We're Hiring: ML-SDET (UI & API Automation) at **BOLD**

Do you enjoy building robust automation frameworks, solving complex quality challenges, and working on AI/ML-driven products? If yes, we'd love to connect with you!

We are looking for an experienced ML-SDET who can drive end-to-end quality engineering across modern web applications, APIs, and intelligent systems.

📍 Location: Noida-135 (Hybrid)

👤 Experience: 5.5 – 7.5 Years

◆ Key Skills We're Looking For:

- 💻 UI Automation – Playwright / Selenium / Cypress
- 🔗 API Automation – REST Assured / Karate / similar tools

Shared by **Job Curator** - Join us on Telegram: <https://t.me/testingexperiencedopenings>

- 🖥️ Strong coding skills in Java / C#
- ⚙️ Automation frameworks & testing best practices
- 🚀 CI/CD tools – Jenkins, GitHub Actions, etc.
- 🧠 AI/ML application testing & data validation

🌟 What You'll Do:

- ✓ Build and maintain scalable UI & API automation frameworks
- ✓ Validate end-to-end workflows across applications and services
- ✓ Collaborate with Engineering, QA, and ML teams
- ✓ Integrate automation into CI/CD pipelines
- ✓ Ensure high-quality releases for AI-powered products

If you're passionate about automation, quality engineering, and next-gen technologies, this role is for you.

- 🚀 Hiring: Senior QA Automation Engineer – ETL & Cloud (AWS) 🚀
- 📍 Location: Gurugram / Chennai (Hybrid)
- 🏠 Work-from-home with occasional office visits
- ⌚ Duration: Contract Opportunity
- ⚡ Immediate Joiners Preferred

We are looking for a highly analytical and hands-on Senior QA Automation Engineer with expertise in ETL Testing, AWS Glue, Automation Frameworks, API Testing, and Database Validation to support critical cloud and data engineering initiatives.

◆ Key Responsibilities

- ✓ Perform end-to-end functional, regression, integration, API, and database testing
- ✓ Design and execute test cases for AWS Glue ETL pipelines and cloud workflows
- ✓ Develop and maintain automation frameworks using Robot Framework or Selenium
- ✓ Validate data accuracy, transformation integrity, and migration processes
- ✓ Monitor AWS Glue jobs and troubleshoot failures using CloudWatch logs
- ✓ Perform API testing using Postman, Swagger, and REST-based tools
- ✓ Collaborate with developers, QA teams, and business stakeholders in Agile environments
- ✓ Maintain test plans, traceability reports, and testing documentation

◆ Required Skills

- ✓ Strong experience in QA Automation & ETL Testing
- ✓ Hands-on expertise with AWS Glue and cloud-based data validation
- ✓ Experience with Robot Framework (Python) or Selenium WebDriver (Java/Python)
- ✓ Strong knowledge of API Testing, Database Testing, and SQL

Shared by **Job Curator** - Join us on Telegram: <https://t.me/testingexperiencedopenings>

- ✓ Experience with Postman, Swagger, Jenkins, Git, and CI/CD pipelines
- ✓ Hands-on exposure to Java, Python, PyCharm, IntelliJ IDEA
- ✓ Experience testing event-driven integrations using Amazon EventBridge
- ✓ Strong analytical, debugging, and troubleshooting skills

★ Preferred Qualifications

- + Experience with REST Assured and serverless architecture testing
- + Familiarity with PostgreSQL and cloud-native applications
- + ISTQB Certification is a plus
- + Experience working in Agile/Scrum environments

Hiring QA Automation Engineer

Company: [Programming.com](https://www.programming.com)

Location: Gurugram

Shift: Night Shift

Preference: Male Candidates Preferred

Job Overview

[Programming.com](https://www.programming.com) is looking for an experienced QA Automation Engineer with strong

Shared by **Job Curator** - Join us on Telegram: <https://t.me/testingexperiencedopenings>

expertise in Playwright for .NET, BDD automation, and CI/CD integration. The ideal candidate should be capable of building scalable automation frameworks, handling API and database testing, and working closely with Agile product teams.

Key Requirements (Must Have)

- 6+ years of QA Automation experience
- Hands-on experience with Playwright for .NET (C#) — Mandatory
- Strong experience with Reqnroll/SpecFlow (BDD Automation) — Mandatory
- Strong knowledge of C#/.NET
- Experience with API Testing (REST APIs, OAuth, JWT, etc.)
- Strong understanding of Azure DevOps CI/CD pipelines
- Experience with SQL & Database Validation
- Hands-on experience with Jira, Git, and Test Management tools
- Experience building scalable automation frameworks using:
 - Page Object Model (POM)
 - Reusable fixtures
 - Cross-browser testing
- Knowledge of accessibility testing using axe + Playwright
- Strong debugging and root-cause analysis skills
- Excellent written and verbal communication skills
- Comfortable working in Night Shift

Key Responsibilities

- Build and maintain automation frameworks using Playwright for .NET.
- Develop BDD automation scenarios using Reqnroll/SpecFlow.
- Perform UI, API, regression, and cross-browser testing.
- Integrate automated test suites into Azure DevOps pipelines.
- Execute database validations using SQL queries.
- Collaborate with product, engineering, and DevOps teams.

Preferred Skills

- Experience with Aqua Test Management
- Exposure to performance testing tools like k6 or JMeter
- Experience in enterprise SaaS or GovTech products

Job Type

Full-time | Work from Office
