Position: *Junior Software Quality Assurance (SQA) Engineer (Manual Testing)*

Department: Quality Assurance / Engineering

Employment Type: Full-time

Job type: *On-site/Remote*

Experience Required: 6 months – 1 year

Location: *Islamabad*

Job Summary

We are a growing software house hiring a Junior SQA Engineer (Manual Testing) to join our

Shared by **Job Curator** - Join us on Telegram: <https://t.me/testingexperiencedopenings>

QA team. Working within an Agile/Scrum environment, you will analyze requirements, design and execute test cases, and report and verify defects across web and mobile applications collaborating closely with developers and project managers to ensure every release meets a high quality bar.

Education Requirements

Bachelor's degree in Computer Science, Software Engineering, IT, or a related field.

Key Responsibilities

Analyze requirements and user stories to identify testable scenarios and edge cases.

Contribute to test planning and write clear, reusable manual test cases.

Execute functional, regression, smoke, sanity, UI/UX, and exploratory testing.

Log clear, reproducible bugs and verify fixes through the full defect lifecycle, including regression after fixes.

Perform basic API testing using Postman and basic data validation using SQL.

Participate in sprint ceremonies and collaborate with developers and project managers.

Perform release verification and maintain testing documentation.

Required Technical Skills

Understanding of SDLC, STLC, and the Bug Life Cycle.

Hands-on experience with Jira or Azure DevOps.

Basic Postman (API testing) and basic SQL (data verification).

Ability to use Browser Developer Tools.

Familiarity with web and mobile application testing.

Soft Skills

Communication, analytical thinking, attention to detail, teamwork, time management, and problem solving.

Send CV: sheeman.kafayat@extravis.co

Oracle BRM Testing

Location: Remote

Experience: 7+ Years

Job Summary

We are seeking an experienced Manual QA Engineer with strong expertise in the Telecom domain and Oracle BRM (Billing and Revenue Management) testing. The ideal candidate should have hands-on experience in Telecom Order Management, Billing, Subscription

Management, API Testing, and end-to-end testing of telecom applications. Experience working on RODOD implementations involving Siebel, AIA, OSM, UIM, and ASAP is highly preferred.

Key Responsibilities

Perform end-to-end manual testing of Telecom OSS/BSS applications.

Validate Order-to-Cash (O2C) and Order Management business flows.

Test Oracle BRM modules including Billing, Charging, Rating, Invoicing, and Subscription Management.

Validate telecom business scenarios across Order Capture, Provisioning, Billing, and Customer Management.

Prepare comprehensive Test Plans, Test Cases, and Test Scenarios based on business requirements.

Execute functional, integration, regression, and system testing.

Perform API testing using Postman and SOAP UI.

Validate database records and BRM schema during testing.

Log, track, and verify defects using JIRA.

Collaborate with Developers, Business Analysts, and Product teams to resolve issues.

Participate in requirement analysis and test planning activities.

Ensure adherence to Software Testing Life Cycle (STLC) and QA best practices.

Required Skills

Strong Telecom domain knowledge with OSS/BSS applications.

Good understanding of Telecom Order Management flow.

Experience in RODOD implementations involving:

Oracle Siebel CRM

Oracle AIA (Application Integration Architecture)

Oracle OSM (Order and Service Management)

Oracle UIM (Unified Inventory Management)

Oracle ASAP (Automatic Service Activation Program)

Hands-on experience in Oracle BRM Testing.

We're Hiring: Automation Testing Engineer (Remote - Brazil)

Are you a seasoned Automation QA professional looking for your next remote challenge?

We are seeking a high-caliber Automation Testing Engineer based in Brazil to drive quality, optimize test frameworks, and collaborate with onshore clients.

If you have 8+ years of experience and thrive in an independent, highly technical environment, this is for you!

What You'll Do:

Framework Mastery: Design, build, and maintain robust test automation frameworks using Selenium and Python (Robot Framework).

API Testing: Own end-to-end API test automation.

Cloud & Data integration: Leverage AWS services (Lambda, Secrets Manager, SparkQL database) to handle test data management and reporting.

CI/CD & Version Control: Integrate automated tests into CI/CD pipelines utilizing GitHub and GitLab.

Problem Solving & Debugging: Analyze, interpret, and summarize test data metrics; proactively identify code issues and help reproduce customer-reported bugs or escalations.

Risk & Stakeholder Management: Identify potential risks that could impact project milestones, produce regular status reports, and communicate results directly to stakeholders and onshore clients.

What We're Looking For:

Experience: 8+ years of hands-on experience in Test Automation.

Core Tech Stack: Selenium, Python, Robot Framework, and API Test Automation.

AWS Cloud Ecosystem: Knowledge of AWS Lambda, SparkQL, and Secrets Manager.

Tools: Expert familiarity with JIRA for test management, alongside Git-based repositories.

Soft Skills: Strong communication skills are a must (you'll be working directly with onshore clients). Ability to work independently with minimal supervision while staying an integral part of the team.

Location: Must be based in Brazil (Remote position).

How to Apply:

Ready to take ownership of automation and elevate our QA processes? Let's connect!

Send your updated English CV to: kuldeep@techrcs.com

=====

#Hiring Argentina!

QA Automation Engineer!

- 4+ years of hands-on QA Automation, SDET, or Quality Engineering experience.
- Strong programming skills in Java and a solid understanding of object-oriented programming principles.
- Experience building and maintaining UI automation frameworks using Appium, Selenium, Playwright, or similar technologies.

Shared by **Job Curator** - Join us on Telegram: <https://t.me/testingexperiencedopenings>

- Experience designing and implementing scalable automated test solutions.
- Experience testing REST APIs and working with JSON payloads.
- Experience with CI/CD pipelines and automated test execution.
- Experience with Maven, Git, and modern software development workflows.
- Strong troubleshooting, debugging, and root-cause analysis skills.
- Ability to quickly understand and contribute to large, existing codebases.
- Experience using AI-assisted development tools for coding, debugging, test generation, documentation, or code review.
- Excellent communication and collaboration skills.
- Experience working in Agile/Scrum environments.

Technology Environment

- Java
- TestNG
- Appium and Selenium
- REST API Testing
- Maven
- Azure DevOps
- Docker
- Git

What You'll Do Here

- Develop, maintain, and expand automated test coverage for the Kitchen Display System (KDS) platform.
- Design and execute automated UI, API, regression, and smoke tests.
- Build scalable, maintainable automation solutions using established framework patterns and best practices.
- Partner closely with developers, product managers, and QA engineers to ensure quality throughout the software development lifecycle.
- Investigate defects, troubleshoot test failures, and identify quality risks early in the development process.
- Maintain and improve automated test execution within CI/CD pipelines.
- Participate in sprint planning, test strategy discussions, and release validation activities.
- Leverage AI-assisted tools and workflows to improve test design, automation development, code reviews, troubleshooting, and engineering productivity.
- Contribute to the continuous improvement of quality engineering standards, automation practices, and testing processes.

100% remote (Argentina)

We're Hiring: Senior Quality Assurance Engineer | Durban (Hybrid)

Shiloh Destiny Industries is growing, and we're looking for an experienced Senior QA Engineer to help us deliver reliable, high-quality software to our customers.

About Shiloh Destiny Industries:

We're a growing organization focused on operational excellence and modern technology, built on integrity, accountability, and strong technical craftsmanship. We believe in continuous improvement — and in team members who bring that same mindset to their work.

About the Role:

This is a full-time, hybrid role based in Durban (with flexibility for partial remote work). You'll own test strategy and execution across multiple software projects — from planning and designing test cases to validating functional and non-functional requirements, documenting defects, and working closely with developers and product teams to resolve issues. Beyond hands-on testing, you'll help shape and improve our QA processes, mentor junior QA team members, and ensure every release meets our quality bar and timelines. We're looking for someone who communicates proactively, documents carefully, and thinks ahead about risk throughout the testing lifecycle.

What You Bring:

Strong background in software testing & QA, with experience defining and enforcing quality standards

Hands-on expertise in test execution, and creating/maintaining/optimizing test cases

Proficiency in manual testing — functional, regression, integration, and UAT Experience with test management/defect tracking tools (Jira, TestRail, or similar)

Strong ability to analyze requirements, identify test scenarios, and estimate testing effort

Comfort collaborating cross-functionally with developers, product managers, and business stakeholders

Solid understanding of SDLC and Agile methodologies

Strong analytical, problem-solving, and documentation skills, with real attention to detail

Clear written and verbal communication, for both technical and non-technical audiences

Bachelor's degree in Computer Science, IT, Engineering, or related field (or equivalent practical experience)

Prior experience in a senior/lead QA role, including mentoring other QA professionals, is a strong plus

How to Apply Send your CV to: recruitment@shilohgroup.co.za

Job Title: QA Automation Engineer – RPA (UiPath)

Experience: 12+ Years

Location: Remote

Offshore Timings: 6;30 PM IST to 2:30 PM IST

Please share resumes to Sammy.M@rayvenit.solutions

Job Summary

We are seeking a QA Automation Engineer with strong experience in UiPath RPA testing to ensure the quality, reliability, and performance of robotic process automation solutions. The ideal candidate will have expertise in QA methodologies, automation testing, and validating UiPath workflows.

Key Responsibilities

Develop and execute test plans, test cases, and test scripts for UiPath RPA solutions.

Validate end-to-end business processes automated using UiPath.

Perform functional, regression, integration, and UAT testing.

Identify, log, track, and verify defects using defect management tools.

Collaborate with RPA developers, business analysts, and stakeholders to understand business requirements.

Validate exception handling, logging, and bot performance.

Ensure adherence to QA standards and best practices.

Participate in Agile ceremonies including sprint planning, stand-ups, and retrospectives.

Prepare test reports and provide quality metrics.

Required Skills

3+ years of QA Automation experience.

2+ years of experience testing UiPath RPA applications.

Strong understanding of Software Testing Life Cycle (STLC) and Software Development Life Cycle (SDLC).

Experience in functional, regression, integration, and system testing.

Knowledge of UiPath Studio, Orchestrator, and REFramework.

Experience with API testing and database validation (SQL).

Familiarity with defect tracking tools such as Jira or Azure DevOps.

Understanding of Agile/Scrum methodologies.

Strong analytical and problem-solving skills.

Preferred Skills

Experience with test automation tools such as Selenium or Playwright.

Knowledge of CI/CD pipelines.

UiPath Certified Professional certification is preferred.

Basic knowledge of programming languages such as C#, [VB.NET](#), or Python.

Experience with Git or Azure DevOps repositories.

Educational Qualifications

Bachelor's degree in Computer Science, Information Technology, or a related field.

Nice to Have

Experience in Finance, Healthcare, Banking, or Insurance domains.

Exposure to OCR, Document Understanding, or AI-enabled automation in UiPath.

Experience with performance and security testing of RPA solutions.
