[#AutomationTesting](#) [#QAHiring](#) [#Selenium](#) [#APITesting](#) [#DatabaseTesting](#)

🚀 We're Hiring: Senior Software Engineer in Test (SDET)

📍 Location: Hyderabad, India

🏢 Work Mode: Hybrid

🕒 Experience: 5–8 years | Full-Time

We are looking for an experienced and detail-oriented Senior Software Engineer in Test to join a Quality Engineering team.

The ideal candidate will have strong hands-on experience across manual, functional, automation, API, and database testing, with the ability to contribute to both test strategy and execution.

🎯 Required Skills & Experience

- 5–8 years of overall testing experience
- Strong experience in Manual & Functional Testing
- Automation experience with Selenium + Java
- Hands-on API testing experience
- Database testing with strong SQL skills
- Good communication and analytical skills

🔍 Key Responsibilities

- ✓ Design and execute manual & functional test cases
- ✓ Develop and maintain automation scripts using Selenium with Java
- ✓ Perform API testing using Postman or similar tools
- ✓ Conduct database validation using SQL queries
- ✓ Log, track, and manage defects through closure
- ✓ Prepare test documentation and communicate test results clearly
- ✓ Collaborate closely with developers and stakeholders

◆ Only [#F2F Hiring on Jan 2026](#)

◆ For QA Automation + AWS / Azure

◆ For Applying Share M Resume On [#riaanisha1995@gmail.com](mailto:riaanisha1995@gmail.com)

◆ Work Mode - Hyderabad (WFO, 1pm to 10pm shift)

◆ Eligibility - 8 years to 12 years

◆ Budget - UPTO 30lpa

◆ Primary Skills - QA Automation + AWS / Azure

◆ Below is a job description (JD) for a QA Automation Engineer with Cloud (AWS/Azure) Experience, which can be tailored to specific company needs. This role is essential for ensuring high quality, reliable, and scalable software solutions within a modern cloud-based infrastructure.

◆ QA Automation Engineer (AWS/Azure) Job Description

We are seeking a talented and detail-oriented QA Automation Engineer to design, develop, and implement automated tests for our software products deployed on cloud platforms, specifically AWS or Azure. The ideal candidate will be responsible for ensuring the quality, functionality, and performance of applications by leveraging their expertise in test automation and cloud technologies. This role involves close collaboration with development and operations teams to integrate testing into our continuous integration

◆ Key Responsibilities

Design and Development: Design, develop, and maintain automated test scripts and frameworks for web, mobile, and API applications using industry-standard tools.

Cloud Testing: Conduct testing within cloud-based environments (AWS/Azure), ensuring applications function correctly and efficiently in a distributed, scalable infrastructure.

CI/CD Integration: Integrate automated tests into CI/CD pipelines (e.g., Jenkins, GitHub Actions, Azure DevOps) to enable continuous testing and faster feedback loops.

Testing and Defect Management: Execute automated and manual tests, identify, document, and thoroughly track bugs to resolution, performing regression testing as needed.

Collaboration: Work closely with cross-functional teams (developers, product managers, DevOps engineers) to understand requirements, refine acceptance criteria, and troubleshoot complex issues.

Performance and Security: Participate in performance and security testing efforts, particularly within the cloud environment, to ensure scalability and robustness.

Process Improvement: Continuously evaluate and improve existing QA processes, tools, and best practices to enhance the efficiency and effectiveness of the overall testing strategy.

Documentation: Create detailed test plans, test cases, and reports, and ensure clear communication of quality metrics to stakeholders.

=====

 **We Are Hiring — Software Tester (Manual & Automation)**

 **Experience:** 6 Months – 1 Year

 **Job Type:** Full-Time

 **Immediate Joiners Preferred**

 **Location:** Hyderabad (Only candidates currently in Hyderabad and ready for a Face-to-Face interview can apply)

Nebulytix Technologies Pvt Ltd is looking for a motivated Software Tester with hands-on experience in Manual and Automation Testing to ensure the quality, reliability, and performance of our web and mobile applications.

 **About the Role**

We are seeking a Software Tester who can perform both Manual and Automation Testing across applications. The ideal candidate should have a strong understanding of the software testing life cycle (STLC) and be capable of identifying, documenting, and tracking defects while working closely with developers and product teams.

 **Key Responsibilities**

Perform Manual Testing of web and mobile applications

Analyze requirements and create test cases, test scenarios, and test plans

Execute functional, regression, smoke, sanity, and UI testing

Identify, log, track, and retest defects using bug tracking tools

Perform Automation Testing using appropriate frameworks and tools

Develop, execute, and maintain automation test scripts

Shared by **Job Curator** - Join us on Telegram: <https://t.me/testingexperiencedopenings>

Validate API responses using tools like Postman

Collaborate with developers, product owners, and QA teams

Ensure quality standards are met before production release

Participate in Agile/Scrum ceremonies

🎯 Must-Have Skills

- ✓ Manual Testing fundamentals
- ✓ Automation Testing basics
- ✓ Knowledge of SDLC & STLC
- ✓ Test case design & execution
- ✓ Bug life cycle and defect tracking
- ✓ Automation tools (Selenium / Cypress / Playwright – any one)
- ✓ Programming basics (Java / Python – any one)
- ✓ API Testing (Postman)
- ✓ Database basics (SQL)
- ✓ Git / Version Control

★ Bonus / Good-to-Have Skills

- + Experience in Mobile App Testing (Android / iOS)
- + Knowledge of TestNG / JUnit / PyTest
- + CI/CD tools (Jenkins, GitHub Actions, etc.)
- + Performance testing basics (JMeter)
- + Agile / Scrum experience
- + AWS basic knowledge

📌 Experience Requirement

6 months to 1 year of relevant experience

Internship, training, or real-time project experience will be considered

💰 Salary

📁 Salary will be based on skills and interview performance

✉ How to Apply

Job Description – Data QA Engineer (Automation | Azure | SQL | ETL)

Experience: 4–6 Years

Engagement: Contract – 6 Months

Work Mode: Remote / Hybrid (Bangalore, Hyderabad, Mumbai, Pune)

Shared by **Job Curator** - Join us on Telegram: <https://t.me/testingexperiencedopenings>

Work Timings: 11:00 AM – 8:00 PM IST (2–3 hours client overlap required)

Role Overview

We are seeking a Data QA Engineer to ensure the accuracy, integrity, and reliability of data products and data marts built on Microsoft Fabric / Databricks. The role involves functional, regression, integration, and data quality testing across complex data pipelines.

Key Responsibilities

Develop and execute test plans and test cases for data products and transformations

Validate PySpark and SQL-based ETL logic across staging and reporting layers

Perform data reconciliation, profiling, and quality checks

Write Python notebooks and complex SQL queries for data validation

Track and manage defects and data anomalies

Maintain regression suites and support test automation in Python

Collaborate with data engineers and participate in Agile/Scrum ceremonies

Mandatory Skills

Strong PySpark and SQL expertise

Hands-on experience with dbt-core, soda-core, or Great Expectations

Solid understanding of ETL, data modeling, and semantic layer design

Experience testing data platforms on Microsoft Fabric and/or Databricks

Knowledge of QA, UAT, regression, and post-production testing

Excellent analytical and communication skills

Preferred

Experience in regulated domains (GRC, compliance-driven environments)

Familiarity with Azure-based data platforms

✉ Interested candidates can share their updated resume at sakshi@technology-next.com

We are hiring: Technical Product Analyst – Product Management Group (PMG)

📍 Location: Hyderabad (Only Hyd) ,

🕒 Experience: 2–5 years

🏢 Mode: Work from Office

About the Role:

As a Technical Product Analyst, you will play a key role in shaping our product roadmap and ensuring that our solutions address real customer challenges while maintaining technical rigor. You'll collaborate with product managers, consultants, developers, QA, and clients to analyze business needs, define product features, and support delivery.

Key Responsibilities:

- ✓ Gather and analyze customer requirements, industry trends, and competitive intelligence.
- ✓ Develop clear Product Requirement Documents (PRDs), user stories, and functional specifications.
- ✓ Act as a bridge between business and technical teams for shared understanding.
- ✓ Support QA and UAT efforts by validating features against documented requirements.
- ✓ Contribute to PMG best practices and process improvements.

Qualifications & Skills:

- ✓ Bachelor's/master's in business administration, Supply Chain, Engineering, or related field.
- ✓ 2–5 years of experience in product or business analysis (preferably in supply chain tech or SaaS).
- ✓ Strong analytical and documentation skills.
- ✓ Familiarity with Agile/Scrum and tools like JIRA or Confluence.
- ✓ Comfortable with technical concepts such as data flows and system interactions.

Why Join Us?

Work on innovative supply chain technology solutions.

Collaborate with cross-functional teams in a dynamic environment.

Opportunity to influence product strategy and delivery.

 Hiring: Senior Business Analyst – US Pharma, Healthcare & Medical Devices

 Location: India (Hyderabad preferred / As per project need)

Shared by **Job Curator** - Join us on Telegram: <https://t.me/testingexperiencedopenings>

Experience: 8–10 Years

Role Overview

We are seeking a domain-strong Senior Business Analyst with deep experience in the US pharmaceutical, healthcare distribution, and medical devices/med-tech landscape.

The ideal candidate will quickly immerse themselves in a large, complex client environment, understand end-to-end business processes, and act as a strong bridge between business stakeholders, technology teams, and external partners.

This role combines hands-on business analysis with strategic domain input, supporting both solution design and delivery execution.

Key Responsibilities

Business & Domain Analysis

Develop deep understanding of pharma distribution, healthcare supply chain, and medical device workflows

Analyze and document end-to-end processes, dependencies, and data flows

Translate business needs into clear functional requirements and specifications and

Stakeholder Collaboration

Healthcare & Pharma Focus

Apply expertise across:

Pharma & healthcare distribution

Medical devices / med-tech operations

Order-to-Cash, Procure-to-Pay, Inventory, Pricing, Chargebacks, Compliance

Understand US regulatory considerations such as FDA, DEA, DSCSA, HIPAA (as applicable)

Solution & Delivery Support

Validate functional fit during solution design

Collaborate with integration, EDI, data, and application teams

Support functional testing, UAT, and validation

Identify risks, gaps, and improvement opportunities early

Documentation & Improvement

Create BRDs, FRDs, user stories, process flows, and data mappings

Identify opportunities for process optimization and automation

Support change management and adoption

Required Skills & Experience

Domain Expertise

Strong experience in US Pharma, Healthcare, or Medical Devices

Experience working with large healthcare distributors or ecosystem players

Solid understanding of healthcare supply chain and distribution models

Business Analysis

Extensive BA experience in enterprise-scale environments

Strong skills in requirements elicitation, documentation, and validation

Experience with Agile, Waterfall, or hybrid delivery models

🌟 Nice to Have

Experience with EDI, integrations, ERP, or enterprise platforms
Exposure to data, analytics, or reporting in healthcare/pharma
Background in client-facing consulting or managed services
