=====

 We are Hiring (Full Stack Developer Intern)

Location: Sector 3, Noida

Technologies You Will Work With

- React.js – Building interactive and responsive frontend applications.
- Next.js – Developing modern and scalable web applications.
- Python – Understanding backend programming and application development.
- Django – Developing backend applications and web services.
- PostgreSQL – Working with relational databases and SQL queries.
- HTML, CSS & JavaScript – Creating structured, responsive, and interactive web interfaces.
- REST APIs – Creating, consuming, and integrating APIs.
- Git/GitHub – Version control and collaborative software development.

Key Responsibilities

- Assist in developing and maintaining frontend and backend components of web applications.
- Build responsive and user-friendly interfaces using HTML, CSS, JavaScript, React.js, and Next.js.
- Assist in developing backend functionality using Python and Django.
- Work with PostgreSQL databases, including basic database operations and SQL queries.
- Develop, integrate, and test REST APIs.
- Connect frontend applications with backend services and APIs.
- Write clean, organized, and maintainable code under the guidance of senior developers.
- Identify and troubleshoot bugs and technical issues.
- Perform basic testing and debugging of applications.
- Use Git and GitHub for code management, version control, and collaboration.
- Participate in code reviews and development discussions.
- Collaborate with developers and other team members to understand project requirements.
- Contribute ideas and suggestions to improve application functionality and performance.
- Learn and implement new technologies, tools, and development practices as required.
- Maintain proper documentation of development work and project-related activities.
- Work on assigned tasks and deliver them within the given timelines.

Candidate Requirements

- Basic understanding of frontend and backend development.
- Familiarity with React.js, Next.js, Python, and Django.
- Basic knowledge of PostgreSQL and SQL.
- Understanding of HTML, CSS, and JavaScript fundamentals.
- Basic understanding of REST APIs and how frontend and backend systems communicate.
- Familiarity with Git and GitHub.
- Good problem-solving and analytical skills.
- Basic debugging and troubleshooting abilities.
- Strong willingness to learn new technologies and development practices.
- Ability to understand technical requirements and work on assigned tasks.
- Good communication and teamwork skills.
- Ability to work collaboratively with a development team.

- A proactive attitude with an interest in software development and technology.

How to Apply

Interested candidates are encouraged to share their updated resume to anshika-hr@axona.ae or DM on LinkedIn.
