We're Hiring | QA Lead | 8–10 Years | Gurgaon | Work From Office

Ascent Business Technology is looking for an experienced QA Lead to join our growing Engineering team. If you're passionate about software quality, test automation, and leading QA initiatives for enterprise applications, we'd love to connect with you.

Role: QA Lead

Experience: 8–10 Years

Location: Gurgaon (Work From Office)

Employment Type: Full-Time

Key Responsibilities:

Lead end-to-end QA activities across enterprise SaaS products.

Define and execute test strategies, test plans, and automation frameworks.

Perform Manual, Functional, Integration, Regression, and System Testing.

Collaborate closely with Product, Engineering, and Business teams in an Agile environment.

Shared by **Job Curator** - Join us on Telegram: <https://t.me/testingexperiencedopenings>

Mentor QA engineers and drive quality best practices.
Identify, track, and resolve software defects while ensuring timely releases.
Validate business-critical workflows, particularly within Banking and Payments domains.

Contribute to continuous improvement of testing processes and quality standards.

Required Skills:

8–10 years of experience in Software Testing and Quality Assurance.
Strong expertise in Manual Testing with hands-on exposure to Automation Testing.

Experience in designing and maintaining automation frameworks.
Good knowledge of SQL and database testing.
Understanding of Application Security Testing.
Experience working in Agile/Scrum environments.
Exposure to Banking, Payments, FinTech, GRC, or Enterprise SaaS products will be an added advantage.
Strong analytical, communication, and leadership skills.

About Ascent Business Technology

Ascent Business Technology is an Enterprise Software company delivering AI-enabled SaaS solutions in Governance, Risk & Compliance (GRC), Business Continuity Management (BCM), Financial Reconciliation, and Escrow Management. Our solutions empower leading organizations across banking and financial services to enhance operational resilience, compliance, and automation.

We are looking for a skilled Manual QA Engineer with experience in Windows Desktop Applications (.NET/C#) to join our product engineering team.

Preference only for Delhi NCR candidates

-  Location: Greater Noida / Noida
-  Work Mode: Onsite
-  Working Hours: IST
-  Joining: Immediate
-  Experience: 2–5 Years
-  Employment Type: Permanent
-  Interview Mode: Virtual (2 Technical Rounds)

Role Overview

We are seeking a detail-oriented Quality Engineer (Manual QA) to own black-box testing for a Windows desktop application built using .NET/C#.

You will work closely with developers, product managers, and designers to ensure high standards of:

- Functionality
- Reliability
- Performance
- Cross-platform compatibility
- UI/Rendering quality

Key Responsibilities

Manual & Functional Testing

- Create detailed test plans and test cases
- Execute functional, regression, integration, and exploratory testing
- Validate workflows, UI behaviour, and end-to-end scenarios
- Perform boundary value analysis and equivalence partitioning

Performance & Reliability Validation

- Validate application launch time and responsiveness
- Monitor memory usage and stability under prolonged use
- Identify crashes, memory leaks, and performance degradation

Graphics & Rendering Validation

- Validate rendering quality, DPI scaling, colour accuracy, and image fidelity
- Test image editing operations and edge-case file inputs
- Verify multi-monitor and resolution compatibility

Compatibility Testing

- Test across multiple Windows OS versions and hardware configurations
- Validate installation, upgrade, and uninstall workflows

Defect Management

- Report reproducible bugs with clear documentation

Shared by **Job Curator** - Join us on Telegram: <https://t.me/testingexperiencedopenings>

Collaborate with developers for defect triage and resolution
Perform regression testing after fixes

Required Skills

- ✓ 2–5 years of Manual QA experience
- ✓ Experience testing Windows desktop applications
- ✓ Strong knowledge of: Black-box testing, Regression testing, Exploratory testing, Usability testing
- ✓ Strong bug reporting and documentation skills
- ✓ Understanding of SDLC and QA processes
- ✓ Excellent communication and analytical skills

Good to Have

- + Exposure to .NET/C# applications
- + Experience with graphics/image editing applications
- + Familiarity with: Azure DevOps, Jira, TestRail
- + Understanding of performance and accessibility testing

What We're Looking For

Someone who: Thinks like a user
Breaks software like an adversary
Pays attention to detail
Ensures only quality releases go live
If you're passionate about delivering high-quality desktop applications, we'd love to connect.

✉ DM for details at hr@fournesttalent.com

🚀 Hiring Alert | Playwright Automation Test Engineer | 6-8 Years Experience 🚀

Are you passionate about Test Automation, Framework Development, and building next-generation automation solutions? We are looking for a skilled Playwright Automation Test Engineer to join our growing team and drive automation excellence.

👤 Role: Automation Test Engineer

🎯 Primary Skill: Playwright

📅 Experience: 6-8 Years

📍 Noida

◆ Key Responsibilities

- ✓ Design, develop, and maintain robust Playwright Automation Frameworks
- ✓ Create and execute automated test scripts for web applications
- ✓ Collaborate with Engineering, Product, and QA teams to drive automation initiatives
- ✓ Develop scalable, reusable, and maintainable automation solutions
- ✓ Perform API and Backend testing validations
- ✓ Improve test coverage, quality, and automation efficiency
- ✓ Generate automation reports and analyze execution results
- ✓ Participate in sprint planning, team discussions, and project reviews
- ✓ Drive automation KPIs and quality engineering best practices
- ✓ Explore and contribute to AI-driven testing and automation initiatives

◆ Required Skills

- ✓ 6-8 years of experience in Automation Testing and Manual Testing
- ✓ Strong hands-on experience with Playwright
- ✓ Proficiency in Java
- ✓ Experience in API Testing
- ✓ Backend Testing knowledge
- ✓ Automation Framework Development expertise
- ✓ Experience working with Agile methodologies
- ✓ Strong debugging and troubleshooting skills
- ✓ Excellent communication and stakeholder management skills

🌟 Preferred Experience

- ◆ Leading technical discussions with Engineering and Product teams
- ◆ Driving Automation Strategy, Goals, and KPIs
- ◆ Exposure to AI Agent Development and AI-powered testing solutions
- ◆ Test Automation Architecture and Framework Design

💡 Why Join?

- ✓ Opportunity to work on enterprise-scale automation initiatives

Shared by **Job Curator** - Join us on Telegram: <https://t.me/testingexperiencedopenings>

- ✓ Build modern Playwright-based automation frameworks
- ✓ Collaborate with highly skilled engineering teams
- ✓ Exposure to cutting-edge AI and Quality Engineering practices

Hiring: QA Architect (Individual Contributor)

Location: Hyderabad / Noida (Local candidates preferred)

Job Type: Full-Time

Work Mode: Hybrid

Experience: 6–10 Years

Notice Period: Immediate to 20 Days

Job Description

We are looking for a highly skilled QA Architect (IC Role) with strong technical expertise in automation, framework development, CI/CD integration, and AI-driven testing. This is an Individual Contributor role where you will define QA architecture, build scalable automation solutions, evaluate emerging technologies, and drive innovation across the QA ecosystem.

Key Responsibilities

Shared by **Job Curator** - Join us on Telegram: <https://t.me/testingexperiencedopenings>

Design, develop, and maintain scalable, reusable automation frameworks.
Drive end-to-end test automation strategy across UI, API, and integration testing.
Build and enhance automation frameworks using industry best practices.
Integrate automated test suites with CI/CD pipelines.
Manage CI/CD credentials, secrets, and secure automation execution.
Evaluate and implement new QA tools through Proof of Concepts (POCs).
Work on AI-assisted testing, Agentic AI workflows, and intelligent test automation.
Research and adopt modern testing technologies to improve quality and productivity.
Collaborate with Development, DevOps, Product, and Architecture teams.
Mentor team members on automation best practices and technical excellence.
Analyze quality metrics and continuously improve testing processes.

Required Skills

6–10 years of experience in QA Automation / Test Architecture.
Strong hands-on experience in designing and developing automation frameworks.
Expertise in UI, API, and end-to-end test automation.
Strong understanding of CI/CD pipelines and credential/secret management.
Experience with Git, Jenkins, GitHub Actions, Azure DevOps, or similar CI/CD tools.
Hands-on exposure to AI-powered testing tools and Agentic AI concepts.
Experience conducting POCs and evaluating new QA tools and technologies.
Strong scripting/programming skills (Java, TypeScript, JavaScript, or Python).
Experience working in Agile/Scrum environments.
Excellent debugging, analytical, and problem-solving skills.

Preferred Skills

Performance testing experience (K6, JMeter, or similar).
Cloud platform exposure (AWS, Azure, or GCP).
Knowledge of containerization (Docker/Kubernetes) is a plus.
Experience with modern AI testing platforms and intelligent automation frameworks.

Education

🎓 Bachelor's degree in Computer Science, Information Technology, or a related field.
