 **WE ARE HIRING: Salesforce Test Automation Engineer (Java-Selenium)** 

We are looking for a Salesforce Test Automation Engineer to join our QA team full-time in Hyderabad. If you have a strong mix of Java-Selenium skills and Salesforce CRM testing experience, we want to hear from you!

 **Overview:**

Experience: 5 – 8 Years

Location: Hyderabad (Work from Office)

Employment Type: Full-Time

Notice Period: Immediate to 30 Days Preferred

 **Key Responsibilities:**

Frameworks: Design, develop, and maintain robust automation frameworks using Java and Selenium WebDriver.

Salesforce Testing: Perform thorough functional, regression, integration, and end-to-end testing of Salesforce applications.

Cloud & Custom Apps: Create and execute automated test cases for Salesforce Sales Cloud, Service Cloud, and custom Salesforce implementations.

Scripting: Develop and maintain clean test scripts using automation frameworks like TestNG and JUnit.

API & Integrations: Validate and test integrations between Salesforce and external systems using APIs.

Defect Tracking: Analyze test results, identify code defects, and collaborate closely with development teams for fast resolution.

Strategy & Estimation: Participate in requirement reviews to provide accurate test estimates and inputs for the overall test strategy.

Documentation: Create and maintain clear test documentation, defect reports, and test execution reports.

Team Setup: Work actively within fast-paced Agile and Scrum development environments.

 **Required Skills (Must-Have):**

5–8 years of direct experience in Software Testing and Test Automation.

Strong, hands-on programming experience with Java and Selenium WebDriver.

Direct, practical experience testing Salesforce CRM applications.

Shared by **Job Curator** - Join us on Telegram: <https://t.me/testingexperiencedopenings>

Solid working knowledge of TestNG/JUnit, Maven, and Git.
Clear understanding of API Testing using tools like Postman, REST Assured, or similar.
Hands-on experience with CI/CD deployment tools like Jenkins.
Deep understanding of the SDLC, STLC, and Agile methodologies.
Excellent debugging, analytical, and workplace communication skills.

🌟 Preferred Skills:

Salesforce Certifications (Administrator, App Builder, or Sales Cloud Consultant) are a major advantage.

Experience writing test scripts in BDD frameworks like Cucumber.

Exposure to cloud platforms and modern DevOps practices.

Direct experience with Salesforce Lightning and Apex testing.

🎓 Education:

Bachelor's Degree in Computer Science, Information Technology, Engineering, or a related field.

Job Title: Test Manager – Rollout & eInvoice Integration Testing (Any ERP out of SAP, Oracle, Microsoft only)

Location: Work from Office – Pune / Hyderabad / Bangalore – Mandatory

Relevant years of Experience: 8+yrs

Budget: Upto 24 Lpa

Client Industry: Global Logistics, Transportation & Supply Chain

Experience: Experienced professional with testing, rollout, and integration project experience

Communication: Excellent spoken and written English required

Role Overview

We are looking for an experienced Test Manager to manage testing delivery for ERP rollout and eInvoice integration projects across multiple countries. The role requires strong coordination with business users, ERP functional teams, developers, country teams, and global stakeholders.

The candidate should have experience in managing SIT, UAT, regression, integration, cutover testing, and rollout readiness. Prior exposure to logistics, transportation, supply chain, freight forwarding, warehousing, or eInvoice/local compliance projects will be preferred.

Key Responsibilities

Lead end-to-end testing coordination for ERP rollout and eInvoice integration projects.

Manage SIT, UAT, regression, integration, data migration, and cutover testing activities.

Track test execution, defects, dependencies, blockers, risks, and sign-offs.

Coordinate with global and local country teams for rollout readiness.

Drive Agile ceremonies, sprint planning, backlog tracking, and status reporting.

Prepare dashboards, RAID logs, test summary reports, and stakeholder updates.

Ensure testing documentation, quality control, and audit readiness.

Required Skills

Strong experience as a Test Manager in ERP testing or rollout projects.

Experience in global or multi-country ERP rollout programs.

Good understanding of ERP testing lifecycle, defect management, and QA governance.

Experience in integration testing, especially around eInvoice, invoicing, tax, compliance, or

Shared by **Job Curator** - Join us on Telegram: <https://t.me/testingexperiencedopenings>

government integration processes.

Hands-on experience with JIRA, Azure DevOps, HP ALM, or similar tools.

Strong stakeholder management, coordination, and risk management skills.

Ability to work with distributed global teams across time zones.

Excellent English communication skills are mandatory.

Must be able to work from office in Pune, Hyderabad, or Bangalore.

Good to Have

Logistics, transportation, freight forwarding, warehousing, or 3PL/4PL domain exposure.

SAP exposure in SD, MM, LE, WM, EWM, TM, FI, or integration processes.

Experience with country-specific localization, statutory compliance, or eInvoice rollouts.

Exposure to global templates and multi-country deployment waves.

 Apply now! Send your resume to (resume@hastree.com)

We are looking for a QA Automation Engineer with strong hands-on experience in Java-based test automation and API testing. This role requires deep expertise in Selenium and REST API automation, along with the ability to lead QA strategy, framework design, and test execution across complex applications. You will guide a small QA team while remaining technically hands-on.

Key Responsibilities

Lead end-to-end QA automation strategy and implementation

Design and maintain scalable automation frameworks using Java and Selenium

Build and execute automated test suites for UI and REST APIs

Integrate automated tests into CI/CD pipelines

Review test design, code quality, and automation coverage

Work closely with developers, product owners, and DevOps teams

Define test plans, test data strategy, and quality metrics

Mentor QA engineers and enforce automation best practices

Drive defect tracking, root cause analysis, and risk reporting

Required Skills

Shared by **Job Curator** - Join us on Telegram: <https://t.me/testingexperiencedopenings>

5 - 7 years of QA experience with a strong automation background
Expert in Java for test automation
Strong experience with Selenium WebDriver
Solid hands-on experience with REST API testing (Rest Assured or similar)
Experience building automation frameworks from scratch
Strong knowledge of TestNG or JUnit
Experience with CI/CD tools like Jenkins or GitHub Actions
Good understanding of Agile/Scrum delivery models
Strong debugging and problem-solving skills
Nice to Have
Experience with BDD tools like Cucumber
Performance or security testing exposure
Cloud testing experience
Container or Docker-based test environments

 Hiring Alert | QA Automation Engineer | Hyderabad (Onsite)

Cybrnova Innovations Inc. is expanding, and we're looking for experienced QA Automation Engineers who are passionate about building robust automation frameworks and driving quality across modern applications.

 Location: Hyderabad (Onsite)
 Employment Type: Full-Time
 Experience Required: 5–7 Years
 Open Positions: 4

◆ What You'll Do

- ✓ Lead automation initiatives across web and API applications
- ✓ Design and develop scalable automation frameworks using Java & Selenium
- ✓ Automate REST APIs using Rest Assured or similar tools
- ✓ Integrate automated testing into CI/CD pipelines
- ✓ Collaborate closely with Development, DevOps, and Product teams
- ✓ Mentor QA engineers and promote automation best practices
- ✓ Drive quality metrics, defect analysis, and test strategy execution

◆ Technical Skills We Need

- ✓ Strong Java programming experience
- ✓ Selenium WebDriver expertise
- ✓ REST API Automation (Rest Assured preferred)
- ✓ TestNG / JUnit
- ✓ Framework development from scratch
- ✓ Jenkins, GitHub Actions, or similar CI/CD tools

Shared by **Job Curator** - Join us on Telegram: <https://t.me/testingexperiencedopenings>

- ✓ Agile/Scrum environment experience
- ✓ Strong debugging and analytical skills

★ Bonus Skills

- Cucumber / BDD Frameworks
- Performance Testing
- Security Testing
- Cloud Testing
- Docker / Containerized Test Environments

🔊 Important Note

We are seeking genuine candidates who can provide complete employment documentation, including:

- Offer Letters
- Experience & Relieving Letters
- Bank Statements
- PF Service History
- Form 16

📝 Selection Process

Technical expertise is our priority.

Expect 2–3 rounds of in-depth technical interviews focused on real-world automation experience and problem-solving skills.

If you have a strong automation background and enjoy solving complex quality challenges, we'd love to connect.
