We're Hiring: Senior QA Engineer (SAP Hybris/eCommerce)
Location: Kalyani Nagar, Pune
Work Model: Hybrid (3 Days Work From Office)
Notice Period: Immediate to 30 Days Preferred
Experience: 10+ Years

Are you passionate about delivering flawless digital commerce experiences? Do you enjoy finding, troubleshooting, and preventing issues before they impact customers? We're looking for a Senior QA Engineer with strong SAP Hybris (SAP Commerce Cloud) experience to join a high-performing eCommerce engineering team. You'll play a key role in ensuring the quality and reliability of our online storefront, APIs, and microservices that power critical customer journeys.

What You'll Do

Test end-to-end eCommerce features including:
Product Search & Catalog
Cart & Promotions
Checkout & Payments
Order Management
Returns & Refunds

Shared by **Job Curator** - Join us on Telegram: <https://t.me/testingexperiencedopenings>

Customer Account Management

Perform functional, integration, regression, and API testing.

Build and maintain automation frameworks using:

Playwright

Postman

REST Assured

Pytest

Validate SAP Hybris components including:

OCC APIs

Backoffice

HAC

ImpEx

Promotion Engine

Order Management

Collaborate closely with Developers, Product Managers, and Business Teams in an Agile environment.

Investigate defects, analyze logs, and support root-cause analysis using tools like Splunk.

Contribute to CI/CD quality processes through Jenkins automation pipelines.

Leverage AI tools such as GitHub Copilot and Claude Code to improve testing efficiency and delivery.

What We're Looking For

Must-Have Skills

10+ years of Software QA/Test Engineering experience

Strong hands-on experience with SAP Hybris (SAP Commerce Cloud)

Experience testing OCC REST APIs and microservices

UI Automation experience using Playwright (preferred) or Selenium

API Automation using Postman, REST Assured, or Pytest

Proficiency in Java, Python, JavaScript, or TypeScript

Experience with Jenkins, Git, JIRA, Xray, and Confluence

Strong debugging, troubleshooting, and analytical skills

Experience with Splunk or similar log analysis tools

Nice to Have

Experience with enterprise-scale eCommerce platforms

Knowledge of payment gateway integrations

Experience working within Agile/Scrum teams

Ability to mentor and guide junior QA engineers

Interested?

Hiring: Data Engineering – ETL Test Engineer (Hands-on Role)

Location: Pune (Onsite – Hybrid possible after 2 months based on performance)

Experience: 5–10 Years

We are looking for a strong ETL Test Engineer with hands-on experience in data validation, ETL testing, and Python-based automation. This is a pure data testing role (NOT AI/ML coding).

Mandatory Skills (Must reflect in resume):

Python (PyTest / Nose2 / Behave – ETL Test Automation)

AWS Cloud (Strongly preferred; GCP acceptable, Azure not considered)

ETL / Data Warehouse Testing (ETL/ELT pipelines, validation, reconciliation)

Snowflake / BigQuery / Redshift

Advanced SQL (Data validation, source-to-target testing)

Experience testing large-scale data pipelines

Key Responsibilities:

Validate complex data pipelines across multiple data sources

Build automated frameworks for data quality & reconciliation

Perform end-to-end data validation (source → transformation → target)

Ensure data accuracy, lineage, and consistency across systems

Good to Have:

DBT testing framework

Data modeling & warehousing concepts

Exposure to complex data integration environments

Interview Process (Non-Negotiable):

Online Assessment

L1 – Virtual Interview

L2 – Final Round (Onsite Pune)

Interested candidates can DM or share profiles

Recruiters – please share relevant profiles at namita.dhunna@programming.com

We're Hiring | Testing Analyst | Navi Mumbai

We're looking for a Testing Analyst to join our team and help ensure safe, reliable, and high-quality software delivery across our cloud, on-premise, and data centre technology environments.

What you'll be working on:

API testing (REST/JSON) using Postman, Swagger, and automation frameworks

Test planning, execution, and quality assurance across the software lifecycle

CI/CD and automated regression testing

JIRA and XRAY for test management and defect tracking

Azure-hosted application testing

Collaborating with cross-functional teams to deliver resilient technology solutions

We're looking for someone with:

Hands-on API testing experience

Strong communication and stakeholder management skills

Experience in complex, high-availability environments

Knowledge of cloud platforms and enterprise applications is a plus

Exposure to data centre, infrastructure, or service management environments is highly regarded

Interested candidates can share their updated resume via LinkedIn.

We're Hiring: Agentic AI Tester

Location: Mumbai (Goregaon)

Experience: 5+ Years

Work Mode: Hybrid – 3 Days Work From Office (Mandatory)

Key Responsibilities

- Test agentic AI systems with multi-step reasoning, planning, and tool usage
- Evaluate LLM outputs for correctness, consistency, reasoning quality, and safety
- Build and improve LLM-as-Judge evaluation frameworks
- Create golden datasets, evaluation rubrics, and automated AI testing pipelines
- Validate hallucinations, prompt injection, tool misuse, and failure recovery scenarios
- Analyze AI agent traces, logs, and decision paths
- Work closely with AI Engineers to improve prompts, guardrails, and evaluation pipelines

Required Skills

- 5+ years of QA/AI Testing experience
- Strong understanding of LLMs, prompting, temperature, tokens, and context windows
- Hands-on experience with LLM-as-Judge or AI evaluation techniques
- Knowledge of Agentic AI concepts – Planning, Memory, Tool Use, Reflection & Self-correction
- Experience testing NLP/ML/AI applications and non-deterministic systems
- Python scripting for evaluation automation

Shared by **Job Curator** - Join us on Telegram: <https://t.me/testingexperiencedopenings>

Experience with OpenAI, Azure OpenAI, Anthropic or similar LLM platforms
Exposure to LangChain, LangGraph, CrewAI, AutoGen, Semantic Kernel or similar frameworks

Preferred

Multi-agent system testing
RLHF concepts
LLM observability tools (prompt logs, traces, embeddings)
AI governance and enterprise AI compliance

We're looking for candidates with:
Strong and relevant technical expertise
Stable career history (no frequent job changes)
Excellent communication skills
Immediate to short notice period preferred
