strong proficiency in writing complex SQL queries (joins, subqueries, aggregations, window functions)
- o Ability to perform large volume data validation and reconciliation
- Python (Basic to Intermediate):
- o Ability to read/write simple Python scripts for data validation, automation support, or log analysis

#Good to Have

- Understanding of CI/CD data pipelines and release validation
- Experience in Healthcare / Insurance / Enterprise analytics domains
- Automation knowledge for data validation (any framework)

#Testing & Process Knowledge

- Strong understanding of ETL testing strategies, defect lifecycle, and RCA
- Experience working in Agile delivery models
- Ability to independently own test scenarios and coordinate with upstream/downstream teams

#Soft Skills

- Clear communication with technical and business stakeholders
- Ability to work independently with minimal supervision.

please do check the JD and if you fit for this position share your CV immediately.

#If interested candidates do share your CV to- panimalar.a@srivango.com

📌 Chennai Tech Hiring Alert | Immediate Joiners Only 📌

A high-impact engineering team at Psiog is scaling aggressively — and some of the strongest backend opportunities in Chennai are now open.

We're hiring:

🔥 Senior Software Engineers – Backend (C#/.NET)

🔥 Junior Engineers

🔥 QA Engineers

🔥 Lead Engineers

This is NOT a maintenance/support environment.

This team is building production-grade systems with:

✓ .NET 6/8

✓ Scalable REST APIs

✓ PostgreSQL / SQL Server

✓ Entity Framework Core

✓ Azure ecosystem

✓ AI-integrated engineering workflows

If you're someone who:

- loves solving real backend engineering problems
- cares about clean architecture and performance
- enjoys high ownership environments
- wants to work with strong engineers and modern practices

...this is the kind of opportunity people usually hear about after the positions close.

⚡ Full-Time Associates or Contract to Hire

📌 Chennai

⚡ Immediate Joiners STRICTLY preferred

⚡ Fast-moving hiring process

The backend roles especially need engineers who can independently build reliable systems — not just write code tickets.

Bonus points if you've worked on:

- scalable APIs
- optimisation-heavy systems
- cloud-native applications
- AI/LLM integrations

 We Are Hiring – WLAN Test Engineer (Manual/Automation) 

We are looking for skilled and passionate WLAN Test Engineer with hands-on experience in WLAN product feature testing and validation to join our growing engineering team working on next-generation wireless and IoT connectivity solutions.

 Position: WLAN Test Engineer (Manual/Automation)

 Experience: 3–5 Years

 Key Skills Required:

✓ Basic knowledge of Networking & Wireless Protocols

✓ Hands-on experience in testing WLAN products such as Routers, Access Points, Extenders, or Mesh Routers

✓ Experience in WLAN functional, stability, performance, and regression testing

✓ Expertise in automation frameworks like PyTest, Robot Framework, or Selenium

✓ Strong scripting skills in Python or relevant scripting languages

✓ Ability to understand IEEE 802.11 standards and prepare test plans accordingly

✓ Experience with Git and Jira

 Good to Have:

✓ Experience in Qualcomm-based WLAN products testing

✓ Understanding of IEEE 802.11ax/be standards

✓ Hands-on experience with WDS or Mesh topology testing

✓ Exposure to Linux environments, GitLab/Bitbucket, and Jenkins

 Roles & Responsibilities:

• Perform manual and automation testing of WLAN features across multiple products

• Develop and execute detailed test plans for newly developed features

• Build and maintain CI/CD automation test beds

• Work closely with R&D and Development teams for feature validation

• Collaborate with customers to ensure product quality and requirement compliance

• Stay updated with the latest WLAN technologies and industry trends

If you are passionate about wireless technologies and want to work on cutting-edge connectivity solutions, we would love to hear from you.

Looking For Gen AI Tester

Location Bangalore (Hybrid) From our Office at Belandur

Experience- 4+ Years

Interested Candidates can Mail me at - rajat.prabhakar@relevancelab.com

We are seeking an experienced Software Tester to join our dynamic team. The ideal candidate will have a minimum of three years of experience in software testing, with a strong focus on Large Language Model (LLM) evaluation, test case writing, and quality assurance practices. This role is crucial in ensuring the reliability and performance of our software products before they reach our users.

Key Responsibilities:

- Collaborate with cross-functional teams, including developers and project managers, to understand project requirements and scope.
- Design, develop, and execute comprehensive test cases for LLM applications, ensuring alignment with business objectives and user needs.
- Conduct various types of testing including functional, regression, performance, and usability testing to identify defects and ensure high-quality outputs.
- Implement both manual and automated testing strategies to validate software functionality.
- Write detailed bug reports and documentation to communicate findings effectively to development teams.
- Participate in the development of test plans and strategies tailored for LLM applications, addressing unique challenges such as output variability.
- Utilize testing tools and frameworks to enhance efficiency in the testing process.
- Provide objective feedback on software quality and performance, assisting in troubleshooting and problem resolution.
- Stay updated with industry trends in software testing methodologies, particularly in AI and machine learning contexts.

Qualifications:

- Bachelor's degree in Computer Science, Engineering, or a related field is preferred.
- At least three years of relevant experience in testing.
- Proven experience with LLM evaluation techniques and methodologies for assessing AI-generated outputs.
- Strong analytical skills with a keen eye for detail to identify issues effectively.
- Familiarity with test management software (e.g., Jira, selenium)
- Excellent communication skills to articulate findings clearly to both technical and non-technical stakeholders.
- Ability to work independently as well as collaboratively within a team environment.

🚀 Hiring: QA Engineer IV (Desktop & Mobile) | Immediate Joiners Only 🚀

We are looking for a senior-level QA Engineer IV to join our team in Bangalore (Office)

If you have a strong background in manual testing for desktop applications and can start immediately, we want to hear from you!

📌 Location: Bangalore II (In-Person Interview Required)

🏃 Notice Period: Immediate Joiners Only

What You'll Do 🚀

Complete Ownership: Own end-to-end testing, feature delivery, and product quality in an Agile environment.

Strategy & Execution: Create test plans, design test cases, execute regression suites, and handle defect management.

Collaboration: Work closely with the development team to deliver key features on schedule.

Leadership: Provide technical expertise and mentor junior team members.

What We Are Looking For (Mandatory Skills) 🚀

Experience: 5+ years of software testing experience as an individual contributor.

Desktop & Mobile Expertise: Proven experience testing Desktop applications (Windows, Mac) and Mobile (Android).

Manual Expertise: Strong core manual testing skills, test design techniques, and STLC/SDLC knowledge.

Automation: Good to have (plus point).

Mindset: High attention to detail, strong problem-solving skills, and a customer-advocate mindset.

Interview Process:

- 1 Round 1: Virtual
- 2 Round 2: In-person (Mandatory)

✉ How to Apply:

If you meet the 5+ years criteria and can join immediately, please drop your CV in the comments, DM directly, or send it to [Insert Email Address] with the subject line "QA Engineer IV - Bangalore".

(bhoomishanmuk5686@gmail.com)

🚀 We're Hiring: iOS Developer / SDET (Automation Focus)

📍 Location: Bangalore/ Hyderabad

👤 Experience: 5+

Are you passionate about iOS development and automation testing? We are looking for a dynamic professional who can build high-quality mobile applications while also driving test automation and quality engineering initiatives.

🔧 Key Responsibilities:

- Design, develop, and maintain applications for the iOS platform
- Collaborate with developers, designers, product owners, and QA teams to deliver high-quality features
- Implement new product features and enhance existing functionalities
- Modernize legacy systems by replacing outdated technologies
- Prepare test plans, write test cases, and execute/automate them
- Identify performance bottlenecks, debug issues, and fix bugs
- Take ownership of automation frameworks and improve testing efficiency

🧠 Required Skills & Expertise:

- Strong experience in iOS development (Swift, SwiftUI / Hybrid technologies)
- Understanding of functional reactive programming, design patterns, dependency injection
- Hands-on experience with automation frameworks (XCUITest, Appium, or similar)
- Solid knowledge of Data Structures, Algorithms, and Operating Systems
- Familiarity with Apple's design principles and coding best practices
- Experience working in Agile/Scrum environments
- Exposure to CI/CD tools and workflows (Git, Jira, etc.)

🧠 Bonus Skills:

- Interest or experience in AI-driven development and automation approaches
- Passion for improving efficiency using modern tools and technologies

✨ If you are someone who enjoys coding + testing + innovation, this role is perfect for you!

Hiring: Lead SDET (Individual Contributor)

📍 Location: Bangalore

 **Work Mode: Remote**

 **Experience Required: 6–8 Years**

We are looking for an experienced Lead SDET to drive quality engineering initiatives across large-scale web applications and SaaS platforms. This is an Individual Contributor role for someone passionate about automation, quality strategy, and engineering excellence.

Key Responsibilities

Quality Ownership

- Own end-to-end quality across multiple product modules

- Drive release readiness and ensure stable product releases

- Identify risks proactively and maintain high-quality standards

Automation Excellence

- Build and scale automation frameworks and testing practices

- Automate complex workflows, integrations, and regression suites

- Improve test reliability, coverage, and execution efficiency

Quality Strategy

- Define and implement quality processes across teams

- Identify gaps in tooling, execution, and workflows

- Drive sustainable improvements in engineering quality

Cross-Functional Collaboration

- Work closely with Product, Engineering, and Leadership teams

- Influence release decisions using quality metrics and risk analysis

- Promote customer-first thinking and accountability

Release Planning & Execution

- Plan test strategies balancing speed, risk, and coverage

- Support fast-paced release cycles with strong quality controls

- Debug complex issues across distributed systems and environments

Required Skills

Must Have

- 6+ years of experience in testing complex web applications or B2B SaaS platforms

- Strong experience in both Automation Testing and Manual Testing

- Hands-on expertise with:

- Playwright

- Cypress

- Selenium

- Strong coding skills in:

- Java / Python

- JavaScript / TypeScript

- Experience with:

- API Testing

- Performance / Load Testing

- Backend Validation

- Understanding of:

- System Architecture

- Databases

- Integrations

- Distributed Systems

- Hands-on experience with CI/CD pipelines and cloud-native environments

Ability to debug complex issues across services and environments

Excellent communication and stakeholder management skills

Preferred Qualifications

B.Tech / B.E / **M.Tech** / MCA

Prior experience leading SDETs or driving quality initiatives across teams

Screening Questions

Please share the below details along with your application:

Total hands-on coding experience (in years)?

Experience with automation frameworks:

Playwright:

Cypress:

Selenium:

Experience with JavaScript / TypeScript (in years)?

Total years of experience in:

Automation Testing:

Manual Testing:

Experience with API Testing, Performance Testing, CI/CD, Docker, Kubernetes – please specify tools/platforms used.

🎯 WE ARE HIRING: **#Fineos_Test_Analyst (#Insurance #Domain)**! 🎯

Experience - 8+ years

Location- Bangalore, Kolkata, Pune

Are you a meticulous QA engineer with hands-on experience handling specialized core systems configurations? We are seeking an offshore FINEOS Test Analyst to lead testing operations for integrated insurance application platforms.

🎯 Key Responsibilities:

Interpret complex business expectations, functional specs, and custom FINEOS configuration files.

Author, structure, and execute end-to-end test scenarios across multiple integrated upstream/downstream systems.

Validate core business rules, custom organizational workflows, calculations, and financial payment tables inside FINEOS modules.

Shared by **Job Curator** - Join us on Telegram: <https://t.me/testingexperiencedopenings>

Oversee defect life cycles using standard tracking platforms to guarantee high-quality releases.

 **Technical & Domain Expertise Required:**

Platform Testing: Strong hands-on testing execution experience inside the FINEOS suite (specifically Fineos Claims and Fineos Policy modules).

Domain Knowledge: solid understanding of the Insurance domain—specifically Claims lifecycle tracking, policy lifecycle administration, benefits mapping, and invoice tracking. (Workers' compensation experience is a major advantage!).

QA Stack: Proficiency in JIRA, Zephyr, and Confluence within Agile/Scrum delivery models.

 Like, Share, or Tag to connect an awesome Fineos QA specialist with their next opportunity!

 How to Apply: Send your updated resume directly to princy@albireorecruiters.in
