=====

We're Hiring! | Test Engineer | Test Lead | DevOps Engineer

Location: Nashik / Pune

Our Technology Solutions team is growing, and we're looking for passionate, hands-on professionals who enjoy solving complex technical challenges and building high-quality software solutions. If you're excited about working in a fast-paced Agile environment with cutting-edge warehouse automation and industrial software systems, we'd love to hear from you!

Test Engineer (2–5 Years)

Key Skills:

- Software Testing / QA for Product, Project, WCS/WES/WMS, MES, or Business Applications
- Automation Testing – Playwright, Selenium, JMeter
- Functional, Integration, Performance & Stress Testing
- API Testing, Database Testing, SQL, Log Analysis
- Simulation Tools, PLC Test Applications (Preferred)
- Strong Linux hands-on experience
- AWS Cloud exposure (Preferred)
- Good understanding of SDLC, STLC & Agile methodologies

Test Lead (8–14 Years)

Key Skills:

- Lead Manual & Automation Testing teams
- Experience in WCS/WES/WMS, MES or Enterprise Applications preferred
- Build and maintain Automation Frameworks (Playwright/Selenium)
- Performance Testing using JMeter / LoadRunner
- Test Planning, Defect Management, UAT, RCA & Release Validation

Shared by **Job Curator** - Join us on Telegram: <https://t.me/testingexperiencedopenings>

- AWS Cloud, GitHub/Bitbucket
- Docker, Kubernetes & CI/CD (Jenkins/GitHub Actions)
- Exposure to PLC, Simulation, ASRS, Conveyor or Warehouse Automation is an added advantage
- Strong leadership, mentoring and problem-solving skills

DevOps Engineer (2–5 Years)

Key Skills:

- DevOps, Build & Release Management, Infrastructure Support
- Unix/Linux & Shell/Python Scripting
- CI/CD – Jenkins, GitHub Actions
- Source Code Management – GitHub, Bitbucket
- Docker & Kubernetes
- Monitoring – Grafana, Prometheus, Helm
- AWS – VPC, IAM, EC2, S3
- Infrastructure as Code – Terraform
- Agile development experience
- Warehouse Automation / WCS / WES domain exposure is a plus

Travel Requirement

Candidates should be willing to travel across India and overseas, whenever required.

How to Apply

Interested candidates are requested to email their updated resume to:

sayali.alai@armstrongdematic.com

Important – Please Read Carefully

Our recruitment process is fully automated. To ensure your application is processed successfully, please copy and use the exact email subject corresponding to the role you are applying for.

Copy & Paste the Subject Exactly as Below:

For Test Engineer: Job Application - Test Engineer

For Test Lead: Job Application - Test Lead

For DevOps Engineer: Job Application - DevOps Engineer

=====

Experience: 3–4 Years
Employment Type: Full-Time

Are you passionate about automation, API testing, and AI-driven quality assurance? We're looking for an experienced API Automation QA Engineer to join our team. If you enjoy building robust automation frameworks, testing backend systems, and leveraging AI to improve software quality, we'd love to hear from you.

Key Responsibilities

- Design and execute test cases and test strategies for APIs and backend systems.
- Perform end-to-end API testing, including functional, regression, and integration testing.
- Develop and maintain automation frameworks and test scripts.
- Execute automated test suites and analyze results to identify defects and improvements.
- Validate API responses, data integrity, JSON/XML structures, and HTTP protocols.
- Perform hands-on automation testing using modern testing tools and frameworks.
- Apply AI-driven testing techniques to optimize test coverage, enable self-healing scripts, and improve defect detection.
- Identify, log, and track defects using tools like JIRA.
- Integrate automated test suites into CI/CD pipelines for continuous testing.
- Collaborate with development and product teams to understand business and technical requirements.

Required Skills

- 3–4 years of hands-on experience in Software Testing (QA).
- Strong experience in:
 - API Testing (Postman, REST Assured, SoapUI)
 - Automation Testing (Selenium, Cypress, Playwright, etc.)
 - AI-based testing tools and techniques
- Solid understanding of REST APIs, HTTP methods, JSON/XML.
- Experience developing and maintaining automation frameworks.
- Basic programming/scripting knowledge in Java, Python, or JavaScript.
- Experience with CI/CD tools such as Jenkins or Azure DevOps.
- Good knowledge of SQL and database validation.
- Understanding of SDLC, STLC, and Agile methodologies.

Preferred Skills

- Experience with AI testing tools such as Testim, AppliTools, or Functionize.
- Exposure to intelligent test automation and self-healing frameworks.
- Knowledge of API performance testing using JMeter.
- Experience working in Agile/Scrum environments.

What We're Looking For

Strong analytical and problem-solving skills
Detail-oriented with a quality-first mindset
Excellent communication and collaboration skills
Ability to quickly adapt to evolving AI-driven testing technologies

Hiring: Agentic AI Tester
Location: Mumbai (Goregaon) (3 Days WFO)
Experience: 5–7 Years
Budget: Up to ₹34 LPA
Immediate Joiners Preferred

We are looking to connect with professionals who have strong experience testing and evaluating agent-based AI systems powered by LLMs — validating reasoning quality, tool usage, decision-making, and applying LLM-as-Judge techniques to assess AI outputs at scale.

Key Skills:

Strong understanding of LLM fundamentals (prompting, temperature, tokens, context windows)
Hands-on experience with LLM-as-Judge or automated AI evaluation techniques
Understanding of agentic AI concepts — planning, memory, tool use, reflection & self-correction
Solid background in QA, test design, and test strategy
Experience validating non-deterministic systems
Excellent communication and documentation skills

Nice to Have:

Shared by **Job Curator** - Join us on Telegram: <https://t.me/testingexperiencedopenings>

Experience with LLM platforms — OpenAI, Azure OpenAI, Anthropic
Familiarity with agent frameworks — LangGraph, LangChain, AutoGen, CrewAI, Semantic Kernel

If this aligns with your experience, you can share your resume at:

=====

Pert Telecom Solutions is hiring for Software Test Engineer for Navi Mumbai Location.

Please find below the details.

Experience: 2 - 5 years

Location: Navi Mumbai (Ghansoli)

Role: Software Test Engineer

Job Description:

We are looking for a QA for a data-intensive application spanning Web UI and backend services. Own end-to-end quality—functional, regression, data validation, and basic performance—for APIs, UI workflows, and database layers. The role blends hands-on testing, light automation, Linux ops.

What You'll Do

Define strategy and write test cases for Web UI and REST APIs (functional, negative, integration, regression).

Build and maintain Postman collections (preferred) and run via Newman in CI.

Drive data-centric testing: seed data, validate business rules with SQL, reconcile API/UI output with MySQL.

Own non-prod Linux environments: package installs, services/logs, basic networking, CLI debugging.

Use Docker/docker-compose to spin up app stacks, manage env vars, volumes, and networks for reproducible tests.

Add focused automation where it pays off (pytest/requests or equivalent), and wire smoke suites into CI.

Partner with Product/Eng on triage, risk, entry/exit criteria, and quality metrics.

(Preferred domain) Validate LI/LBS/IPDR features—record correctness, retention, export formats, and evidentiary integrity.

Must-Have Qualifications

Strong Web & API testing (auth flows, pagination, idempotency, rate limits, error codes).

Linux (mandatory): services, logs, permissions, networking basics, scripting comfort.

Database testing: solid SQL (joins, aggregates), test data design; MySQL preferred.

Docker: build/run images, docker-compose basics for multi-service stacks.

Postman (preferred): environments, variables, pre/postscripts, collection runners.

Tooling: Git, Jira (or similar), CI basics (Jenkins/GitLab CI).

Clear defect writing, evidence capture, and stakeholder communication.

Must be located in or willing to relocate

to Navi Mumbai and work from the office

Interested candidates can share their profiles on mansi.ghodke@pertsol.com

We're Hiring | Infrastructure Penetration Tester | Reliance Jio | Immediate Joiners | Ghansoli, Navi Mumbai

Are you passionate about Infrastructure Penetration Testing and Red Teaming? We are hiring experienced Infrastructure Penetration Testers for our client Reliance Jio at Ghansoli, Navi Mumbai.

Location: Ghansoli, Navi Mumbai
Experience: 4–9 Years
Education: BE / B.Tech / ME / M.Tech / MCA / MS / M.Sc
Immediate Joiners Preferred(15-20days NP)

Please Note: We are only looking for candidates with hands-on Infrastructure Penetration Testing experience. Profiles focused primarily on Application Security/Web Application VAPT will not be considered.

Key Skills We're Looking For:

Infrastructure VAPT & Red Teaming
Active Directory Security Assessments
Metasploit, Cobalt Strike, Kali Linux
BloodHound, Impacket, Mimikatz, Rubeus
Hydra, Hashcat, John the Ripper, CrackMapExec
Tenable.io, Tenable.SC, Nessus
Nmap, Masscan, Shodan, Censys
Python, Bash, PowerShell
MITRE ATT&CK, PTES, OSSTMM, NIST SP 800-115
CVSS v3.1, EPSS

Threat Intelligence & Attack Surface Management

Responsibilities:

Conduct internal & external infrastructure penetration testing.
Perform vulnerability validation, exploitation, and remediation verification.
Execute Active Directory security assessments and privilege escalation testing.
Perform password auditing and credential security assessments.
Develop safe Proof of Concepts (PoCs) and provide risk-based remediation recommendations.
Collaborate with SOC and Vulnerability Management teams during security assessments.
Prepare technical reports with evidence, attack paths, and mitigation guidance.

If you have strong expertise in Infrastructure VAPT, Red Teaming, Active Directory Security, BloodHound, Hydra, Hashcat, Metasploit, Kali Linux, and enterprise infrastructure security assessments, I'd love to connect.
